1	Toronto, Ontario	1	like to call her. 09:00:43
2	Upon resuming on Sunday, February 21, 2016	2	PRESIDENT: Okay. Thank you very 09:00:44
3	at 8:59 a m.	3	much. 09:00:44
4	PRESIDENT: Good morning, ladies and 08:59:49	4	That means on Tuesday we'll start with 09:00:49
5	gentlemen. We are at Day 6 of the hearing. 08:59:49	5	Deloitte, Low, first thing in the morning. 09:00:53
6	Any housekeeping issues to be raised? 08:59:52	6	MR. TERRY: Yes. 09:00:55
7	Mr. Terry. 08:59:55	7	PRESIDENT: Very good. So, if there 09:00:55
8	PROCEDURAL MATTERS: 08:59:56	8	are no other issues we'll start with OCC/COWI, and 09:00:57
9	MR. TERRY: Yes, just a scheduling and 08:59:57	9	I understand it will be Mr. Cooper. 09:01:03
10	witness matter. As we informed our friends, we will 08:59:59	10	Good morning, Mr. Cooper. 09:01:35
11	no longer be calling for cross-examination, Sue Lo, 09:00:02	11	THE WITNESS: Good morning. 09:01:38
12	Susan Lo. She is set to be up on Tuesday, so she 09:00:08	12	PRESIDENT: I appreciate you being 09:01:39
13	can be taken off the list. 09:00:14	13	available on a Sunday morning. 09:01:41
14	PRESIDENT: Any comment from the 09:00:15	14	THE WITNESS: I'm happy to help. 09:01:43
15	Respondent? 09:00:16	15	PRESIDENT: Thank you. To begin with, 09:01:44
16	MR. NEUFELD: First of all to thank 09:00:20	16	can you state your full name for the record and then 09:01:45
17	Mr. Terry for letting us know. 09:00:20	17	read the expert declaration that you have in front 09:01:48
18	The other thing I'd like to say is 09:00:22	18	of you? 09:01:50
19	that we do note in the letter to the Tribunal that 09:00:25	19	THE WITNESS: My name is Brent David 09:01:51
20	we specifically reserve right, when a witness isn't 09:00:29	20	Cooper, and I solemnly declare upon my honour and 09:01:52
21	called, to consider whether we should and we're 09:00:32	21	conscience that my evidence and my opinions will be 09:01:56
22	still considering. We haven't made a decision one 09:00:34	22	in accordance with my sincere belief. 09:01:59
23	way or another. But we'll have it put our heads 09:00:36	23	AFFIRMED: BRENT DAVID COOPER 09:02:01
24	together and come to a decision shortly and we'll 09:00:38	24	PRESIDENT: Thank you very much. You 09:02:02
25	advise the Tribunal as soon as we know whether we'd 09:00:40	25	have submitted on behalf of your company, one expert 09:02:04
	Page 6		Page 7
1	report in this arbitration which is on record, and 09:02:10	1	THE WITNESS: All right. Thank you. 09:03:03
2	this is a report dated May 2014 09:02:16	2	So as I said, my name is Brent Cooper. I'm 09:03:05
3	I understand you will make a brief 09:02:19	3	a project engineer with COWI North American and 09:03:08
4	presentation up to 20 minutes on your report, as the 09 02:20	4	obviously, we all know what we're here to talk 09:03:15
5	parties have agreed 09:02:23	5	about. 09:03:16
6	THE WITNESS: Yes, but we have 09:02:24		0,100110
7		6	Today in my presentation, I'd like to 09:03:18
	submitted two reports 09:02:25	6 7	Today in my presentation, I'd like to 09:03:18 give a bit of both personal and corporate background 09:03:20
8	submitted two reports 09:02:25 PRESIDENT: Sorry, I missed that 09 02:26		give a bit of both personal and corporate background 09:03:20
8 9	•	7	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22
	PRESIDENT: Sorry, I missed that 09 02:26	7 8	give a bit of both personal and corporate background 09:03:20
9	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28	7 8 9	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25
9 10	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38	7 8 9 10	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28
9 10 11	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44	7 8 9 10 11	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31
9 10 11 12	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45	7 8 9 10 11 12	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33
9 10 11 12 13	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45	7 8 9 10 11 12 13 14	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36
9 10 11 12 13 14	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46	7 8 9 10 11 12 13 14 15	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43
9 10 11 12 13 14 15 16	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51	7 8 9 10 11 12 13 14 15 16	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:46
9 10 11 12 13 14 15 16 17	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55	7 8 9 10 11 12 13 14 15 16 17	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:49
9 10 11 12 13 14 15 16 17 18	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the — that will come 09:02:55	7 8 9 10 11 12 13 14 15 16 17 18	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:49 summarize by discussing how all of these different 09:03:51
9 10 11 12 13 14 15 16 17 18 19 20	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the — that will come 09:02:55 after the presentation? 09:02:59	7 8 9 10 11 12 13 14 15 16 17 18 19 20	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54
9 10 11 12 13 14 15 16 17 18 19 20 21	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the – that will come 09:02:59 MS SEERS: That's correct 09:03:01	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54 strategy.
9 10 11 12 13 14 15 16 17 18 19 20 21	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the that will come 09:02:55 after the presentation? 09:02:59 MS SEERS: That's correct 09:03:01 PRESIDENT: Mr Cooper, please go 09 03:01	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:46 foundations are built and manufactured, and then 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54 strategy. 09:03:59 So I am a project engineer with COWI 09:04:00
9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the that will come 09:02:55 after the presentation? 09:02:59 MS SEERS: That's correct 09:03:01 PRESIDENT: Mr Cooper, please go 09 03:01 ahead 09:03:02	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:46 foundations are built and manufactured, and then 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54 strategy. 09:03:59 So I am a project engineer with COWI 09:04:00 North America. I have seven years experience 09:04:02
9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the – that will come 09:02:55 after the presentation? 09:02:59 MS SEERS: That's correct 09:03:01 PRESIDENT: Mr Cooper, please go 09 03:01 ahead 09:03:02 PRESENTATION BY BRENT DAVID COOPER, COWI, NORTH 09:03:02	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:46 foundations are built and manufactured, and then 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54 strategy. 09:03:59 So I am a project engineer with COWI 09:04:00 North America. I have seven years experience 09:04:06
9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	PRESIDENT: Sorry, I missed that 09 02:26 Yes Do you have any corrections to make, either 09:02:28 one 09:02:38 THE WITNESS: No, sir 09:02:44 PRESIDENT: So you will make the 09:02:45 presentation 09:02:45 Will there be any questions from 09:02:46 counsel on direct? 09:02:48 MS SEERS: Yes, we will have one 09:02:50 question, Mr President 09:02:51 PRESIDENT: Okay Thank you very 09:02:55 much That will come after the that will come 09:02:55 after the presentation? 09:02:59 MS SEERS: That's correct 09:03:01 PRESIDENT: Mr Cooper, please go 09 03:01 ahead 09:03:02	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	give a bit of both personal and corporate background 09:03:20 to establish who I am and who COWI is, and then 09:03:22 we're going to talk about the semi-floating 09:03:25 gravity-based foundations that COWI has proposed for 09:03:28 Windstream, speaking just briefly about the 09:03:31 different types of foundations, why the 09:03:33 gravity-based foundation we've proposed is 09:03:36 technically suitable, why it's possible to 09:03:39 manufacture and fabricate these foundations in 09:03:41 Ontario, how it's possible to install them, discuss 09:03:43 some considerations to the schedule with which these 09:03:46 foundations are built and manufactured, and then 09:03:49 summarize by discussing how all of these different 09:03:51 considerations are an overall risk-mitigation 09:03:54 strategy. 09:03:59 So I am a project engineer with COWI 09:04:00 North America. I have seven years experience 09:04:02

Page 8 Page 9 1 1 09:04:13 extra-large monopile design, 80 turbines using the 09:05:35 offshore structures, and I have a professional 2 2 engineer licence in the state of South Carolina. 09:04:16 new Siemens 6-megawatt turbine. We are the lead 09:05:41 3 3 Overall, a little bit of corporate foundation design engineer for the London Array. 09:05:44 4 4 background on COWI. We are a large consulting 09:04:23 There's 175 Siemens 3.6-megawatt turbines, and we've 09:05:47 5 5 company, worldwide, headquartered in Copenhagen, 09:04:27 also worked on the Nysted and Rodsand 2, 09:05:51 6 6 Denmark. We have approximately 6,200 employees and 09:04:31 gravity-based foundations, which are another good 09:05:54 7 7 we consult primarily in economics, and environmental 09:04:35 analogy for the Windstream project. 09:05:57 8 science. We are working in over 24 countries with 09:04:39 8 In addition to offshore wind 09:05:59 9 9 anywhere in the order of 13,000 projects ongoing at 09:04:42 experience in Europe, we have considerable 09:06:01 10 10 any one time. experience with most of the offshore wind projects 09:06:03 11 We have considerable experience in the 09:04:47 11 proceeding in North America, including the lead 09:06:06 12 12 offshore Windstream industry. COWI was the actually 09:04:50 designer for LEEDco Phase I, in Lake Erie. 09:06:09 13 the designer of the very first offshore wind farm in 09:04:55 13 We're also the foundation design 09:06:13 14 14 Vindeby, Denmark in 1991. 09:04:56 energy for Trillium project in Lake Ontario. We're 09:06:15 15 15 Since then, or I guess actually more 09:04:58 an overall project manager and lead designer for all 09:06:18 16 16 appropriately, as of the time that Windstream would 09:05:00 aspects of Santee Cooper's offshore wind 09:06:22 17 17 have been moving to construction, in approximately 09:05:03 demonstration project in South Carolina. We were 09:06:25 18 2011, COWI held a 14 percent market share of all 09:05:07 18 engineer for Winergy's Met Mass, Offshore New Jersey 09:06:27 19 commissioned wind farms operating offshore. 09:05:10 19 before they were acquired by Deepwater Wind. 09:06:30 20 20 Some of our highlight projects, we -- 09:05:13 We also worked on the New York power 09:06:33 21 21 Thornton Bank, a large gravity-based foundation, six 09:05:16 authority solicitation for offshore wind in Lake 09:06:37 22 22 turbines, 5-megawatt turbine. The Wikinger, 09:05:21 Erie. And I don't need to read through the rest of 09:06:40 23 23 project, offshore Germany, ongoing now, 70 jackets, 09:05:25 these, but these are another scattering of actual 09:06:42 24 24 5-megawatt turbines. The Merkur project, also 09:05:28 projects moving towards development, technology 09:06:45 25 offshore Germany, this is a next generation, 09:05:32 25 development projects, industry research. And 09:06:49 Page 10 Page 11 1 1 choose an offshore wind foundation, there's a huge 09:08:09 I should also say that we function in providing 09:06:51 2 2 infrastructure studies such as the ports available 09:06:54 number of considerations that go into the selection 09:08:11 3 3 to support the building of these projects. 09:06:57 choice. Not only the water depth and soil 09:08:15 4 All said, COWI's contributed to more 09:07:00 4 conditions, but also the turbine size, the 09:08:15 5 than 400 on and offshore wind projects in more than 09:07:06 5 meteorological and oceanic environment, wind, waves, 09:08:15 6 50 countries. 09:07:10 6 current, ice, all of these things feed in. But it's 09:08:19 7 7 not just the technical suitability of the So what did we do with Windstream? 09:07:11 09:08:24 8 8 09:07:13 foundations; you also have to be able to build them. 09:08:25 We're a part of Windstream's integrated project 9 9 So we considered the supply change such as the design and installation team. 09:07:16 09:08:28 10 10 Windstream, as the developer, brought 09:07:18 available materials, equipment and labour that are 09:08:30 11 11 on SgurrEnergy. Both us and Weeks Marine were 09:07:20 available to build these. 09:08:32 12 12 brought on to help design the foundations and 09:07:25 The main foundation types that we see, 09:08:33 13 13 offshore works construction installation plan for 09:07:27 monopile foundation, jacket and gravity-based. 09:08:36 14 14 Windstream. Specifically, COWI's scope was the 09:07:30 I gave an example just a moment ago. There are some 09:08:39 15 holistic foundation system design of the 09:07:34 15 newer innovative foundation types. These are just 09:08:42 16 16 gravity-based foundations, so it's not only that -- 09:07:36 scatterings, but -- and Windstream has chosen the 09:08:46 17 17 the technical design of the foundation, but also the 09:07:38 gravity-based foundation, which we're going to start 09:08:49 18 18 fabrication facility, layout and design that would 09:07:40 getting into a little bit now. 09:08:53 19 19 There are three different types of 09:08:54 be used to build the foundations, the manner in 09:07:43 20 20 gravity-based foundations. They're all based on which these large foundations are launched into the 09:07:47 21 21 water and how they're transported to site. And then 09:07:49 similar technology and similar premises. But they 09:08:59 22 22 we also contribute to the schedule and how these -- 09:07:51 are the cone type, the fully floating foundation and 09:09:03

09:07:55

09:08:06

09:08:04

24

25

the semi-floating foundation type. Most of the

foundation. They're brought out to site, sunk down 09:09:10

European projects rely on the cone type of

09:09:06

09:09:09

how and when these would be built.

So if we step back a little bit to

understand offshore wind foundations, when you

25

and ballasted. They float and they're carried 09:09:14 either on a barge or by crane to site. The floating 09:09:16 foundations, as their name applies, are able to be 09:09:19 brought out completely floating on their own. 09:09:21 They're simply towed to the site and then ballasted 09:09:22 into place. 09:09:25

The semi-floating that we've proposed 09:09:26 for Windstream takes advantage of the best merits of 09:09:29 both types of foundations, the cone and the 09:09:30 floating, in such a way that we'll see it is 09:09:33 particularly suited to their installation for this 09:09:35 project in the Great Lakes. 09:09:37

So a typical installation process, is, 09:09:39
these foundations are fabricated on-shore, while 09:09:42
concurrently the seabed, or in this case, the lake 09:09:46
floor is prepared, and that preparation may include 09:09:49
excavation of some surficial sediments in the 09:09:51
placement of a gravel bed or gravel mat. 09:09:54

Once they're done, the foundations are 09:09:58 transported to the site, which we'll also talk about 09:10:00 the specific mechanism and why the semi-floating are 09:10:02 particularly applicable. They are lowered into 09:10:05 position on top of that gravel map. They're 09:10:09 ballasted into place, so they're initially filled 09:10:11 with water. And then once they're fully in place, 09:10:13

Page 13

stable in their installed position, the cable and 09:10:20 turbine are installed beyond that. 09:10:22 09:10:24 So now we get into why the semi-floating gravity-based foundation is 09:10:26 particularly suitable for Windstream. Considering 09:10:28 the conditions that were reported to us, in the 09:10:30 meteorological and oceanic reports and some of the 09:10:33 geophysical work that was done at the time that we 09:10:36 were engaged, there is minimal sea floor preparation 09:10:38 required with shallow surficial sediments and 09:10:43 shallow bedrock making this particularly suitable. 09:10:46 The large mass of the concrete foundations as 09:10:49 compared to steel foundations are particularly able 09:10:51 to resist the ice loads found in Lake Ontario, with 09:10:54 little adaptation necessary to the base design. 09:10:58

they're filled with sand. And once they become

This foundation is readily adaptable 09:11:00 to changes in water depth by varying different 09:11:03 elements of the design. And it is a proven 09:11:05 technology, not only in offshore wind as we've seen 09:11:08 in Europe, but this is a float in place and floating 09:11:10 large concrete case on technology. It is a 09:11:13 technology that we've seen in Canada in the 09:11:17 Confederation Federation bridge Caissons. We've 09:11:18 also seen it in oil and gas, such as the Hybernia 09:11:22

Page 14

oil and gas platform in water depths far exceeding 09:11:23 what we expect for this project. 09:11:28 So, we were asked to provide a 09:11:31 scenario in which case these foundations could be 09:11:33 built. We identified a number of sites on the 09:11:36 Ontario side of Lake Ontario, either six or seven of 09:11:39 them possible, that seemed to have a large amount of 09:11:42 land available. As our representative site, we 09:11:45 chose the St. Mary's cement plant because it had 09:11:49 some piers in place and was located immediately next 09:11:53 to a cement facility. So what this does is this 09:11:56 allows us very quick and easy access to local 09:11:59 materials, labour and equipment. 09:12:04

This is technology that's well known 09:12:06 in the area, all of which helps to mitigate the risk 09:12:07 of trying to obtain materials from far away. It 09:12:11 enables local control and also facilitates local 09:12:14 economic development. 09:12:18

So, as to the specific design of the 09:12:23 fabrication yard, we've done a number these designs. 09:12:26 The premise behind all of these designs is the same. 09:12:30 The -- let me see if the laser pointer works. 09:12:33

My laser pointer's not working, but in 09:12:41 general, the foundation fabrication begins furthest 09:12:43 from the water, the on-shore positions, where the 09:12:47

Page 15

jetty here is the widest. The foundations are built 09:12:50 from the bottom up and as construction proceeds, 09:12:52 they're slowly skidded along these rails. In this 09:12:54 case, they're concrete rails with a plastic surface 09:12:57 to reduce the friction. But they proceed along 09:13:00 these rails in progressive stages of development 09:13:02 such that as the foundations are completed, they're 09:13:05 at the most offshore position, ready to be lowered 09:13:07 into the water by the elevator platform. This 09:13:11 particular scenario we're seeing is based on having 09:13:13 25 foundations in concurrent fabrication and 09:13:16 staging. 09:13:19

We're showing an acre -- we're showing 09:13:19 an area contained within the yellow boundary of 09:13:22 approximately 26. The actual fabrications that are 09:13:25 being used in this particular circumstance is 15 09:13:31 hectares. 09:13:33

This is a readily scalable design. To 09:13:35 increase production, it's easy to add either 09:13:38 additional positions along the line or add 09:13:41 additional fabrication lines. And if we go back one 09:13:44 slide, we can see that beyond this yellow area there 09:13:46 appears to be a lot of additional area to the 09:13:49 outside of that yellow highlight, if we need to 09:13:51 expand the site. 09:13:54

Page 17 Page 16 1 1 09:14:01 Specifically with regard to the hydraulic jacks proceed down to connection points 09:15:22 2 2 elevator system, there are a number of mechanisms to 09:14:02 and the foundation's pulled up tight to the bottom 09:15:26 3 3 place these foundation into the water. We have of these barges, up into its fully floating 4 4 proposed an elevator system for Windstream. This is 09:14:07 position. 09:15:33 5 a technology that's been around for about 70 years. 09:14:09 5 At this point, these barges are then 09:15:33 6 09:14:13 6 There are approximately 240 to 250 installations towed out to the site using two tugboats, one in the 09:15:34 7 7 throughout the world, and some have been able to lead, one in back to take the strain and keep 09:15:38 8 achieve as many as 500 launchings per year using the 09:14:21 8 control of the foundation wall towing. And the 09:15:42 9 9 09:14:27 benefit of this system is that we don't require 09:15:45 10 10 We have proposed approximately 18 09:14:29 a lot of the more complicated expensive vessels that 09:15:47 11 11 months for the elevator system, including 16 months 09:14:33 are being used in Europe. This is a more benign 09:15:51 12 12 of -- for procurement and approximately two months 09:14:35 environment. The wave conditions are lower, so 09:15:54 13 13 of installation. This is based on both this we're able to use barges that are fabricated here in 09:15:56 14 09:14:44 14 Ontario to facilitate this and both reduces the project, as well as our previous experience with 09:15:59 15 15 Weeks Marine. 09:14:47 schedule and cost risks associated with other types 09:16:04 16 16 You know, it's been suggested that six 09:14:48 of installation. 17 17 months for installation is more appropriate, but we 09:14:50 So as far as the schedule goes, COWI 09:16:08 18 think that based on the site already being prepared, 09:14:52 18 was the lead design engineer on the project. We 19 the piers, in place, that two months is more than 09:14:55 19 worked very collaboratively with the contractor, who 09:16:19 20 20 ample time to install the wenches and elevator 09:15:00 was Per Aarsleff on that project. 09:16:22 21 21 platform. 09:15:03 Those six foundations, they were a 09:16:25 22 22 technology demonstration project, more than they So here we see a view of the 09:15:06 09:16:26 23 23 semi-floating GBF in its transport position. Once 09:15:08 were concerned about costs, but those foundations 09:16:30 24 24 the GBFs are placed into the water, these barges are 09:15:14 were built on average in 135 days. Both from our 09:16:32 25 25 placed around the buoyancy chambers. Wenches or experience as well as interviews with the 09:16:37 Page 18 Page 19 1 1 09:17:49 contractor, if they were doing this again and no point out is using this fabrication scheme, the 2 2 changes to the technology, they would estimate 120 09:16:41 foundation's been moved along these rails as 09:17:52 days per turbine foundation would be a reasonable 09:16:43 3 3 progressive stages of our construction are ready. 09:17:55 4 estimate. 09:16:46 4 Along with the foundations moving, the 09:17:58 5 We've proposed 120 days per 09:16:48 5 construction crews and equipment are also mobile. 09:18:00 6 foundation, as the schedule for Windstream. 09:16:51 6 So are you're able to stay with the foundation and 09:18:02 7 However, we think that's a conservative estimate 7 give it the attention that it needs. You also have 09:18:06 09:16:55 8 8 because we simply -- we have a learning curve with 09:16:58 the resources in place, already to provide the 09:18:08 9 9 building 130 turbines. We expect, if nothing else, 09:17:01 different types of fabrication, whether it be tying 09:18:11 10 10 experience with the fabrication, that alone would 09:17:04 rebar, placing formwork, pouring concrete. These 09:18:13 11 11 bring down the construction time. are known in place by the contractor along that 09:17:07 09:18:18 12 12 We also have not fully quantified the 09:17:08 line. And so that just helps ensure that the 09:18:20 13 13 additional benefits of using the manufacturing 09:17:10 concrete foundations are produced as they should be. 09:18:25 14 14 assembly line, some additional slip forming which 09:17:12 So, in summary, all of this 15 was not used in, the skidding system to facilitate 09:17:17 15 foundation, the entire foundation system design is 09:18:31 16 16 moving the foundations around the site. Our 09:17:22 designed to mitigate risk. We've established the 09:18:33 17 17 schedule estimate is based on the 25-metre 09:17:24 fabrication areas, as well as our indicative area. 09:18:37 foundation, which is the images that we've seen 18 18 09:17:27 There are a number of areas readily available in 09:18:40 19 19 earlier today. 09:17:30 Ontario. 09:18:43 20 20 Based on the five to, I believe, 09:17:31 The materials and labour, concrete 09:18:43 21 21 42 metres proposed, 32 metres proposed for 09:17:34 foundation technology is very common. You are able 09:18:45 22 22 Windstream, this is one of the larger foundations. 09:17:39 to build these foundations all year round. We 09:18:49 23 23 So a lot of the foundations are smaller, should be 09:17:43 believe we have a realistic, if not conservative 09:18:52 24 24 able to be constructed more readily. 09:17:46 fabrication schedule, and we're using local tugs and 09:18:55 25 25 The other thing that we'd like to 09:17:48 barges, reducing our offshore equipment risk. 09:19:00

	Page 20		Page 21
1	So thank you for giving me this 09:19:03	1	I'm going to ask you a few questions 09:20:53
2	opportunity to present this information. 09:19:04	2	this morning about the two reports that you filed in 09:20:54
3	PRESIDENT: Thank you very much, 09:19:07	3	the arbitration, so I can better understand the 09:20:56
4	Mr. Cooper. Ms. Seers. 09:19:07	4	conclusions that you've made. If you don't 09:20:58
5	EXAMINATION IN-CHIEF BY MS. SEERS: 09:19:14	5	understand the questions that I've asked, let me 09:21:00
6	Q. Good morning, Mr. Cooper. 09:19:17	6	know, I'll rephrase it or try and ask it again so 09:21:01
7	A. Good morning. 09:19:19	7	that you do understand. And in that regard, if the 09:21:04
8	Q. In response to concerns expressed 09:19:19	8	question is a "yes" or "no" question, if you could 09:21:07
9	by the Government of Canada in their opening 09:19:21	9	start with that first and provide whatever context 09:21:10
10	statement about the question answered by experts 09:19:22	10	you'd like to provide, go ahead, but if you could 09:21:13
11	retained by Windstream, would you please confirm 09:19:26	11	give a "yes" or "no" just so the record's clear. 09:21:15
12	whether, absent the moratorium, in your opinion, it 09:19:29	12	That would be great. 09:21:15
13	is more likely than not that the foundations would 09:19:32	13	In front of you you've been given 09:21:17
14	have been built and installed within the timelines 09:19:34	14	quite a large binder. There are numerous tabs in 09:21:18
15	set out in your reports on the project schedule? 09:19:37	15	there. Throughout the course of my question, I'll 09:21:21
16	A. We see no fatal flaws given this 09:19:40	16	be referring you to specific tab numbers there as we 09:21:22
17	proven technology. We believe it's more likely than 09:19:43	17	go, so when I say Tab 1, or 3, that's what I'm 09:21:25
18	not that Windstream could have achieved these. 09:19:45	18	referring to is the binder there in front of you. 09:21:29
19	MS. SEERS: Thank you very much? 09:19:50	19	I should also note for the benefit of 09:21:31
20	PRESIDENT: Thank you, Ms. Seers. 09:19:50	20	everybody, because your second report was embedded 09:21:33
21	Cross-examination, Ms. Squires? 09:19:52	21	into the SgurrEnergy report, we've actually exerted 09:21:37
22	CROSS-EXAMINATION BY MS. SQUIRES: 09:19:54	22	it into your binder to make it easier for everybody 09:21:37
23	Q. Good morning, Mr. Cooper. As you 09:20:47	23	to look at so you don't have to be flipping through 09:21:37
24	know, my name is Heather Squires and I'm counsel for 09:20:47	24	both reports at the one time. So your first report 09:21:37
25	the Government of Canada in these proceedings. 09:20:50	25	is found at Tab 1 and your second report is found at 09:21:45
	Page 22		Page 23
1	Tab 2. So when I refer to your first page of your 09:21:48	1	manufacturing of the foundations and to feed into 09:22:48
2	first report as page 51, we can all know why it's at 09:21:50	2	the overall project schedule; correct? 09:22:50
3	51 for the first page. 09:21:55	3	A. No, I'm sorry, that's incorrect. 09:22:52
4	A. Very good. Thank you. 09:21:57	4	Windstream had already made the decision to go with 09:22:54
5	Q. All right. Now, I want to start 09:21:58	5	the concrete gravity-based foundation. We were able 09:22:56
6	by looking at your second report at Tab 2 in your 09:22:00	6	to confirm that, as a viable and likely choice, but 09:23:00
7	binder. As I mentioned, that's labeled page 51. 09:22:05	7	that decision had already been made. 09:23:05
8	And I want to look at the background section. 09:22:09	8	Beyond that, the rest of your question 09:23:06
9	You note there that you were retained 09:22:12	9	is correct. We were brought on to advise as to the 09:23:08
10	by Windstream, via SgurrEnergy to provide consulting 09:22:14	10	design and fabrication. 09:23:11
11	services for the design and fabrication of GBFs for 09:22:18	11	Q. Okay. So you were told, "Let's go 09:23:13
12	the Wolfe Island Shoals wind farm? 09:22:22	12	with gravity-based foundations," and you were then 09:23:15
13	Do you see that? 09:22:25	13	to discuss how that would be implemented? 09:23:18
14	A. Yes, I do. 09:22:25	14	A. Correct. 09:23:22
15	Q. And you were not retained until 09:22:26	15	Q. Okay. Now. Tab 2 in your first 09:23:22
16	2014; correct? 09:22:28	16	report, you refer to it as a foundation conceptual 09:23:23
17	A. That's correct. 09:22:30	17	design. 09:23:27
18	Q. So, in fact, you were retained by 09:22:30	18	A. That's correct. 09:23:27
19	SgurrEnergy to provide a report for the purposes of 09:22:31	19	Q. And conceptual designs like this, 09:23:28
20	this arbitration, but not to actually work on 09:22:34	20	they're not detailed designs, correct? They're not 09:23:31
21	project, correct? 09:22:37	21	appropriate for construction purposes. You would 09:23:35
22	A. That's correct. 09:22:38	22	have to do further refinements before you actually 09:23:36
23	Q. Now, the purpose of your report 09:22:43	23	have the exact foundation you're going to use; 09:23:39
24	was to discuss the selection of the appropriate 09:22:44	24	correct? 09:23:41
25	foundations for the project as well as the 09:22:46	25	A. That's correct. 09:23:42

	Page 24		Page 25
1	Q. Now, you mentioned in your 09:23:43	1	be a moneymaker. 09:24:29
2	presentation that your company was involved in the 09:23:44	2	Further, the type of facilities that 09:24:32
3	design of the foundations for the Phase I project; 09:23:45	3	were available in Belgium to support that, were 09:24:34
4	correct? 09:23:51	4	mainly steel facilities. They had those online. So 09:24:36
5	A. That's one of the projects, yeah. 09:23:51	5	it was an easy switch to make to the jackets because 09:24:40
6	We've worked on a number of gravity-based 09:23:52	6	a lot of that infrastructure was already there. 09:24:43
7	foundations projects. 09:23:54	7	Whereas here, in for Windstream, Canada doesn't 09:24:46
8	Q. Right. 09:23:56	8	have a lot of the steel infrastructure in place, but 09:24:49
9	A. Yes. 09:23:56	9	they have the concrete infrastructure in place. So 09:24:52
10	Q. But that is one of them. 09:23:56	10	that's their natural switch. 09:24:55
11	Now, as both SgurrEnergy and URS note 09:23:58	11	Q. All right. So if we're talking 09:24:58
12	in their reports, the project changed from 09:23:59	12	about the Windstream project then, if something was 09:25:00
13	gravity-based foundation to another type of 09:24:01	13	to occur where a change in foundation was required 09:25:04
14	foundation after Phase I; correct? 09:24:02	14	during the construction phase, that would greatly 09:25:07
15	A. Yeah. Keeping that we are in 09:24:05	15	impact the project schedule in this; correct? You 09:25:10
16	Thornton Bank yes, that did change. 09:24:06	16	mentioned that we don't have the infrastructure in 09:25:12
17	Q. And that was because of 09:24:09	17	Canada to do, say, the steel foundations. 09:25:14
18	difficulties encountered with that specific project 09:24:09	18	If for some reason Windstream had to 09:25:17
19	as it pertained to the use of gravity-based 09:24:12	19	shift like Thornton Bank did for the gravity-base to 09:25:19
20	foundations; is that correct? 09:24:15	20	steel, there could be a problem for the project 09:25:22
21	A. The Phase I I'm sorry. Yes, 09:24:16	21	schedule, correct? 09:25:25
22	they did change foundation types as to some of the 09:24:18	22	A. I mean, if you change the 09:25:26
23	construction logistics, but we have to remember too 09:24:21	23	foundation, mid-construction, that's obviously a 09:25:28
24	that the Thornton Bank Phase 1 was a technology 09:24:24	24	project schedule impact. But it would be very rare 09:25:29
25	demonstration. They did not build that project to 09:24:27	25	for a developer to switch foundation type by the 09:25:31
	Page 26		Page 27
1	time that we've gotten to construction. And they've 09:25:34	1	available on the Canadian market; correct? 09:26:30
2	embedded a number of levels before you get to that 09:25:36	2	A. Correct. 09:26:32
3	point. 09:25:39	3	Q. Now, you note in your second 09:26:32
4	Q. So even at some point if you start 09:25:39	4	report that gravity-based foundations have been 09:26:33
5	down the path of gravity-based, there could be some 09:25:40	5	successfully installed in over 13 operating wind 09:26:35
6	lag time if you do need to switch? 09:25:43	6	farms. Do you recall that? I can take you to the 09:26:38
7	A. Yeah, a re-design would require 09:25:45	7	page if you need it? 09:26:40
8	additional time. 09:25:46	8	A. I do recall that, but I'd like to 09:26:41
9	Q. Now, in both your reports, you 09:25:48	9	see the page anyway. 09:26:43
10	recommended the use of semi-floating gravity-based 09:25:50	10	Q. It's page 51 if your second 09:26:44
11	foundations. And we've talked about that a bit in 09:25:52	11	report, which is the first page of your report at 09:26:46
12	your presentation this morning, but and so we all 09:25:55	12	Tab 2. 09:26:49
13	understand, and just so I'm on the same page here, 09:25:57	13 14	A. Yes, okay. I see at the. 09:26:50
14	if these foundations differ than regular 09:26:00	15	Q. And you list some of those 09:26:50 projects there? 09:26:52
15	gravity-based foundations in that they're floated 09:26:03	16	A. That's correct. 09:26:54
16	out to the site, they're not jacked up on a barge 09:26:05	17	Q. Now, none of those projects employ 09:26:54
17	and taken out to the site; correct? 09:26:08	18	the semi-floating installation methodology, correct? 09:26:56
18	A. Correct. The difference is all in 09:26:10	19	Those are all regular gravity-based foundations? 09:26:59
19 20	the installation methodology. As to how they're - 09:26:11	20	A. Yeah, these are all cone-type 09:27:04
21	their function when they're out there and they've 09:26:14	21	foundations. 09:27:06
22	been installed, it's all the same principles. 09:26:18	22	Q. And if we go ahead two pages to 09:27:07
23	Q. Okay. And to the extent that 09:26:20 these foundations are used for the project then, as 09:26:22	23	page 53, still staying in your report there, under 09:27:09
24	you mentioned, it alleviates the need for those 09:26:24	24	Section 2.1 you refer to the semi-floating 09:27:14
25	heavy-lift machinery or vessels that are not readily 09:26:27	25	foundations as "Innovative and the next generation 09:27:16
-	near, inclination of vessels that are not readily 07.20.27		

	Page 28		Page 29
1	of technology development." 09:27:21	1	actually the heaviest type of foundation because 09:28:14
2	Do you see that? 09:27:22	2	they have to have that extra mast to be able to 09:28:17
3	A. Yes, we did write that. 09:27:23	3	float. They also require the greatest water depth, 09:28:19
4	Q. Okay. And on the next page again, 09:27:24	4	so that's also not a viable foundation for this 09:28:22
5	page 54, you note that the semi-floating 09:27:26	5	location. So by combining both aspects into the 09:28:22
6	gravity-based foundation was installed in 2015 to 09:27:30	6	semi-floating foundation, we're able to use the 09:28:24
7	support a single meteorological tour; is that 09:27:35	7	water depths that are available with the benefits of 09:28:26
8	correct? 09:27:38	8	both technology by reducing those installation 09:28:29
9	A. No, that's not correct. The sea 09:27:39	9	vessels while still being able to work in the water 09:28:31
10	tower crane free foundation is a fully-floating 09:27:40	10	depth available. 09:28:34
11	technology. So it's is not a semi-floating 09:27:44	11	Q. Okay. So if I follow then, given 09:28:36
12	technology. 09:27:46	12	that correction, we have the 13 projects that you 09:28:37
13	Q. Okay. So it's not relevant to the 09:27:46	13	mentioned that have used the regular cone-type 09:28:40
14	discussion today then? 09:27:49	14	foundation. We have the MET tour that's been 09:28:42
15	A. Well, they you know, it's 09:27:50	15	installed in the full-on-floating foundation, but as 09:28:45
16	a blend of all the foundation types. Like I said, 09:27:51	16	of to date, there's been no wind farms that have 09:28:48
17	once they're installed they all function 09:27:53	17	used the semi-floating methodology to install their 09:28:52
18	equivalently. They're all held in place by their 09:27:56	18	foundations; correct? 09:28:55
19	self weight. 09:28:00	19	A. No, not as far as wind farms, but 09:28:56
20	Now, how you get them out there 09:28:01	20	this is this is actually one of the great 09:28:59
21	changes. The cone-type foundations relied on cranes 09:28:02	21	opportunities where we've been able to leverage this 09:29:01
22	that could lift thousands of tonnes. They're large 09:28:05	22	technology from other industries, because the 09:29:04
23 24	cranes. Some of them can't fit through the locks to 09:28:08	23	semi-floating technology has been used in bridge 09:29:07
25	get to Lake Ontario. 09:28:11 The floating foundation, they're 09:28:13	24 25	industries and some of the other concrete Caisson 09:29:08
23	The floating foundation, they're 09:28:13	25	projects, such is things like that Venice Lagoon. 09:29:09
	Page 30		Page 31
1	Page 30 So it's — while it's not povel to offshore wind 00:20:00	1	Page 31
1 2	So it's while it's not novel to offshore wind, 09:29:09	1 2	whatever time you need. 09:30:32
2	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13	2	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40
2	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16	2 3	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42
2	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16	2	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43
2 3 4	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17	2 3 4	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46
2 3 4 5	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17	2 3 4 5	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47
2 3 4 5	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18	2 3 4 5 6	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49
2 3 4 5 6 7	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23	2 3 4 5 6 7	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52
2 3 4 5 6 7 8	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26	2 3 4 5 6 7 8	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49
2 3 4 5 6 7 8	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28	2 3 4 5 6 7 8	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54
2 3 4 5 6 7 8 9	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28	2 3 4 5 6 7 8 9	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56
2 3 4 5 6 7 8 9 10	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32	2 3 4 5 6 7 8 9 10	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58
2 3 4 5 6 7 8 9 10 11	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36	2 3 4 5 6 7 8 9 10 11	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00
2 3 4 5 6 7 8 9 10 11 12 13	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47	2 3 4 5 6 7 8 9 10 11 12 13	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02
2 3 4 5 6 7 8 9 10 11 12 13 14	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49	2 3 4 5 6 7 8 9 10 11 12 13	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 Q. Okay. So I want to turn to 09:31:09
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:53 So, I want to have a look at line 368. 09:29:57	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	whatever time you need. 09:30:32 Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:12
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:57 It indicates there that foundation installation for 09:30:14	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	whatever time you need. Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:57 It indicates there that foundation installation for 09:30:14 the project was the project scheduled to begin on 09:30:17	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	whatever time you need. Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14 Q. No. It's not, unfortunately, but 09:31:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:57 It indicates there that foundation installation for 09:30:14 the project was the project scheduled to begin on 09:30:17 November 12th, 2013 with mobilization beginning on 09:30:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	whatever time you need. Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 Q. Okay. So I want to turn to 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14 Q. No. It's not, unfortunately, but 09:31:16 it's right here. Gravity-based foundations. 09:31:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:53 So, I want to have a look at line 368. 09:29:57 It indicates there that foundation installation for 09:30:14 the project was the project scheduled to begin on 09:30:17 November 12th, 2013 with mobilization beginning on 09:30:19 that date; do you see that? 09:30:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	whatever time you need. Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 Q. Okay. So I want to turn to 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14 Q. No. It's not, unfortunately, but 09:31:16 it's right here. Gravity-based foundations. 09:31:21
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:53 So, I want to have a look at line 368. 09:29:57 It indicates there that foundation installation for 09:30:14 the project was the project scheduled to begin on 09:30:17 November 12th, 2013 with mobilization beginning on 09:30:19 that date; do you see that? 09:30:22 A. Yes, I do see that. 09:30:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	whatever time you need. Line 275, it notes that: "The design of these foundations 09:30:42 begins on February 11th of 2011." O9:30:43 A. Yes, that's correct. O9:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just — we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. O9:31:07 Q. Okay. So I want to turn to 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14 Q. No. It's not, unfortunately, but 09:31:16 it's right here. Gravity-based foundations. 09:31:21 you. 09:31:23
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So it's while it's not novel to offshore wind, 09:29:09 it's a proven technology we're just borrowing from 09:29:13 other industries. 09:29:16 Q. Okay. But just 09:29:16 A. Yes. 09:29:17 Q as a matter of fact, though, 09:29:17 yes, it's novel for offshore wind. Okay. 09:29:18 Now I want to turn to the Sgurr 09:29:23 report, Appendix 4, which is the project schedule. 09:29:26 I don't know if you guys have your giant printout 09:29:28 that you can make it easier on your eyes. 09:29:32 A. Okay. 09:29:36 PRESIDENT: Giant print out. 09:29:47 BY MS. SQUIRES: 09:29:49 Q. Exactly, so we'll call it even. I 09:29:49 know my eyes are grateful for that, so appreciate 09:29:51 you too, Donnie. 09:29:53 So, I want to have a look at line 368. 09:29:57 It indicates there that foundation installation for 09:30:14 the project was the project scheduled to begin on 09:30:17 November 12th, 2013 with mobilization beginning on 09:30:19 that date; do you see that? 09:30:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	whatever time you need. Line 275, it notes that: 09:30:40 "The design of these foundations 09:30:42 begins on February 11th of 2011." 09:30:43 A. Yes, that's correct. 09:30:46 Q. So presumably then, if Windstream 09:30:47 was to take advantage of the knowledge of any other 09:30:49 projects that have been designed and used 09:30:52 gravity-based foundations, leaving aside the 09:30:54 methodology of installation, just we're going to 09:30:56 just talk about gravity-based foundations, they 09:30:58 would need that information at that time, correct? 09:31:00 A. If they were using those projects 09:31:02 as references, then they would need that 09:31:04 information. 09:31:07 Q. Okay. So I want to turn to 09:31:07 page 10 of the second Sgurr report. So I believe 09:31:09 you've been given a copy, perhaps? 09:31:14 Q. No. It's not, unfortunately, but 09:31:16 it's right here. Gravity-based foundations. 09:31:21

	Page 32		Page 33
1	towards the bottom of the page there, you can see 09:31:37	1	A. I don't have information as to 09:32:33
2	that SgurrEnergy is discussing the Thornton Bank 09:31:39	2	the the entire industry size. 09:32:34
3	project. Do you see where I am there? 09:31:43	3	Q. Okay. Well 09:32:36
4	A. Yes. 09:31:54	4	A. I'm sorry. 09:32:36
5	Q. So they provide a bulleted list 09:31:54	5	Q. That's okay. Let's turn you do 09:32:36
6	there at the end of the page to compare Thornton 09:31:56	6	recognise it's probably smaller than that, though? 09:32:38
7	Bank to this project to indicate in their view it's 09:32:00	7	You have a general sense of the number of megawatts 09:32:41
8	not appropriate. 09:32:02	8	that are was that have been installed for offshore 09:32:44
9	Do you see follow where I am on the 09:32:04	9	generally? 09:32:47
10	bulleted list? 09:32:04	10	A. As of which I mean, are we 09:32:47
11	A. Yes, I do. 09:32:05	11	talking 2011, 2016 or 09:32:49
12	Q. Okay. So we're actually going to 09:32:05	12	Q. So I believe in that paragraph 09:32:51
13	turn over to the next page and look at one of the 09:32:06	13	they are referring to current date. They are saying 09:32:52
14	factors on that list. It's around page 11. 09:32:08	14	since the Thornton Bank project. 09:32:55
15	The second bullet point on that page, 09:32:10	15	A. I don't know. I think it's 09:32:58
16	they argue that one of the reasons the comparison to 09:32:12	16	conceivable that there could be that many megawatts. 09:33:00
17	Thornton Bank is not appropriate is that the project 09:32:14	17	The UK is building huge number of wind farms. I'm 09:33:03
18	as the benefit of the experience gained from 09:32:16	18	sorry, I don't know the number. 09:33:06
19	approximately 6,900 megawatts of the offshore wind 09:32:19	19	Q. Okay. Well, let's turn to Tab 13 09:33:07
20	industry projects built since Thornton Bank. 09:32:21	20	in your binder. It's Exhibit C-1735. 09:33:08
21	Do you see that? 09:32:25	21	A. 13 which tab, I'm sorry? Oh, 09:33:20
22	A. Yeah, I see that. 09:32:25	22	Tab 13. Okay.
23	Q. Okay. So now they're referring to 09:32:26	23	Q. Tab 13, yeah. It's Exhibit 1735. 09:33:28
24	the number of megawatts installed for all projects 09:32:27	24	This is an offshore wind turbine 09:33:31
25	correct, not just gravity-based foundations? 09:32:30	25	generator foundation parametric study that 09:33:33
	Page 34		Page 35
1	· ·	,	
1 2	SgurrEnergy carried out in 2013, and I want to turn 09:33:38	1 2	my colleague is posing a hypothetical which I submit 09:34:54
3	to page 19 and have a look at figure 11. 09:33:40	3	is perhaps a little far afield from Mr. Cooper's 09:34:59
4	So they note that there that the 09:33:51	4	expertise here. 09:35:01
5	market share of operating WTG foundations in 2013, 09:33:56 and they note that of that market share, only 09:33:59	5	PRESIDENT: Well, I think the answer 09:35:02 only requires mathematics. 09:35:04
6	16.1 percent of operating wind farms use 09:34:02	6	only requires mathematics. 09:35:04 BY MS. SQUIRES: 09:35:11
7	gravity-based foundation; do you see that? 09:34:10	7	Q. I I can rephrase the question 09:35:12
8	A. No. I just have to remind you 09:34:10	8	for you, Mr. Cooper, if you're not following where 09:35:13
9	that we didn't contribute to this report. I don't 09:34:12	9	I am, but the SgurrEnergy report, when it refers to 09:35:14
10	know what the source is, but I do see their report 09:34:14	10	the 6,900, speaks of current day. We agree that 09:35:17
11	says that. 09:34:16	11	there would be less two years before that, correct? 09:35:20
12	Q. And so if the 1600 megawatts is 09:34:17	12	A. Correct. 09:35:23
13	Q. That so it the 1000 hegawatts is 07.54.17		
14	a number a current number, which it seems to be 09:34:21	1 13	O And of that less number 09:35:23
T-2	a number a current number, which it seems to be 09:34:21 from that Sgurr report, and there were less than 09:34:23	13 14	Q. And of that less number, 09:35:23 16.1 percent, according to SgurrEnergy, was 09:35:24
15	from that Sgurr report, and there were less than 09:34:23		16.1 percent, according to SgurrEnergy, was 09:35:24
	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26	14	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28
15	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28	14 15	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30
15 16	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30	14 15 16	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31
15 16 17	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33	14 15 16 17	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31
15 16 17 18	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33 gravity-based foundation at that time. Based on 09:34:39	14 15 16 17 18	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31 can probably agree that that number was even 09:35:32 smaller? 09:35:35
15 16 17 18 19	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33 gravity-based foundation at that time. Based on 09:34:39	14 15 16 17 18 19	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31 can probably agree that that number was even 09:35:32 smaller? 09:35:35 A. That's actually a tricky answer. 09:35:36
15 16 17 18 19 20	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33 gravity-based foundation at that time. Based on 09:34:39 this, if we take them for their if they take 09:34:39	14 15 16 17 18 19 20	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31 can probably agree that that number was even 09:35:32 smaller? 09:35:35 A. That's actually a tricky answer. 09:35:36
15 16 17 18 19 20 21	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33 gravity-based foundation at that time. Based on 09:34:39 this, if we take them for their if they take 09:34:39 SgurrEnergy for their word on this, that would be 09:34:41	14 15 16 17 18 19 20 21	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31 can probably agree that that number was even 09:35:32 smaller? 09:35:35 A. That's actually a tricky answer. 09:35:36 It probably was smaller. But most of the early 09:35:37
15 16 17 18 19 20 21	from that Sgurr report, and there were less than 09:34:23 installed there's obviously less installed in 09:34:26 2013. There's been projects that have come online 09:34:28 in between those two periods, and of that then, 09:34:30 a smaller number that was available was 09:34:33 gravity-based foundation at that time. Based on 09:34:39 this, if we take them for their if they take 09:34:39 SgurrEnergy for their word on this, that would be 09:34:41 the conclusion, correct? 09:34:43	14 15 16 17 18 19 20 21 22	16.1 percent, according to SgurrEnergy, was 09:35:24 gravity-based; correct? 09:35:28 A. According to this, yes. 09:35:30 Q. Okay. So and then in 2011 we 09:35:31 can probably agree that that number was even 09:35:32 smaller? 09:35:35 A. That's actually a tricky answer. 09:35:36 It probably was smaller. But most of the early 09:35:37 phase foundations were gravity-based foundation. 09:35:41

	Page 36		Page 37
1	2015/2016, most of the industry is actually turning 09:35:54	1	Q. Okay. And gravity-based 09:36:45
2	back. But in that interim period, most of the 09:35:57	2	foundation generally tend to be best with relatively 09:36:48
3	foundations installed were steel foundations. 09:35:59	3	flat lakebed conditions because less slope means 09:36:52
4	Q. Okay. I think we can at least 09:36:02	4	less work in preparing the lakebed and more 09:36:55
5	agree that they wouldn't have the benefit of that 09:36:03	5	stability with the foundations; correct? 09:36:58
6	full 6,900 megawatts of today; correct? 09:36:05	6	A. The I mean, it's less work, but 09:36:59
7	A. Correct. 09:36:09	7	the also the type of work that we're talking 09:37:01
8	Q. I want to understand how 09:36:15	8	about, the dredging and filling, is also relatively 09:37:02
9	foundations are chosen for an offshore wind farm, 09:36:16	9	easy work. It's also work that's done commonly here 09:37:06
10	and you've gone through a bit of this in your 09:36:18	10	with dredging navigation channels. Yes, if the 09:37:09
11	presentation this morning. But you've mentioned 09:36:21	11	seabed's flatter, it's less work, but that's not 09:37:13
12	there are numerous factors and they include factors 09:36:22	12	a major the slope here, as long as we're within 09:37:17
13	such as the lakebed shape and slope, correct? 09:36:25	13	with a certain range, is not a big consideration. 09:37:20
14	A. That's just a few of the factors, 09:36:28	14	Q. Okay. Now, in order to determine 09:37:25
15	yes. 09:36:29	15	if all of this this seabed, or lakebed, I guess, 09:37:27
16	Q. And water, depth and ice effect, 09:36:30	16	in this case, the conditions, in order to determine 09:37:27
17	vessel availability and suitable manufacturing 09:36:32	17	what is present, you have to do on-site field 09:37:31
18	location; correct? 09:36:35	18	studies, correct, or geotechnical investigations? 09:37:33
19	A. Yes, all of those are 09:36:36	19	A. Ultimately, before you get to the 09:37:37
20	considerations. 09:36:37	20	construction phase, we would generally recommend 09:37:39
21	Q. Now and depending on the slope 09:36:37	21	that. In a beginning phase of a project. We often 09:37:40
22	of the lakebed or the amount of sediment present, 09:36:39	22	rely on the navigation charts published. So if 09:37:43
23	different foundation types might be recommended; 09:36:42	23	we're in the U.S., it would be the we would go on 09:37:46
24	correct? 09:36:44	24	NOAA charts. 09:37:49
25	A. Yes, that's correct. 09:36:45	25	In Canada, we would rely on the 09:37:50
	71. 105, tilitis estreet. 09.50.15		in canada, we would rely stitute 57.57.50
	Page 38		Page 39
1	Canadian Hydrographic Service, but that's where 09:37:52	1	it indicates that COWI used studies completed by the 09:38:52
2	things start and then you proceed through a very 09:37:55	2	Canadian seabed research to refine the proposed 09:38:56
3	measured approach, because you don't go out and take 09:37:57	3	foundation type and to assist in layout 09:38:58
4	borings right in the beginning, so you start with 09:38:00	4	recommendations. 09:39:01
5	you start with phased geophysical surveys. So you 09:38:04	5	Do you follow where I am? 09:39:01
6	start with some of the site and the next and you 09:38:07	6	A. Yes, I see that. 09:39:10
7	get a little bit more information, refine your 09:38:10	7	Q. Okay. And if we look to the 09:39:11
8	design, you might go back again and then survey all 09:38:12	8	footnote that's referred to in that paragraph, 09:39:13
9	of the site, then go back again and form your 09:38:15	9	footnote 71, it refers to two separate CSR, Canadian 09:39:15
10			
11	geotechnical program. So yes, you do get lots of 09:38:17	10	seabed research studies that you relied on; do you 09:39:20
1 0	geotechnical program. So yes, you do get lots of 09:38:17 information before you finalize the design. 09:38:22	10 11	
12			seabed research studies that you relied on; do you 09:39:20
13	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25	11	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23
13 14	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23	11 12	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23
13	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25	11 12 13	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30
13 14	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34	11 12 13 14	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50
13 14 15	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32	11 12 13 14 15	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47
13 14 15 16	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34	11 12 13 14 15 16	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50
13 14 15 16 17	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34	11 12 13 14 15 16 17	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52
13 14 15 16 17 18	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35	11 12 13 14 15 16 17 18	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55
13 14 15 16 17 18	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35 of the second Sgurr report. So it's is not in your 09:38:36	11 12 13 14 15 16 17 18	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55 section. 09:39:58 Q. Okay. So even though Sgurr 09:39:59 MS. SQUIRES: If we can just scroll up 09:40:03
13 14 15 16 17 18 19	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35 of the second Sgurr report. So it's is not in your 09:38:36 binder; it is the report that was just handed up to 09:38:39	11 12 13 14 15 16 17 18 19 20	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55 section. 09:39:58 Q. Okay. So even though Sgurr 09:39:59
13 14 15 16 17 18 19 20	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35 of the second Sgurr report. So it's is not in your 09:38:36 binder; it is the report that was just handed up to 09:38:39 you. 09:38:42	11 12 13 14 15 16 17 18 19 20 21	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55 section. 09:39:58 Q. Okay. So even though Sgurr 09:39:59 MS. SQUIRES: If we can just scroll up 09:40:03 a bit there, Donnie, back to the paragraph. 09:40:04 BY MS. SQUIRES: 09:40:06
13 14 15 16 17 18 19 20 21	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35 of the second Sgurr report. So it's is not in your 09:38:36 binder; it is the report that was just handed up to 09:38:39 you. 09:38:42 A. I'm sorry, page 138? 09:38:46	11 12 13 14 15 16 17 18 19 20 21 22	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55 section. 09:39:58 Q. Okay. So even though Sgurr 09:39:59 MS. SQUIRES: If we can just scroll up 09:40:03 a bit there, Donnie, back to the paragraph. 09:40:04 BY MS. SQUIRES: 09:40:06 Q. Even though it says SgurrEnergy is 09:40:08
13 14 15 16 17 18 19 20 21 22 23	information before you finalize the design. 09:38:22 Q. Okay. So generally speaking then, 09:38:23 when you're planning an offshore wind project, 09:38:25 there's a certain element of risk that remains until 09:38:29 you get to that final point of the on the on-site 09:38:32 studies? 09:38:34 A. That's correct. 09:38:34 Q. Now. I want to turn to page 138 09:38:35 of the second Sgurr report. So it's is not in your 09:38:36 binder; it is the report that was just handed up to 09:38:39 you. 09:38:42 A. I'm sorry, page 138? 09:38:46 Q. 138. 09:38:49	11 12 13 14 15 16 17 18 19 20 21 22 23	seabed research studies that you relied on; do you 09:39:20 see that? 09:39:23 A. I see that, but I'm trying to jog 09:39:23 my memory here of this. I may have to defer to 09:39:30 Sgurr on this because we did not write this 09:39:44 section of the report. COWI was also not involved 09:39:47 with the siting of the project or the micro-siting 09:39:50 of the turbines within the turbine layout. So, 09:39:52 unfortunately, I may have to defer to Sgurr on this 09:39:55 section. 09:39:58 Q. Okay. So even though Sgurr 09:39:59 MS. SQUIRES: If we can just scroll up 09:40:03 a bit there, Donnie, back to the paragraph. 09:40:04 BY MS. SQUIRES: 09:40:06

	Page 40		Page 41
1	Canadian seabed research were employed by COWI, your 09:40:14	1	area that was used for that report. 09:41:25
2	view or your conclusion is that COWI did not rely on 09:40:17	2	A. Yeah, that appears to be correct. 09:41:28
3	those reports? 09:40:20	3	Q. Okay. Now, you can see there that 09:41:30
4	A. We were provided information for 09:40:20	4	the project location is actually nowhere near that; 09:41:31
5		5	
6	this project in a series of summer reports and 09:40:22	6	correct? So the red line goes from Wolfe Island to 09:41:35
	overall conditions. We did he not receive the 09:40:28		Kingston. But the project location itself is off 09:41:39
7	entirety of reports. So it's possible that some of 09:40:29	7	the Long Point which is towards the southwest of 09:41:42
8	the information that we received from Sgurr did 09:40:31	8	Wolfe Island? 09:41:45
9	originate from those reports, but I did not see 09:40:33	9	A. I mean, that's what this graphic 09:41:46
10	those reports in their entirety. 09:40:35	10	shows. 09:41:48
11	Q. Okay. And okay. So perhaps we 09:40:37	11	Q. Okay. So if this study's then 09:41:49
12	can look through maybe if we look through certain 09:40:44	12	based on that survey area, it's irrelevant for 09:41:50
13	parts of the report it may trigger your mind if 09:40:48	13	determining the foundation types in the actual 09:41:53
14	you've seen that or not seen that before, but let's 09:40:50	14	project location; correct? 09:41:56
15	turn to Tab 5 in your binder. So this is the first 09:40:54	15	A. It could contribute some 09:41:57
16	document that was referred to in that footnote. And 09:41:04	16	information, but, you know, again, this is not 09:41:59
17	this the 2007 Wolfe Island cable route survey. 09:41:09	17	this is not something I've seen. It's not something 09:42:01
18	Are you with me there?	18	I've had time to review, but 09:42:04
19	A. Yes, I see that. 09:41:12	19	Q. Okay. That's fine. We'll turn to 09:42:05
20	Q. We're going to turn to page to 09:41:13	20	Tab 6 then. Let's try the second report. And this 09:42:05
21	figure 1.1, which is on Page 2. 09:41:15	21	is the the other report that was conducted in 09:42:17
22	MS. SQUIRES: And Donnie, for your 09:41:17	22	2010 by the Canadian seabed research. It's Exhibit 09:42:19
23	benefit, that's page 7 in the PDF. 09:41:18	23	C-0514. And if we turn to page 18 and look under 09:42:21
24	BY MS. SQUIRES: 09:41:21	24	Section 5.6. 09:42:27
25	Q. This map demonstrates the survey 09:41:22	25	A. I'm sorry, where am I? 09:42:38
	Page 42		Page 43
	r age 42		rage 43
1	Q. We're on page 18. 09:42:40	1	that: 09:43:50
1 2		1 2	that: 09:43:50
	Q. We're on page 18. 09:42:40		that: 09:43:50
2	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41	2	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53
2	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42	2 3	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54
2 3 4	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46	2 3 4	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57
2 3 4 5	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52	2 3 4 5	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58
2 3 4 5 6	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54	2 3 4 5 6	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00
2 3 4 5 6 7	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54	2 3 4 5 6 7	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01
2 3 4 5 6 7 8	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55	2 3 4 5 6 7 8	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02
2 3 4 5 6 7 8	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57	2 3 4 5 6 7 8	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04
2 3 4 5 6 7 8 9	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00	2 3 4 5 6 7 8 9 10	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06
2 3 4 5 6 7 8 9 10	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but and 09:43:03	2 3 4 5 6 7 8 9 10 11	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15
2 3 4 5 6 7 8 9 10 11	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07	2 3 4 5 6 7 8 9 10 11 12 13	that: 09:43:50 "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16
2 3 4 5 6 7 8 9 10 11 12	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08	2 3 4 5 6 7 8 9 10 11 12 13 14	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16
2 3 4 5 6 7 8 9 10 11 12 13 14	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09	2 3 4 5 6 7 8 9 10 11 12 13 14	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 Q report yet 09:44:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 Q report yet 09:44:16 A. I'm up with you now. 09:44:17
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 Q report yet 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:18 said earlier, CSR is agreeing with you that further 09:44:20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the — the subject is "The wind farm and cable route 09:43:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:20 studies would need to be done because you need that 09:44:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the the subject is "The wind farm and cable route 09:43:19 survey," so it extends 09:43:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 Q report yet 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:20 studies would need to be done because you need that 09:44:22 ground truthing in order to be determined make 09:44:25
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the — the subject is "The wind farm and cable route 09:43:24 A. Okay. Yep. 09:43:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:20 studies would need to be done because you need that 09:44:22 ground truthing in order to be determined make 09:44:25 final determinations on the site; correct? 09:44:27
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the — the subject is "The wind farm and cable route 09:43:19 survey," so it extends — 09:43:25 Q. Unlike the last report, this one 09:43:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:18 said earlier, CSR is agreeing with you that further 09:44:20 studies would need to be done because you need that 09:44:25 final determinations on the site; correct? 09:44:27 A. Correct. 09:44:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the — the subject is "The wind farm and cable route 09:43:19 survey," so it extends — 09:43:25 Q. Unlike the last report, this one 09:43:25 would extend to a broader area. If we turn to 09:43:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:18 said earlier, CSR is agreeing with you that further 09:44:20 studies would need to be done because you need that 09:44:25 final determinations on the site; correct? 09:44:30 Q. Now, you mentioned so these are 09:44:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. We're on page 18. 09:42:40 A. Okay. 09:42:41 Q. Section 5.6. And it notes there 09:42:42 in that paragraph that ground truthing could not be 09:42:46 carried out as part of their study, due to weather 09:42:49 conditions that were encountered. 09:42:52 Do you see where I am there? 09:42:54 A. I see that it says that, yep. 09:42:55 Q. And so we'll just walk through 09:42:57 a couple provisions, couple sections of this and 09:43:00 then we can assess them after, but — and 09:43:03 I understand you might not be familiar with the 09:43:05 document, but 09:43:07 A. No, I'm — it just says that this 09:43:08 is a cable route survey, so we didn't have anything 09:43:09 to do under our scope of work with the cable route. 09:43:12 I mean, I'm reading this. That's 09:43:15 Q. So, I think it actually says on 09:43:18 the — the subject is "The wind farm and cable route 09:43:19 survey," so it extends — 09:43:25 Q. Unlike the last report, this one 09:43:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that: "Ground truthing determinations 09:43:52 from video and sediment samples 09:43:53 will be required in order to 09:43:54 determine grain size and 09:43:57 composition of the sediment." [As 09:43:58 read] 09:44:00 Do you see where I am? 09:44:01 A. No, I'm sorry. I'm like 09:44:02 I said, I'm orienting myself in this document for 09:44:04 the first time. 09:44:06 Q. So, understanding that you haven't 09:44:15 reviewed this 09:44:16 A. Yes. Okay. 09:44:16 A. I'm up with you now. 09:44:17 Q. So to come back to something you 09:44:18 said earlier, CSR is agreeing with you that further 09:44:20 studies would need to be done because you need that 09:44:25 final determinations on the site; correct? 09:44:27 A. Correct. 09:44:30

	Page 44		Page 45
1	conceptual design. And you mentioned that you 09:44:38	1	or summary of the lakebed; correct? 09:46:44
2	haven't reviewed them or you maybe have seen parts 09:44:40	2	A. I believe the draft project 09:46:49
3	of them, and I guess I'm curious to know what you 09:44:43	3	description did have some information. 09:46:51
4	did review because the scope of work with your 09:44:45	4	Bill Follett, the third reference, was our contact 09:46:56
5	report does not include any other type of 09:44:47	5	at SgurrEnergy who provided a lot of the 09:47:00
6	geotechnical study. 09:44:52	6	information. And this was a couple of years ago. 09:47:03
7	A. No. I mean, we probably listed 09:44:54	7	I'd have to go back into the reports to see if any 09:47:11
8	the references in our report, but we were provided 09:44:56	8	of them also contained any additional information. 09:47:15
9	a series of reports from Sgurr that had different 09:44:59	9	Q. Okay. Well, we can have a look, 09:47:18
10	types of information. The primary let me refer 09:45:02	10	perhaps, at that Bill Follett email, and that's 09:47:19
11	to my report for a moment, please. 09:45:10	11	it's at Tab 9 of your binder. 09:47:21
12	Q. So your first report on page 28 09:45:12	12	A. Okay. 09:47:32
13	lists off your references, if that helps. 09:45:15	13	Q. So you will see there that 09:47:32
14	A. Do we have the appendix that 09:45:32	14	Mr. Follett that this is an email from Bill 09:47:34
15	should be at the end of Section 6? Because that's 09:45:34	15	Follett to you and he's indicating that the folks at 09:47:39
16	the design-basis memo that would have all the design 09:45:36	16	Ortech put something together for you guys to look 09:47:45
17	constraints that went into choosing this design. 09:45:40	17	at and it simply touches one Isopach or bathymetry 09:47:47
18	Q. If you look at Tab 1 in your 09:45:44	18	chart on the second page; correct? 09:47:54
19	binder, it might be what follows after page 28. 09:45:46	19	A. That appears to be the case, yes. 09:47:55
20	A. Thank you. 09:45:57	20	Q. So, in doing your foundation 09:47:58
21	Q. I note that that part has 09:45:57	21	design then, you didn't ask to see any other studies 09:48:01
22	a separate list of references on page 9. 09:46:25	22	beyond what was provided to you by Ortech in this 09:48:03
23	A. Yes, I see those references now. 09:46:33	23	email and perhaps the draft project description from 09:48:06
24	Q. Okay. So, of those references 09:46:35	24	Ortech in 2012? 09:48:09
25	then, none of those are a geotechnical desktop study 09:46:37	25	A. No. That would be inconsistent 09:48:10
	Page 46		Page 47
1	with the level of design that we were asked to 09:48:12	1	A. That's correct. 09:49:24
2	provide. I mean, this was a concept study based on 09:48:13	2	Q. See where I am? 09:49:24
3	some of the general characteristics of the site. So 09:48:16	3	A. Yes. 09:49:25
4	somewhere we got some information that allowed us to 09:48:19	4	Q. And if we turn back to Page 51, so 09:49:25
5	get the rock quality designation that was in that 09:48:22	5	the first page, you note that the gravity-based have 09:49:27
6	earlier design-basis memo, but as to looking at 09:48:25	6	been installed on offshore wind farms and projects 09:49:34
7	specific turbine siting, that would not be done in a 09:48:28	7	up to 27 metres in depth. 09:49:38
8	conceptual design. It wouldn't be done in 09:48:30	8	Do you see where I am there? 09:49:41
9	preliminary design. You wouldn't get to that until 09:48:33	9	A. Yes, I do. 09:49:42
10	the detailed design phase, so that we wouldn't 09:48:35	10	Q. Okay. So, if Windstream's project 09:49:42
11	have relied on specific turbine citing data. 09:48:38	11	is going to be built up to 30 metres, given that 09:49:45
12	Q. So it's fair to say that it's not 09:48:40	12	they're they have only been installed up to 09:49:47
13	clear, looking at your report, what exactly, what 09:48:42	13	27 metres to date, then Windstream's project would 09:49:52
14	information we can't determine what information 09:48:44	14	have been the deepest to date to use that 09:49:55
15	you relied on? 09:48:46	15	technology; correct? 09:49:59
16	A. Two years ago, I don't remember 09:48:47	16	A. It would have been the deepest 09:50:00
17	exactly which reference was which, no. 09:48:48	17	offshore wind farm at that time, but the next 09:50:01
18	Q. Okay. Let's move on to 09:48:51	18	paragraph down, we talk about the viability of those 09:50:05
19	a different topic. 09:48:57	19	foundations has been proposed for four projects and 09:50:07
20	A. Okay. 09:48:58	20	up to 55 metres of water, and the same technology's 09:50:11
21	Q. And we're going to look at your 09:48:58	21	also been used for like I said, I gave examples 09:50:14
22 23	second report, which is at Tab 2, and have a look at 09:49:00	22 23	in my presentation, the Confederation Bridge in 09:50:16
24	page 54, which is the third page. And in the last 09:49:09 paragraph, you note that the water depth for the for 09:49:16	24	35 metres. Same technology in the Hibernia gas 09:50:18 platform, the 80 metres, so the yeah, the first 09:50:23
25	as proposed, ranges from 5 metres to 30 metres? 09:49:19	25	of the time first for a wind farm, but certainly 09:50:23

	Page 48		Page 49
1	not the first for the technology. 09:50:26	1	another foundation system would be used. 09:51:21
2	Q. Okay. But we agree on first for a 09:50:28	2	Do you see that? 09:51:23
3	wind farm? 09:50:30	3	A. Yes. 09:51:24
4	A. Yes. 09:50:30	4	Q. Now, in your report you've not 09:51:24
5	Q. Okay. Now, let's turn to page 24 09:50:31	5	opined on what foundations would be used in less 09:51:26
6	of your first report, which is at Tab 1. 09:50:32	6	than 6 metres of water or what this would mean for 09:51:28
7	And here you are discussing water 09:50:48	7	their manufacture or their impact on the project the 09:51:31
8	depth considerations for the installation of 09:50:49	8	project schedule; correct? 09:51:34
9	foundations under Section 4.3.1. 09:50:51	9	A. No. I mean, what I can contribute 09:51:35
10	Do you see where I am? 09:50:55	10	to this is that we've this is a system that we've 09:51:37
11	A. Yes, I do. 09:50:56	11	worked on with Weeks Marine previously. 09:51:40
12	Q. And in the first paragraph, the 09:50:57	12	This has been originally developed for 09:51:43
13	last sentence, you note that: 09:50:58	13	the freshwater wind project in Lake Erie, and we've 09:51:45
14	"The system, as designed, requires 09:51:00	14	proven the stability of the system in the flotation 09:51:48
15	a minimum water depth of 09:51:02	15	as low as 6 metres because that's that's as low 09:51:50
16	8.2 metres at the port, the 09:51:04	16	as we've been asked to look at it. 09:51:55
17	designed turbine location and 09:51:05	17	Chances are good that in less than 09:51:57
18	along a navigational fairway 09:51:06	18	6 metres, because the foundations are lighter 09:51:59
19	between the two points." 09:51:08	19	weight, they would not draw as much water. They 09:52:02
20	[As read] 09:51:10	20	would be shallower. So chances are you would be 09:52:04
21	Do you see that? 09:51:10	21	able to employ the same system in less than 6, 09:52:07
22	A. I do. 09:51:11	22	metres but we've not run calculations to that 09:52:11
23	Q. And at the end of the second 09:51:11	23	effect. 09:52:13
24	paragraph when discussing installation in less than 09:51:13	24	Q. Okay. And you've also not opined 09:52:13
25	6 metres of water, you note that you have assumed 09:51:15	25	what would be done for what water depths between the 09:52:15
	D 50		
	Page 50		Page 51
1	Page 50	1	Page 51
1	6 metres and 8.2 metres; correct? 09:52:16	1	it is between 5 and 10, so I agree that some might 09:53:20
2	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19	2	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23
2	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20	2	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25
2 3 4	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21	2 3 4	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27
2 3 4 5	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22	2 3 4 5	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29
2 3 4 5 6	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24	2 3 4 5 6	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30
2 3 4 5 6 7	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26	2 3 4 5 6 7	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33
2 3 4 5 6	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27	2 3 4 5 6	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36
2 3 4 5 6 7 8	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30	2 3 4 5 6 7 8	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36
2 3 4 5 6 7 8	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27	2 3 4 5 6 7 8 9	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37
2 3 4 5 6 7 8 9	6 metres and 8.2 metres; correct? 09:52:16 A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:35	2 3 4 5 6 7 8 9 10	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38
2 3 4 5 6 7 8 9 10	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:35 on the screen as well. 09:52:37	2 3 4 5 6 7 8 9	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:40
2 3 4 5 6 7 8 9 10 11	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:35 on the screen as well. 09:52:37 BY MS. SQUIRES: 09:52:39	2 3 4 5 6 7 8 9 10 11	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:40 Q. So it's uncertain right now? 09:53:41
2 3 4 5 6 7 8 9 10 11 12	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. 09:52:20 Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. 09:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:35 on the screen as well. 09:52:37 BY MS. SQUIRES: 09:52:39 Q. Now, this is the 2015 project 09:52:47	2 3 4 5 6 7 8 9 10 11 12	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:41 A. There is a possibility. 09:53:43
2 3 4 5 6 7 8 9 10 11 12 13	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. O9:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:35 on the screen as well. O9:52:37 BY MS. SQUIRES: O9:52:39 Q. Now, this is the 2015 project 09:52:49 layout for the Wolfe Island Shoals wind farm. And O9:52:49	2 3 4 5 6 7 8 9 10 11 12 13 14	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:41 A. There is a possibility. 09:53:43 Q. And to your knowledge, then 09:53:44
2 3 4 5 6 7 8 9 10 11 12 13 14	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. O9:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. O9:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to O9:52:30 hand out a copy so you can see, but it will come up O9:52:37 BY MS. SQUIRES: O9:52:39 Q. Now, this is the 2015 project O9:52:49 if you look there on the right-hand side, it O9:52:53 indicates the different dots for the different O9:52:54 turbines are based on different water depth. And O9:52:57	2 3 4 5 6 7 8 9 10 11 12 13 14 15	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:40 Q. So it's uncertain right now? 09:53:41 A. There is a possibility. 09:53:44 there's nothing in the SgurrEnergy schedule or in 09:53:45
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. 09:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to 09:52:30 hand out a copy so you can see, but it will come up 09:52:37 BY MS. SQUIRES: 09:52:37 BY MS. SQUIRES: 09:52:39 Q. Now, this is the 2015 project 09:52:47 layout for the Wolfe Island Shoals wind farm. And 09:52:53 indicates the different dots for the different 09:52:54 turbines are based on different water depth. And 09:52:57 this is found at page 24 of the second Sgurr report. 09:53:00	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. SQUIRES: 09:53:36 Q. So, it's uncertain 09:53:37 A on those foundations between 5 09:53:38 and 6 metres. 09:53:40 Q. So it's uncertain right now? 09:53:41 A. There is a possibility. 09:53:43 Q. And to your knowledge, then 09:53:44 there's nothing in the SgurrEnergy schedule or in 09:53:45 any other technical reports filed by the Claimant 09:53:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	6 metres and 8.2 metres; correct? A. No. We cut off our analysis 09:52:19 always 6 metres. Q. Now, I just want to haul up 09:52:21 a demonstrative for everyone to look at. O9:52:22 MS. SQUIRES: And Donnie, if you could 09:52:24 haul up slide 1. O9:52:26 I think a copy of them has been handed 09:52:27 out or you have them there. Melissa is going to O9:52:30 hand out a copy so you can see, but it will come up O9:52:37 BY MS. SQUIRES: O9:52:39 Q. Now, this is the 2015 project O9:52:49 if you look there on the right-hand side, it O9:52:53 indicates the different dots for the different O9:52:54 turbines are based on different water depth. And O9:52:57	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	it is between 5 and 10, so I agree that some might 09:53:20 be more than 6 there are a possibility here that 09:53:23 some of those foundations could not employ the 09:53:25 technology that you've recommended into your report? 09:53:27 THE WITNESS: No, I suggested that 09:53:29 they may be able to use that technology, but we have 09:53:30 not proven as to such and run the calculation 09:53:33 numbers 09:53:36 BY MS. And to your knowledge, then 09:53:44 there's nothing in the SgurrEnergy schedule or in 09:53:48 any other technical reports filed by the Claimant 09:53:48 that discusses what other technology could be used 09:53:50 in the event that you could not use the methodology 09:53:52 that you provide in your report? 09:53:57 another technology. The only part that I would add 09:53:58

	Page 52		Page 53
1	lay out wasn't wasn't set, and from general 09:54:08	1	surface sediment." 09:55:12
2	experience with other projects. This is part of the 09:54:11	2	Do you see that? 09:55:13
3	normal design phase. 09:54:13	3	A. I do. 09:55:15
4	Once you establish the technology and 09:54:15	4	Q. And we're going to turn back to 09:55:14
5	you understand the limits of it, you revisit your 09:54:17	5	page 8 of your first report, and we're going to look 09:55:16
6	turbine lay1out and then you adapt you adapt that 09:54:19	6	at the first paragraph. 09:55:21
7	layout to fit the limits of your technology. 09:54:23	7	It indicates that these initial 09:55:29
8	So multiple iterations of this layout, 09:54:26	8	
9		9	8 · · · · · · · · · · · · · · · · · · ·
10	like I said, while we didn't have anything to do 09:54:27	10	75 percent of the proposed foundations are located 09:55:33 in area of where the bedrock is within 2 metres of 09:55:36
	with them, would have been normal as parts of that 09:54:30		
11	development phase. 09:54:33	11	the lake bottom. Do you see that? 09:55:40
12	Q. Okay. So the stage we're at now 09:54:34	12	A. I do. 09:55:42
13	then with the little bit of uncertainty or the 09:54:35	13	Q. And if we turn ahead to page 13, 09:55:42
14	uncertainty that remains is because of the early 09:54:37	14	you indicate there in table 3.1 that one of the 09:55:46
15	stage developments of the project? 09:54:39	15	design parameters that you used to select 09:55:50
16	A. Yes, I would say that's correct. 09:54:41	16	gravity-based foundation is the assumption that 09:55:54
17	Q. All right. Let's turn to page 55 09:54:43	17	there's 1.5 metres of loose sediment over limestone 09:55:55
18	of your second report. 09:54:45	18	bedrock. Correct? 09:56:01
19	You note there that: 09:54:57	19	A. That's correct. 09:56:02
20	"Based on the preliminary geotech 09:54:58	20	Q. So despite 25 percent of the 09:56:03
21	studies," the ones that you in 09:55:01	21	turbines being in more than 2 metres of sediment, 09:56:03
22	fact did review, I guess, "the 09:55:03	22	you've based your report conclusions on a uniform 09:56:04
23	project area is comprised of 09:55:04	23	assumption of 1.5 metres; correct? 09:56:08
24	shallow bedrock from exposed 09:55:06	24	A. Well, we have that's correct, 09:56:10
25	overlay by as much as 2 metres of 09:55:08	25	but we have to understand why. I mean, we're in 09:56:11
	Page 54		Page 55
1	a place where the turbine layout's changing. We 09:56:13	1	for the purposes of your report you haven't 09:57:23
2	talked about that that's part of the normal 09:56:17	2	explored you've just assumed the 1.5? 09:57:24
3	development phase. 09:56:19	3	A. Correct. 09:57:26
4	We also talked about that that area 09:56:20	4	Q. Now, I'm going to turn back to the 09:57:27
5	ranges from 0 to 2 metres. So if we talk about - 09:56:22	5	Canadian seabed research study, and again, 09:57:28
6	if we we assume, and I think everyone agrees. 09:56:26	6	I recognise that you're not familiar with it, but 09:57:30
7	That more sediment is slightly more work, than 09:56:28	7	maybe we can draw a conclusion from it. 09:57:33
8	an average value for design would be 1 metre of 09:56:31	8	A. Okay. 09:57:35
9	loose sediment. So we've erred on the conservative 09:56:34	9	Q. We're going to it's at Tab 6 09:57:35
10	side for one representative design that 1.5 metres 09:56:38	10	and it's Exhibit C-0514. So we're at page 34. 09:57:37
11	would be a reasonable starting space, given that 09:56:41	11	MS. SQUIRES: Donnie, that's 40 in the 09:57:50
12	we're only completing one representative design. 09:56:44	12	PDF. 09:57:51
13	Q. Okay. So it's a starting space, 09:56:46	13	BY MS. SQUIRES: 09:57:53
14	but recognizing that different design or different 09:56:48	14	Q. They note there on the second 09:57:53
15	considerations would have to go in for those 09:56:52	15	paragraph, that there's a deeper channel with 09:57:57
16	25 percent that are outside that realm? 09:56:54	16	a thick layer of sediment over top of the bedrock 09:58:01
17	A. If they were not relocated to 09:56:56	17	that runs through the central region of the proposed 09:58:04
18	other areas within the overall project site, you 09:56:57	18	project area. 09:58:07
19	know, you may have some additional considerations. 09:57:01	19	Do you see where I am? 09:58:08
20	Certainly these can be installed in areas that have 09:57:04	20	A. Yes. 09:58:11
21	more than two metres of surficial sediments. 09:57:08	21	Q. And they note that different 09:58:11
22	Some of the other projects have looked 09:57:12	22	turbine foundation designs may be needed for each of 09:58:14
23	at excavating as much as 6 or 7 metres of sediment, 09:57:14	23	these two different lakebed conditions. That's 09:58:16
	at eneartaing as mach as o or , metres or securion, o, ic, it.		
24	so the technology's certainly applicable. 09:57:18	24	their conclusion. 09:58:19

	Page 56		Page 57
1	Q. Okay. So I just I want to 09:58:21	1	Q. You can see we've placed that then 09:59:24
2	PRESIDENT: Excuse me, where are we, 09:58:23	2	over the 2015 layout that's found at page 24 of the 09:59:26
3	page 4? 09:58:24	3	Sgurr report. So we've the foundations then are 09:59:31
4	MS. SQUIRES: We're at page 34. 09:58:27	4	placed on that channel. 09:59:33
5	PRESIDENT: 34, sorry. 09:58:28	5	MS. SQUIRES: And if we just go to the 09:59:35
6	MR. BISHOP: Is that the first or 09:58:33	6	next slide for ease of there we go. 09:59:37
7	second paragraph? 09:58:34	7	BY MS. SQUIRES: 09:59:39
8	MS. SQUIRES: The second paragraph. 09:58:36	8	Q. So now we can see which turbines 09:59:40
9	So it's the third sentence and the second paragraph 09:58:36	9	in the project layout actually fall within that 09:59:42
10	starting with "Secondly a deep channel" 09:58:42	10	deeper channel or deeper areas of sediment. 09:59:45
11	Okay. So we're going to haul up 09:58:45	11	And you can see there that there's 09:59:48
12	another demonstrative on the screen which was also 09:58:48	12	quite a number of turbines that, in CRS' conclusion, 09:59:50
13	in the package that was handed out, but I Donnie, 09:58:52	13	fall within a deep level of sediment that will 09:59:55
14	if you could click the next slide. 09:58:54	14	require either, as you put it, more considerable 09:59:59
15	So, you can see from this, this is 09:58:56	15	lakebed preparation or would require another type of 10:00:02
16	the the survey that they did and it's actually 09:58:59	16	foundation; is that correct? 10:00:05
17	it's actually the same layout that was provided in 09:59:02	17	A. Those you know, those are 10:00:07
18	that Bill Follett email that we looked at earlier, 09:59:04	18	possible options. Like we talked about the turbines 10:00:07
19	and you can note here that there is that that 09:59:07	19	can be moved to other areas a of the project site. 10:00:09
20	deep channel that's placed in the centre there with 09:59:12	20	Once the settlement's fully understood, whether it 10:00:12
21	a green and blue; do you see that? 09:59:15	21	is a competent sand or rock or gravel, it may be 10:00:14
22	A. I see a deep channel, yes. 09:59:18	22	possible that you don't have to excavate at all. 10:00:18
23	MS. SQUIRES: And if we just go to the 09:59:21	23	But, you know, its the you know, worst case, you 10:00:20
24	next slide, Donnie. 09:59:22	24	may have to have some different considerations. 10:00:22
25	BY MS. SQUIRES: 09:59:23	25	Best case, you can use them as is with no 10:00:24
	DT Mis. SQUINES. 07.37.23		Best case, you can use them as is with no
	Page 58		Page 59
1	Page 58 preparation. That's just something that had to be 10:00:28	1	Page 59 overburden of greater than 3 metres. 10:01:30
1 2	· ·	1 2	•
	preparation. That's just something that had to be 10:00:28		overburden of greater than 3 metres. 10:01:30
2	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30	2	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32
2	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31	2	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32 A. I see the report says that. 10:01:33
2 3 4	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32	2 3 4	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32 A. I see the report says that. 10:01:33 Q. Okay. So according to 10:01:35
2 3 4 5	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34	2 3 4 5	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32 A. I see the report says that. 10:01:33 Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36
2 3 4 5	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34	2 3 4 5 6	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32 A. I see the report says that. 10:01:33 Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40
2 3 4 5 6 7	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34	2 3 4 5 6 7	overburden of greater than 3 metres. 10:01:30 Do you see where I am there? 10:01:32 A. I see the report says that. 10:01:33 Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43
2 3 4 5 6 7 8	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34	2 3 4 5 6 7 8	overburden of greater than 3 metres. Do you see where I am there? 10:01:32 A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46
2 3 4 5 6 7 8	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36	2 3 4 5 6 7 8	overburden of greater than 3 metres. Do you see where I am there? 10:01:32 A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:30
2 3 4 5 6 7 8 9	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37	2 3 4 5 6 7 8 9	overburden of greater than 3 metres. Do you see where I am there? 10:01:32 A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. 10:02:00
2 3 4 5 6 7 8 9 10	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39	2 3 4 5 6 7 8 9 10	overburden of greater than 3 metres. Do you see where I am there? 10:01:32 A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. A. Yep. Okay. Q. All right. So you've assumed 10:02:01
2 3 4 5 6 7 8 9 10 11	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42	2 3 4 5 6 7 8 9 10 11	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03
2 3 4 5 6 7 8 9 10 11 12	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44	2 3 4 5 6 7 8 9 10 11 12 13	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:01:30
2 3 4 5 6 7 8 9 10 11 12 13	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48	2 3 4 5 6 7 8 9 10 11 12 13	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:08 A. Based on the statement. That 10:02:11
2 3 4 5 6 7 8 9 10 11 12 13 14	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54	2 3 4 5 6 7 8 9 10 11 12 13 14 15	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11
2 3 4 5 6 7 8 9 10 11 12 13 14 15	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:11 appears possible.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. 10:02:12 Q. Okay. Now. Before we leave that 10:02:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:09	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that 10:02:20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:09 geotechnical investigative." 10:01:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that 10:02:20 figure, SgurrEnergy also notes that: 10:02:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:09 geotechnical investigative." 10:01:12 And they note there that the layer of 10:01:16	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that 10:02:20 figure, SgurrEnergy also notes that: 10:02:22 "While the majority of lakebed 10:02:24
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:09 geotechnical investigative." 10:01:12 And they note there that the layer of 10:01:16 the over burden material was 1.5 metres for 35 10:01:18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:00 Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that page. In the last paragraph there before the figure, SgurrEnergy also notes that: 10:02:24 comprises between 0 and 1-degree 10:02:26
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:12 And they note there that the layer of 10:01:16 the over burden material was 1.5 metres for 35 10:01:18 percent of the tests that they carried out. 10:01:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that page. In the last paragraph there before the figure, SgurrEnergy also notes that: 10:02:24 comprises between 0 and 1-degree 10:02:26
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	preparation. That's just something that had to be 10:00:28 more understood. 10:00:30 Q. All right. So until we have those 10:00:31 studies, right now we're just guessing. 10:00:32 A. Yes. 10:00:34 Q. Okay. 10:00:34 A. Well, not guessing. We have 10:00:34 educated opinion which suggest they're competent, 10:00:34 but, yeah, more information is necessary. 10:00:36 Q. I don't mean to imply that you're 10:00:37 just pulling this out of the air, for sure. 10:00:39 Now, before we leave this topic, 10:00:42 I want to turn to Tab 13 in your binder, which is 10:00:44 C-1735. And this is the SgurrEnergy foundation 10:00:48 parametric study from October 2013 that we spoke 10:00:54 about earlier. 10:00:58 We're going to turn to page 10. And 10:00:59 we'll look at the paragraph that starts: 10:01:06 "At the Wolfe Island site under 10:01:09 geotechnical investigative." 10:01:12 And they note there that the layer of 10:01:16 the over burden material was 1.5 metres for 35 10:01:18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	overburden of greater than 3 metres. Do you see where I am there? A. I see the report says that. Q. Okay. So according to 10:01:35 SgurrEnergy then, when they did based on the 10:01:36 information that they had before them, 65 percent of 10:01:40 the turbines are located in areas that have an over 10:01:43 burden more than what you've used in your report; 10:01:46 correct? Assuming my math is right on 47 plus 18. 10:01:48 A. Yep. Okay. Q. All right. So you've assumed 10:02:01 1.5 metres, but in fact it could be possible that 10:02:03 upwards if 65 percent of the foundations in the area 10:02:04 don't actually follow that assumption; correct? 10:02:08 A. Based on the statement. That 10:02:11 appears possible. Q. Okay. Now. Before we leave that 10:02:16 tab, if you'll look at the next paragraph on that page. In the last paragraph there before the 10:02:22 "While the majority of lakebed 10:02:24 comprises between 0 and 1-degree 10:02:26 slopes, slopes of 3 and 4 degrees 10:02:29

	Page 60		Page 61
1	Correct? 10:02:36	1	[As read] 10:03:20
2	A. I'm I'm sorry, I was trying to 10:02:36	2	Do you see that? 10:03:21
3	read ahead of you. I apologies. Could you read 10:02:40	3	A. Yeah, I see that that's written, 10:03:22
4	that again? 10:02:42	4	but from my perspective is that people designing the 10:03:23
5	Q. So I'm looking at the sentence 10:02:43	5	foundation, 3 to 4 degrees doesn't scare me at all. 10:03:27
6	where they say: 10:02:44	6	I mean, we've designed foundations that have gone in 10:03:30
7	"While the majority of the lakebed 10:02:45	7	and and sloped steeper than that. Some of the 10:03:33
8	comprises between 0 and 1 10:02:47	8	European projects use more than that. I mean, the 10:03:36
9	degree" 10:02:49	9	gravel mats that we place have anywhere between 30 10:03:39
10	A. Yes. 10:02:49	10	and 45 degrees angles to taper the mats. So 10:03:41
11	Q. (Reading) 10:02:49	11	accommodating 3 to 4 degrees I don't see as a major 10:03:45
12	"Slopes of 3 and 4 degrees exist 10:02:49	12	technical challenge. 10:03:49
13	in some parts"? [As read] 10:02:52	13	Q. Okay. So you differ in opinion 10:03:51
14	A. Yes. 10:02:53	14	from SgurrEnergy on that point? 10:03:52
15	Q. If we move ahead to page 29 to see 10:02:53	15	A. In this particular point, the 10:03:53
16	the conclusion that they've drawn from that, if you 10:02:55	16	I don't see 3 to 4 degrees as a technical challenge. 10:03:55
17	look at the second-last paragraph, they note that in 10:03:03	17	Q. Okay. Now, I want to move now to 10:04:01
18	their opinion: 10:03:08	18	discuss the manufacturing and the foundation at the 10:04:05
19	"Uneven terrain encountered at the 10:03:09	19	St. Mary's cement facility. 10:04:09
20	lakebed that would require 10:03:11	20	A. Okay. 10:04:11
21	significant preparation works 10:03:13	21	Q. And you've noted for the purposes 10:04:12
22	prior to leveling of the 10:03:14	22	of your report, you've assumed this is the facility, 10:04:13
23	gravity-based foundation, it may 10:03:17	23	it is a representative facility; correct? 10:04:16
24	also cause concern over 10:03:18	24	A. Yes. 10:04:18
25	stability." 10:03:20	25	Q. And if we turn to page 29 of the 10:04:19
	P. (2)	-	P. (2)
	Page 62	1	Page 63
1 2	second SgurrEnergy report. So again that's not in 10:04:21	1 2	So again, it's it's in the the 10:05:40
2	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24	2	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43
2	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33	2 3	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45
2 3 4	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that:	2 3 4	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03
2	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39	2 3 4 5	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06
2 3 4 5	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40	2 3 4 5 6	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10
2 3 4 5 6	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43	2 3 4 5 6 7	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11
2 3 4 5 6 7	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45	2 3 4 5 6 7 8	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13
2 3 4 5 6 7 8	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49	2 3 4 5 6 7	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16
2 3 4 5 6 7 8 9	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49	2 3 4 5 6 7 8	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17
2 3 4 5 6 7 8 9	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50	2 3 4 5 6 7 8 9	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21
2 3 4 5 6 7 8 9 10	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52	2 3 4 5 6 7 8 9 10	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22
2 3 4 5 6 7 8 9 10 11	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55	2 3 4 5 6 7 8 9 10 11	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22
2 3 4 5 6 7 8 9 10 11 12	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56	2 3 4 5 6 7 8 9 10 11 12 13	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22
2 3 4 5 6 7 8 9 10 11 12 13	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:49 a possible location because 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01	2 3 4 5 6 7 8 9 10 11 12 13 14	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:23 outer boundary of the site as you had designed it at 10:06:23
2 3 4 5 6 7 8 9 10 11 12 13 14	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:49 a possible location because 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15	2 3 4 5 6 7 8 9 10 11 12 13 14 15	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:16	2 3 4 5 6 7 8 9 10 11 12 13 14 15	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:16 the back. It's where you have the different maps 10:05:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:29
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we – sorry. If we come 10:04:57 back to your report – I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:19 and conceptual designs. We're going to look at the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:29 Q. Okay. And it shows that the 10:06:31
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:39 a possible location because 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:19 and conceptual designs. We're going to look at the 10:05:21 third page, which is the — a Google earth view of 10:05:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:39 Q. Okay. And it shows that the 10:06:31 majority of the land then is used up by the three 10:06:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:19 and conceptual designs. We're going to look at the 10:05:21 third page, which is the — a Google earth view of 10:05:27 the St. Mary's facility. 10:05:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:31 majority of the land then is used up by the three 10:06:32 production lines; correct? 10:06:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:19 and conceptual designs. We're going to look at the 10:05:21 third page, which is the — a Google earth view of 10:05:27 the St. Mary's facility. 10:05:31 A. Okay. 10:05:34	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:29 Q. Okay. And it shows that the 10:06:31 majority of the land then is used up by the three 10:06:32 production lines; correct? 10:06:34 A. I mean, in in this case I think 10:06:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	second SgurrEnergy report. So again that's not in 10:04:21 your binder; that's the additional one. We look at 10:04:24 the third last paragraph on page 29. They note 10:04:33 that: 10:04:39 "Bowmanville was selected as 10:04:40 repurposing an existing facility 10:04:43 or capitalizing on the existing 10:04:45 infrastructure of these facilities 10:04:49 is expected to reduce facility 10:04:50 development, time and cost." 10:04:52 [As read] 10:04:55 Do you see that? 10:04:56 A. I do. 10:04:56 Q. Now, if we — sorry. If we come 10:04:57 back to your report — I should get the page number. 10:05:01 So we're going to come to your first 10:05:15 report and we're going to look at the appendices in 10:05:19 and conceptual designs. We're going to look at the 10:05:21 third page, which is the — a Google earth view of 10:05:27 the St. Mary's facility. 10:05:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So again, it's it's in the the 10:05:40 first COWI report in the appendices at the back 10:05:43 you'll see some maps. All right. So this is 10:05:45 a Google earth view of the facility, and then on the 10:06:03 next page you've drawn in there three production 10:06:06 lines into that that area; correct? 10:06:10 A. That's correct. 10:06:11 Q. And it notes there one of the 10:06:13 arrows that says that: 10:06:16 "This is the planned extent of the 10:06:17 site." 10:06:21 It that correct? 10:06:22 A. Yes, that's correct. 10:06:22 Q. Okay. So this represents the 10:06:22 outer boundary of the site as you had designed it at 10:06:23 the time; correct? 10:06:27 A. That was the limit of what we 10:06:28 we had recommended based on that scenario, yes. 10:06:31 majority of the land then is used up by the three 10:06:32 production lines; correct? 10:06:34

	Page 64		Page 65
1	though, correct? 10:06:50	1	sheet to the sketch 3. We see a large amount of 10:07:55
2	A. Okay. So we said 26 hectares for 10:06:52	2	un-developed land outside of that yellow line and 10:07:58
3	the area contained within the yellow line, and the 10:06:54	3	because that yellow line's arbitrary I mean. We 10:08:00
4	actual production lines occupy approximately 10:06:58	4	only drew that line because that's what we 10:08:03
5	15 hectares, so that's that's more than half. 10:07:01	5	recommended based on that scenario, but there also 10:08:05
6	Yeah, that's I'll give you the majority. 10:07:03	6	appears to be extra undeveloped land to the east, to 10:08:07
7	Q. Okay. Now, in your in your 10:07:06	7	the west, to the north. All of those those rocky 10:08:10
8	second report, you noted that the facility had 10:07:09	8	and and green areas appear un-developed and I 10:08:13
9	been the design of the facility had been updated 10:07:13	9	you know, based on the type of analysis we did, 10:08:17
10	from the May 2014 and now uses six parallel 10:07:15	10	I see no reason why you couldn't use those as well. 10:08:19
11	construction lines; correct? 10:07:20	11	Q. Okay. So then in order to get the 10:08:22
12	A. We did not actually update this 10:07:22	12	six production lines, we're talking more than just 10:08:24
13	design. We said, "Based on that new scenario we 10:07:25	13	repurposing an existing facility by expanding it 10:08:26
14	would recommend 6 lines," yes. 10:07:28	14	with the consequence of time and money; correct? 10:08:30
15	Q. So you've not provided any kind of 10:07:30	15	A. The repurpose and whatnot was not 10:08:33
16	design details for a sixth production line? 10:07:32	16	COWI language, but, you know, again, if we're 10:08:35
17	A. That's correct. 10:07:36	17	building fabrication rails here, I mean, we can 10:08:37
18	Q. And if we look at that map then, 10:07:36	18	build them next door to where they are too. 10:08:40
19	you would agree with me that you cannot fit as 10:07:38	19	There's there's no technical difference. 10:08:43
20	the as it currently looks right there now in that 10:07:40	20	Q. Okay. But given the scale of the 10:08:44
21	planned extensive site, you could not fit six 10:07:44	21	diagram, if the three takes up the majority, if 10:08:46
22	production lines; correct? 10:07:47	22	you're going to build more lines next door, 10:08:48
23	A. No, I don't agree because, (1), 10:07:49	23	presumably you would have to infill some lakebed or 10:08:51
24	we're not limited to this extent. 10:07:50	24	something; correct? 10:08:54
25	If we go back one more one more 10:07:53	25	A. No. We could move the location of 10:08:55
	Page 66		Page 67
1		1	_
1 2	the elevator platform and construct the lines 10:08:56	1 2	Page 67 go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00
	the elevator platform and construct the lines 10:08:56 onshore and not use the jetty. We could use the 10:08:59		go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00
2	the elevator platform and construct the lines 10:08:56 onshore and not use the jetty. We could use the 10:08:59	2	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00
2	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the 10:09:03	2 3	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04
2 3 4	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the construction lines on shore, put the elevator 10:09:03	2 3 4	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07
2 3 4 5	the elevator platform and construct the lines 10:08:56 onshore and not use the jetty. We could use the 10:08:59 jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots — as you said, 10:09:12	2 3 4 5	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04
2 3 4 5 6	the elevator platform and construct the lines 10:08:56 onshore and not use the jetty. We could use the 10:08:59 jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12	2 3 4 5 6	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09
2 3 4 5 6 7 8	the elevator platform and construct the lines 10:08:56 onshore and not use the jetty. We could use the 10:08:59 jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots — as you said, 10:09:12	2 3 4 5 6 7	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11
2 3 4 5 6 7 8 9	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12 now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19	2 3 4 5 6 7 8	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13
2 3 4 5 6 7 8 9 10	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12 now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19 options; this is the only one we submitted. 10:09:20	2 3 4 5 6 7 8	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17
2 3 4 5 6 7 8 9 10 11 12	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator platform on the shoreline. So there is a number of 10:09:08 options to expand. Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19 options; this is the only one we submitted. 10:09:20 Q. Okay. Now, you we've discussed 10:09:22	2 3 4 5 6 7 8 9	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19
2 3 4 5 6 7 8 9 10 11 12 13	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12 now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19 options; this is the only one we submitted. 10:09:20 Q. Okay. Now, you we've discussed 10:09:22 in your first report the three production lines and 10:09:23	2 3 4 5 6 7 8 9 10	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24
2 3 4 5 6 7 8 9 10 11 12 13 14	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12 now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19 options; this is the only one we submitted. 10:09:20 Q. Okay. Now, you we've discussed 10:09:22 in your first report the three production lines and 10:09:23 that you've suggested boosting this up to six 10:09:26	2 3 4 5 6 7 8 9 10 11	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the elevator platform and construct the lines on shore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator 10:09:03 platform on the shoreline. So there is a number of 10:09:08 options to expand. 10:09:10 Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right 10:09:12 now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of 10:09:19 options; this is the only one we submitted. 10:09:20 Q. Okay. Now, you we've discussed 10:09:22 in your first report the three production lines and 10:09:23 that you've suggested boosting this up to six 10:09:26 production lines in your in your second report. 10:09:29	2 3 4 5 6 7 8 9 10 11 12 13	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of judge 10:09:03 Q. Okay. So lots as you said, judge 10:09:12 numerous theoretically possible, but as of right now, we don't have that design in front of us? A. Yeah, that's correct. Lots of judge 10:09:19 options; this is the only one we submitted. Q. Okay. Now, you we've discussed judge 10:09:20 Q. Okay. Now, you we've discussed judge 10:09:23 that you've suggested boosting this up to six judge 10:09:26 production lines in your in your second report. 10:09:32	2 3 4 5 6 7 8 9 10 11 12 13	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator platform on the shoreline. So there is a number of jetty for material staging and we could move the 10:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the 10:09:08 options to expand. Q. Okay. So lots as you said, jetty for material staging and we could move the 10:09:10 Q. Okay. So lots as you said, jetty for material staging and we could move the 10:09:12 numerous theoretically possible, but as of right jetty for material staging and we could move the 10:09:12 numerous theoretically possible, but as of right jetty for material staging and we could move the 10:09:10 Q. Okay. So lots as you said, jetty for material staging and we could move the 10:09:10 A. Yeah, that's correct. Lots of jetty for move the stage of the stage	2 3 4 5 6 7 8 9 10 11 12 13 14 15	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the 10:09:03 construction lines on shore, put the elevator platform on the shoreline. So there is a number of 10:09:08 options to expand. Q. Okay. So lots as you said, 10:09:12 numerous theoretically possible, but as of right now, we don't have that design in front of us? 10:09:17 A. Yeah, that's correct. Lots of Q. Okay. Now, you we've discussed 10:09:20 Q. Okay. Now, you we've discussed 10:09:22 in your first report the three production lines and 10:09:23 that you've suggested boosting this up to six 10:09:29 Now, you've had a chance to review the 10:09:32 rejoinder report of URS, I presume, since they since it's been filed in November, and they noted 10:09:40	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the loop:03 construction lines on shore, put the elevator platform on the shoreline. So there is a number of loop:08 options to expand. Q. Okay. So lots as you said, loop:12 numerous theoretically possible, but as of right now, we don't have that design in front of us? loop:17 A. Yeah, that's correct. Lots of loop:19 options; this is the only one we submitted. loop:20 Q. Okay. Now, you we've discussed loop:22 in your first report the three production lines and loop:23 that you've suggested boosting this up to six production lines in your in your second report. Now, you've had a chance to review the loop:32 rejoinder report of URS, I presume, since they - since it's been filed in November, and they noted an either further problem with the six production loop:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at 10:10:40
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of juicop:03 platform on the shoreline. So there is a number of juicop:08 Okay. So lots as you said, juicop:12 numerous theoretically possible, but as of right now, we don't have that design in front of us? A. Yeah, that's correct. Lots of juicop:19 Okay. Now, you we've discussed juicop:20 Q. Okay. Now, you we've discussed juicop:22 in your first report the three production lines and juicop:23 that you've suggested boosting this up to six production lines in your in your second report. Now, you've had a chance to review the juicop:32 rejoinder report of URS, I presume, since they since it's been filed in November, and they noted an either further problem with the six production lines and that results in a bottleneck in 10:09:45	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at they 10:10:40 a number of activities that were required, and they 10:10:42
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of lo:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the lo:09:03 platform on the shoreline. So there is a number of lo:09:08 options to expand. Q. Okay. So lots as you said, jetty for material staging in form of us? lo:09:12 numerous theoretically possible, but as of right lo:09:12 now, we don't have that design in front of us? lo:09:17 A. Yeah, that's correct. Lots of lo:09:19 options; this is the only one we submitted. lo:09:20 Q. Okay. Now, you we've discussed lo:09:22 in your first report the three production lines and lo:09:23 that you've suggested boosting this up to six lo:09:26 production lines in your in your second report. Now, you've had a chance to review the lo:09:32 rejoinder report of URS, I presume, since they Now, you've had a chance to review the lo:09:35 since it's been filed in November, and they noted an either further problem with the six production lo:09:45 production; correct? lo:09:48	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at 10:10:40 a number of activities that were required, and they 10:10:42 were looking at some of the schedule, but what's not 10:10:44
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:03 construction lines on shore, put the elevator loop:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:09:08 options to expand. Q. Okay. So lots as you said, jetty for material staging and we could move the loop:12 numerous theoretically possible, but as of right loop:12 now, we don't have that design in front of us? loop:17 A. Yeah, that's correct. Lots of loop:19 options; this is the only one we submitted. loop:20 Q. Okay. Now, you we've discussed loop:20 in your first report the three production lines and loop:23 that you've suggested boosting this up to six loop:26 production lines in your in your second report. loop:29 Now, you've had a chance to review the loop:29 Now, you've had a chance to review the loop:32 rejoinder report of URS, I presume, since they loop:35 since it's been filed in November, and they noted loop:40 an either further problem with the six production loop:48 A. Yeah. We we take exception to loop:48	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at 10:10:40 a number of activities that were required, and they 10:10:42 were looking at some of the schedule, but what's not 10:10:44 included in the schedule is when the foundations are 10:10:47
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:03 construction lines on shore, put the elevator loop:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:09:08 options to expand. Q. Okay. So lots as you said, jetty for material staging and we could move the loop:12 numerous theoretically possible, but as of right loop:12 numerous theoretically possible, but as of right loop:12 now, we don't have that design in front of us? loop:17 A. Yeah, that's correct. Lots of loop:19 options; this is the only one we submitted. loop:20 Q. Okay. Now, you we've discussed loo:09:20 in your first report the three production lines and loo:09:23 that you've suggested boosting this up to six loop:26 production lines in your in your second report. loop:29 Now, you've had a chance to review the loo:09:29 Now, you've had a chance to review the loo:09:32 rejoinder report of URS, I presume, since they - loop:35 since it's been filed in November, and they noted loop:40 an either further problem with the six production loop:42 lines and that results in a bottleneck in loop:48 A. Yeah. We we take exception to loop:48 a significant portion of the URS report. They loop:50	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at 10:10:40 a number of activities that were required, and they 10:10:42 were looking at some of the schedule, but what's not 10:10:44 included in the schedule is when the foundations are 10:10:47 actually moved from position to position and URS has 10:10:50
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the elevator platform and construct the lines onshore and not use the jetty. We could use the jetty for material staging and we could move the jetty for material staging and we could move the jetty for material staging and we could move the construction lines on shore, put the elevator platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:03 construction lines on shore, put the elevator loop:09:03 platform on the shoreline. So there is a number of jetty for material staging and we could move the loop:09:08 options to expand. Q. Okay. So lots as you said, jetty for material staging and we could move the loop:12 numerous theoretically possible, but as of right loop:12 now, we don't have that design in front of us? loop:17 A. Yeah, that's correct. Lots of loop:19 options; this is the only one we submitted. loop:20 Q. Okay. Now, you we've discussed loop:20 in your first report the three production lines and loop:23 that you've suggested boosting this up to six loop:26 production lines in your in your second report. loop:29 Now, you've had a chance to review the loop:29 Now, you've had a chance to review the loop:32 rejoinder report of URS, I presume, since they loop:35 since it's been filed in November, and they noted loop:40 an either further problem with the six production loop:48 A. Yeah. We we take exception to loop:48	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	go through their assumptions if you want, but the 10:09:59 the constructions activities are not limited to 10:10:00 a certain position on the line. 10:10:02 I mean, an informed and experienced 10:10:04 contractor will know when they need to move the 10:10:07 foundations along the line to receive the next stage 10:10:09 of construction. 10:10:11 So, I mean, also these facilities with 10:10:13 their cross rails, the entire design of the system 10:10:17 is is intended to reduce bottlenecks, so we 10:10:19 might see that as a risk. This is actually 10:10:24 a risk-mitigation strategy. 10:10:26 Q. Okay. So but when URS was 10:10:27 looking at that and made that conclusion on the 10:10:30 bottleneck, they were looking at the project 10:10:32 schedule; correct? They were looking at the 10:10:34 sequential production of those foundations; do you 10:10:36 recall? 10:10:38 A. They yes. They were looking at 10:10:40 a number of activities that were required, and they 10:10:42 were looking at some of the schedule, but what's not 10:10:44 included in the schedule is when the foundations are 10:10:47

Page 68 Page 69 1 1 10:10:59 foundation is moved and then you do the entirety because of this and because of the redundancies in 10:11:59 2 2 duration of that next construction activity and then 10:11:02 the reliability of this system, this is the type of 10:12:01 3 3 the foundation is moved, and that's not the case. system that France is moving to in some of the new 10:12:03 10:11:05 4 4 These -- these are fabricated in such a way that like Fécamp and Saint-Nazaire projects. So I mean, 10:12:06 10:11:07 they've -- I mean, this is a system that's proven 10:12:08 5 5 maybe in one position, yes, the -- the -- I don't 10:11:10 6 6 know the durations, but say component A takes ten 10:11:12 its reliability. 10:12:12 7 7 days to build, but that could take six days in 10:11:16 Q. Okay. And -- but just to confirm, 10:12:13 8 position one and four days in position two. And 10:11:19 8 though, we still -- we don't have that explanation 10:12:14 9 9 that's simply based on the other production rates 10:11:21 in the report. You're providing that now, but URS 10:12:17 10 10 and tying all the different crafts together. 10:11:23 wouldn't have the benefit of that knowledge of how 10:12:21 11 Like I said, that's -- that's 11 you were going to modify this when they wrote their 10:12:23 10:11:26 12 12 a construction scheduling issue that an experienced 10:11:28 report; correct? 10:12:25 13 contractor's used to dealing with. 10:11:29 13 A. We did not submit it. Those are 10:12:26 14 Q. Okay. So you can fix it, as you 10:11:31 14 the press releases that are in many of the offshore 10:12:27 15 15 said in your opening presentation then, by moving 10:11:33 wind magazines, 2015 and 2016. So if they were 16 workers and equipments along that line to deal with 10:11:36 16 reading those, they could have had the benefit, but 10:12:34 17 17 10:12:37 those bottleneck issues? 10:11:38 we did not provide them. 18 A. Well, like I said, this entire 10:11:40 18 Q. Now, I just have one last topic 10:12:38 19 system is designed to reduce bottle necks and 19 I want to explore with you and that's the offshore 10:12:40 10:11:43 20 20 mitigate that possibility, so we don't see the 10:11:45 substation that could possibly be employed for the 10:12:42 21 21 possibility of bottlenecks as a major issue, but project, and I'm not sure we are aware, but if 22 22 yes, that's the benefit of the system is that you're 10:11:51 you're not, we can turn to page 34 of the second 10:12:47 23 23 able to relieve a lot of those potential issues. 10:11:53 Sgurr report. 10:12:50 24 24 Q. Okay. 10:11:56 A. I was going to say, I can try to 10:12:51 25 25 A. I should also point out that 10:11:56 answer these, but the substation was outside the 10:12:52 Page 70 Page 71 1 1 wouldn't use an offshore type of foundation, but if 10:13:42 scope of our work. 10:12:54 2 2 Q. I just have a couple of questions. 10:12:55 you go back to my presentation, one of the things 10:13:46 3 3 A. That's the big book again? 10:12:57 that we've done, very early on, but I showed the 10:13:48 4 Q. Yep. Big book, page 34. We're 10:12:59 4 example of it the Nysted project, and right next to 10:13:52 looking under Section 3.1.10. 5 10:13:02 5 that is an offshore substation. So there would be 10:13:56 6 A. Okay. 10:13:07 6 a few additional calculations, but the offshore 10:13:58 7 Q. And you can see there in the third 10:13:07 7 substation, you use the same foundation as the 10:14:01 8 sentence that they note that: 10:13:09 8 turbines in that particular case. 10:14:04 9 "An island-based substation has: 10:13:11 9 Q. In that case? 10:14:05 1.0 Been proposed at this stage of the 10:13:15 10 A. So it may be possible to re-use 10:14:06 11 design of the project, but other 10:13:16 11 the turbine foundations. 10:14:08 12 options are possible, including 10:13:18 12 Q. Okay. Again, possible, but we 10:14:10 13 a substation mounted on 10:13:20 13 haven't done the design work for this project? 10:14:11 14 a foundation platform." [As read] 10:13:22 14 A. No, based on the scope of design 10:14:13 15 Do you see that? 10:13:23 15 at which Windstream was proceeded, that work would 10:14:14 16 A. You know, again, we didn't have 10:13:24 16 not have been done yet. 10:14:17 17 anything to do with this. I do see that it says. 10:13:25 17 MS. SQUIRES: Give me one second and 10:14:19 18 Q. Yeah, so my question is not then 10:13:27 18 I'll check with my colleagues. 10:14:20 19 related to the appropriateness of a substation. My 10:13:28 19 Those are all my questions, 10:14:53 20 question then is the foundation platform that would 10:13:31 20 10:14:55 Mr. Cooper. 21 be used for that type of substation, you have not 10:13:32 21 THE WITNESS: Thank you. 10:14:56 22 accounted for that design or manufacture in the 10:13:35 22 PRESIDENT: Thank you, Ms. Squires. 10:14:56 23 manufacturing facility that you have designed; 10:13:38 23 Any question in redirect? 24 correct? 10.13.39 24 MS. SEERS: We do, Mr. Chair. If 10:15:01 25 A. Well, if it were on an island, it 10:13:40 25 I could ask for the Tribunal's indulgence of a few 10:15:03

	Page 72		Page 73
1	minutes to get it together. 10:15:04	1	2008. 10:21:02
2	PRESIDENT: Five minutes. 10:15:07	2	Q. Okay. Thank you. You'll recall 10:21:03
3	Recess taken at 10:15 a m. 10:15:13	3	that Ms. Squires asked you questions about the 10:21:09
4	Upon resuming at 10:20 a m. 10:15:13	4	source of your information regarding the lakebed. 10:21:11
5	PRESIDENT: Let's go on. 10:20:24	5	You mentioned during your presentation your 10:21:15
6	BY MS. SEERS: 10:20:25	6	involvement with various projects in the general 10:21:18
7	Q. Thank you, Mr. President. As 10:20:25	7	area, and so I guess if if you could clarify 10:21:20
8	I indicated to Ms. Nettleton, we're ready to proceed 10:20:25	8	whether you have any other sources of knowledge 10:21:25
9	with most of my questions. My colleagues are simply 10:20:29	9	about the project area from from those 10:21:27
10	researching one minor point and hopefully the answer 10:20:31	10	projects from your involvement in those other 10:21:30
11	will arrive before we reach the end of the question. 10:20:37	11	projects? 10:21:32
12	PRESIDENT: We will take it in stride, 10:20:41	12	A. The most of our information, 10:21:33
13	then. 10:20:42	13	like I said, was was derived from information 10:21:35
14	MS. SEERS: We will. 10:20:43	14	provided by Sgurr in a series of reports, and and 10:21:39
15	RE-EXAMINATION BY MS. SEERS: 10:20:43	15	I I don't remember specifically which they were. 10:21:44
16	Q. Mr. Cooper, you will recall that 10:20:43	16	Q. Okay. You'll recall that 10:21:46
17	Ms. Squires asked you questions about the Thornton 10:20:44	17	Ms. Squires asked you questions about the level of 10:21:52
18	Bank project. 10:20:47	18	design work conducted in your report. In this, 10:21:54
19	A. Yes, she did. 10:20:47	19	but-for scenario in which we're operating where 10:21:58
20	Q. And she took you to various dates 10:20:52	20	we're assuming that the the moratorium did not 10:22:01
21	regarding it. Just to be clear for the record, are 10:20:52	21	occur and that your report is about what would more 10:22:03
22	you aware of when the Thornton Bank project was 10:20:54	22	likely than not have occurred in that scenario, 10:22:08
23	commissioned and when its foundations would have 10:20:57	23	where in the project cycle would the detailed design 10:22:10
24 25	been designed in that process? 10:20:59	24 25	work that Ms. Squires referred you to have occurred? 10:22:13
	A. It would have been approximately 10:21:01	25	A. Detailed design work on a project 10:22:20
	Page 74		Page 75
1	like this doesn't occur until just before 10:22:22	1	create. They would addendum on the the layout of 10:23:42
2	construction. Normally at that point, the developer 10:22:25	2	the site, but it's it's a it's a flexible 10:23:45
3	has has already selected a contractor, the 10:22:27	3	process. 10:23:47
4	preliminary design is in place, and that final 10:22:30	4	Q. Thank you. 10:23:49
5	design is only completed. Certainly less than 10:22:35	5	You'll recall that Ms. Squires asked 10:23:50
6	a year but within a few months of actual 10:22:37	6	you questions about locating turbines within 10:23:51
7	construction. 10:22:39	7	a particular channel located at the at the 10:23:54
8 9	Q. You recall that Ms. Squires asked 10:22:46	8 9	project site. 10:23:57
	you questions about the proposed fabrication 10:22:48	10	Could you provide some context as to 10:23:59
10 11	facility at St. Mary's Cement and you gave answers 10:22:48 about the options that were available at that 10:22:54	11	the design work that would have been done had the 10:24:01
12	1	12	project been permitted to proceed in regards to the 10:24:04 siting of turbines within that particular area of 10:24:07
13	facility. 10:22:55 Could you give greater context to the 10:22:56	13	the project? 10:24:10
14	various options that would have been available, more 10:22:58	14	A. Yeah. So as I started to allude 10:24:10
15	generally, for fabrication of the foundations? 10:23:01	15	to, within the project there's normally a huge 10:24:12
16	A. Yeah, so we we identified 10:23:03	16	number of iterations of the actual turbine layout, 10:24:18
17	a number of sites in Hamilton and Toronto in that 10:23:05	17	once within the overall project site. And it starts 10:24:20
18	site in Bowmanville, in in Pickering, in and 10:23:10	18	with generally a pure wind resource assessment and 10:24:23
19	either way, there were a number of un-developed land 10:23:17	19	a very regular uniform grid. Once that's 10:24:27
20	parcels that we found simply by aerial image that 10:23:20	20	established, you start looking at the technical 10:24:32
21	appeared to have good water access and a significant 10:23:25	21	merits of the foundation. So that's some of the 10:24:34
22	amount of upland area available for the assembly 10:23:28	22	cabling issues, length of cable, where the cable has 10:24:36
23	or or for the the fabrication facility. So 10:23:30	23	to go, you know, some other things we weren't we 10:24:39
24	they those you know, the exactly out would 10:23:35	24	get input from other partners on. But all of these 10:24:41
25	depend on the number of turbines you needed to 10:23:40	25	different things are considered and if there are 10:24:44

Page 76 Page 77 1 1 particular turbine locations that are challenging, 10:24:46 then the micro siting is the actual location of each 10:25:54 2 2 the project site is reoriented, either so that it's 10:24:49 turbine within the project, so -- then even when 10:25:57 3 3 within the constraints of the technology that's there's a certain grid system, it may be that 10:25:59 10:24:54 4 4 chosen or for constructibility purposes. 10:24:57 there's an obstruction on the sea floor and 10:26:02 5 5 It could be as simple as going from 10:24:59 a particular turbine needs to move 10 metres in 10:26:05 6 6 a square grid pattern to a diamonds grid pattern, 10:25:01 a certain direction to avoid that. But those type 10:26:08 7 7 relocating turbines from deeper areas to shallower 10:25:04 of issues are -- are very common and normal. 10:26:11 8 areas or very shallow areas to deeper areas. It's 10:25:09 8 Q. And those types of micro --10:26:13 9 all part of the natural iteration. 9 A. And I'm sorry. Yeah, they -- and 10:26:15 10:25:14 10 10 Even at a 30 percent design, it would 10:25:17 that -- that type of issue would not be completed 10:26:15 11 11 be to say there's over 20 iterations of the micro 10:25:17 until much later in the design. 10.26.17 12 12 siting layout. So that's certainly something that 10:25:20 That site information would have to be 10:26:21 13 would have continued to be done and refined as the 10:25:23 13 gathered. You would have completed at least the 65 10:26:22 14 project developed. 10:25:25 14 to 70 percent design of the foundations to better 10:26:25 15 15 understand the type of issues you're trying to site 10:26:28 Q. And you referred just now to 10:25:26 "micro siting layout." Could you provide greater 10:25:27 16 16 around. 10:26:31 17 17 context as to what that is and when that occurs in 10:25:30 Q. Okay. You'll recall that 10:26:32 18 the development cycle? 10:25:33 18 Ms. Squires asked you questions about 10:26:34 19 A. Sorry. So, yes, the micro 10:25:34 19 judging lakebed sediment and how that would impact 10:26:35 20 20 siting -- there's the project siting, which is the 10:25:36 foundation installation. 10:26:39 21 21 overall boundary of the project, and that has to do 10:25:38 I'd like to give you the opportunity 10:26:42 22 22 with the -- the property rights and the land that's 10:25:44 to expand, if you'd like on how judging issues are 10:26:43 23 23 typically handled in the normal course of foundation 10:26:47 leased and other things that we don't normally see. 10:25:46 24 24 By the time it gets to us, we just get an overall 10:25:48 installation? 10:26:49 25 25 boundary and say stay within sight of this. But 10:25:51 A. Yeah, so the -- the -- you know, 10:26:50 Page 78 Page 79 1 first of all, our design was based on one and a half 10:26:53 1 10:28:05 a moment. I think my colleagues have found the 2 2 metres of loose surface sediments. And it may be 10:26:56 answer in question -- or the question, I'll just 10:28:07 3 3 necessary to excavate additional sediment, if that 10:27:00 confer with them for one moment, with your 10:28:09 4 is loose sediment, but the -- the geologic history 10:27:03 4 indulgence? 10:28:11 5 of Lake Ontario, and especially in that area, is 10:27:08 5 PRESIDENT: Yes, of course. 10:28:12 6 competent sediments. So if they're loose nature, 10:27:11 6 [Counsel confer] 10:28:33 7 they may need to be excavated. If they're more 10:27:16 7 BY MS. SEERS: 10:29:34 8 8 competent sediments, they could even remain in 10:27:19 Q. So, this will actually be simply 10:29:34 9 9 10:27:22 a point of clarification for the record regarding place. 10:29:37 That characterisation that would be 10:27:23 10 10 Exhibit C-0514, which is Tab 6 of your binder, 10:29:40 11 11 10:29:46 done, again, with further levels of development that 10:27:24 Mr. Cooper. 12 12 Windstream had not progressed to, but the other 10:27:29 I appreciate you say you didn't recall 10:29:47 13 13 thing to remember too, is that that dredging, that's 10:27:31 looking at this document, and so this is simply to 10:29:49 14 14 a normal process that's done in the Great Lakes. 10:27:34 clarify the record. Perhaps we can request Donnie's 10:29:50 15 It's the same type of operation that is done in 10:27:36 15 assistance in pulling up page 2 of C-0514. 10:29:56 16 10:27:38 16 marinas, in navigation channels. It's You will recall, Mr. Cooper, that 10:30:10 17 17 a well-understood process. It is not a time and 10:27:41 Ms. Squires asked you questions about this document 10:30:12 18 18 labour intensive process and if there were risks and 10:27:45 and suggested that the cable in question was not -- 10:30:15 19 19 sudden additional volumes which -- those volumes or that the work in question had not been done in 10:30:19 10:27:48 20 would be calculated and confirmed before you got to 10:27:52 20 connection with the project area. And I'll simply, 10:30:23 21 construction, but if there were more, it would be 10:27:54 21 for the -- for the record --10:30:25 22 22 a matter of bringing in another dredger, and that's 10:27:57 MS. SQUIRES: Sorry, Ms. Seers, 10:30:30 23 23 certainly not a vessel with -- with limited 10:27:59 I don't mean to interrupt, but I was talking about 10:30:31 24 24 availability. They're commonly available. the previous at Tab 5 was the one that covered only. 10:30:33 10:28:01 25 25 MS. SEERS: Okay, let me just have 10:28:03 So it is C-015, not C-0514. 10:30:37

	Page 80		Page 81
1	MS. SEERS: Okay. 10:30:44	1	You know, these are corporate knowledge. I've had 10:32:05
2	MS. SQUIRES: So this the one that 10:30:46	2	involvement with a few of these, but not 10:32:10
3	you have in your hand is the one that I referred to 10:30:47	3	certainly not all 10:32:12
4	as the offshore wind farm and cable route survey, 10:30:49	4	PRESIDENT: The ones that you know 10:32:13
5	but Tab 5 is simply the cable route survey. 10:30:49	5	about directly. 10:32:14
6	MS. SEERS: I see. So this so for 10:30:54	6	THE WITNESS: In terms of water depth, 10:32:14
7	the record then, I would simply note that this later 10:30:54	7	I know that Nysted and Rodsand were were fairly 10:32:18
8	document, Tab 6, C-0514, says that in the first 10:30:57	8	shallow. They were generally 3 to 12, maybe 10:32:22
9	paragraph that it was conducted to provide conduct 10:31:02	9	15 metres. The Wikinger and Merkur I'm not sure of. 10:32:24
10	a geophysical survey for the proposed wind farm over 10:31:06	10	Thornton Bank was done in up to 27 10:32:31
11	the Wolfe Island Shoals. Sorry if there was 10:31:11	11	metres. I know the surficial sediments, the 10:32:33
12	confusion about that. 10:31:15	12	excavation was low, but there was some. I don't 10:32:35
13	QUESTIONS BY THE TRIBUNAL: 10:31:16	13	know the actual the actual amount. 10:32:36
14	PRESIDENT: Okay. Thank you, 10:31:16	14	The most interesting response to that, 10:32:37
15	Ms. Seers. 10:31:17	15	though, is the London Array project and the 10:32:39
16	The Tribunal maybe has a couple of 10:31:18	16	monopile. There's actually a phenomenon there 10:32:42
17	questions. 10:31:23	17	called sand waves, and it's basically offshore dunes 10:32:46
18	If I could go back to your 10:31:23	18	that migrate due to the wave energy. 10:32:51
19	presentation, Page 5, where you list some of your 10:31:24	19	So they actually have to endure 10:32:54
20	prior design foundation design experience in 10:31:31	20	a phenomenon where the seabed level might change by 10:32:56
21	Europe starting with Vindeby. Can you tell us what 10:31:35	21	as much as 3 metres as these sand waves migrate 10:32:59
22 23	the in terms, what the water depth was in these 10:31:47	22	across the project site. 10:33:03
24	prior projects and the sediment depth, as well as 10:31:52 the slope and what kind of challenges you had? 10:32:02	24	That was a particularly challenging 10:33:05 design. 10:33:06
25	THE WITNESS: I can tell you in some. 10:32:04	25	design. 10:33:06 PRESIDENT: And the sediment depth? 10:33:07
23	THE WITNESS. Tearter you in some. 10.52.04		TRESIDENT: And the sediment deput: 10.55.07
	Page 82		Page 83
1	THE WITNESS: Well, the sediment 10:33:09	1	detail, but my understanding that what's come out of 10:34:33
2	depth, I mean, that's sand that's I don't know 10:33:11	2	them is the amount of construction impacts. And 10:34:36
3	the number. I'm sorry. 10:33:12	3	LEEDCo involved significantly more bottom 10:34:40
4	PRESIDENT: Okay. 10:33:15	4	preparation because they have far more challenging 10:34:42
5	DR. CREMADES: Probably you are not 10:33:23	5	soil conditions than Windstream does. But what 10:34:46
6	the person to answer that and that's the reason why 10:33:25	6	I was told and what I got out of that report was 10:34:48
7	I put to you the question. Most of the projects we 10:33:28	7	that the amount of bottom disturbance and sediment, 10:34:50
8	see in your page 7, especially, and in your page 6, 10:33:32	8	suspension in the water was less than an average 10:34:54
9	are not dealing with drinking water. 10:33:37	9	autumn thunderstorm. 10:34:57
10	I mean, what is the impact of the 10:33:43	10	DR. CREMADES: Thank you. 10:35:01
11 12	construction you are projecting into the sediments 10:33:49 which might have an impact into the drinking water, 10:33:52	11	PRESIDENT: Thank you very much, 10:35:03
13	who was the reason for the moratorium officially? 10:33:52	13	Mr. Cooper. That concludes your examination. Thank 10:35:04 you for your time. 10:35:06
14	THE WITNESS: There's only I have 10:33:59	14	THE WITNESS: Thank you. 10:35:08
15	to admit this is a little bit out of my comfort 10:34:01	15	I suggest we have the morning break 10:35:11
16	zone, but I I can offer one piece of testimony to 10:34:05	16	now and continue at 10:50. Thank you. 10:35:13
17	that. Specifically with the well, two. 10:34:08	17	Recess taken at 10:35 a.m. 10:35:17
18	The New York Power Authority 10:34:11	18	Upon resuming at 10:54 a m. 10:35:18
19	Freshwater Winds project was located in Lake Erie, 10:34:13	19	PRESIDENT: All set from the Claimant 10:54:15
20	and that was just offshore of Buffalo, and that 10:34:16	20	side and also the Respondent? Good morning, 10:54:16
21	issue did not come up. 10:34:21	21	Mr. Palmer. 10:54:21
22	That issue it come up with the LEEDCo 10:34:22	22	THE WITNESS: Good morning. 10:54:21
23	project. That project is located within a few miles 10:34:24	23	PRESIDENT: Could I please ask you to 10:54:22
24	of the major water intake for the City of Cleveland. 10:34:27	24	state your full name for the record and then read 10:54:22
25	I have not studied those reports in 10:34:31	25	the the expert declaration that you have over 10:54:22

	Page 84		Page 85
1	there on the table in front of you? 10:54:22	addition to the	presentation? 10:55:35
2	THE WITNESS: My name is Richard Paul 10:54:37	2 MS SI	EERS: I will have one question 10:55:37
3	Palmer. I solemnly declare upon my honour and 10:54:37	in direct after th	e presentation 10:55:38
4	conscience that my evidence and my opinions will be 10:54:37	4 PRESI	DENT: After the presentation 10:55:43
5	in accordance with my sincere belief. 10:54:39	5 MS SI	EERS: You set the pattern 10:55:44
6	AFFIRMED: RICHARD PAUL PALMER 10:54:41	5 PRESI	DENT: Very good 10:55:45
7	PRESIDENT: Thank you very much, 10:54:47	7 So I un	derstand that you have prepared 10:55:46
8	Mr. Palmer. We understand you are the person 10:54:47	a presentation for	or us 10:55:47
9	responsible or at least the person to defend the 10:54:52	9 THE W	/ITNESS: That's correct 10:55:48
10	May 2014 report submitted in this arbitration by 10:54:56	PRESI	DENT: So please go ahead, 10:55:50
11	Weeks Marine, Inc. 10:55:01	1 Mr Palmer	10:55:52
12	THE WITNESS: That's correct. 10:55:07	2 PRESENTATIO	ON BY RICHARD PAUL PALMER, WEEKS MARINE, 10:55:52
13	PRESIDENT: And I have learned my 10:55:08	3 INC	10:55:52
14	lesson. I understand the annex or Appendix 3 to the 10:55:09	4 THE W	/ITNESS: Okay, my name is Richard 10:55:54
15	Sgurr report is also considered a separate report 10:55:13	5 P Palmer I am	vice-president of Weeks Marine 10:55:55
16	that you will defend also. 10:55:15	I've been the vic	e-president of Weeks Marine since 10:55:59
17	THE WITNESS: I'm unfamiliar what it's 10:55:17	7 2009	10:56:01
18	called in the Sgurr report, but if it's this little 10:55:19	8 I am th	e offshore wind and marine 10:56 02
19	few pages here, yes, that's true. 10:55:22	enewable energ	y lead for Weeks Marine's 10:56:05
20	PRESIDENT: Appendix 3, which is 10:55:23	construction div	rision I've acted in that capacity 10:56:08
21	called Weeks McNally Marine Summary Report. 10:55:24	since 2008	10:56:11
22	THE WITNESS: That's correct. 10:55:28	2 I have 2	27 years of domestic and 10:56:12
23	PRESIDENT: Okay. Very good. The way 10:55:29	3 international ex	perience in project management and 10:56:15
24	it will work now well, that's the question. 10:55:31	4 engineering, and	l including more 23 years in the 10:56:19
25	Do you have any questions on direct in 10:55:34	5 marine construc	tion industry 10:56:22
	Page 86		Page 87

2	Construction, dredging and marine services. 10:58:48	2	maintenance and new work dredging for ports and 10:59:56
3	Both construction and dredging really 10:58:53	3	harbours, coastland and inland waterways, land 11:00:03 reclamation, wetland reclamation, beach 11:00:06
4	are the backbone of our companies. We like dredging 10:58:54 quite a bit, in addition to construction. 10:58:57	4	
5	1 ,	5	
6	We also have two wholly-owned 10:58:59 subsidiaries. One is McNally International or 10:59:01	6	We are the largest dredgers in North 11:00:12 America. We have an extensive fleet of dredging 11:00:14
7	sometimes it's referred to McNally Construction. 10:59:03	7	equipment. So this is just one of the many things 11:00:17
8	That's based in Hamilton, Ontario, right here just 10:59:07	8	that we do. 11:00:19
9	down the lake, and also Healy Tibbitts Builders, 10:59:09	9	Our marine services division does some 11:00:20
10	which is based in Honolulu, Hawaii. 10:59:12	10	pretty unique stuff. Heavy lifts, we people need 11:00:22
11	We work all over the place North and 10:59:17	11	a space shuttle picked up, we pick up a space 11:00:25
12	even South America and out into the south Pacific. 10:59:20	12	shuttle. We do stevedoring. We do towing. We do 11:00:29
13	Our McNally subsidiary has done a lot 10:59:23	13	some very specialized marine transportation at 11:00:30
14	of work in Ontario and other provinces in 10:59:25	14	times, and we have a lot of equipment we have 11:00:36
15	Canada, including extensive work here on Lake 10:59:28	15	available for charter. 11:00:38
16	Ontario. 10:59:30	16	McNally International, our subsidiary 11:00:40
17	Our construction division builds 10:59:34	17	that we own here that's based in Ontario, was 11:00:41
18	marine projects of all kind, including offshore wind 10:59:36	18	established in 1949 and was wholly-owned by 11:00:43
19	turbine foundations, tunnels. We are currently 10:59:39	19	Weeks Marine since 2011. 11:00:46
20	involved in a very large concrete tunnel project 10:59:41	20	It specializes in tunnelling and 11:00:48
21	town in Norfolk, Virginia. We do bridges. We do 10:59:44	21	marine construction and has completed multiple 11:00:50
22	LNG and petroleum terminals. We do wharfs, piers, 10:59:49	22	marine projects in Ontario, including, I believe, 11:00:55
23	marine pipeline, all standard marine construction 10:59:54	23	back in 2008, the Wolfe Island on-shore wind project 11:00:57
24	work. 10:59:56	24	cabling crossing and structures in Kingston, 11:01:01
25	Our dredging division performs 10:59:56	25	Ontario. We were involved in that project. 11:01:03

1	September of 2010 to discuss the project and the 11:03:26	1	market at that time. 11:04:29
2	potential assistant that Weeks and our partners in 11:03:29	2	We began, actually, the design of 11:04:32
3	offshore wind at that time which were Kiewit 11:03:33	3	a specialized jack-up barge in late 2010, 11:04:34
4	Construction and GOC, which was a European offshore 11:03:34	4	specifically adapted to transit the St. Lawrence 11:04:38
5	wind contractor, the assistance that we can provide 11:03:40	5	canal or St. Lawrence Seaway, I apologize, the 11:04:41
6	for pre-construction planning and development 11:03:42	6	St. Lawrence Seaway, with a vessel width at 11:04:43
7	assistance. 11:03:45	7	23.8 metres or 70 feet. That vessel was later named 11:04:46
8	In that meeting, I recall we talked 11:03:46	8	the following year the R.D. McDonald. 11:04:50
9	a bit about local content because that was a concern 11:03:47	9	The hull was constructed and launched 11:04:53
10	at the time. We also felt that because of the 11:03:50	10	in June of 2012 out of BAE Shipyards in Jacksonville 11:04:55
11	nature of the project and what we knew about Lake 11:03:54	11	Florida. 11:05:00
12	Ontario and the eastern end of Lake Ontario, we 11:03:56	12	And honestly, we began the 11:05:01
1.3	thought that concrete foundations would actually be 11:03:58	13	construction of the R.D. McDonald specifically 11:05:03
14	a very viable type of foundation to pursue for the 11:04:00	14	thinking about the Wolfe Island Shoals project. 11:05:07
15	project. 11:04:03	15 16	It was critical in our decision-making 11:05:11
16	We also strongly believed that the Wolfe11:04:04	17	to say, let's proceed with building a jack-up vessel 11:05:13
17 18	Island Shoals project would be the first offshore 11:04:06	18	for the burgeoning and glowing offshore wind market 11:05:16
19	wind project constructed in North America. It would 11:04:08 be ahead of Cape Wind, which we were also working 11:04:11	19	in North America. 11:05:20
20	and on, and other projects in the U.S. because of 11:04:14	20	Now, in 2013, we obviously knew about 11:05:23 the moratorium that was placed in February of 2011 11:05:25
21	the revenue certainty that was guaranteed by the FIT 11:04:16	21	which certainly changed the plans for how things 11:05:28
22	contract. Revenue certainty is a big topic in 11:04:19	22	would progress with Wolfe Island Shoals, but we 11:05:31
23	offshore wind, and we saw the FIT contract in giving 11:04:22	23	continued in working in offshore wind, still a big 11:05:33
24	Windstream and the Wolfe Island Shoals project a leg 11:04:25	24	market here to work on, but in the fall of 2013 we 11:05:37
25	up on every other project that was there in the 11:04:27	25	were approached and requested to review the 11:05:39
	Page 94		Page 95

2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	feasibility and the schedule for construction of 11:05:42 a Wolfe Island Shoals project based on a plan using 11:05:45 130 gravity-based foundation and Siemens 2.3 11:05:48 megawatts turbines. We were to assume that the 11:05:55 project was restarted almost immediately in 2011, 11:05:58 after the wind moratorium would have been lifted, 11:05:59 and so as I think you've already heard, we worked 11:06:02 with COWI and SgurrEnergy to develop the 11:06:05 construction methodology. 11:06:08 We prepared our plan following our 11:06:09 standard process that would be used many. Many 11:06:12 times of analysing each required work activity in 11:06:15 detail that was going to be needed for the 11:06:17 construction of the project and basing our 11:06:20 construction schedule on the production rates 11:06:21 derived from that analysis. 11:06:24 Our analysis was prepared with the 11:06:26 same care and the risk assumptions that we've used 11:06:33 projects over the past decade. 11:06:35 What we found was that the offshore 11:06:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	We did not assume that marine work 11:06:49 would occur on the project site between mid-November 11:06:51 and the end of March. Working on Lake Ontario in 11:06:55 the winter is nothing that we really want to sign up 11:06:58 for, although we did expect that if our work over 11:07:00 the first season had to had issues, had delays, 11:07:04 that we could probably extend into December without 11:07:08 any issue, that ice would not be a major concern and 11:07:11 we could push ourselves into December to make up and 11:07:14 recapture some of the float we needed in our the 11:07:16 schedule. 11:07:18 And we see that the key to achieving 11:07:21 vessels to construct the project, and to be working 11:07:24 at several foundation locations at any one given 11:07:27 time with that fleet of vessels. 11:07:30 In many of our construction projects 11:07:32 the availability of the equipment fleet is critical 11:07:37 If you have a lot of tools in your 11:07:39 tool bag, it's much easier to get a project done 11:07:40
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	feasibility and the schedule for construction of 11:05:42 a Wolfe Island Shoals project based on a plan using 11:05:45 130 gravity-based foundation and Siemens 2.3 11:05:48 megawatts turbines. We were to assume that the 11:05:55 project was restarted almost immediately in 2011, 11:05:58 after the wind moratorium would have been lifted, 11:05:59 and so as I think you've already heard, we worked 11:06:02 with COWI and SgurrEnergy to develop the 11:06:05 construction methodology. 11:06:08 We prepared our plan following our 11:06:09 standard process that would be used many. Many 11:06:12 times of analysing each required work activity in 11:06:15 detail that was going to be needed for the 11:06:17 construction of the project and basing our 11:06:20 construction schedule on the production rates 11:06:21 derived from that analysis. 11:06:24 Our analysis was prepared with the 11:06:28 and have used for multiple other offshore wind 11:06:33 projects over the past decade. 11:06:35 What we found was that the offshore 11:06:39 marine construction portion of the work is 11:06:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	We did not assume that marine work 11:06:49 would occur on the project site between mid-November 11:06:51 and the end of March. Working on Lake Ontario in 11:06:55 the winter is nothing that we really want to sign up 11:06:58 for, although we did expect that if our work over 11:07:00 the first season had to had issues, had delays, 11:07:04 that we could probably extend into December without 11:07:08 any issue, that ice would not be a major concern and 11:07:11 we could push ourselves into December to make up and 11:07:14 recapture some of the float we needed in our the 11:07:16 schedule. 11:07:18 And we see that the key to achieving 11:07:21 vessels to construct the project, and to be working 11:07:21 vessels to construct the project, and to be working 11:07:27 time with that fleet of vessels. 11:07:30 In many of our construction projects 11:07:32 the availability of the equipment fleet is critical 11:07:34 to reducing the risk on the project. 11:07:39 tool bag, it's much easier to get a project done 11:07:40 because you're not counting on just one specific 11:07:43

Page 96 Page 97 1 1 that was being proposed is that almost every work 11:07:54 our operations during our construction season would 11:09:08 2 2 be shut down 25 percent of the time due to weather 11:09:09 activity that was needed to install these 11:07:57 3 3 foundations could be completed with kind of 11:07:59 between April 1st and November 10th. We built that 11:09:12 4 4 standard, typical marine construction vessels and 11:08:01 into our construction the project schedule to say, 11:09:15 5 5 barges that already existed in the Canadian market 11:08:05 yeah, we know weather event happen, we know we're 11:09:17 6 6 going to be stopped, but we're going to take that 11:09:22 and existed in the US market, that didn't require 11:08:07 7 7 a specialized heavy lift vessel, that didn't require 11:08:12 into account. 8 unique vessels that would potentially be difficult 11:08:15 8 Equipment availability, again, always 11:09:25 9 9 to procure and bring to the project. 11:08:20 a concern, but what we saw is because of the design 11:09:26 10 10 You know, the vessels that would be 11:08:23 of the foundations and the semi-buoyant 11:09:30 11 required here were the vessels that we already have 11:08:25 11 gravity-based foundation that had been proposed, we 11:09:33 12 11:08:28 12 saw that in reality to -- to install that, the in our fleet. 13 Now, certainly with any marine 13 supplemental flotation barges that were required to 11:09:39 11:08:29 14 14 project, the weather and the -- the sea conditions, 11:08:32 support those foundations during transport and 11:09:42 15 1.5 sea state conditions have a large impact on the 11:08:35 lowering were actually pretty simple barges. 11:09:45 16 16 productivity that can be achieved. We reviewed the 11:08:37 Nothing exotic about those. They're relatively 11:09:47 17 17 wave data. We looked at buoy data that's publicly 11:08:39 small in size and they could be easily designed and 11:09:51 18 available. We examined the conditions that we 11:08:44 18 fabricated and brought into Lake Ontario. 11:09:53 19 expected. We talked with McNally and said, how is 11:08:48 19 To aid the project schedule, we 11:09:55 20 20 it working in Lake Ontario? And the expected 11:08:51 planned to utilise four sets of these barges to 11:09:57 21 21 conditions at the project site are certainly much 11:08:53 allow the foundation structures to be transported 11:10:00 22 22 and placed at a rate of every two and a half days. 11:10:03 more benign than we needed to take into account on 11:08:56 23 23 our other offshore wind projects that are out in the 11:09:00 And getting redundancy, in case there are issues, we 11:10:06 24 Atlantic. 11:09:03 24 always had a lot of these barges in the mix so we 11:10:09 25 Even so, we conservative assume that 11:09:04 25 could be at various stages of the installation. 11:10:12 Page 99 Page 98 1 1 Also, certainly following the 11:10:15 available. 11:11:25 2 2 foundation installation, the wind turbine generators 11:10:17 We almost always intend to use 11:11:26 3 3 have to be erected utilising a stable crane on 11:10:21 existing vessels, particularly when we're pricing 11:11:27 4 a jack-up or a pinned installation vessel. 11:10:23 4 work. We always like to think we're pricing the 11:11:31 5 This is just a -- almost a given right 11:10:26 5 work using an actual viable method. We don't want 11:11:34 6 now in the offshore wind industry. I am unaware of 11:10:28 6 to have be dreaming, making pie in the sky 7 any -- any project that has been -- had the wind 7 assumptions, saying hey, they way we can build this 11:11:41 11:10:31 8 8 is this unique way. No. We want to use something 11:11:42 turbines erected from a floating vessel. And so 11:10:34 9 9 it's well known that you need a very stable crane to 11:10:36 that's real. We want to make sure that we have 11:11:45 10 10 be able to accurately assemble the turbine 11:10:39 tried and proven ways to build a project and to 11:11:48 11 11 components. 11:10:43 price out a project, because that's the only way we 11:11:51 12 12 As we -- I had already mentioned, we 11:10:45 can guarantee that we minimise our risk. 11:11:53 13 13 had started the construction of the R.D. McDonald 11:10:46 But, you know, for here, these vessels 11:11:55 14 14 jack-up in 2010, you know, started the design, and 11:10:50 are obviously a concern, but, you know, if the 11:11:57 15 the fabrication was -- steel was being bought in 11:10:52 15 vessels can't be found or constructed or contracted 11:12:00 16 16 February of 2011 for this vessel. We felt the 11:10:55 or unsuitable for the project for various reasons, 11:12:03 17 17 R.D. McDonald would have been a very suitable vessel 11:11:01 in those situations, Weeks Marine typically does not 11:12:06 18 18 to install the wind turbines. 11:11:04 hesitate to construct the appropriate equipment or 11:12:12 19 19 There's also many other vessels, not 11:11:05 vessel. And what you can see, we had already 11:12:14 20 20 an extensive list, but certainly existing. There 11:11:08 started construction on the R.D. McDonald and as 11:12:15 21 21 are existing turbine installation vessels and other 11:11:10 an example, for the Cape Wind project, for that 11:12:18 22 22 jack-ups that are capable of reaching Lake Ontario 11:11:14 project, we needed two additional wind turbine 11:12:21 23 23 that have a beam less than 23.8 metres, and those 11:11:15 component transport vessels to comply with the Johns 11:12:23 24 24 Act requirements of the Cape Wind project. 11:12:27 existing vessels would also be a first choice to use 11:11:19 25 25 on the project. But they are not the only option 11:11:22 We started the construction of those 11:12:29

	Page 100		Page 101
1	two barges in the summer of 2014, months before Cape 11:12:31	1	to provide a stepping stone to a market that could 11:13:41
2	Wind had ever expected to reach financial close. We 11:12:35	2	not otherwise be achieved. That's certainly one of 11:13:45
3	went ahead in addition to continuing our work on 11:12:38	3	the the biggest hindrances we have in North 11:13:47
4	the R.D. McDonald, we went ahead and got two 11:12:40	4	America is that we do not have the vessel fleet that 11:13:49
5	additional jack-up hulls into fabrication at Conrad 11:12:43	5	Europeans have. And this project gave us the 11:13:55
6	Industries so that we could have the vessels we 11:12:48	6	opportunity to use vessels that currently exist on 11:13:57
7	needed to build the Cape Wind project. So it's 11:12:50	7	the market to construct the foundations. My 11:13:57
8	nothing that's out of out of you know, it's 11:12:53	8	perspective, that is an incredible advantage that 11:14:01
9	nothing that's uncommon for us to build vessels. 11:12:55	9	this project had. 11:14:03
10	So in conclusion I just want to say 11:13:02	10	This project I just said that, I 11:14:05
11	that we clearly recognise the risk that offshore 11:13:03	11	guess. 11:14:05
12	construction imposes on a project. And availability 11:13:06	12	This project, un-like many European 11:14:07
13	of appropriate vessels is a critical aspect for any 11:13:08	13	offshore wind energy projects can be built using 11:14:09
14	marine project, and Weeks Marine has built over 30 11:13:12	14	equipment that's available, can be readily procured, 11:14:12
15	new vessels in the past ten years as part of our 11:13:15	15	purposely constructed for the task. 11:14:15
16	effort to ensure that we always have the right 11:13:17	16	My opinion, in our opinion, based on 11:14:17
17	vessels available for our work. 11:13:18	17	our construction experience in the marine 11:14:20
18	In addition to new builds, we also 11:13:21	18	environment, the time-line we set out in the project 11:14:22
19	retrofit and reconfigure existing vessels to meet 11:13:23	19	schedule is imminently achievable. There's nothing 11:14:24
20	the needs for particular projects. It's just how we 11:13:26	20	a stretch here. We have the equipment, the vessels 11:14:27
21	do business. That's how what we to have to do. 11:13:29	21	are available. It absolutely could be built. 11:14:31
22	The Wolfe Island Shoals project, as 11:13:32	22	Thank you. 11:14:34
23	proposed with the gravity-based foundation, we feel 11:13:34	23	PRESIDENT: Thank you, Mr. Palmer. 11:14:35
24 25	it would have been able to capitalise on the 11:13:36	24 25	Ms. Seers. 11:14:36
	currently available Canadian and U.S. vessel fleet 11:13:38	25	MS. SEERS: I believe Mr. Palmer 11:14:38
	Page 102

You probably have the advantage of 11:16:12 hearing the cross-examination of Mr. Cooper, but for 11:16:13 the sake of just for clarity, we'll run through 11:16:15 some housekeeping rules first. We'll do them fairly 11:16:18 quickly. 11:16:22 As you know, my name is Heather 11:16:23 Squires and I'm counsel for the Government of Canada 11:16:25 in these proceedings. 11:16:27 I'm going to ask you a few questions 11:16:30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	a question I've asked, I'll be happy to rephrase it 11:16:45 for you. Just let me know and I can do that. 11:16:47 It's also important that to the extent 11:16:51 my question has a "yes" or "no" at the start of your 11:16:53 answer, to provide that for the record and then you 11:16:55 can give the appropriate context that you feel is 11:16:57 necessary. 11:16:59 As you know, the binders in front of 11:17:00 you and I'll be referring to the tab numbers 11:17:02 and we've done the same thing here that we did with 11:17:04 the COWI reports and provided both of your reports 11:17:07 at Tabs 3 and 4, just to make it easier for 11:17:10 reference. 11:17:13 We may need to go into confidential 11:17:13 session at some point during this. I'll let you 11:17:15 know. You don't need to concern yourself with it, 11:17:17 but there might be a time that we will have to break 11:17:20 the feed. So I will let you know. 11:17:22 A. Okay. 11:17:24 Q. Now, you've confirmed before that 11:17:25
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	answered my question just now, so I don't need to 11:14:40 ask him. 11:14:43 PRESIDENT: Okay, good. 11:14:44 Shall we move straight to 11:14:45 cross-examination. 11:14:47 MS. SQUIRES: I just need one minute. 11:14:49 PRESIDENT: Sure. 11:14:50 CROSS-EXAMINATION BY MS. SQUIRES: 11:14:52 Q. Good morning, Mr. Palmer. 11:16:10 A. Hi. 11:16:10 Q. You probably have the advantage of 11:16:12 hearing the cross-examination of Mr. Cooper, but for 11:16:13 the sake of just for clarity, we'll run through 11:16:15 some housekeeping rules first. We'll do them fairly 11:16:18 quickly. 11:16:22 As you know, my name is Heather 11:16:23 Squires and I'm counsel for the Government of Canada 11:16:25 in these proceedings. 11:16:27 I'm going to ask you a few questions 11:16:30 conclusions that you've submitted on behalf of the 11:16:35 to learn about how you lift a spaceship, but perhaps 11:16:37	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a question I've asked, I'll be happy to rephrase it 11:16:45 for you. Just let me know and I can do that. 11:16:47 It's also important that to the extent 11:16:51 my question has a "yes" or "no" at the start of your 11:16:53 answer, to provide that for the record and then you 11:16:55 can give the appropriate context that you feel is 11:16:57 necessary. 11:16:59 As you know, the binders in front of 11:17:00 you and I'll be referring to the tab numbers 11:17:02 and we've done the same thing here that we did with 11:17:04 the COWI reports and provided both of your reports 11:17:10 reference. 11:17:13 We may need to go into confidential 11:17:13 session at some point during this. I'll let you 11:17:15 know. You don't need to concern yourself with it, 11:17:17 but there might be a time that we will have to break 11:17:20 the feed. So I will let you know. 11:17:22 A. Okay. 11:17:24 Q. Now, you've confirmed before that 11:17:27 support of the Sgurr report in this arbitration; 11:17:30 correct? 11:17:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	answered my question just now, so I don't need to 11:14:40 ask him. 11:14:43 PRESIDENT: Okay, good. 11:14:44 Shall we move straight to 11:14:45 cross-examination. 11:14:47 MS. SQUIRES: I just need one minute. 11:14:49 PRESIDENT: Sure. 11:14:50 CROSS-EXAMINATION BY MS. SQUIRES: 11:14:52 Q. Good morning, Mr. Palmer. 11:16:10 A. Hi. 11:16:10 Q. You probably have the advantage of 11:16:12 hearing the cross-examination of Mr. Cooper, but for 11:16:13 the sake of just for clarity, we'll run through 11:16:15 some housekeeping rules first. We'll do them fairly 11:16:18 quickly. 11:16:22 As you know, my name is Heather 11:16:23 Squires and I'm counsel for the Government of Canada 11:16:25 in these proceedings. 11:16:27 I'm going to ask you a few questions 11:16:30 conclusions that you've submitted on behalf of the 11:16:32 Claimant. And I have to note, I am very interested 11:16:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a question I've asked, I'll be happy to rephrase it 11:16:45 for you. Just let me know and I can do that. 11:16:47 It's also important that to the extent 11:16:51 my question has a "yes" or "no" at the start of your 11:16:53 answer, to provide that for the record and then you 11:16:55 can give the appropriate context that you feel is 11:16:57 necessary. 11:16:59 As you know, the binders in front of 11:17:00 you and I'll be referring to the tab numbers 11:17:02 and we've done the same thing here that we did with 11:17:04 the COWI reports and provided both of your reports 11:17:10 reference. 11:17:13 We may need to go into confidential 11:17:13 session at some point during this. I'll let you 11:17:15 know. You don't need to concern yourself with it, 11:17:17 but there might be a time that we will have to break 11:17:20 the feed. So I will let you know. 11:17:22 A. Okay. 11:17:24 Q. Now, you've confirmed before that 11:17:27 support of the Sgurr report in this arbitration; 11:17:30

	Page 104		Page 105
1	first report, which is at Tab 3 in your binder 11:17:37	1	retained then for the purposes of this arbitration, 11:18:42
2	MR. BISHOP: Oh, same binder? 11:17:52	2	not to actually work on the project? 11:18:44
3	MS. SQUIRES: Same binder as before. 11:17:54	3	A. That's correct. 11:18:46
4	MR. BISHOP: Page 11:17:55	4	Q. Okay. Now, we'll turn to page 24 11:18:47
5	MS. SQUIRES: Page 7. Tab 3, page 7. 11:17:55	5	of your first report there at Tab 3. It's the last 11:18:50
6	BY MS. SQUIRES: 11:18:00	6	page of your report, if that makes it easier. And 11:18:59
7	Q. And I would like to have a look at 11:18:00	7	you note there that: 11:19:01
8	the paragraph right before the mobilization heading. 11:18:08	8	"The means and methods provided in 11:19:02
9	It starts with: 11:18:11	9	your report describe a viable and 11:19:04
10	"SgurrEnergy has selected" [As 11:18:13	10	comprehensive solution for the 11:19:09
11	read] 11:18:14	11	installation of the WWIS as 11:19:11
12	And you note there that you were. 11:18:14	12	currently scoped." [As read] 11:19:13
13	" retained by SgurrEnergy to 11:18:15	13	That's correct? 11:19:16
14	develop the offshore means and 11:18:16	14	A. Yes. 11:19:16
15	methods plans for the WWIS 11:18:20	15	Q. And "currently scoped" here then 11:19:16
16	project." [As read] 11:18:21	16	refers to the use of the semi-floating gravity-based 11:19:17
17	Do you see that? 11:18:25	17	foundation that I discussed with Mr. Cooper earlier 11:19:20
18	A. Yes. 11:18:25	18	this morning, correct? 11:19:24
19	Q. Now, you mentioned in your 11:18:26	19	A. That's correct. 11:19:24
20	presentation that you had discussions with 11:18:27	20	Q. Now, you've heard Mr. Cooper and 11:19:25
21	Windstream back in September of 2010, but you 11:18:29	21	I discuss the possibility that other foundation 11:19:26
22	weren't retained to work with them until 2014; 11:18:31	22	types may be required as the design and development 11:19:30
23	correct? 11:18:34	23	process continues. But you have not provided in 11:19:33
24	A. 2013. Yes. 11:18:36	24	your report any means and methods of how those 11:19:35
25	Q. 2013. Okay. So then you were 11:18:37	25	foundations would be installed; correct? 11:19:38
	Page 106		Page 107
1	Page 106 A. As I understand it, those 11:19:40	1	Page 107 Erie and we found that that vessel didn't exist to 11:20:40
1 2	•	1 2	_
	A. As I understand it, those 11:19:40	1	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47
2	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46	2	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44
2	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49	2 3 4 5	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51
2 3 4 5	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52	2 3 4 5 6	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53
2 3 4 5 6 7	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54	2 3 4 5 6 7	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57
2 3 4 5 6 7 8	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58	2 3 4 5 6 7 8	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59
2 3 4 5 6 7 8	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00	2 3 4 5 6 7 8	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00
2 3 4 5 6 7 8 9	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03	2 3 4 5 6 7 8 9	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02
2 3 4 5 6 7 8 9 10	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06	2 3 4 5 6 7 8 9 10	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05
2 3 4 5 6 7 8 9 10 11	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07	2 3 4 5 6 7 8 9 10 11	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07
2 3 4 5 6 7 8 9 10 11 12 13	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08	2 3 4 5 6 7 8 9 10 11 12 13	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08
2 3 4 5 6 7 8 9 10 11 12 13	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10	2 3 4 5 6 7 8 9 10 11 12 13	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11
2 3 4 5 6 7 8 9 10 11 12 13 14 15	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:11 would have been pushing to always have the vessel 11:21:14
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:27 foundation installation, the rate that you provided 11:21:29
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23 A. Yeah, the types of vessels, like 11:20:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22 Q. Right. Let's turn to the 11:21:27 foundation installation, the rate that you provided 11:21:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23 A. Yeah, the types of vessels, like 11:20:24 the Rambiz which was used for Thornton Bank, is 11:20:26	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22 Q. Right. Let's turn to the 11:21:27 foundation installation, the rate that you provided 11:21:34 report, so we'll stay at Tab 3 there and we're going 11:21:36
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23 A. Yeah, the types of vessels, like 11:20:24 the Rambiz which was used for Thornton Bank, is 11:20:26 a very large catamaran style "stiff leg." [phon.] 11:20:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22 Q. Right. Let's turn to the 11:21:27 foundation installation, the rate that you provided 11:21:34 report, so we'll stay at Tab 3 there and we're going 11:21:36 to turn to Page 17 in your binder. We're going to 11:21:39
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23 A. Yeah, the types of vessels, like 11:20:24 the Rambiz which was used for Thornton Bank, is 11:20:26 a very large catamaran style "stiff leg." [phon.] 11:20:34	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22 Q. Right. Let's turn to the 11:21:27 foundation installation, the rate that you provided 11:21:34 report, so we'll stay at Tab 3 there and we're going 11:21:36 to turn to Page 17 in your binder. We're going to 11:21:39 look at the section there, we are discussing the 11:21:43
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. As I understand it, those 11:19:40 foundations weren't defined, so we did not provide 11:19:41 any means or methods to install those. 11:19:44 Q. Okay. So, let's have a look at 11:19:46 what you did provide then for those semi-floating 11:19:49 gravity-based foundation. 11:19:52 Now, we've already as I talked 11:19:54 about already with Mr. Cooper, that this method of 11:19:58 installation is to float them out as opposed to 11:20:00 lifting them onto something and lowering them into 11:20:03 the water; correct? 11:20:06 A. That's right. 11:20:07 Q. And the installation method that 11:20:08 you chose then in the plan to use the semi-floating 11:20:10 foundations was chosen largely because you agree 11:20:12 that those vessels needed to install regular 11:20:15 gravity-based foundation of a non-semi-floating 11:20:19 variety, have limited access in the Great Lakes; 11:20:21 correct? 11:20:23 A. Yeah, the types of vessels, like 11:20:24 the Rambiz which was used for Thornton Bank, is 11:20:26 a very large catamaran style "stiff leg." [phon.] 11:20:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Erie and we found that that vessel didn't exist to 11:20:40 install large concrete foundations in Lake Erie and 11:20:44 it would would've had to have been constructed. 11:20:47 That was the benefit of the 11:20:49 semi-floating gravity the semi-buoyant prop 11:20:51 foundation is that you could install it with very 11:20:53 minimal marine equipment. 11:20:57 Q. So, you would agree with me then 11:20:59 to the extent that the foundations might change, 11:21:00 there could be an issue with obtaining the required 11:21:02 vessels to do that installation; correct? 11:21:05 A. There certainly potential would be 11:21:07 changes to the vessels required. Whether there 11:21:08 would be any difficulty to obtain them, I think we 11:21:11 would have been pushing to always have the vessel 11:21:14 needed to install to be a capable vessel that could 11:21:18 be brought into Lake Ontario. 11:21:22 Q. Right. Let's turn to the 11:21:27 foundation installation, the rate that you provided 11:21:34 report, so we'll stay at Tab 3 there and we're going 11:21:36 to turn to Page 17 in your binder. We're going to 11:21:39

	Page 108		Page 109
1	A. The table? Yeah. 11:21:51	1	A. Quite honestly and I apologize for 11:22:59
2	Q. Yeah. In the last row of the 11:21:52	2	this, but I believe this is a misstatement in this 11:23:00
3	table there you noted: "Installation cycle of 11:21:55	3	particular section. I didn't realize it only said 11:23:04
4	approximately 6 days"; correct? 11:21:58	4	two sets in this paragraph, but our intent was to 11:23:07
5	A. Correct. 11:22:00	5	have four sets to install, not two sets. 11:23:09
6	Q. And if we go back to page 8 in 11:22:01	6	Q. Okay. So all right. So the 11:23:11
7	your report, and we look under the heading 11:22:03	7	first report says two sets even though the intention 11:23:13
8	"Supplemental flotation barges," you note that 11:22:13	8	was for you would agree with me then when URS did 11:23:16
9	the that the SBFs or the supplemental flotation 11:22:17	9	their reply report to the report you provided and 11:23:21
10	barges will consist of two sets of four specialized 11:22:20	10	they noted a problem with the two sets, that was 11:23:24
11	sectional barges; do you see that? 11:22:22	11	just that was referring to a typo and not 11:23:26
12	It is under the heading "Supplemental 11:22:26	12	an error that URS themselves then made? 11:23:29
13	flotation barge." 11:22:29	13	A. I can remember that. I don't know 11:23:34
14	A. Yes, I see where it says the SBF 11:22:30	14	what URS' response to this was, but if that was what 11:23:36
15	will consist of two set of four specialized 11:22:33	15	they said, I can agree. 11:23:40
16	sectional barges. 11:22:34	16	Q. So, if we turn to page 60 of your 11:23:42
17	Q. Now, you alluded to this in your 11:22:38	17	second report, which is at Tab 4. So we're 11:23:49
18	presentation, but just for the sake of clarity, when 11:22:40	18	again, I'm referring to the SgurrEnergy numbering 11:23:57
19	you make one of these specialized barges, you hook 11:22:42	19	here, but it's page 60. And I want to look at the 11:24:01
20	together four smaller barges to make one barge; 11:22:46	20	response to the URS report, Paragraphs 343 to 345. 11:24:04
21	correct? 11:22:49	21	That's discussion the foundation installation rate. 11:24:05
22	A. That's correct. 11:22:50	22	So you note there that with the four 11:24:13
23	Q. So when you say "Two sets of four 11:22:50	23	installation barges in rotation and a 35 percent 11:24:14
24	specialized barges," overall, you mean you have two 11:22:53	24	weather and mechanical contingency, that's how you 11:24:16
25	different installation barges that can be used? 11:22:56	25	get to the one installed every 2.5 days; correct? 11:24:18
	Page 110		Page 111
1	A. That's correct. 11:24:22	1	Ms. Seers' question, that the Bowmanville site 11:25:41
2	Q. Okay. Now, okay. Now, you 11:24:26	2	merely represents a representative gas facility, 11:25:45
3	remember earlier in your report we discussed the 11:24:37	3	and there are other locations on the Great Lakes 11:25:47
4	project as it was currently scoped; correct? 11:24:40		
5		4	that can be explored; do you remember that? 11:25:49
6	A. Yes. 11:24:44	5	A. Absolutely. 11:25:52
	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45	5 6	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53
7	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47	5 6 7	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55
7 8	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50	5 6 7 8	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57
7 8 9	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56	5 6 7 8 9	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59
7 8 9 10	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58	5 6 7 8 9	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06
7 8 9 10 11	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58	5 6 7 8 9 10	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07
7 8 9 10 11 12	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01	5 6 7 8 9 10 11 12	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16
7 8 9 10 11 12	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13	5 6 7 8 9 10 11 12 13	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16
7 8 9 10 11 12 13	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17	5 6 7 8 9 10 11 12 13 14	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19
7 8 9 10 11 12 13 14	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20	5 6 7 8 9 10 11 12 13 14 15	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22
7 8 9 10 11 12 13 14 15	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21	5 6 7 8 9 10 11 12 13 14 15	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26
7 8 9 10 11 12 13 14 15 16 17	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23	5 6 7 8 9 10 11 12 13 14 15 16 17	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31
7 8 9 10 11 12 13 14 15 16 17	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:23	5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32
7 8 9 10 11 12 13 14 15 16 17 18	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:23 Q. And with an average speed of 2 11:25:25	5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33
7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:25 knots, this indicates that the tow to the project 11:25:27	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51
7 8 9 10 11 12 13 14 15 16 17 18	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:25 knots, this indicates that the tow to the project 11:25:27 site would take 58 hours; correct? 11:25:29	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51 Q and they identify there further 11:26:52
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:25 knots, this indicates that the tow to the project 11:25:27 site would take 58 hours; correct? 11:25:29 A. Yeah. 11:25:33	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51 Q and they identify there further 11:26:52 locations such as the Port of Hamilton; correct? 11:26:53
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:23 Q. And with an average speed of 2 11:25:25 knots, this indicates that the tow to the project 11:25:27 site would take 58 hours; correct? 11:25:33 Q. Now, we've already we've 11:25:33	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51 Q and they identify there further 11:26:52 locations such as the Port of Hamilton; correct? 11:26:53 I believe Hamilton may be on the next page, on the 11:26:57
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:23 Q. And with an average speed of 2 11:25:25 knots, this indicates that the tow to the project 11:25:27 site would take 58 hours; correct? 11:25:33 Q. Now, we've already we've 11:25:33 discussed and I've discussed this with Mr. Cooper. 11:25:35	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51 Q and they identify there further 11:26:52 locations such as the Port of Hamilton; correct? 11:26:53 I believe Hamilton may be on the next page, on the 11:26:57 top of the next page, perhaps. 11:27:02
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Yes. 11:24:44 Q. And as currently scoped for this 11:24:45 project, means relying on the use of the St. Mary's 11:24:47 cement facility in Bowmanville as the project 11:24:50 staging and fabrication site; correct? 11:24:56 A. That's correct. 11:24:58 Q. And if we look back at page 17 of 11:24:58 your first report at Tab 3, it's that table, again, 11:25:01 I believe. You note in that second column that 11:25:13 assumption of Bowmanville being used; correct? 11:25:17 A. Correct. 11:25:20 Q. And you note that it is 132 miles 11:25:21 from the project location? 11:25:23 A. That's what the table says. 11:25:23 Q. And with an average speed of 2 11:25:25 knots, this indicates that the tow to the project 11:25:27 site would take 58 hours; correct? 11:25:33 Q. Now, we've already we've 11:25:33 discussed and I've discussed this with Mr. Cooper. 11:25:35	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Absolutely. 11:25:52 Q. If we turn to page 29 of the 11:25:53 second SgurrEnergy report. I don't know if you have 11:25:55 a copy in front of you but my assistant for the day, 11:25:57 Mr. Neufeld, will hand it up to you. 11:25:59 A. Page 29? 11:26:06 Q. We're going to go to page 29. 11:26:07 A. Okay. 11:26:16 Q. Now, they note on this page other 11:26:16 possible locations for that on-shore manufacturing 11:26:19 facility. They note them as: Oakville, Toronto, 11:26:22 Pickering, Oshawa, the list continues; do you see 11:26:26 where I am there? 11:26:31 A. Yes, I do. 11:26:32 Q. And if we go ahead to page 166 11:26:33 A. Okay. 11:26:51 Q and they identify there further 11:26:52 locations such as the Port of Hamilton; correct? 11:26:53 I believe Hamilton may be on the next page, on the 11:26:57

	Page 112		Page 113
1	Q. All right. 11:27:08	1	Q. And if we turn to page 12, and we 11:28:13
2	MS. SQUIRES: Now, we're going to go 11:27:08	2	look at Figure 1, you can see there some of the 11:28:15
3	into confidential session for a bit. I'm just going 11:27:10	3	locations that I just mentioned on this map? 11:28:19
4	to ask Melissa or Darian, if you can confirm that 11:27:13	4	A. Okay. 11:28:26
5	C-0552 is confidential? 11:27:18	5	Q. Now, some of these locations are 11:28:27
6	MS. SEERS: Yes. 11:27:25	6	much farther from the project site than Bowmanville 11:28:29
7	MS. SQUIRES: Okay. So we're going to 11:27:26	7	itself; correct? 11:28:32
8	go into confidential session for a minute. 11:27:28	8	A. Let's see, we've got 11:28:41
9	Confidential transcript begins 11:27:32	9	Q. So if we look, for example, at 11:28:46
10	BY MS. SQUIRES 11:27:35	10	Toronto or Hamilton, they're further away? 11:28:48
11	Q. You can turn to tab 19 in the 11:27:35	11	A. Yep. 11:28:50
12	meantime. 11:27:39	12	Q. So to the extent some of these 11:28:51
13	A. Tab 11:27:40	13	locations are moved, then it will take more time to 11:28:52
14	Q. In your binder. 11:27:43	14	move a foundation from the facility to the project 11:28:56
15	A. Tab 19. 11:27:44	15	location; correct? 11:29:00
16	Q. Yes. It's for all our Sunday 11:27:44	16	A. Yes. 11:29:00
17	morning viewers out there. I'm going to cut them 11:27:53	17	Q. And some of these are substantial 11:29:01
18	off. 11:27:56	18	distance away. The Port of Hamilton looks to be 11:29:03
19	A. Okay. 11:27:56	19	double the distance? 11:29:06
20	Q. All right. So this is Exhibit 11:28:00	20	A. Uh-hmm. 11:29:07
21	C-0552 for the record, and it's a document prepared 11:28:02	21	Q. So to the extent you use one of 11:29:08
22	by Ortech entitled "Project description, Wolfe 11:28:06	22	these locations that are further away, assuming we 11:29:11
23	Island Shoals offshore wind farm." 11:28:09	23	still have the four installation vessels, it will 11:29:14
24	Do you see that? 11:28:12	24	take you longer to install the foundations; correct? 11:29:16
25	A. Yes. 11:28:13	25	A. With your assumption that only 11:29:19
	Page 114		Page 115

[As read] 11:31:20 Do you see that? 11:31:21 Q. So, even though in your first 11:31:23 report you only mention the one installation vessel 11:31:24 and URS prepared their report based on that, in 11:31:28 reality as SgurrEnergy mentioned, a second one was 11:31:31 supposed to be used? 11:31:35 I think in the context of how we wrote the first 11:31:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	four vessels would be used, yes, I would say you're 11:29:20 correct. I would have to say in our context that if 11:29:22 we had to come from a longer distance, we would just 11:29:25 add more barges to the fleet. 11:29:28 Q. Okay. So more resources, higher 11:29:30 cost. You would get it done in the same amount of 11:29:32 time? 11:29:34 A. I mean it would just obviously 11:29:34 a longer tow, more barges, it does add something to 11:29:36 the cost, but the key is getting the work done on 11:29:41 schedule on the project site and so you do what you 11:29:43 have to do to make sure you have the materials. 11:29:46 Q. Let's turn to page 19 of your 11:29:51 first report at Tab 3 in your binder. 11:30:06 Q. Page 19. Now, you note here that 11:30:07 the turbines will be installed using the 11:30:13 Weeks Marine R.D. McDonald jack-up vessel? 11:30:16 A. That's correct. 11:30:20 Q. And that's the only vessel 11:30:21 A. Yeah, the way the first report was 11:30:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Confidential transcript ends BY MS. SQUIRES 11:30:44 Q. Let's turn to page 210 of the 11:30:44 second SgurrEnergy report, so that's the report that 11:30:46 was handed to you a minute ago by Mr. Neufeld. 11:30:48 A. Page 210? 11:30:52 Q. Page 210. We're going to look at 11:30:54 the Section there that deals were the response to 11:31:05 your paragraph 278 and SgurrEnergy notes there: 11:31:07 "The project execution strategy 11:31:13 and project schedule has always 11:31:14 assumed that a minimum of two 11:31:16 installation vessels will be 11:31:18 employed." [As read] 11:31:20 Do you see that? 11:31:21 A. Yes. 11:31:21 Q. So, even though in your first 11:31:23 report you only mention the one installation vessel 11:31:24 and URS prepared their report based on that, in 11:31:28 reality as SgurrEnergy mentioned, a second one was 11:31:31 supposed to be used? 11:31:34 A. Yeah, and I have to say that 11:31:35

	Page 116		Page 117
1	I honestly believe that there was some 11:31:48	1	Q. So, it replicated a preliminary 11:32:49
2	additional schedules, at least, that may not have 11:31:50	2	approach as to how you would do this eventually? 11:32:51
3	ever made it in, but I honestly can't remember. But 11:31:53	3	A. Yes. 11:32:54
4	we certainly when we built our construction the 11:31:57	4	Q. Now, let's turn to page 61 of your 11:32:55
5	project schedule to erect the project, we made the 11:32:01	5	second report, so that's at Tab 4 of the binder. 11:32:59
6	assumption that at least two units would be provided 11:32:03	6	We're going to have a look at the last paragraph of 11:33:11
7	to erect the turbines. 11:32:05	7	that page. 11:33:13
8	And so I don't disagree that maybe as 11:32:07	8	And here you note that: 11:33:14
9	it got read when it got read that URS may have been 11:32:11	9	"The St. Lawrence Seaway locks 11:33:16
10	led to believe that only one turbine installation 11:32:15	10	pose a challenge to bring the 11:33:19
11	vessel was used. 11:32:18	11	majority of turbine installation 11:33:20
12	Q. So, further work in the 11:32:19	12	vessels that operate in Europe 11:33:21
13	background, it was actually intended to be two, and 11:32:20	13	into the project area." 11:33:25
14	a that's the position that's maintained now in the 11:32:22	14	Do you see that? 11:33:26
15	latest SgurrEnergy report? 11:32:26	15	A. That's correct. 11:33:27
16	A. Our arrangement in that first 11:32:28	16	Q. There are at least 16 jack-up or 11:33:28
17	report was basically to say here is a method. It 11:32:29	17	pinup vessels that could fit in through those locks; 11:33:30
18	wasn't necessarily to go into the full detail of 11:32:32	18	correct? 11:33:35
19	exactly how many individual barges and everything. 11:32:34	19	A. That's correct. 11:33:35
20	I think we used the 571 for every 11:32:37	20	Q. And as of the date of the deferral 11:33:35
21	operation that we were doing out there, which is 11:32:40	21	on February 11, 2011, to your knowledge, Windstream 11:33:36
22	obviously not how the actual project had to be 11:32:42	22	had not secured any of those vessels; correct? 11:33:39
23	constructed. But, again, we identify the type of 11:32:44	23	A. That's correct. There would have 11:33:42
24	vessel that would be used for each of the 11:32:47	24	been no reason to secure them at that point in time, 11:33:42
25	operations. 11:32:49	25	but that's correct. 11:33:44
	operations. 11.52.47		out that's correct.

1	Page 118 Q. Now, I want to turn to this 11:33:49	1	Page 119 Q. And if my math is right, April 6th 11:34:54
1 2	-	1 2	_
	Q. Now, I want to turn to this 11:33:49		Q. And if my math is right, April 6th 11:34:54
2	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58	2	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57
2	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54	2 3	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04
2 3 4	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58	2 3 4	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03
2 3 4 5	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00	2 3 4 5	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07
2 3 4 5 6	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04	2 3 4 5 6	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05
2 3 4 5 6 7	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05	2 3 4 5 6 7	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11
2 3 4 5 6 7 8	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04	2 3 4 5 6 7 8	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08
2 3 4 5 6 7 8	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05	2 3 4 5 6 7 8	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11
2 3 4 5 6 7 8 9	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06	2 3 4 5 6 7 8 9	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19
2 3 4 5 6 7 8 9 10	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08	2 3 4 5 6 7 8 9 10	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22
2 3 4 5 6 7 8 9 10 11	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12	2 3 4 5 6 7 8 9 10 11 12	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19
2 3 4 5 6 7 8 9 10 11 12	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11	2 3 4 5 6 7 8 9 10 11 12 13 14	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28
2 3 4 5 6 7 8 9 10 11 12 13	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:32 installation of the turbines occurs within a single 11:34:36	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12 Q. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:36 season starting on April 6th, 2015, and finishing on 11:34:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:30 do realize that you have the weather contingency 11:35:34 built in there, as well. 11:35:36 So my question though, there was 22 11:35:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12 Q. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:32 installation of the turbines occurs within a single 11:34:36 season starting on April 6th, 2015, and finishing on 11:34:39 November 10th, 2015. 11:34:44 A. Yeah. 11:34:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:34 built in there, as well. 11:35:36 So my question though, there was 22 11:35:38 days of contingency then of 10 percent of 218 days 11:35:39
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12 Q. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:32 installation of the turbines occurs within a single 11:34:39 November 10th, 2015. 11:34:43 Do you follow where I am there? 11:34:44 A. Yeah. 11:34:47 Q. Now you built a 10 percent 11:34:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:30 do realize that you have the weather contingency 11:35:34 built in there, as well. 11:35:36 So my question though, there was 22 11:35:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12 Q. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:32 installation of the turbines occurs within a single 11:34:36 season starting on April 6th, 2015, and finishing on 11:34:39 November 10th, 2015. 11:34:43 Do you follow where I am there? 11:34:44 A. Yeah. 11:34:47 mechanical contingency into the project schedule; is 11:34:51	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:30 do realize that you have the weather contingency 11:35:34 built in there, as well. 11:35:36 So my question though, there was 22 11:35:38 days of contingency then of 10 percent of 218 days 11:35:39 gives us 22 days; correct, roughly? 11:35:43 A. Yes. 11:35:46
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Now, I want to turn to this 11:33:49 SgurrEnergy schedule that they had with their second 11:33:51 report, and I'm going to ask if Ms. Seers can again 11:33:54 hand up that giant piece of paper. 11:33:58 MS. SEERS: I believe that 11:34:00 MS. SQUIRES: There is one still 11:34:02 there. 11:34:03 MS. SEERS: the witness is 11:34:04 MS. SQUIRES: Thank you. 11:34:05 MS. SEERS: This will be the witness 11:34:06 schedule. 11:34:08 MS. SQUIRES: Perfect. Don't leave 11:34:08 notes then. 11:34:11 BY MS. SQUIRES 11:34:12 Q. We are going to look at line 389. 11:34:12 Now, if we look at that line, 389, it indicates that 11:34:32 installation of the turbines occurs within a single 11:34:39 November 10th, 2015. 11:34:43 Do you follow where I am there? 11:34:44 A. Yeah. 11:34:47 Q. Now you built a 10 percent 11:34:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. And if my math is right, April 6th 11:34:54 to November 10, 2015 is about 218 days. 11:34:57 Does that sound about right, take my 11:35:01 word for it? 11:35:03 A. I'll take your word for it. 11:35:04 Q. We can correct the record later if 11:35:05 I'm wrong. 11:35:07 So you have about 22 days of 11:35:08 contingency there, so 10 percent of 218? 11:35:11 A. There's weather built in there, as 11:35:15 well. You said 10 percent mechanical, which is part 11:35:17 of it, and then there was 25 percent weather, 11:35:19 I believe, on top of that and possibly even more. 11:35:22 But I honestly don't remember precisely how we 11:35:25 developed that. 11:35:28 Q. So right now I want to focus on 11:35:29 the mechanical contingency of that 10 percent but I 11:35:30 do realize that you have the weather contingency 11:35:34 built in there, as well. 11:35:36 So my question though, there was 22 11:35:38 days of contingency then of 10 percent of 218 days 11:35:39 gives us 22 days; correct, roughly? 11:35:43

	Page 120		Page 121
1	December 2015 because of the winter months, you 11:35:54	1	Q. And they note 20 to 25 days; 11:36:56
2	would have an extra 20 days to work with at the end; 11:35:56	2	correct? 11:36:59
3	correct? You have between November 10th, 2015 to 11:35:59	3	A. I see that they note that it takes 11:37:26
4	the start of December? 11:36:01	4	20 to 25 days to bring a vessel from Europe at 11:37:29
5	A. Yeah, or possibly even into 11:36:03	5	least. That's an approximation, but to say that it 11:37:33
6	December, yeah. 11:36:05	6	adds to project cost, I would say that it doesn't 11:37:35
7	Q. Now, if one of the two vessels 11:36:06	7	add to project cost. 11:37:38
8	being used suffered a mechanical failure of 11:36:08	8	Q. Okay. If we just talk about the 11:37:39
9	significant length, there could be a problem with 11:36:11	9	days, the 20 to 25 days. 11:37:40
10	the project schedule; correct? If they went down 11:36:13	10	If one of the vessels did go down for 11:37:42
11	longer than those 42 days? 11:36:16	11	mechanical failure and you were to require that 11:37:44
12	A. That's correct. 11:36:18	12	third vessel, assuming you've secured it in advance, 11:37:46
13	Q. Now, if we look at if let's 11:36:20	13	that travel time would eat up your entire 11:37:49
14	go to page 216 of the second SgurrEnergy report. So 11:36:24	14	contingency; correct? 11:37:53
15	that's the coiled report there that Mr. Neufeld 11:36:27	15	A. If we at that moment said the 11:37:54
16	handed to you. 11:36:30	16	only way we could proceed forward was to actually 11:37:56
17	A. Which page again, I apologize? 11:36:30	17	bring in another vessel and the only place that 11:38:00
18	Q. We're going to 216. 11:36:36	18	vessel was available was Europe, then I would agree 11:38:03
19	A. Okay. 11:36:42	19	with you. 11:38:07
20	Q. And we're going to look under 11:36:42	20	But my expectation is that the reality 11:38:07
21	SgurrEnergy's response to URS, paragraph 444. And 11:36:45	21	is there would be other ways that we could mitigate 11:38:09
22	there they're they are discussing the time for 11:36:49	22	that risk without having to potentially say we need 11:38:12
23	the turbine installation vessel to come from Europe 11:36:51	23	to bring another vessel from Europe. 11:38:15
24	to the Great Lakes; correct? 11:36:55	24	To be honest with you, we went through 11:38:16
25	A. That's correct. 11:36:56	25	this scenario on the Cape Wind project because on 11:38:19
	110000		and section of the cupe while project countries on Theory
	Page 122		Page 123
1	the Cape Wind project we had 101 3.6 megawatt 11:38:20	1	Q. That brings me to my next question 11:39:19
2	turbines. We had two installation vessels. Very 11:38:21	2	then: The Cape Wind project is not being built; 11:39:20
3	similar to this project used to planned to 11:38:25	3	correct? 11:39:23
4	install those turbines. 11:38:26	4	A. That is correct. 11:39:24
5	But what we found was even if one of 11:38:27	5	Q. Now, a few minutes ago we noted 11:39:24
6	those installation vessels went down, we could still 11:38:31	6	that there are six jack-up vessels that in theory 11:39:27
7	install the entirety of the project turbines with 11:38:33	7	could do the job, based on what you said? 11:39:30
8	that one remaining vessel. It wasn't necessarily 11:38:37	8	1 551
9	•	"	A. The six that were identified on 11:39:32
,	an issue. 11:38:40	9	that list, yes. 11:39:34
10	an issue. 11:38:40 When turbine erection is going well, 11:38:41		that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35
10	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43	9	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38
10 11 12	an issue. 11:38:40 When turbine erection is going well, 11:38:41	9 10 11 12	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35
10	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51	9 10 11	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38
10 11 12 13	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53	9 10 11 12	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48
10 11 12 13	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51	9 10 11 12 13	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48
10 11 12 13	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59	9 10 11 12 13 14	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53
10 11 12 13 14 15	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56	9 10 11 12 13 14 15	that list, yes. 11:39:34 Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49
10 11 12 13 14 15	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02	9 10 11 12 13 14 15	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59
10 11 12 13 14 15 16 17 18	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02 same time constraints that Windstream would have 11:39:05	9 10 11 12 13 14 15 16 17	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56
10 11 12 13 14 15 16 17	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02	9 10 11 12 13 14 15 16 17	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59
10 11 12 13 14 15 16 17 18 19 20 21	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02 same time constraints that Windstream would have 11:39:05	9 10 11 12 13 14 15 16 17 18	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59 a turbine installation vessel, yes. 11:40:00
10 11 12 13 14 15 16 17 18 19 20 21	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02 same time constraints that Windstream would have 11:39:05 been under with five years; correct? 11:39:07 A. It had some very serious time 11:39:09 constraints. 11:39:11	9 10 11 12 13 14 15 16 17 18 19 20 21 22	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59 a turbine installation vessel, yes. 11:40:00 Q. So in reality that list should be 11:40:02 shortened by one? 11:40:04 A. That's correct. 11:40:05
10 11 12 13 14 15 16 17 18 19 20 21 22 23	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02 same time constraints that Windstream would have 11:39:05 been under with five years; correct? 11:39:07 A. It had some very serious time 11:39:09 constraints. 11:39:11 Q. Do you recall how fast those were? 11:39:12	9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59 a turbine installation vessel, yes. 11:40:00 Q. So in reality that list should be 11:40:02 shortened by one? 11:40:04 A. That's correct. 11:40:05 Q. Now, I want to take you to 11:40:05
10 11 12 13 14 15 16 17 18 19 20 21	an issue. 11:38:40 When turbine erection is going well, 11:38:41 these turbines could go up in a day and you can move 11:38:43 right on. So it's just we didn't at Cape Wind 11:38:47 we didn't realize we didn't see that that was 11:38:51 a significant risk, and here I don't think at the 11:38:53 stage that we were in our analysis, we don't see it 11:38:56 as a significant risk. 11:38:59 Q. Two questions then on Cape Wind. 11:39:02 The first: Cape Wind wasn't under the 11:39:02 same time constraints that Windstream would have 11:39:05 been under with five years; correct? 11:39:07 A. It had some very serious time 11:39:09 constraints. 11:39:11	9 10 11 12 13 14 15 16 17 18 19 20 21 22	that list, yes. Q. Now, if we turn to page 212 of the 11:39:35 second SgurrEnergy report, the one in front of you 11:39:38 there, those six vessels are identified here; 11:39:41 correct? 11:39:48 A. That's correct. 11:39:48 Q. Now, as a point of clarity, the 11:39:49 Weeks 751 which you spoke about earlier, that's not 11:39:53 a turbine installation vessel; correct? 11:39:56 A. That's correct. It is not 11:39:59 a turbine installation vessel, yes. 11:40:00 Q. So in reality that list should be 11:40:02 shortened by one? 11:40:04 A. That's correct. 11:40:05

	Page 124		Page 125
1	assistance again. 11:40:16	1	potentially could have been be available in 2013 or 11:41:33
2	I it's paragraph 412. Sorry, not 11:40:17	2	'14 and then going back and saying, "In the real 11:41:34
3	page. 11:40:20	3	world when we look at what actually happened, those 11:41:39
4	A. Tell me the page again? 11:40:24	4	vessels were not available." I would have to say 11:41:42
5	Q. It is paragraph 412. 11:40:26	5	that's absolutely incorrect. I mean, you just can't 11:41:44
6	A. Paragraph 412. 11:40:28	6	look at it that way. If this project was a real 11:41:45
7	11:40:29	7	project, real vessels would have been contracted. 11:41:48
8	Q. Apologies. There are a lot of 11:40:30	8	The R.D. MacDonald would have been 11:41:50
9	paragraphs and page numbers and tab numbers going 11:40:32	9	finished. We would have had vessels available and 11:41:53
10	on. 11:40:35	10	quite possibly the A2Sea vessels could have been 11:41:55
11	PRESIDENT: Sorry, which document are 11:40:35	11	contracted or any of these other vessels if they 11:42:00
12	we looking as now? 11:40:37	12	were in the market, could have been contracted. 11:42:03
13	MS. SQUIRES: The second URS report. 11:40:39	13	So, I would have to say, no, I 11:42:05
14	BY MS. SQUIRES: 11:40:41	14	disagree this table accurately reflects vessel 11:42:07
15	A. It is page 81. 11:40:49	15	availability. 11:42:10
16	Q. All right. Now, in that paragraph 11:41:08	16	Q. So, again, your conclusion from 11:42:11
17	URS lists the same vessels; correct? 11:41:12	17	that then is because in your report you're just 11:42:12
18	A. Correct. 11:41:15	18	looking at Windstream as a hypothetical project and 11:42:17
19	Q. And they note that of those 11:41:15	19	that it's not real and if it was real, they would 11:42:20
20	vessels that were identified, none of them were 11:41:18	20	have been able to secure these vessels. You haven't 11:42:23
21	available in 2015; correct? 11:41:20	21	really gone through an analysis to determine what 11:42:25
22	A. On this table it says there 11:41:23	22	vessels would have been available for the project? 11:42:27
23	they're certainly not available. I mean there is 11:41:25	23	MS. SEERS: If I could, perhaps, 11:42:29
24	a big disconnect here between a hypothetical project 11:41:27	24	interject and ask that Ms. Squires poses one 11:42:30
25	that's being planned and saying what vessels could 11:41:30	25	question to the witness at a time. 11:42:35
	Page 126		Page 127
1		1	_
1 2	MS. SQUIRES: I believe that was one 11:42:37	1 2	We contacted A2 Sea and the Sea Power, and this is 11:43:32
	MS. SQUIRES: I believe that was one 11:42:37		We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37
2	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38	2	We contacted A2 Sea and the Sea Power, and this is 11:43:32
2	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40	2	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39
2 3 4	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39	2 3 4	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45
2 3 4 5	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40 THE WITNESS: Could you say it, again, 11:42:42	2 3 4 5	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45 it work. 11:43:48
2 3 4 5	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40 THE WITNESS: Could you say it, again, 11:42:42 though. I apologize. 11:42:43	2 3 4 5 6	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45 it work. 11:43:48 Q. So, a possibility is there, but 11:43:49
2 3 4 5 6 7	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40 THE WITNESS: Could you say it, again, 11:42:42 though. I apologize. 11:42:43 BY MS. SQUIRES: 11:42:45	2 3 4 5 6 7	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45 it work. 11:43:48 Q. So, a possibility is there, but 11:43:49 nothing contracted at this point or at the point at 11:43:50
2 3 4 5 6 7 8 9	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40 THE WITNESS: Could you say it, again, 11:42:42 though. I apologize. 11:42:43 BY MS. SQUIRES: 11:42:45 Q. I guess I'm trying to establish 11:42:45 that in your first report you didn't look into the 11:42:47 availability of vessels because, to use your words, 11:42:49	2 3 4 5 6 7 8	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45 it work. 11:43:48 Q. So, a possibility is there, but 11:43:49 nothing contracted at this point or at the point at 11:43:50 February '11. 11:43:53 A. That's right. 11:43:54 Q. One final series of questions for 11:43:55
2 3 4 5 6 7 8 9 10	MS. SQUIRES: I believe that was one 11:42:37 question but 11:42:38 PRESIDENT: I was able to follow it, 11:42:39 but whether the witness was able to 11:42:40 THE WITNESS: Could you say it, again, 11:42:42 though. I apologize. 11:42:43 BY MS. SQUIRES: 11:42:45 Q. I guess I'm trying to establish 11:42:45 that in your first report you didn't look into the 11:42:47 availability of vessels because, to use your words, 11:42:49 the project was hypothetical and if it had have 11:42:53	2 3 4 5 6 7 8	We contacted A2 Sea and the Sea Power, and this is 11:43:32 in 2014, we contacted them about the possibilities 11:43:37 of using the Sea Power on the Cape Wind project in 11:43:39 2015 and they said, no issues, we can probably make 11:43:45 it work. 11:43:48 Q. So, a possibility is there, but 11:43:49 nothing contracted at this point or at the point at 11:43:50 February '11. 11:43:53 A. That's right. 11:43:54 Q. One final series of questions for 11:43:55 you about the idea of building a new jack-up vessel 11:43:56
2 3 4 5 6 7 8 9 10 11	MS. Now, turbine installation starts 11:44:25

Page 129 Page 128 1 1 mechanical issues, you couldn't, in fact, replace it 11:44:36 Wolfe Island Shoals project, I would say we're down 11:46:08 2 2 with a new build in order to meet the current at the third bullet which is "Build a lower cost 11:44:40 11:46:10 3 3 schedule; correct? 11:44:42 functional jack-up with minimal features," not the 11:46:13 A. Yeah, if we had already started 11:44:43 4 4 150 million, which I did -- in this specific report 11:46:16 5 5 construction, we would not have been able to 11:44:46 I'm saying you don't need to build a \$150 million 11:46:18 6 complete a new -- build a new vessel in time to stay 11:44:48 6 vessel. That's exactly what I'm saying, this 11:46:21 7 7 on that schedule to finish the project. 11:44:51 \$150 million vessel is a NG9000, Gusto MCS design, 11:46:23 8 Q. Now, if Windstream had to 11:44:56 8 the self propelled turbine installation vessels that 11:46:29 9 9 commission and build a new vessel, the rough price 11:44:58 actually cannot even come down the Seaway. It 11:46:34 10 10 would be USD \$150 million? 11:45:05 wouldn't be able to be used on the Wolfe Island 11:46:36 11:45:07 11 A. I disagree. 11 project. You needs something that could actually 11:46:39 12 12 Q. Well, I want to take you to 11:45:08 fit through the Seaway, and would be the lowest 11:46:41 13 an exhibit in your binder. We're going to turn to 11:45:11 13 possible cost to give you the functionality you need 11:46:44 14 tab 20 and we're going to look at page 5. 11:45:13 14 to erect the turbines. 11:46:47 15 15 So we will come back to the first Q. So, we're looking at a vessel then 11:46:48 11:45:36 16 16 page there for a moment. So, this is Exhibit R-0655 11:45:38 that has, as you've said it, the lowest possible 11:46:50 17 and it's a presentation called "Build it and they 11:45:42 17 cost with the functionality for it to work, but you 11:46:53 18 will come," given by you on December 6th, 2012? 11:45:45 18 note there in the presentation that there could be 11:46:56 19 A. That's correct. 11:45:48 19 certain constraints with those types of vessels, one 11:46:59 20 20 Q. And if we turn to page 5, in the 11:45:48 being if the turbines get bigger. 11:47:02 21 21 second slide, it notes there: How much do we need. 11:45:51 So, again this conclusion on whether 11:47:03 22 22 Build 150 million plus jack-up vessel? So, is your 11:45:56 or not that vessel would be appropriate for the 11:47:04 23 23 testimony then that this is incorrect, that it 11:46:02 project is, again, preliminary; correct? 11:47:06 24 24 doesn't cost \$150 million? 11:46:04 A. I believe the vessel that R.D. A. For a vessel to construct the 25 11:46:06 25 MacDonald certainly appropriate for the Wolfe Island 11:47:14 Page 130 Page 131 1 1 Shoals project, even if the Wolfe Island Shoals 11:47:16 significant time constraints associated with that 11:49:16 2 2 project had used larger turbines than what we 11:47:18 project and that you had to get -- I think your 3 3 planned on, vessels smaller than the R.D. MacDonald 11:47:23 words were, "You had to get the project done on 11:49:17 4 were very appropriate if 2.3 megawatts turbines were 11:47:26 4 time." 11:49:20 5 going to be used. 11:47:31 5 In your experience, how are project 11:49:20 6 Q. As of right now there's nothing in 11:47:31 6 completion deadlines managed in the marine 11:49:23 7 your report to discuss the building or the 7 construction environment? 11:49:25 8 8 utilization, how those vessels would be modified; 11:47:35 A. Typically the developer or the 11:49:28 9 9 correct? Your report doesn't speak to that issue. 11:47:39 owner will ask us to sign a contract and in the case 11:49:30 A. I don't believe so. 10 10 of Cape Wind, that is also in the case of the Block 11:49:33 11:47:41 11 11 Island project, we've signed contracts that have 11:49:36 Q. Just give me one moment. 11:47:43 12 12 significant liquidated damages that are linked to 11:49:39 [Counsel confer] 11:47:44 13 13 MS. SQUIRES: Those are all my very specific schedule dates. 11:48:22 11:49:43 14 14 questions, Mr. Palmer. Thank you. 11:48:23 And those are the stick that they use 11:49:44 15 PRESIDENT: Thank you, Ms. Squires. 11:48:25 15 to ensure that we actually finish projects on time 11:49:48 16 16 Do you need to gather your thoughts or 11:48:26 because if we do not finish on time, we have to pay 11:49:52 17 17 can you go on immediately? 11:48:30 a significant sum of money immediately back to them 11:49:54 18 18 MS. SEERS: We can go on immediately. 11:48:33 to manage that risk on their side. 11:49:58 19 19 PRESIDENT: Okay, please. So, I can -- I believe I can very 11:50:01 11:48:35 20 RE-EXAMINATION BY MS. SEERS: 20 truthfully say that in the case of this project, 11:49:00 11:50:04 21 21 knowing how it was potentially would go to an EPC 11:50:06 Q. Good morning, Mr. Palmer, Ms. 11:49:03 22 22 Squires, you will recall, asked you questions about 11:49:05 fully-wrapped type of installation contract, I could 11:50:09 23 23 whether there were timing constraints on the Cape 11:49:10 believe that there would have been liquidated 11:50:14 24 24 Wind project that you were involved with. 11:49:11 damages built into this contract, and we have been 11:50:16 25 25 You answered that there were 11:49:16 held to those liquidated damages. 11:50:21

Page 132 Page 133 1 1 Q. And which party would bear the 11:50:23 Q. And you recall that Ms. Squires 11:51:28 2 2 asked you about the possibility of a vessel risk of contingencies occurring or other things, if 11:50:24 11:51:32 3 3 the project -- to ensure that the project would be 11:50:27 experiencing mechanical failure during construction 11:51:33 4 and the possible requirement to build a new vessel 11:51:38 4 built by the deadline? 11:50:32 5 5 A. The construction risk would have 11:50:33 during construction. And you gave an answer 11:51:41 6 6 regarding that possibility and the impact, if that 11:51:44 been carried by the construction contractor. 11:50:34 7 7 Q. Ms. Squires asked you questions 11:50:41 possibility were to materialize on the project 11:51:46 8 about whether a further contingency would be 8 schedule. 11:51:48 11:50:43 9 9 required if there was a mechanical failure; you will 11:50:45 Could you comment, in your opinion, as 11:51:50 10 10 recall? 11:50:48 to the likelihood of that scenario that was put to 11:51:53 11 11:50:49 11 you, materializing? 11:51:56 A. Uh-hmm. 12 12 Q. And you will recall that you 11:50:50 A. I think the likelihood that the 11:51:58 13 13 turbine installation vessel or one of the other 11:52:02 answered -- you gave an answer regarding the 11:50:51 14 14 possibility of a third vessel from Europe being 11:50:54 vessels failed to such an extent, that it was no 11:52:05 15 15 required. 11:50:57 longer a viable resource on the project, is remote. 11:52:10 16 But certainly it would have been part 11:52:13 16 Could you comment on whether the 11:50:59 17 17 10 percent contingency for mechanical failure is 11:51:00 of our planning, and we would have had additional 11:52:17 18 more likely than not sufficient, in your opinion, to 11:51:03 18 plans to how we could potentially mitigate that 11:52:22 19 deal with the possibility of mechanical failure? 19 contingency. 11:51:06 11:52:25 20 20 A. In our experience, we often use As I mentioned on Cape Wind we had 11:52:26 11:51:09 21 21 analyzed the schedule and found that we actually the 10 percent number, based on our actual 11:51:12 22 22 could complete the turbine installation, albeit it 11:52:31 experience with mechanical downtime. 11:51:16 23 23 I actually -- and 10 percent is 11:51:19 was going to take longer, we were going to get into 11:52:33 24 24 actually a conservative number. I would say our 11:51:22 liquidated damages, but we could complete the 11:52:36 25 actual mechanical downtime is less. 11:51:25 25 turbine installation with a single installation 11:52:38 Page 134 Page 135 1 11:52:41 1 vessel. work does not stop. We don't just have a single 11:53:53 2 2 Q. You will recall that Ms. Squires 11:52:42 point in time and say that's exactly how we're doing 11:53:54 3 3 asked you questions about whether your first report 11:52:44 it. We continually update our plans and our methods 11:53:57 4 represented a preliminary approach, in her words, to 11:52:47 4 and even after the contract is fully firm and the 11:54:01 5 the ways and means for construction, and you 11:52:52 5 design is fully complete, even going into 6 answered that it did. 6 construction we continue to improve and optimize our 11:54:05 7 7 11:54:09 Had the moratorium not occurred and 11:52:59 plan. 8 8 Q. You will recall Ms. Squires asked 11:54:13 the project been permitted to proceed, could you 9 9 comment on when, in the project development cycle 11:53:03 you questions that she characterized as, again, the 11:54:14 10 10 a more detailed construction ways and means plan 11:53:06 possibility of chartering certain particular vessels 11:54:18 11 11 11:53:10 would have been developed? for this project. And you will recall that you 12 12 A. Based on our real world 11:53:12 answered that, absent the moratorium it would have 11:54:25 13 13 experience, we would have constantly been updating 11:53:14 been possible to charter vessels or construct them. 11:54:28 14 14 the construction means and methods as we worked with 11:53:19 Can you comment on whether it would 11:54:32 15 the client to develop the project and the engineer. 11:53:22 15 have been likely as opposed to possible? 11:54:33 16 16 As changes were made to the foundation 11:53:26 A. I believe it was highly likely. 11:54:35 17 17 design, if any were required, we would have brought 11:53:28 Based on our actual experience in the 11:54:37 18 18 that into our construction methodology. It would 11:53:31 market and the offshore wind market for projects on 11:54:40 19 19 have been an ongoing process. We would have been 11:53:33 the east coast during that same timeframe in 2012, 11:54:44 20 re-estimating, re-scheduling, re-working this 20 11:53:37 2013, there was a significant amount of interest by 11:54:48 21 21 constantly from the time we got involved in the 11:53:41 European vessel owners to be able to provide vessels 11:54:51 22 22 11:53:43 project, all the way through. to the US, market, particularly vessels such as the 11:54:55 23 23 That has been our experience for all 11:53:44 A2 Sea, Sea Power, the A2 Sea Energy, that were too 11:55:00 24 24 small at that time to actually work efficiently in 11:55:05 of the offshore wind projects, and also many other 11:53:47 25 marine projects that we've been involved in. The 11:53:50 25 the European market. Those vessels -- they were

			·
	Page 136		Page 137
1	looking for places to put those vessels. 11:55:12	1	available and their relative proximity to the 11:56:46
2	Q. If you will turn back to tab 19, 11:55:15	2	project location? 11:56:49
3	please, Mr. Palmer, this is an Ortech report that 11:55:18	3	MR. NEUFELD: Before you answer, sorry 11:56:53
4	Ms. Squires took you to. 11:55:22	4	to interrupt, just a point of clarification here. 11:56:55
5	I'll get you the for the record 11:55:24	5	Everything on this page you've designated as 11:56:57
6	it's C-0552. 11:55:27	6	"confidential" so I'd like for you to either express 11:56:59
7	Okay, I don't think the page let me 11:55:37	7	that you are waiving the confidentiality 11:57:01
8	just give me a moment to check whether the 11:55:40	8	designations on the page or proceed to 11:57:02
9	page I'm taking him to I don't believe there's 11:55:42	9	MS. SEERS: Let me confer with my 11:57:06
10	any confidential information, so I don't think you 11:55:45	10	client about that then. I don't know that there's 11:57:08
11	need to cut the feed for this page. 11:55:47	11	a particular issue. 11:57:10
12	There is, but we won't pull it up on 11:55:56	12	PRESIDENT: We can also read the map, 11:57:11
13	the screen. Page 12, Mr. Palmer, please. This is 11:55:58	13	so I'm not sure we're going to find it necessary to 11:57:12
14 15	a map showing various potential fabrication 11:56:07	14 15	go there. 11:57:16
16	facilities, as I understand it, for the foundations. 11:56:13	16	MS. SEERS: I doubt that it's 11:57:17
17	A. Correct. 11:56:18 Q. And you will recall that 11:56:20	17	particularly confidential, but, okay, my client says 11:57:18 it's fine. 11:57:21
18	Ms. Squires asked you questions about the fact that 11:56:21	18	THE WITNESS: Certainly what I see on 11:57:21
19	certain potential foundation fabrication facilities 11:56:23	19	the map and this is the first time I've actually 11:57:24
20	were located further away from the project area than 11:56:26	20	seen this map in this context, but there were 11:57:27
21	the St. Mary's Cement, Bowmanville facility and she 11:56:29	21	multiple potential fabrication sites that were 11:57:31
22	asked you some questions about the impact on the 11:56:34	22	closer to the project site than the St. Mary's 11:57:35
23	project schedule about that. 11:56:36	23	facility and I have to say that the those other 11:57:38
24	If you go back to the map, can you 11:56:40	24	sites would actually be beneficial. 11:57:40
25	comment as to the various facilities that were 11:56:44	25	We, as a contractor, if we had been 11:57:43
	Page 138		Page 139
1	given the scope to say you also have to fabricate 11:57:45	1	as soon as we recognized that vessels would have 11:58:49
2	the foundation units, we would be looking for the 11:57:48	2	needed to be modified to or vessels that maybe we 11:58:51
3	closest possible site that was feasible for the 11:57:51	3	already had in our fleet, could be used on 11:58:53
4	project, just because it helps reduce our risk. 11:57:54	4	the project if they were modified, we would have 11:58:56
5	BY MS. SEERS: 11:57:56	5	anticipated that right from the start. 11:59:00
6	Q. So, you gave an answer to 11:57:56	6	To say exactly what time it would have 11:59:03
7	Ms. Squires about the impact on the project schedule 11:57:58	7	been, but in the initial estimate, if we had 11:59:05
8	if a site further away from the project area than 11:58:00	8	recognized we had a vessel that could work if we 11:59:07
9	the Bowmanville facility had been selected. 11:58:02	9	modified it, we would have been thinking about that 11:59:09
10	Could you comment on the impact on the 11:58:04	10	modification from the very beginning. 11:59:12
11	project schedule, if a site closer than the 11:58:06	11	MS. SEERS: I'll just confer with my 11:59:14
12	Bowmanville facility had been selected? 11:58:08	12	colleagues for one moment. Thank you, Mr. Palmer. 11:59:15
13	A. I think the project, the 11:58:12	13	Those are our questions. 11:59:27
14	installation schedule would still have been met. We 11:58:14	14	THE WITNESS: You're welcome. 11:59:28
15	would have sized and constructed the number of 11:58:16	15	PRESIDENT: Thank you, Ms. Seers. 11:59:32
16	installation vessels, appropriate for wherever that 11:58:19	16	There will be questions from the Tribunal, as well. 11:59:33
17	facility was located. 11:58:23	17	QUESTIONS FROM THE TRIBUNAL: 11:59:35
18	Q. Okay. You will recall that 11:58:24	18	MR. BISHOP: Yes, I have a question 11:59:39
19	Ms. Squires asked you questions about whether your 11:58:26	19	about the Cape Wind project. You said that that 11:59:40
20	report speaks to the modification of vessels. And 11:58:29	20	wasn't built. Why wasn't it built? 11:59:42
21	you noted that it does not. When, in the design or 11:58:33	21	THE WITNESS: I believe I can only 11:59:46
22	development of the project process, absent the 11:58:37	22	probably share information that's been made 11:59:47
23	moratorium, would detail of that nature been 11:58:41	23	available publicly, and as I believe though what had 11:59:50
24	developed? 11:58:45	24	publicly stated was that they were unable to secure 11:59:55
25	A. It would have developed right 11:58:47	25	all of their financing for the project. 11:59:59

Page 140 Page 141 1 1 They were certainly way, well on their 12:00:02 12:01:21 so they felt the force majeure were gone. 2 2 way to having all of their financing in place, but 12:00:04 MR. BISHOP: Do you know why they were 12:01:25 3 3 there was still portions of the financing that were 12:00:09 unable to obtain the financing? 12:01:25 4 4 not available. At the end of 2014, there was THE WITNESS: Ultimately, I think 12:00:11 12:01:28 5 5 a clause in their power purchase agreements that 12:00:19 it -- ultimately it came down to just the timing of 12:01:30 6 6 effectively cancelled their power purchase 12:00:22 the project, the schedule and when power had to be 12:01:37 7 7 agreements, and so at the end of 2014 they lost 12:00:26 delivered, and that's maybe a broad answer and I 12:01:46 8 their power purchase agreements. 12:00:28 8 apologize, but I don't think I can get into more 12:01:48 9 9 detail than that. There were steps, I think, that had 12:00:30 12:01:50 10 10 been put out in the news that said they could have 12:00:32 MR. BISHOP: What I took out of it was 12:01:52 11 potentially had petitioned for a longer period of 12:00:35 11 that it related to the schedule of finishing the 12:01:52 12 time for the power purchase agreements to remain in 12:00:40 12 project, as it related to the deadlines in the power 12:01:56 13 effect, but ultimately because of other factors they 12:00:42 13 purchase agreement. 14 elected not to do that. 14 THE WITNESS: That's correct. 12:00:45 12:02:00 15 MR. BISHOP: The other factors being 12:00:46 15 MR. BISHOP: That's what you were 12:02:01 16 16 the financing? 12:00:48 12:02:02 referring to? 17 THE WITNESS: Other factors, as 17 12:00:49 THE WITNESS: That's how I've under 12:02:02 18 I think they felt and I think that Jim Gordon had 12:00:50 18 stood it, yes. 12:02:03 19 come out publicly to say that they really felt they 12:00:54 19 MR. BISHOP: Were there technical 12:02:05 20 20 had a force majeure case here to build because of 12:00:58 issues on that project that were -- that would have 12:02:07 21 21 all the litigation that the project had been put been insurmountable? 22 22 through by the opposition. And they felt that their 12:01:04 THE WITNESS: No, we felt, 12:02:13 23 23 ability to reach the deadlines that were mandated by 12:01:08 technically, that we had an excellent plan to 12:02:14 24 24 the power purchase agreement were negatively 12:01:12 construct the project, and to erect the project and 12:02:18 25 25 effected because of all the litigation opposition, 12:01:18 the turbines they had selected, the Siemens turbines 12:02:21 Page 142 Page 143 1 1 were quite erectible without any issues for that 12:02:24 fabrication installation report done. Effectively, 12:03:30 2 2 project site. 12:02:28 the only thing they did not achieve was financial 12:03:32 3 3 That project had a lot of similarities 12:02:29 close. 12:03:36 4 in a way, to the Wolfe Island Shoals project. It 12:02:32 4 MR. BISHOP: What was the schedule for 12:03:37 5 was inside Nantucket Sound, a very -- much more 12:02:34 5 that project, start to finish? 12:03:38 6 protected area of water, where you did not get the 12:02:38 6 THE WITNESS: At the end it was going 12:03:40 7 same swell conditions, the same sea conditions that 12:02:41 7 to be -- it was going to be built in two seasons, 12:03:41 8 8 you have, let's say, off of Block Island or along 12:02:44 2015, 2016. There has been -- there were multiple 12:03:45 9 9 the eastern seaboard. 12:02:48 other schedules for the project but ultimately at 12:03:50 10 10 12:03:53 So, they had the advantage of having 12:02:49 the end, it was still a two-season project. 11 11 MR. BISHOP: Could the project have 12:03:56 a protected site that was in relatively shallow 12 12 water. The deepest water was about 20 metres, and 12:02:55 been built within that schedule, assuming that the 12:03:57 13 13 the technical challenges were all easily 12:02:58 other factors you mentioned --12:04:03 14 14 surmountable. THE WITNESS: If they -- I would say, 12:04:05 15 MR. BISHOP: How big was that project? 12:03:02 15 the project suffered a one-year delay, which is 16 THE WITNESS: The overall -- it was 12:03:04 16 public knowledge. It was initially scheduled to be 12:04:10 17 17 permitted for 468 megawatts. 12:03:05 2014, 2015. They had some concerns and it got 18 18 The first phasing had sold 77 percent 12:03:08 pushed into 2015, 2016. 12:04:17 19 19 of the power, and they were going to initially If the -- if -- when they made that 12:04:19 12:03:11 20 construct 101 turbines in the first phase. 20 12:03:13 one-year slide, if the -- some of the dates for 12:04:24 21 MR. BISHOP: Did they actually get 21 12:03:17 financing had been achieved, the project was 12:04:27 22 22 into construction of that project? 12:03:18 absolutely constructable. 12:04:30 23 THE WITNESS: No, they got all the way 12:03:19 23 MR. BISHOP: Okay. Thank you. 12:04:32 24 24 through, they have all the BOEM approvals. 12:03:22 PRESIDENT: I understand this project, 12:04:40 25 They got all the facility design report, the 12:03:26 25 the Windstream project, would have been held by your 12:04:42

	Page 144		Page 145
1	construction division? 12:04:44	1	one point they were both looking for a fully wrapped 12:05:50
2	THE WITNESS: That's correct. In 12:04:48	2	EPC contractor to step in and maybe handle 12:05:53
3	conjunction with our partners at the time, Kiewit 12:04:50	3	everything, but they they moved away from that to 12:05:56
4	and GOC. 12:04:50	4	more of a multi-contract approach where the 12:05:59
5	PRESIDENT: Generally, in your 12:04:55	5	developer themself sat in the middle between many 12:06:01
6	projects, do you contract? What is the contracting 12:04:56	6	other contractors. 12:06:03
7	structure? Do you contract directly with the owner 12:05:00	7	We had a very well-defined scope for 12:06:04
8	or the project manager or somebody else? 12:05:03	8	marine installation at Cape Wind. We were at risk 12:06:07
9	THE WITNESS: We've for many 12:05:06	9	for everything that was within our scope, but there 12:06:14
10	contracts, we've contracted directly with the owner. 12:05:08	10	were other risks on the project that were carried by 12:06:17
11	Historically, in offshore wind, we are 12:05:10	11	the developer. They put themselves in that position 12:06:19
12	contracting directly with the owner. That's how 12:05:13	12	to potentially lower cost for the project. 12:06:22
13	Cape Wind was. We contracted directly with Cape 12:05:16	13	PRESIDENT: I understand you did some 12:06:25
14	Wind. On Block Island we contracted directly with 12:05:19	14	work, you had some contact with Windstream back in 12:06:26
15	Deep Water Wind. 12:05:22	15	2010. 12:06:31
16	Other projects that have 12:05:23	16	Did you discuss the potential contract 12:06:31
17	a construction manager in the middle, we also 12:05:24	17	structure for 12:06:35
18	contracted that way, but in offshore wind we haven't 12:05:27	18	THE WITNESS: I recall in 2010, we 12:06:37
19	gone to a construction manager. 12:05:30	19	absolutely discussed the contract structure in that 12:06:39
20	PRESIDENT: So, what's based on 12:05:32	20	meeting, and at the time we were with Kiewit and 12:06:41
21	your experience, what would be the typical 12:05:34	21	GOC. We were absolutely willing to entertain 12:06:46
22	construction project structure, contracting 12:05:36	22	an EPC-type of contracting mechanism if that's what 12:06:50
23	structure in an offshore in a wind project? 12:05:40	23	they wanted. 12:06:55
24	THE WITNESS: I would say both the 12:05:44	24	In 2010 when Cape Wind came back out 12:06:55
25	Cape Wind project and the Block Island project, at 12:05:46	25	in the market, we had been working with them since 12:07:01
	Page 146		Page 147
1	2003. But in 2010, Cape Wind was absolutely looking 12:07:04	1	Ms. Squires. 12:09:35
2	for a full turnkey, fully wrapped EPC contract that 12:07:07	2	MS. SEERS: Sorry. 12:09:38
3	would bring the turbine supply and everything under 12:07:10	3	MS. SQUIRES: It's okay. 12:09:38
4	one contractor. 12:07:13	4	FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 12:09:39
5	And so in 2010, that was what was in 12:07:13	5	Q. Mr. Palmer, I just have one 12:09:47
6	our head was that people wanted these projects as 12:07:17	6	•
7			question for you. Mr. Bishop asked quite a number 12:09:48
	EPCs. 12:07:19	7	question for you. Mr. Bishop asked quite a number 12:09:48 of questions about the Cape Wind project, and you 12:09:52
8		7 8	
8 9	PRESIDENT: So, your understanding was 12:07:21		of questions about the Cape Wind project, and you 12:09:52
		8	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54
9	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23	8 9	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58
9 10	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28	8 9 10	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02
9 10 11	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28	8 9 10 11	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04
9 10 11 12	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29	8 9 10 11 12	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06
9 10 11 12 13	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33	8 9 10 11 12 13	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08
9 10 11 12 13 14	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36	8 9 10 11 12 13 14	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09
9 10 11 12 13 14	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. PRESIDENT: Okay. Thank you very 12:07:38	8 9 10 11 12 13 14 15	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09 What were the capital costs of that project? 12:10:10
9 10 11 12 13 14 15	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39	8 9 10 11 12 13 14 15	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09 What were the capital costs of that project? 12:10:10 A. I'd say for the Cape Wind project, 12:10:15
9 10 11 12 13 14 15 16	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:39	8 9 10 11 12 13 14 15 16	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:10 What were the capital costs of that project? 12:10:10 A. I'd say for the Cape Wind project, 12:10:15 it was I'm not sure honestly, I do not know. 12:10:17
9 10 11 12 13 14 15 16 17	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36 PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:39 PRESIDENT: Do the questions from the 12:07:41	8 9 10 11 12 13 14 15 16 17 18	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09 What were the capital costs of that project? 12:10:10 A. I'd say for the Cape Wind project, 12:10:15 it was — I'm not sure — honestly, I do not know. 12:10:17 Maybe you can tell me what's been publicly reported? 12:10:22
9 10 11 12 13 14 15 16 17 18	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36 PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:41 Tribunal give rise to any questions from counsel? 12:07:42	8 9 10 11 12 13 14 15 16 17 18	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02
9 10 11 12 13 14 15 16 17 18 19 20	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36 PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:39 PRESIDENT: Do the questions from the 12:07:41 Tribunal give rise to any questions from counsel? 12:07:42 MS. SEERS: Let me just have a moment 12:07:46	8 9 10 11 12 13 14 15 16 17 18 19 20	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09 What were the capital costs of that project? 12:10:10 A. I'd say for the Cape Wind project, 12:10:15 it was I'm not sure honestly, I do not know. 12:10:17 Maybe you can tell me what's been publicly reported? 12:10:22 Q. I don't have the number in front 12:10:25 of me either. That's fine. 12:10:26
9 10 11 12 13 14 15 16 17 18 19 20 21	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36 PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:39 PRESIDENT: Do the questions from the 12:07:41 Tribunal give rise to any questions from counsel? 12:07:42 MS. SEERS: Let me just have a moment 12:07:46 to confer. 12:07:47	8 9 10 11 12 13 14 15 16 17 18 19 20 21	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02 I don't want you to reveal any 12:10:04 confidential information of your clients in 12:10:06 answering this question, but I know it's been 12:10:08 publicly reported, so maybe you can still answer: 12:10:09 What were the capital costs of that project? 12:10:10 A. I'd say for the Cape Wind project, 12:10:15 it was I'm not sure honestly, I do not know. 12:10:17 Maybe you can tell me what's been publicly reported? 12:10:22 Q. I don't have the number in front 12:10:25 of me either. That's fine. 12:10:26 A. I truly don't know but it is 12:10:27
9 10 11 12 13 14 15 16 17 18 19 20 21	PRESIDENT: So, your understanding was 12:07:21 at the time that it would have been an EPC directly 12:07:23 with the owner? 12:07:27 THE WITNESS: Potentially, yeah. 12:07:28 I can say it certainly didn't get developed very 12:07:29 far, it was just talked about. But it wasn't 12:07:33 something that we with we were opposed to. 12:07:36 PRESIDENT: Okay. Thank you very 12:07:38 much. 12:07:39 THE WITNESS: You're welcome. 12:07:39 PRESIDENT: Do the questions from the 12:07:41 Tribunal give rise to any questions from counsel? 12:07:42 MS. SEERS: Let me just have a moment 12:07:46 to confer. 12:07:47 MR. SPELLISCY: We should probably go 12:09:26	8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	of questions about the Cape Wind project, and you 12:09:52 mentioned that it was similar because of the shallow 12:09:54 water, similar to Windstream project because it was 12:09:58 in a protected area in shallower with water. 12:10:02

	Page 148		Page 149
1	-	1	
2	MS. SQUIRES: And just one second. 12:10:40	2	A. At the time I mean, I say 12:11:50
3	That's it. Thank you. 12:10:42 PRESIDENT: Thank you, Ms. Squires. 12:10:45	3	not after February of 2011, but prior to 12:11:51
4		4	February 2011, we thought it gave a lot of financial 12:11:56 strength to the project. 12:11:59
5		5	strength to the project. 12:11:59 As I already said, we thought that was 12:12:00
6	MS. SEERS: I waited my turn. 12:10:48 RE-EXAMINATION BY MS. SEERS: 12:10:50	6	
7		7	going to be a key factor in actually letting that 12:12:02
8	Q. Mr. Palmer, Mr. Bishop asked you 12:10:58	8	project start first, rather than be a later project. 12:12:04 MS. SEERS: Okay. Thank you. And 12:12:09
9	questions about the Cape Wind project and why it was 12:11:00	9	
10	not built, and you gave answers about the 12:11:03	10	I appreciate we've reached the edge of your 12:12:10
	financability of the project and the issues 12:11:06	1	expertise as a marine contractor, but we appreciate 12:12:12
11 12	regarding its power purchase agreement. 12:11:10	11 12	your insight. Thank you. 12:12:16
	Could you comment on the nature, as 12:11:12	1	THE WITNESS: You're welcome. 12:12:18
13	far as you're aware of course, of those power 12:11:15	13	PRESIDENT: Okay, thank you very much, 12:12:22
14	purchase agreements and how they compare, if you're 12:11:19	14	Mr. Palmer. 12:12:23
15	aware, to the FIT contract that Windstream had? 12:11:23	15	THE WITNESS: You're welcome. 12:12:24
16	A. I honestly cannot offer any 12:11:28	16	PRESIDENT: So that concludes your 12:12:25
17	understanding of the power purchase agreements, 12:11:30	17	examination. We have still some time, so I suggest 12:12:27
18	which are at least one of them is public record. 12:11:31	18	we have the presentation of the next experts or 12:12:32
19	You can find on it the Internet, and you can read 12:11:34	19	expert. I understand it will be Mr. Irvine. 12:12:37
20	through it all. 12:11:36	20	And do we need a short logistical 12:12:46
21	Certainly, from our perspective, my 12:11:37	21	break of five minutes? Let's do that. We will 12:12:49
22	perspective, the FIT contract was a better mechanism 12:11:39	22	continue at 12:17. 12:12:52
23	than the power purchase agreements that Cape Wind 12:11:43	23	Recess taken at 12:13 p m. 12:19:59
24	had for financing. 12:11:48	24	Upon resuming at 12:21 p m. 12:19:59
25	Q. And can you 12:11:50	25	PRESIDENT: Good afternoon, 12:21:14
	Page 150		
	1 age 130		Page 151
1	•	1	Page 151 have already received Will there be any direct 12:22:18
1 2	Mr. Irvine. 12:21:15	1 2	•
	Mr. Irvine. 12:21:15	1	have already received Will there be any direct 12:22:18
2	Mr. Irvine. 12:21:15 THE WITNESS: Good afternoon. 12:21:16 PRESIDENT: You have been here before 12:21:17	2	have already received Will there be any direct 12:22:18 examination by counsel? 12:22:23

Now, 12:21:45 I understand you are here to defend the both of 12:21:52 the Sgurr reports, although you were not involved in 12:21:55 the preparation of the first one; is that correct? 12:21:58 THE WITNESS: That's correct. 12:22:01 PRESIDENT: And you are familiar with 12:22:01 the first report and your 12:22:03 THE WITNESS: Yes, I am familiar with 12:22:06	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	have already received Will there be any direct 12:22:18 examination by counsel? 12:22:23 MS SEERS: There may be 12:22:24 PRESIDENT: There may be Okay, let's 12:22:25 see 12:22:26 So, Mr Irvine, please go ahead 12:22:26 PRESENTATION BY IAN ADAM IRVINE, SGURR ENERGY 12:22:26 THE WITNESS: Thank you for the 12:22:33 opportunity to speak today 12:22:34 Here is the agenda that I intend to 12:22:37 run through, and I'll tell you a bit about myself, 12:22:42 opinion, and discuss something about offshore wind 12:22:45 component and why we do not believe their components 12:22:52 are novel, a little bit about the schedule, and 12:22:56 I will conclude with a little discussion about the 12:22:59 wind resource 12:23:05 So, a little bit about myself I am 12:23:10 renewable energy since 1985, since I graduated, so 12:23:14
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Mr. Irvine. 12:21:15 THE WITNESS: Good afternoon. 12:21:16 PRESIDENT: You have been here before 12:21:17 so you know-how it works. 12:21:18 Can you please state your name for the 12:21:20 record, and then read the declaration for expert 12:21:22 witnesses? 12:21:25 THE WITNESS: Certainly. My name is 12:21:30 Ian Adam Irvine. My name is Ian Adam Irvine and 12:21:31 I solemnly declare upon my honour and conscience 12:21:36 that my evidence and my opinions will be in 12:21:40 accordance with my sincere belief. 12:21:42 AFFIRMED: IAN ADAM IRVINE 12:21:44 PRESIDENT: Thank you very much. Now, 12:21:45 I understand you are here to defend the both of 12:21:52 the Sgurr reports, although you were not involved in 12:21:55 the preparation of the first one; is that correct? 12:21:58 THE WITNESS: That's correct. 12:22:01 PRESIDENT: And you are familiar with 12:22:01 the first report and your 12:22:03 THE WITNESS: Yes, I am familiar with 12:22:06 both reports. 12:22:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	have already received Will there be any direct 12:22:18 examination by counsel? 12:22:23 MS SEERS: There may be 12:22:24 PRESIDENT: There may be Okay, let's 12:22:25 see 12:22:26 So, Mr Irvine, please go ahead 12:22:26 PRESENTATION BY IAN ADAM IRVINE, SGURR ENERGY 12:22:26 THE WITNESS: Thank you for the 12:22:33 opportunity to speak today 12:22:34 Here is the agenda that I intend to 12:22:37 run through, and I'll tell you a bit about myself, 12:22:38 a bit about SgurrEnergy, give you a summary of my 12:22:42 opinion, and discuss something about offshore wind 12:22:45 component and why we do not believe their components 12:22:52 are novel, a little bit about the schedule, and 12:22:56 I will conclude with a little discussion about the 12:22:59 wind resource 12:23:05 So, a little bit about myself I am 12:23:08 a mechanical engineer I've been involved in 12:23:10 renewable energy since 1985, since I graduated, so 12:23:14 over 30 years of experience in the renewable energy 12:23:17
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Mr. Irvine. 12:21:15 THE WITNESS: Good afternoon. 12:21:16 PRESIDENT: You have been here before 12:21:17 so you know-how it works. 12:21:18 Can you please state your name for the 12:21:20 record, and then read the declaration for expert 12:21:22 witnesses? 12:21:25 THE WITNESS: Certainly. My name is 12:21:30 Ian Adam Irvine. My name is Ian Adam Irvine and 12:21:31 I solemnly declare upon my honour and conscience 12:21:36 that my evidence and my opinions will be in 12:21:40 accordance with my sincere belief. 12:21:42 AFFIRMED: IAN ADAM IRVINE 12:21:45 I understand you are here to defend the both of 12:21:52 the Sgurr reports, although you were not involved in 12:21:55 the preparation of the first one; is that correct? 12:21:58 THE WITNESS: That's correct. 12:22:01 PRESIDENT: And you are familiar with 12:22:01 the first report and your 12:22:03 THE WITNESS: Yes, I am familiar with 12:22:06 both reports. 12:22:07 PRESIDENT: Okay, very good. So, we 12:22:08	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	have already received Will there be any direct 12:22:18 examination by counsel? 12:22:23 MS SEERS: There may be 12:22:24 PRESIDENT: There may be Okay, let's 12:22:25 see 12:22:26 So, Mr Irvine, please go ahead 12:22:26 PRESENTATION BY IAN ADAM IRVINE, SGURR ENERGY 12:22:26 THE WITNESS: Thank you for the 12:22:33 opportunity to speak today 12:22:34 Here is the agenda that I intend to 12:22:37 run through, and I'll tell you a bit about myself, 12:22:38 a bit about SgurrEnergy, give you a summary of my 12:22:42 opinion, and discuss something about offshore wind 12:22:45 component and why we do not believe their components 12:22:52 are novel, a little bit about the schedule, and 12:22:56 I will conclude with a little discussion about the 12:22:59 wind resource 12:23:05 So, a little bit about myself I am 12:23:08 a mechanical engineer Tve been involved in 12:23:10 renewable energy since 1985, since I graduated, so 12:23:14 over 30 years of experience in the renewable energy 12:23:17 sector 12:23:21
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Mr. Irvine. 12:21:15 THE WITNESS: Good afternoon. 12:21:16 PRESIDENT: You have been here before 12:21:17 so you know-how it works. 12:21:18 Can you please state your name for the 12:21:20 record, and then read the declaration for expert 12:21:22 witnesses? 12:21:25 THE WITNESS: Certainly. My name is 12:21:30 Ian Adam Irvine. My name is Ian Adam Irvine and 12:21:31 I solemnly declare upon my honour and conscience 12:21:36 that my evidence and my opinions will be in 12:21:40 accordance with my sincere belief. 12:21:42 AFFIRMED: IAN ADAM IRVINE 12:21:44 PRESIDENT: Thank you very much. Now, 12:21:45 I understand you are here to defend the both of 12:21:52 the Sgurr reports, although you were not involved in 12:21:55 the preparation of the first one; is that correct? 12:21:58 THE WITNESS: That's correct. 12:22:01 PRESIDENT: And you are familiar with 12:22:01 the first report and your 12:22:03 THE WITNESS: Yes, I am familiar with 12:22:06 both reports. 12:22:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	have already received Will there be any direct 12:22:18 examination by counsel? 12:22:23 MS SEERS: There may be 12:22:24 PRESIDENT: There may be Okay, let's 12:22:25 see 12:22:26 So, Mr Irvine, please go ahead 12:22:26 PRESENTATION BY IAN ADAM IRVINE, SGURR ENERGY 12:22:26 THE WITNESS: Thank you for the 12:22:33 opportunity to speak today 12:22:34 Here is the agenda that I intend to 12:22:37 run through, and I'll tell you a bit about myself, 12:22:38 a bit about SgurrEnergy, give you a summary of my 12:22:42 opinion, and discuss something about offshore wind 12:22:45 component and why we do not believe their components 12:22:56 I will conclude with a little discussion about the 12:22:59 wind resource 12:23:05 So, a little bit about myself I am 12:23:10 renewable energy since 1985, since I graduated, so 12:23:14 over 30 years of experience in the renewable energy 12:23:17 sector 12:23:21 Tve over a decade of experience 12:23:24

	Page 152		Page 153
1	developments. 12:23:34	1	offshore energy services company, Wood Group, that 12:24:59
2	I formed SgurrEnergy in 2002 to focus 12:23:35	2	is some 32,000 people, and at any one time over 12:25:02
3	on renewable energy globally. 12:23:39	3	2,000 personnel working in the offshore environment. 12:25:07
4	I've been involved in the first 12:23:42	4	SgurrEnergy's experience in offshore 12:25:14
5	project financed offshore wind farm, Q7-2006. 12:23:43	5	wind is significant and considerable. These are the 12:25:16
6	I support the government initiatives 12:23:50	6	key roles that we get involved in, lender's 12:25:19
7	to look at the opportunities for wind farm 12:23:52	7	engineer, right through to a very important aspect 12:25:23
8	development offshore in China. 12:23:55	8	of offshore wind development, which is risk analysis 12:25:26
9	I'm a fellow of the Institute of 12:23:58	9	and project de-risking. 12:25:32
10	Mechanical Engineers, a visiting professor of 12:24:00	10	We are currently working on 14 live 12:25:36
11	University of Strathclyde and currently helping the 12:24:03	11	lenders technical advisor assignments, equal 12:25:40
12	UK Foreign and Commonwealth Office with a joint 12:24:06	12	equivalent to 4 gigawatts project in Europe. We 12:25:45
13	initiative to help reduce the cost of offshore wind 12:24:09	13	have a very strong record in Germany and the UK, the 12:25:49
14	for deployment in China. 12:24:16	14	world's biggest offshore wind markets. 12:25:54
15	That's a quick summary of SgurrEnergy, 12:24:18	15	And we have conducted significant work 12:25:55
16	what our business has achieved. We have consulted 12:24:21	16	with regard to the assessment of the wind resource, 12:25:59
17	in over 160 gigawatts of renewable energy projects 12:24:25	17	including current groundbreaking assessment using 12:26:02
18	since 2002. 12:24:29	18	remote sensing technologies such as LiDAR. 12:26:03
19	We actually have 280 staff worldwide 12:24:30	19	Here's a list of lender engineer's 12:26:14
20	supporting the development of a variety of renewable 12:24:35	20	assignments we have undertaken for offshore wind 12:26:18
21	energy projects. 12:24:38	21	farms. I'm not going to go through every point, 12:26:18
22	That is a summary of our global 12:24:41	22	just highlight the extensive coverage we have in 12:26:21
23	offices. We offer services all over the world and 12:24:45	23	that regard. 12:26:24
24	are well-established here in North America. 12:24:49	24	Another list of projects where we have 12:26:25
25	Importantly, we are now part of an 12:24:54	25	provided independent engineering acquisition, due 12:26:27
	Page 154		Page 155
1	Page 154 diligence support. 12:26:31	1	potential risks and appropriate mitigation of these 12:28:08
2	diligence support. 12:26:31 Some details on projects such as the 12:26:33	2	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11
	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38	2	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13
2 3 4	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42	2 3 4	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15
2 3 4 5	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45	2 3 4 5	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17
2 3 4 5 6	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53	2 3 4 5 6	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20
2 3 4 5 6 7	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55	2 3 4 5 6 7	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23
2 3 4 5 6 7 8	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58	2 3 4 5 6 7 8	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26
2 3 4 5 6 7 8	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00	2 3 4 5 6 7 8	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29
2 3 4 5 6 7 8 9	diligence support. 12:26:31 Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03	2 3 4 5 6 7 8 9	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32
2 3 4 5 6 7 8 9 10	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07	2 3 4 5 6 7 8 9 10	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:32 We consider the Wolfe Shore Island 12:28:34
2 3 4 5 6 7 8 9 10 11	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14	2 3 4 5 6 7 8 9 10 11	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38
2 3 4 5 6 7 8 9 10 11 12 13	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17	2 3 4 5 6 7 8 9 10 11 12	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43
2 3 4 5 6 7 8 9 10 11 12 13	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21	2 3 4 5 6 7 8 9 10 11 12 13 14	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47
2 3 4 5 6 7 8 9 10 11 12 13 14	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:31 assessments in wind resource such in places such as 12:27:33	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50 uses technologies which capitalise on the extensive 12:28:54
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50 uses technologies which capitalise on the extensive 12:28:54 supply chain, and its experience specifically in the 12:28:58
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:38 This is a very important aspect of 12:27:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:39 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:50 uses technologies which capitalise on the extensive 12:28:54 supply chain, and its experience specifically in the 12:28:58 Great Lakes system. We view the project schedule as 12:29:02
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:41 what we offer to our clients, which is risk analysis 12:27:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:50 uses technologies which capitalise on the extensive 12:28:54 supply chain, and its experience specifically in the 12:28:58 Great Lakes system. We view the project schedule as 12:29:02 reasonable and achievable. 12:29:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:41 what we offer to our clients, which is risk analysis 12:27:49 and project re-risking. I cannot emphasize 12:27:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50 uses technologies which capitalise on the extensive 12:28:58 Great Lakes system. We view the project schedule as 12:29:02 reasonable and achievable. 12:29:05 It has a robust and bankable wind 12:29:08
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:41 what we offer to our clients, which is risk analysis 12:27:49 sufficiently how much importance we have to place in 12:27:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50 uses technologies which capitalise on the extensive 12:28:54 supply chain, and its experience specifically in the 12:28:58 Great Lakes system. We view the project schedule as 12:29:02 reasonable and achievable. 12:29:05 It has a robust and bankable wind 12:29:08 resource supporting reports. We consider the 12:29:11
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	diligence support. Some details on projects such as the 12:26:33 assessment of floating wind, undertaking 12:26:38 construction reviews for potential offshore wind 12:26:42 developments. And interestingly, we also supported 12:26:45 Cape Wind's development in the US. 12:26:53 We have undertaken numerous technical 12:26:55 feasibility studies for clients ranging from Japan 12:26:58 through to looking at operation maintenance 12:27:00 strategies for large offshore wind developments in 12:27:03 the UK, such as Inch Cape and Moray Firth. 12:27:07 We have undertaken extensive 12:27:14 assessment of the offshore resource looking at 12:27:17 issues like wind turbine power curve responses in 12:27:21 the offshore wind environment, deploying LiDAR on a 12:27:24 platform off of Hong Kong. 12:27:29 We currently do shore-to-sea 12:27:31 assessments in wind resource such in places such as 12:27:33 Texas and South Korea. 12:27:41 what we offer to our clients, which is risk analysis 12:27:49 and project re-risking. I cannot emphasize 12:27:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	potential risks and appropriate mitigation of these 12:28:08 risks, and continue that right through the project 12:28:11 cycle. 12:28:13 From our perspective, we would 12:28:15 typically see 30 or more iterations of a project 12:28:17 schedule by the time we got to the financial close 12:28:20 position. 12:28:23 So, this gives a summary of my 12:28:26 opinion, and that is based upon our extensive 12:28:29 experience. 12:28:32 We consider the Wolfe Shore Island 12:28:34 offshore wind project to be technically feasible, 12:28:38 and more likely than not, it would have been 12:28:43 developed and built within the guidelines of the FIT 12:28:47 contract. 12:28:48 And we reach this conclusion for the 12:28:48 following reasons: It uses proven technologies, it 12:28:50 uses technologies which capitalise on the extensive 12:28:58 Great Lakes system. We view the project schedule as 12:29:02 reasonable and achievable. 12:29:05 It has a robust and bankable wind 12:29:08

	Page 156		Page 157
1	expertise. 12:29:25	1	the conditions that we have to operate in, the 12:30:55
2	This is highlighting that we don't 12:29:28	2	conditions that we have to operate in, the 12:30:58
3	consider that project to be novel. The components 12:29:30	3	we get more information we develop the schedule and 12:31:02
4	proposed for this project have been used in many 12:29:36	4	so it goes on. 12:31:06
5	other applications, as the previous witnesses have 12:29:38	5	So we believe that there's appropriate 12:31:07
6	explained. 12:29:42	6	consideration that has been given to weather 12:31:09
7	There is over 9 gigawatts of offshore 12:29:45	7	downtime, the ice season, which this year we see has 12:31:12
8	wind, 370 gigawatts of wind installed worldwide, 12:29:48	8	not occurred. And I'm happy to conclude and 12:31:17
9	giving an extensive pull of experience to draw from. 12:29:52	9	confident to conclude based on our review and 12:31:24
10	And there are also projects that are 12:29:57	10	assessment of over 39 offshore wind projects, that 12:31:26
11	very, very similar to this proposition for Lake 12:30:00	11	we believe the 63-month project development and 12:31:29
12	Ontario, based in both the Baltic Sea and on a lake 12:30:03	12	construction schedule is reasonable. 12:31:33
13	in Sweden. 12:30:09	13	This is a very critical slide because 12:31:38
14	So taking a look at the project 12:30:11	14	it highlights the scheduling advantages we have with 12:31:40
15	schedule, this is looking at 63 months for 12:30:13	15	regards to construction of an offshore wind farm on 12:31:45
16	undertaking all the associated activities, from 12:30:18	16	Lake Ontario. We have a benign marine environment 12:31:49
17	start to finish to get the project online, which we 12:30:21	17	compared to the majority of the offshore wind farm 12:31:54
18	consider adequate. 12:30:26	18	projects that have been constructed in the North 12:31:57
19	It has been developed by COWI, 12:30:28	19	Sea. 12:31:58
20	Weeks Marine, ourselves, WSP and Baird. And as 12:30:33	20	There is no requirement to bury the 12:32:00
21	I said previously, the project schedule we start 12:30:36	21	array or export cables which allows us to accelerate 12:32:04
22	with is one of many iterations we would expect to 12:30:41	22	that part of the development. 12:32:08
23	see as the project is developed. 12:30:44	23	The intention is to use an onshore, 12:32:11
24	And those iterations would drop on 12:30:48	24	rather than an offshore substation. That's 12:32:14
25	further site investigation work to better understand 12:30:51	25	referenced as offshore, but the intention is to 12:32:16
	Page 158		Page 159
1	locate that on an island location. 12:32:19	1	considered a very reasonable timeframe. 12:33:46
2	There is electrically available 12:32:26	2	-
3	-		I nat's supported by recent examples of 17:33:50
3	facilities and materials for contract in the 12:32:28		That's supported by recent examples of 12:33:50 very similar number of turbines and similar size 12:33:53
4	facilities and materials for contract in the 12:32:28 foundations and turbines 12:32:30	3 4	very similar number of turbines and similar size 12:33:53
	foundations and turbines. 12:32:30	3	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58
4	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31	3 4	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02
4 5	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34	3 4 5	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13
4 5 6	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37	3 4 5 6	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16
4 5 6 7	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42	3 4 5 6 7	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17
4 5 6 7 8	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42	3 4 5 6 7 8	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16
4 5 6 7 8 9	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46	3 4 5 6 7 8	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17
4 5 6 7 8 9	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49	3 4 5 6 7 8 9	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24
4 5 6 7 8 9 10	foundations and turbines. 12:32:30 We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52	3 4 5 6 7 8 9 10	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26
4 5 6 7 8 9 10 11	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54	3 4 5 6 7 8 9 10 11 12	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27
4 5 6 7 8 9 10 11 12	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57	3 4 5 6 7 8 9 10 11 12	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31
4 5 6 7 8 9 10 11 12 13	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58	3 4 5 6 7 8 9 10 11 12 13 14	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35
4 5 6 7 8 9 10 11 12 13 14	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58 get such technology locally. The intention is to 12:33:02	3 4 5 6 7 8 9 10 11 12 13 14 15	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41
4 5 6 7 8 9 10 11 12 13 14 15	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:15	3 4 5 6 7 8 9 10 11 12 13 14 15 16	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42
4 5 6 7 8 9 10 11 12 13 14 15 16	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58 get such technology locally. The intention is to 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:45 procurement. 12:34:48 Every project is unique and an average 12:34:49
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:15	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:45 procurement. 12:34:48
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:18 robust grid connection-point with the intention to 12:33:26	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:48 Every project is unique and an average 12:34:49 turbine delivery time is not something that we would 12:34:56 use as a guide for project turbine supply. 12:34:58
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58 get such technology locally. The intention is to 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:15 conditions, and we believe that there is a very 12:33:18 robust grid connection-point with the intention to 12:33:26 power transmission system. 12:33:30	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:45 procurement. 12:34:48 Every project is unique and an average 12:34:49 turbine delivery time is not something that we would 12:34:56 use as a guide for project turbine supply. 12:34:58 And we expect that the turbine 12:35:04
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58 get such technology locally. The intention is to 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:15 conditions, and we believe that there is a very 12:33:18 robust grid connection-point with the intention to 12:33:26 power transmission system. 12:33:30 We consider that the project uses 12:33:38	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:45 procurement. 12:34:48 Every project is unique and an average 12:34:49 turbine delivery time is not something that we would 12:34:56 use as a guide for project turbine supply. 12:34:58 And we expect that the turbine 12:35:04 manufacturers, with an interest in capturing 12:35:06
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	foundations and turbines. We have a relatively short export 12:32:31 cable, only 28 kilometres, compared to what we see 12:32:34 in some European examples, 60, 70, 80 kilometres. 12:32:37 We are in close proximity to the shore 12:32:42 with regards to staging and the offshore 12:32:46 construction activities. That is a major advantage 12:32:49 compared to those projects being developed in the 12:32:52 North Sea. 12:32:54 There is no requirement for 12:32:57 a custom-built European installation vessel. We can 12:32:58 get such technology locally. The intention is to 12:33:02 use well understood and tested turbine technology, 12:33:07 in the Siemens 2.3 megawatts turbine. 12:33:12 We have well categorized geotechnical 12:33:15 conditions, and we believe that there is a very 12:33:18 robust grid connection-point with the intention to 12:33:26 power transmission system. 12:33:30	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	very similar number of turbines and similar size 12:33:53 projects in North America. Kay Wind project, for 12:33:58 example, is a 14-month delivery of 130 turbines, 12:34:02 Siemens 2.3 megawatts turbines. 12:34:13 Similarly, there's a project in North 12:34:16 Dakota 200 megawatts, and again, it's got a similar 12:34:17 scheduling requirement with regards to the 14 months 12:34:17 that we claim. 12:34:24 The manufacturer of wind turbines, 12:34:26 specifically the Siemens 2.3 turbine, is 12:34:27 a straightforward and well understood process. 12:34:31 Siemens can make a nacelle in one to two days. It 12:34:35 is a production turbine. 12:34:41 So we disagree with URS conclusion 12:34:42 that 24 months would be required for turbine 12:34:45 procurement. 12:34:48 Every project is unique and an average 12:34:49 turbine delivery time is not something that we would 12:34:56 use as a guide for project turbine supply. 12:34:58 And we expect that the turbine 12:35:04

	Page 160		Page 161
1	developer's timelines. 12:35:20	1	the project site. 12:36:44
2	As noted by Weeks, they began to build 12:35:22	2	An activity that's proven the concept 12:36:48
3	a vessel in anticipation of this market opening up. 12:35:28	3	of being able to bring this turbine into the Ontario 12:36:50
4	That is something I have seen on many occasions 12:35:31	4	lake system, and indeed that project also purchased 12:36:55
5	whereby a potential contractor will construct 12:35:35	5	the concept for connecting to the grid via 12:36:57
6	equipment with a view to capture a first mover 12:35:41	6	an undersea cable. 12:37:01
7	advantage in the regular market. 12:35:43	7	So thousands of Siemens 2.3 megawatts 12:37:04
8	And it is also standard practice to 12:35:50	8	turbines operating onshore and offshore globally. 12:37:07
9	procure major pieces of equipment to begin the 12:35:52	9	There is no material difference between the onshore 12:37:13
10	procurement process, to begin the design of, for 12:35:54	10	and offshore versions. And the freshwater 12:37:16
11	example, a turbine transformer so we can move more 12:35:57	11	environment that we are deploying, means that we are 12:37:19
12	rapidly when the funds become available to purchase. 12:36:02	12	exposed to less risk. For example, we do not need 12:37:23
13	And the last point, there is, yes, 12:36:06	13	the paint systems that are required to cope with the 12:37:28
14	it's typical for turbines to be paid for at 12:36:09	14	saltwater environment. 12:37:30
15	financial close, but not necessarily on each 12:36:14	15	I don't need to dwell on this as one 12:37:37
16	occasion. 12:36:17	16	of my colleagues has already discussed in detail, 12:37:40
17	It comes down to the appetite for risk 12:36:18	17	the foundation design and deployment. Only to say 12:37:43
18	of a developer and the financial strength of 12:36:20	18	that this is a standard way of constructing concrete 12:37:48
19	a developer. 12:36:24	19	structures in the offshore end environment. 12:37:54
20	I'd like to comment on Siemens 12:36:27	20	The electrical system design, while we 12:37:58
21	2.3 megawatts turbine. This is a workhorse of the 12:36:29	21	have many examples of cables being deployed in the 12:38:04
22	industry. It's been deployed in many locations in 12:36:34	22	Great Lakes system, including Lake Ontario, it's 12:38:08
23	the offshore environment. 12:36:37	23	a well-understood activity and commonly executed. 12:38:12
24	Indeed, there are examples of that 12:36:39	24	And this ability to connect on to what 12:38:16
25	turbine sitting on Wolfe Island right adjacent to 12:36:41	25	I said earlier was an artery of the transmission 12:38:20
	Page 162		Page 163
1	system, is a major advantage to this project, 12:38:24	1	are many sites in the German sector where they are 12:39:59
2	particularly, given as it has been proven with the 12:38:30	2	using government-funded met mass of 100 metres 12:40:03
3	Wolfe Island deployment. 12:38:34	3	
4	Wone island deployment. 12.36.34	1 -	height called FIN01. And that is used to underpin 12:40:06
	Finally, on the wind resource of our 12:38:39	4	height called FIN01. And that is used to underpin 12:40:06 the energy or prediction for sites that are being 12:40:11
5			
	Finally, on the wind resource of our 12:38:39	4	the energy or prediction for sites that are being 12:40:11
5	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44	4 5	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17
5 6	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47	4 5 6	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22
5 6 7	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01	4 5 6 7	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25
5 6 7 8 9	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06	4 5 6 7 8 9	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29
5 6 7 8 9 10	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11	4 5 6 7 8 9 10	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39
5 6 7 8 9 10 11	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16	4 5 6 7 8 9 10 11 12	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39
5 6 7 8 9 10 11 12	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:16 it does not have many features to destroy the wind 12:39:18	4 5 6 7 8 9 10 11 12 13	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40
5 6 7 8 9 10 11 12 13 14	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22	4 5 6 7 8 9 10 11 12 13 14	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41
5 6 7 8 9 10 11 12 13 14	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23	4 5 6 7 8 9 10 11 12 13 14	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42
5 6 7 8 9 10 11 12 13 14 15	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25	4 5 6 7 8 9 10 11 12 13 14 15	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42
5 6 7 8 9 10 11 12 13 14 15 16 17	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28	4 5 6 7 8 9 10 11 12 13 14 15 16	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46
5 6 7 8 9 10 11 12 13 14 15 16 17	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28 characteristics, I mean we can see low wind sheer 12:39:32	4 5 6 7 8 9 10 11 12 13 14 15 16 17	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50
5 6 7 8 9 10 11 12 13 14 15 16 17 18	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:32 and wind turbulence consistent with what we would 12:39:35	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:32 and wind turbulence consistent with what we would 12:39:35 expect to see in the offshore environment. 12:39:39	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53 you can have your lunch. Thank you. 12:40:58
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28 characteristics, I mean we can see low wind sheer 12:39:32 and wind turbulence consistent with what we would 12:39:35 expect to see in the offshore environment. 12:39:39 There's a sufficient amount of robust 12:39:43	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53 you can have your lunch. Thank you. 12:40:58 THE WITNESS: Thank you. 12:41:00
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28 characteristics, I mean we can see low wind sheer 12:39:32 and wind turbulence consistent with what we would 12:39:35 expect to see in the offshore environment. 12:39:43 data that has been collected over a very long period 12:39:45	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53 you can have your lunch. Thank you. 12:40:58 THE WITNESS: Thank you. 12:41:00 Lunch recess taken at 12:41 p m. 12:41:08
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28 characteristics, I mean we can see low wind sheer 12:39:32 and wind turbulence consistent with what we would 12:39:35 expect to see in the offshore environment. 12:39:43 data that has been collected over a very long period 12:39:47	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. Thank 12:40:40 you. 12:40:41 PRESIDENT: Thank you very much. 12:40:42 I suggest we break now for an hour and continue at 12:40:42 1:40. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53 you can have your lunch. Thank you. 12:40:58 THE WITNESS: Thank you. 12:41:08 Lunch recess taken at 12:41 p m. 12:41:08 Upon resuming at 1:43 p m. 12:41:08
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Finally, on the wind resource of our 12:38:39 as assessment of the wind data, the reports that 12:38:44 have been prepared by others, lead us to conclude 12:38:47 that it is a bankable energy unit for the site. 12:38:53 When I look at the Long Point met 12:38:57 mast, it's 11 kilometres from the site. It exhibits 12:39:01 characteristics of being offshore, despite it being 12:39:06 located on a small island. 12:39:11 This is because the island is small, 12:39:16 it does not have many features to destroy the wind 12:39:18 and the mast itself is located on a point, on 12:39:22 a split which has very little impact on the 12:39:23 measurements being conducted. 12:39:25 So when I say exhibits offshore 12:39:28 characteristics, I mean we can see low wind sheer 12:39:32 and wind turbulence consistent with what we would 12:39:35 expect to see in the offshore environment. 12:39:43 data that has been collected over a very long period 12:39:45	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the energy or prediction for sites that are being 12:40:11 built tens of kilometres away from the measurement 12:40:17 location. 12:40:19 So I am very confident that we have 12:40:19 sufficient data of sufficient quality to create 12:40:22 a bankable wind energy yield prediction for this 12:40:25 site. And that is the end of my presentation. 12:40:29 PRESIDENT: Thank you very much. 12:40:39 Anything further? 12:40:39 MS. SEERS: No, no questions. And I would ask you, Mr. Irvine, not to speak 12:40:46 with anybody about your testimony. 12:40:50 We have reserved a room for you where 12:40:53 you can have your lunch. Thank you. 12:40:58 THE WITNESS: Thank you. 12:41:00 Lunch recess taken at 12:41 p m. 12:41:08

	Page 164		Page 165
1	MS. SQUIRES: For better or worse 13:43:14	1	Windstream prior to February 12011; correct? 13:44:23
2	you're going to hear from me again. 13:43:15	2	A. Personally or my company? 13:44:28
3	CROSS-EXAMINATION BY MS. SQUIRES: 13:43:17	3	Q. Your company. 13:44:30
4	Q. Good afternoon, Mr. Irvine. 13:43:25	4	A. That's correct. 13:44:31
5	A. Good afternoon. 13:43:34	5	Q. Now, both of the reports that you 13:44:32
6	Q. Now, you've certainly had the 13:43:35	6	filed, they opine on the technical feasibility of 13:44:34
7	advantage of sitting through my opening spiel 13:43:37	7	the project; correct? 13:44:37
8	a couple of times this morning so just, again, very 13:43:39	8	A. That's correct, based on the 13:44:40
9	briefly. 13:43:42	9	information that was made available. 13:44:41
10	There's a binder in front of you with 13:43:42	10	Q. Now, but SgurrEnergy, in general 13:44:43
11	the tabs for the documents I'll refer to. To the 13:43:44	11	as part of their business model, it conducts 13:44:46
12	extent the answer to my question is a "yes" or "no," 13:43:48	12	bankability analysis of different offshore projects; 13:44:49
13	please state that for the record, but feel free to 13:43:52	13	correct? 13:44:53
14	provide any relevant context that you might think is 13:43:55	14	A. In effect, that is what we offer. 13:44:53
15	necessary to answer your question completely. 13:43:57	15	We undertake an assessment of the risks in a 13:44:55
16	A. Okay. 13:44:00	16	project, and get it to a position where the risk 13:45:00
17	Q. We may go into confidential 13:44:00	17	level could be appropriate to receive bank debt. 13:45:02
18	session at some point as well, so we'll do the same 13:44:02	18	Q. Okay. Now, for the purposes of 13:45:08
19	as we did this morning and cut the feed as 13:44:04	19	this arbitration, then, you didn't provide any cost 13:45:10
20	necessary. 13:44:07	20	estimates for Windstream; correct? 13:45:12
21	Now, you filed two expert reports in 13:44:12	21	A. That's correct. This was only on 13:45:15
22	this arbitration, correct, one in August 2014 and 13:44:14	22	the basis of a technical assessment of a theoretical 13:45:17
23	one in June 2015; is that right? 13:44:17	23	project which could have been built at the site, 13:45:21
24	A. Yes, I've got them here. 13:44:19	24	based on the information that was available at the 13:45:24
25	Q. Now, you were not retained by 13:44:21	25	time. 13:45:27

1 2	Q. Now, you mentioned in your report 13:45:31	1 2	reviewed by SgurrEnergy; do you see that, in the 13:46:33
2	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32		reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45
	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34	2	reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45 A. Yes, I see that. 13:46:47
2	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39	2 3	reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52
2 3 4 5	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39	2 3 4	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53
2 3 4	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41	2 3 4 5	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57
2 3 4 5 6	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44	2 3 4 5 6	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59
2 3 4 5 6 7	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46	2 3 4 5 6 7	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03
2 3 4 5 6 7 8	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from public information, the capital costs were 13:45:48	2 3 4 5 6 7 8	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04
2 3 4 5 6 7 8 9	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from public information, the capital costs were 13:45:48 2 billion. 13:45:50	2 3 4 5 6 7 8 9	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05
2 3 4 5 6 7 8	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51	2 3 4 5 6 7 8	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FTT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07
2 3 4 5 6 7 8 9 10	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53	2 3 4 5 6 7 8 9 10	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09
2 3 4 5 6 7 8 9 10 11 12	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56	2 3 4 5 6 7 8 9 10 11 12	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12
2 3 4 5 6 7 8 9 10 11	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57	2 3 4 5 6 7 8 9 10 11	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12
2 3 4 5 6 7 8 9 10 11 12 13	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00	2 3 4 5 6 7 8 9 10 11 12 13	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the
2 3 4 5 6 7 8 9 10 11 12 13 14	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02	2 3 4 5 6 7 8 9 10 11 12 13 14 15	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have based on the 13:46:02	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have based on the 13:46:02 knowledge of SgurrEnergy in general, you have no 13:46:05	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have — based on the 13:46:05 further information on the capital cost of — 13:46:08	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FTT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:26
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 knowledge of SgurrEnergy in general, you have no 13:46:05 further information on the capital cost of — 13:46:08 A. I have no knowledge of the capital 13:46:11	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FTT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 knowledge of SgurrEnergy in general, you have no 13:46:05 further information on the capital cost of - 13:46:08 A. I have no knowledge of the capital 13:46:11 cost on the Cape Wind project. That was executed 13:46:13	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:30 page. 13:47:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:41 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have based on the 13:46:05 further information on the capital cost of 13:46:08 A. I have no knowledge of the capital 13:46:11 cost on the Cape Wind project. That was executed 13:46:13 from our Portland office in Maine. 13:46:16	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:30 page. 13:47:32 Q. So it's page 12 in your binder; 13:47:33
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that 13:45:34 correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:44 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have based on the 13:46:05 further information on the capital cost of 13:46:08 A. I have no knowledge of the capital 13:46:11 cost on the Cape Wind project. That was executed 13:46:13 from our Portland office in Maine. 13:46:16 Q. I want to take you to your first 13:46:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	reviewed by SgurrEnergy; do you see that, in the 13:46:33 second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FIT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:26 A. Because appendix B is a blank 13:47:30 page. 13:47:32 Q. So it's page 12 in your binder; 13:47:33 we've included a copy or Tab 12, sorry. 13:47:36
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Now, you mentioned in your report 13:45:31 and earlier in your presentation that SgurrEnergy 13:45:32 was involved in the Cape Wind product; is that correct? 13:45:39 A. That's correct. My Portland 13:45:39 office personnel were involved in that project. 13:45:41 Q. You've heard Mr. Palmer say that 13:45:41 based on the best of his knowledge he has from 13:45:46 public information, the capital costs were 13:45:48 2 billion. 13:45:50 Can you confirm whether or not that 13:45:51 was correct or provide us with some clarity on that? 13:45:53 A. I cannot provide you with any 13:45:56 clarity on the capital costs associated with 13:45:57 Cape Wind because I was not personally involved in 13:46:00 that project. 13:46:02 Q. Okay. So you have based on the 13:46:05 further information on the capital cost of 13:46:08 A. I have no knowledge of the capital 13:46:11 cost on the Cape Wind project. That was executed 13:46:13 from our Portland office in Maine. 13:46:16	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	reviewed by SgurrEnergy; do you see that, in the second paragraph? 13:46:45 A. Yes, I see that. 13:46:47 Q. And at the very bottom, you note 13:46:52 that the project schedule, based on the award of the 13:46:53 FTT contract was included in your report as appendix 13:46:57 B; correct? 13:46:59 A. Could you just explain that again, 13:47:03 please? 13:47:04 Q. So I'm just the schedule then 13:47:05 that you are referring to there is the one that you 13:47:07 attached as appendix B to your report; is that 13:47:09 correct? 13:47:12 A. I would say that that's I'd 13:47:12 just like to look at the 13:47:17 Q. Take your time. 13:47:20 A. Appendix 3 you say? 13:47:21 Q. Appendix B. If it helps you, 13:47:24 we've also included it as Tab 1 in your binder. 13:47:30 page. 13:47:32 Q. So it's page 12 in your binder; 13:47:33

	Page 168		Page 169
1	small writing that this is the overall project 13:47:50	1	Q. Okay. If we just turn back to the 13:49:39
2	development schedule highlights, revised 13:47:52	2	first page of that document at Tab 10, I just want 13:49:44
3	February 17th, 2011; do you see that? 13:47:55	3	to look at the date there. 13:49:46
4	A. Yes. I can see that. 13:47:57	4	It's dated August 30th, 2010; correct? 13:49:47
5	Q. Okay. Now, if you can keep that 13:47:59	5	A. Yes, I can read that. 13:50:03
6	one out of the binder if it's easier, but we'll turn 13:48:01	6	Q. This is the schedule are you 13:50:04
7	to Tab 10. This is Exhibit R-138 for the record. 13:48:05	7	aware that FIT signed Windstream signed its FIT 13:50:06
8	This appears to be the same schedule 13:48:29	8	contract on August 20, 2010? 13:50:10
9	just an earlier version, correct? It's dated 13:48:31	9	A. Yes, I'm aware of that. 13:50:12
10	August 12, 2011? 13:48:33	10	Q. So this would be the schedule that 13:50:13
11	A. I don't know if I'm looking at the 13:48:35	11	would be in their hands ten days after that; 13:50:14
12	correct page here. Tab 9? 13:48:36	12	correct? 13:50:17
13	Q. So, it starts on page 9 there in 13:48:57	13	A. I can only assume so. 13:50:17
14	Tab 10. 13:49:01	14	Q. Now we're going to turn to Tab 4 13:50:19
15	A. They certainly look similar. 13:49:08	15	in your binder. 13:50:21
16	Q. The earlier one we looked at looks 13:49:15	16	This, again, is the same type of Excel 13:50:33
17	like an updated version or at least a similar 13:49:19	17	schedule. This one says that it's dated 13:50:35
18	version of that one you have in your hand, correct, 13:49:21	18	October 28th, 2010, and it is Exhibit C-0375. 13:50:38
19	of the R-138? 13:49:23	19	So that one, again, same format, all 13:50:42
20	A. Yep, they look similar but 13:49:26	20	different Excel schedules; correct? 13:50:46
21	I couldn't really deduce anything from either of 13:49:28	21	A. It says "Revised August 1, 2014" 13:50:49
22	these. 13:49:33	22	on this. 13:50:52
23	Q. Okay. But on their face they look 13:49:34	23	Q. Give me one second. We're looking 13:51:01
24	quite similar? 13:49:37	24	at Tab 4. I think you might be in Tab 3, possibly. 13:51:22
25	A. Pictorially, yes. 13:49:38	25	If not, I can provide you with a corrected exhibit 13:51:26
	Page 170		Page 171
1	Page 170 that should be there. 13:51:29	1	Page 171 you have there in front of you, that's the only one 13:52:27
1 2	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36	1 2	_
	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38		you have there in front of you, that's the only one 13:52:27
2 3 4	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39	2 3 4	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38
2 3 4 5	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42	2 3 4 5	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40
2 3 4 5 6	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45	2 3 4 5 6	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42
2 3 4 5 6 7	that should be there. 13:51:29 PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50	2 3 4 5 6 7	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43
2 3 4 5 6 7 8	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51	2 3 4 5 6 7 8	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44
2 3 4 5 6 7 8	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52	2 3 4 5 6 7 8	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51
2 3 4 5 6 7 8 9	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:52	2 3 4 5 6 7 8 9	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15
2 3 4 5 6 7 8 9 10	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:53 on the screen. I'm getting nowhere with this 13:51:53	2 3 4 5 6 7 8 9 10	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20
2 3 4 5 6 7 8 9 10 11	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57	2 3 4 5 6 7 8 9 10 11	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24
2 3 4 5 6 7 8 9 10 11 12	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58	2 3 4 5 6 7 8 9 10 11 12 13	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26
2 3 4 5 6 7 8 9 10 11 12 13	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00	2 3 4 5 6 7 8 9 10 11 12 13	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. 13:52:01	2 3 4 5 6 7 8 9 10 11 12 13 14 15	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. 13:52:01 (LAUGHTER) 13:52:04	2 3 4 5 6 7 8 9 10 11 12 13 14 15	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. We're getting sneaky with this 13:52:04	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: 13:51:52 Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. 13:52:01 (LAUGHTER) 13:52:04 BY MS. SQUIRES: 13:52:04 One. All right. So, generally then, all these are 13:52:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 Q. So, if I understand correctly 13:53:37 then, the conclusion we can draw from this is that 13:53:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. (LAUGHTER) BY MS. SQUIRES: 13:52:04 Q. We're getting sneaky with this 13:52:04 one. All right. So, generally then, all these are 13:52:07	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37 then, the conclusion we can draw from this is that 13:53:38 given Windstream itself was relying on this schedule 13:53:42
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. (LAUGHTER) BY MS. SQUIRES: 13:52:04 Q. We're getting sneaky with this 13:52:04 one. All right. So, generally then, all these are 13:52:11	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37 then, the conclusion we can draw from this is that 13:53:38 given Windstream itself was relying on this schedule 13:53:42 when it signed the FIT contract, they never should 13:53:44
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. (LAUGHTER) BY MS. SQUIRES: Q. We're getting sneaky with this 13:52:04 one. All right. So, generally then, all these are 13:52:11 They're all different schedules 13:52:13	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37 then, the conclusion we can draw from this is that 13:53:42 when it signed the FIT contract, they never should 13:53:44 have, and it would have led to inaccurate conclusion 13:53:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. (LAUGHTER) 13:52:04 BY MS. SQUIRES: 13:52:04 Q. We're getting sneaky with this 13:52:04 one. All right. So, generally then, all these are 13:52:11 They're all different schedules 13:52:13 derived from the Excel program; correct? 13:52:16	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37 then, the conclusion we can draw from this is that 13:53:38 given Windstream itself was relying on this schedule 13:53:42 when it signed the FIT contract, they never should 13:53:48 on the part of Windstream as well? 13:53:51
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	that should be there. PRESIDENT: Where do we have the date? 13:51:36 MS. SQUIRES: It's on the very top of 13:51:38 the schedule there in very small writing. It says 13:51:39 "Overall project development, scheduled highlights, 13:51:42 August 28th, 2010," Exhibit C-057. 13:51:45 THE WITNESS: Mine's got a hole where 13:51:50 it would say 13:51:51 BY MS. SQUIRES: Q. So we'll look at the one up here 13:51:52 on the screen. I'm getting nowhere with this 13:51:53 clearly. It says on the screen there, 13:51:57 "October 28th, 2010"? 13:51:58 PRESIDENT: For the record, I was 13:52:00 asking for the same reason. (LAUGHTER) BY MS. SQUIRES: Q. We're getting sneaky with this 13:52:04 One. All right. So, generally then, all these are 13:52:07 the same in terms of their method of preparation. 13:52:11 They're all different schedules 13:52:13 derived from the Excel program; correct? 13:52:16 A. As far as I can see, yes. 13:52:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	you have there in front of you, that's the only one 13:52:27 Windstream would have had available on February 11, 13:52:30 2011; is that correct? 13:52:37 A. Yes, I believe that would be 13:52:38 appropriate for a project in this stage of its 13:52:40 development. 13:52:42 Q. Okay. Let's to go your second 13:52:43 report and look at the second paragraph on page 78. 13:52:44 And if we're in that second paragraph 13:52:51 there on page 78, you criticised URS reliance on 13:53:15 this type of schedule in their first report noting 13:53:20 that was not intended or provided for use as 13:53:24 a detailed project schedule, and that accordingly, 13:53:26 project schedule assumings drawn from this document 13:53:28 would invariably lead to inaccurate conclusions; do 13:53:32 you see that? 13:53:35 A. Yes, I can see that. 13:53:37 then, the conclusion we can draw from this is that 13:53:42 when it signed the FIT contract, they never should 13:53:44 have, and it would have led to inaccurate conclusion 13:53:48

	Page 172		Page 173
1	associated with the FIT contract, and that assumes 13:54:01	1	contract or offshore wind development was designed, 13:55:16
2	five-year development window with an overlap of 13:54:03	2	which presumably was based on the best available 13:55:20
3	about 18 months or thereabouts. 13:54:08	3	information that was held by the offerer of the FIT 13:55:25
4	So I would think it's perfectly 13:54:11	4	contract. 13:55:31
5	reasonable for the developer to have a schedule that 13:54:13	5	Q. Okay. Well, given that you had 13:55:32
6	fits around that based upon the information that 13:54:18	6	you had raised issues with that as a preliminary 13:55:36
7	they had available to themselves at that time. 13:54:20	7	type schedule or as you mentioned, it's not at 13:55:39
8	I would further expect that a schedule 13:54:26	8	least inaccurate assumptions. 13:55:43
9	like this is developed as we progress through the 13:54:28	9	You for your second report developed 13:55:46
10	project. 13:54:31	10	the type of schedule that you just raised there 13:55:48
11	As I said in my presentation, I would 13:54:34	11	using MS project; correct? 13:55:50
12	expect 20, 30, 40 revisions of this as we progress 13:54:35	12	A. Yes, that's correct. 13:55:53
13	through the development collecting more information 13:54:43	13	Q. And you commenced that this is the 13:55:54
14	about the sea state, about the sea bed to show 13:54:45	14	type of schedule that you would have had had if 13:55:56
15	that is what I conclude from this. 13:54:52	15	a deferral was lifted, for example? 13:55:59
16	Q. Okay. So your report though does 13:54:55	16	A. This is the type of schedule that 13:56:01
17	indicate that reliance on that type of schedule 13:54:57	17	we would have begun to develop if there was no 13:56:02
18	would lead to inaccurate assumptions. 13:54:59	18	moratorium. 13:56:07
19	We agreed there; correct? 13:55:01	19	Q. Now, this new schedule does not 13:56:09
20	A. A degree of uncertainty in this, 13:55:03	20	allow any time though to go from that Excel schedule 13:56:11
21	based upon the information that's available at the 13:55:06	21	to this new schedule; correct? 13:56:15
22	time. 13:55:09	22	A. It assumes on February 11, 2011 13:56:18
23	Q. Okay. 13:55:10	23	that that's the schedule you had in your hands. 13:56:21
24 25	A. So the only information available 13:55:10	24 25	This is based upon an assumption that we'd begin 13:56:23
25	at the time was the information around which the FIT 13:55:12	25	work on the project on February 11. 13:56:30

Well, let's say as of 13:57:17 February 10th, 2011, before there was a deferral, 13:57:21 A. That's correct, but they could 13:57:23 have been retained on February 11th. 13:57:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	This line is discussed MR. BISHOP: Sorry, which documents 13:57:48 are we looking at? BY MS. SQUIRES: Q. Oh, sorry. The giant schedule. 13:57:51 It's taken on a new nickname of the giant schedule. We're on line 29. All right. Now, 13:57:59 line 29, it's discussing bat field surveys; do you 13:58:21 see that? THE WITNESS: I can see that, yes. 13:58:24 BY MS. SQUIRES: Q. And it indicates that they start 13:58:25 Q. And it indicates that they start A. I can see that also, but I would 13:58:27 A. I can see that also, but I would 13:58:31 surveys. This is an area of expertise which was 13:58:45 Q. Okay, but this is not my area of Q. Okay, but this is a schedule that 13:58:48 their input into this schedule. And I have no 13:58:50

Page 176 Page 177 1 1 experience in Canada, and my experience of project 13:59:06 Q. Yeah, so my questions pertain to, 14:00:18 2 2 development is that you recruit local environmental 13:59:10 as Mr. Irvine is the individual who developed this 14:00:20 3 3 consultants, with local experience. schedule with that input, I just have questions on 14:00:23 13:59:14 4 4 So, I'm relying upon WSP with regards 13:59:18 the timing of certain activities. 14:00:25 to its knowledge and experience locally. 5 5 13:59:20 If you don't -- if you -- I understand 14:00:27 6 6 Q. All right. So to the extent -- so 13:59:25 that you might have relied on WSP's expertise for 14:00:28 7 7 you've relied entirely on WSP's opinion for all 13:59:27 those certain events, but I just wanted to more so 14:00:33 8 permitting aspects of this schedule? 13:59:31 8 acknowledge that certain events happened on certain 14:00:36 9 9 A. All permitting aspects, yes, 13:59:33 days, not whether or not it was appropriate to have 14:00:38 10 10 that's correct. They are the experts in their field 13:59:35 that data on that day for now. 11 11 in this area, and that's what I would do if I was 13:59:37 MS. SEERS: Well, and just to further 14:00:43 12 12 involved in any project anywhere in the world. clarify, if I can assist, the actual dates were 13:59:41 14:00:45 13 I would rely upon a local environmental specialist 13:59:43 13 provided by Mr. Roberts and so, yes, it's true to 14:00:47 14 that has the appropriate understanding of local 13:59:48 14 say that Sgurr held the pen or the keyboard, so to 14:00:51 15 15 speak, in terms of inputting that data into the legislation. 13:59:51 14:00:55 16 16 schedule, but the actual dates were provided by WSP 14:00:57 O. Okay. 13:59:52 17 17 MS. SEERS: If I may interject, 13:59:53 in the -- with respect to those activities. And so 14:01:02 18 18 I just -- perhaps it could assist. The schedule, as 13:59:54 Mr. Irvine is not in a position to -- unless your 14:01:05 19 you'll see at the top, indicates, and I believe it's 13:59:57 19 question -- unless Ms. Squires' question is about 14:01:10 20 20 explained both in the reply memorial and in the mechanically inputting data from another consultant 14:01:13 14:00:00 21 21 Sgurr report that it was prepared in conjunction 14:00:06 into the program, we're outside of Mr. Irvine's 22 22 collaboratively by Sgurr, Baird, WSP, COWI and 14:00:10 scope of expertise here. 14:01:20 23 23 Weeks, and so each of them contributed within their 14:00:13 PRESIDENT: Well, it is appropriate to 14:01:22 24 24 respective areas of expertise. 14:00:16 explore the precise role of the expert in terms of 14:01:24 25 25 BY MS. SOUIRES: 14:00:18 coordinating the input from the various sources, so 14:01:28 Page 178 Page 179 1 1 that's fine. 14:01:32 that is why I have been able to conclude that this 14:02:42 2 2 MS. SEERS: And certainly, 14:01:34 is a reasonable schedule. 14:02:45 3 3 Mr. President, Mr. Irvine can speak to that 14:01:34 Q. Okay, so you have done some 14:02:47 4 coordinating aspect if not the content. 14:01:37 4 overall comparison of times? 14:02:49 5 Pardon me, by microphone was off. 14:01:41 5 A. Personally, I have done that, yes. 14:02:50 6 Certainly Mr. Irvine can speak to the coordination 14:01:44 6 Q. Okay, let's look at line 143. It 14:02:53 7 aspect of this, but not to the content of the areas 14:01:46 7 indicates there that the activity surrounding the 14:03:06 8 8 outside the scope of his expertise. on-shore foundation fabrication facility commenced 14:03:09 14:01:49 9 9 THE WITNESS: Just for clarity, I run 14:01:52 on December 11th, 2011; do you see that? 14:03:12 10 10 A. Yes. I can see that. quite a lot of business and I don't personally have 14:01:54 14:03:17 11 11 expertise in Microsoft Project. I rely on 14:01:57 Q. And this more technical work is 14:03:19 12 12 individuals to take that information and put it into 14:02:02 within the realm of your report; correct? Your 14:03:22 13 13 a program that I would then encourage to be report comments on --14:02:05 14:03:26 14 14 stress-tested and compared against the real world. 14:02:09 A. Yes, based on information supplied 14:03:27 15 That's my role in all this. It's not down at the 14:02:13 15 to us by COWI, who is the expert in this area. 14:03:29 16 16 detail level and putting data into this project. 14:02:16 Q. Okay, now, to your knowledge, no 14:03:32 17 17 BY MS. SQUIRES: 14:02:21 site had been secured as of February 11th, 2011; 14:03:36 18 18 Q. To confirm, then, you didn't do 14:02:21 correct? 14:03:39 19 19 any independent checking of the information that WSP 14:02:23 A. That's correct. I think that's 14:03:40 20 provided for the permitting, is the conclusion I'm 14:02:27 20 a reasonable position given the state of development 14:03:43 21 14:02:29 21 14:03:46 of the project. 22 22 Q. Okay, so, you would agree with me 14:03:47 A. I did independent checking 14:02:30 23 23 inasmuch as I have personally compared the duration 14:02:31 then that you would need to build some time into the 14:03:50 24 24 shown on this schedule with my knowledge and our 14:02:35 schedule in order to negotiate with someone to 14:03:54

25

obtain access to such facility; correct?

14:03:56

database of project developments elsewhere. And

25

	Page 180		Page 181
1	A. Well, we have MNR land use permit, 14:04:15	1	example, as I would expect that these activities 14:05:46
2	fabrication facility on line 44. Underneath that we 14:04:19	2	would be undertaken by the project developer, this 14:05:49
3	have "Repair application to fabrication" on 14:04:23	3	is a technical schedule to try and establish whether 14:05:52
4	line 145, which looks like it's kicking in August or 14:04:27	4	it would be technically feasible to achieve the 14:05:55
5	thereabouts, so one would expect there is time to 14:04:23	5	commercial operation date that has been specified. 14:05:59
6	discuss with those associated with land ownership. 14:04:38	6	Q. Okay, so this is an early stage 14:06:01
7	Q. Sorry, can you indicate to me what 14:04:44	7	project schedule used to identify the technical 14:06:05
8	lines you are referring to? 14:04:46	8	feasibility of the project? 14:06:08
9	A. Line 145. 14:04:47	9	A. That's correct. It's early stage, 14:06:10
10	Q. Okay, so the MNR land use permit? 14:04:54	10	and we would continue to develop this throughout the 14:06:11
11	A. 146, 147. 14:04:57	11	duration of the project. 14:06:15
12	O. Uh-hmm. 14:04:59	12	Q. All right. Let's stay on that 14:06:18
13	A. So it looks to me like there is 14:05:04	13	schedule there, and I want to look at line 7. And 14:06:23
14	a period of discussion and opportunity. 14:05:06	14	line 7 indicates that indicates that the project 14:06:25
15	Q. So, this appears to be discussion, 14:05:12	15	would receive financial close on December 11, 2014; 14:06:35
16	as you've mentioned, with MNR, which is the Ministry 14:05:14	16	correct? 14:06:39
17	of Natural Resources, but there is nothing in the 14:05:16	17	A. It states that, yes, that's 14:06:39
18	schedule to include for discussion with the owner of 14:05:19	18	correct. 14:06:40
19	the facility in terms of commercial negotiation, 14:05:21	19	Q. And if we go to line 9, it 14:06:41
20	say? 14:05:24	20	indicates that the renewable energy process so 14:06:43
21	A. Well, this says "Program," which 14:05:25	21	the environmental permitting commences on 14:06:47
22	is about a hypothetical situation. This does not 14:05:31	22	February 11th, 2011, and ends with a REA appeal 14:06:49
23	include anything with regards to negotiating of 14:05:34	23	period on August 12th, 2013. Do you see that? 14:06:53
24	a particular area of land, nor does it include 14:05:39	24	A. REA appeal period. I can't see 14:07:01
25	anything with regards to project financing, for 14:05:42	25	that, sorry. 14:07:06
	anything with regards to project mannering, for		
	Page 182		Page 183
1	Q. So that might be in the just 14:07:07	1	Page 183 correct? 14:08:44
1 2	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09	1 2	_
	Q. So that might be in the just 14:07:07	l .	correct? 14:08:44
2 3 4	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20	2 3 4	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52
2	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25	2 3 4 5	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52
2 3 4 5	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27	2 3 4 5 6	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54
2 3 4 5 6 7	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37	2 3 4 5 6 7	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56
2 3 4 5 6 7 8	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27	2 3 4 5 6 7 8	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59
2 3 4 5 6 7 8 9	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51	2 3 4 5 6 7 8	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02
2 3 4 5 6 7 8 9	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54	2 3 4 5 6 7 8 9	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05
2 3 4 5 6 7 8 9 10	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56	2 3 4 5 6 7 8 9 10	correct? A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05
2 3 4 5 6 7 8 9 10 11 12	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58	2 3 4 5 6 7 8 9 10 11	correct? A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08
2 3 4 5 6 7 8 9 10 11 12 13	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01	2 3 4 5 6 7 8 9 10 11 12	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12
2 3 4 5 6 7 8 9 10 11 12 13 14	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05	2 3 4 5 6 7 8 9 10 11 12 13	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15
2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08	2 3 4 5 6 7 8 9 10 11 12 13 14	A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. Yes, that is what is written in 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13 Q. Okay 14:08:18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17 Mr. Roberts and is outside the scope of Mr. Irvine's 14:09:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13 Q. Okay 14:08:18 A. That is why WSP is involved in 14:08:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17 Mr. Roberts and is outside the scope of Mr. Irvine's 14:09:22 expertise, and I'm not certain that we need Mr. 14:09:24
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13 Q. Okay 14:08:18 A. That is why WSP is involved in 14:08:19 this development. 14:08:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	correct? 14:08:44 A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17 Mr. Roberts and is outside the scope of Mr. Irvine's 14:09:24 Irvine to tell us what the dates would be if the 14:09:27
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13 Q. Okay 14:08:18 A. That is why WSP is involved in 14:08:19 this development. 14:08:22 Q. Yes, and I understand that those 14:08:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17 Mr. Roberts and is outside the scope of Mr. Irvine's 14:09:24 Irvine to tell us what the dates would be if the 14:09:27 schedule was moved by six months. 14:09:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. That is what has been indicated by 14:07:58 the schedule, but can I repeat that I am reliant 14:08:01 upon a local consultant to feed into this 14:08:05 information. I do not fully understand the detail 14:08:08 of the process with regards to permitting. 14:08:13 Q. Okay 14:08:18 A. That is why WSP is involved in 14:08:29 this development. 14:08:22 Q. Yes, and I understand that those 14:08:24 inputs came from them but I'm merely asking you to 14:08:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Yes, that is what is written in 14:08:44 the schedule. 14:08:51 Q. Now, last week we heard some 14:08:52 testimony from Ms. Sarah Powell, and she confirmed 14:08:52 that, based on her experience, the typical time to 14:08:54 receive a renewable energy approval is 36 months, 14:08:56 and then there's an additional 6 months beyond that 14:08:59 for the Environmental Review Tribunal, so the total 14:09:02 being 42 months. 14:09:05 So if we rely on this testimony then, 14:09:05 the renewable energy approval would occur on 14:09:08 February 11, 2014; is that correct, six months 14:09:12 later? 14:09:15 MS. SEERS: Again, Mr. Chair, this is 14:09:16 a scope that's been covered by both Ms. Powell and 14:09:17 Mr. Roberts and is outside the scope of Mr. Irvine's 14:09:24 Irvine to tell us what the dates would be if the 14:09:27 schedule was moved by six months. 14:09:32 BY MS. SQUIRES: 14:09:33
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. So that might be in the just 14:07:07 when we get further. Just give me one minute, I'll 14:07:09 find you the exact line. 14:07:17 A. I can see it now. 14:07:20 Q. Are you there? Maybe you can 14:07:25 remind me which line it is. Okay, so line 678 says: 14:07:27 "The REA approval period appeal 14:07:37 period ends on August 12th, 2013." 14:07:40 What follows after that on line 69 is 14:07:51 an additional six months for the Environmental 14:07:54 Review Tribunal; correct? 14:07:56 A. 8	approval, then, was pushed back six months from 14:09:54	8 consultant. 14:11:05	
9	August 2013, the renewable energy approval would 14:09:57	9 Q. Okay, so, if we taking what 14:11:06	
10	arrive on February 11th, 2014; correct? 14:09:59	Ms. Powell said and, again, I'm just trying to 14:11:11	
11	A. That is correct. But looking at 14:10:04	understand the consequence of what that would have 14:11:1	14
12	the context of this, I am reliant on WSP. I'm not 14:10:08	for the schedule if her testimony is right. The 14:11:16	
13	aware of Ms. Powell's testimony or what context that 14:10:13	consequence would be that you would lose six months 14:11:	19
14	was spoken in. I'm reliant upon WSP as an expert in 14:10:16	in the construction schedule; correct? Instead of 14:11:21	
15	the field 14:10:21	starting on February, you're now starting in August? 14:11:25	
16	Q. Yes. 14:10:23	A. Well, it's arithmetic correct, but 14:11:27	
17	A to give me the numbers 14:10:23	17 I'm reliant upon WSP's information and a detailed 14:11:30	
18	appropriate here. 14:10:24	breakdown of the components that feed in to being 14:11:36	
19	Q. I understand that that's where 14:10:26	able to get the relevant permits. I have not seen 14:11:41	
20	your numbers came from, but you would agree with me, 14:10:27	or heard Ms. Powell's testimony. I don't know how 14:11:45	;
21	if Ms. Powell is right, who was also one of the 14:10:30	much reliance one can place on that. This is 14:11:47	
22	claimants' experts, your schedule would shift by six 14:10:33	a local environmental consultant who has broken down 14:11:	:51
23	months? 14:10:36	the permitting process into its constituent parts 14:11:58	
24	A. By arithmetic, that is correct. 14:10:38	and put them in an order that I am comfortable with. 14:12:02	2
25	Q. Okay, so that means, then, based 14:10:41	And I would take precedence on this information over 14:12:0	6
	Page 186	Page 1	87
	Page 186	Page 18	
1	information that perhaps does not have the same 14:12:10	of the flow chart that consents were authorized in 14:13:23	
2	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13	of the flow chart that consents were authorized in 14:13:29 July 2012; do you see that? 14:13:31	
2	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17	of the flow chart that consents were authorized in 14:13:29 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33	
2 3 4	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18	of the flow chart that consents were authorized in 14:13:29 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34	8
2 3 4 5	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21	of the flow chart that consents were authorized in 14:13:24 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:3	8
2 3 4 5	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25	of the flow chart that consents were authorized in 14:13:24 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:36 can you see that? 14:13:41	8
2 3 4 5 6 7	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27	of the flow chart that consents were authorized in 14:13:24 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:36 can you see that? 14:13:41 A. I can see that also. 14:13:42	8
2 3 4 5 6 7 8	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:35 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43	8
2 3 4 5 6 7 8	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44	8
2 3 4 5 6 7 8 9	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46	8
2 3 4 5 6 7 8 9 10	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46	8
2 3 4 5 6 7 8 9 10 11	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50	8
2 3 4 5 6 7 8 9 10 11 12	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43	of the flow chart that consents were authorized in 14:13:23 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52	8
2 3 4 5 6 7 8 9 10 11 12 13 14	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46	of the flow chart that consents were authorized in 14:13:21 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52	8
2 3 4 5 6 7 8 9 10 11 12	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:03	7
2 3 4 5 6 7 8 9 10 11 12 13 14 15	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:02 conclusions one can draw from this information in 14:14:	8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8
2 3 4 5 6 7 8 9 10 11 12 13 14 15	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:00 conclusions one can draw from this information in 14:14: relation to the proposed project here. 14:14:14	8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 A. I can see that also. 14:13:42 Q. So for this chart, they have – or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:02 conclusions one can draw from this information in 14:14: relation to the proposed project here. 14:14:14 Q. So I'm looking for the – if you 14:14:17	8 7 3 3 111
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:02 conclusions one can draw from this information in 14:14: relation to the proposed project here. 14:14:14 Q. So I'm looking for the if you 14:14:17 leave the permitting regime aside, if we are looking 14:14:1	8 7 3 3 111
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10 about halfway down the page, this is for the	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:07 conclusions one can draw from this information in 14:14:19 Q. So I'm looking for the — if you 14:14:17 leave the permitting regime aside, if we are looking 14:14:12 at the date, once the permitting has been obtained, 14:14:22	8 77 3 3 111 9 2
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10 about halfway down the page, this is for the 14:13:17 Dudgeon — and correct me if I am entirely saying 14:13:19	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:03 conclusions one can draw from this information in 14:14:14 Q. So I'm looking for the — if you 14:14:17 leave the permitting regime aside, if we are looking 14:14:12 at the date, once the permitting would be dealt 14:14:26 so all delays relating to permitting would be dealt 14:14:26	8 77 3 3 111 9 2
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10 about halfway down the page, this is for the 14:13:17 Dudgeon and correct me if I am entirely saying 14:13:19 that wrong, but I 14:13:25	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:01 conclusions one can draw from this information in 14:14:17 leave the permitting regime aside, if we are looking 14:14:17 leave the permitting regime aside, if we are looking 14:14:12 so all delays relating to permitting would be dealt 14:14:26 with at that point, they had two years before they 14:14:29 with at that point, they had two years before they 14:14:29	8 77 3 3 111 9 2
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10 about halfway down the page, this is for the 14:13:17 Dudgeon and correct me if I am entirely saying 14:13:19 that wrong, but I	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:01 conclusions one can draw from this information in 14:14:14 Q. So I'm looking for the — if you 14:14:17 leave the permitting regime aside, if we are looking 14:14:12 at the date, once the permitting would be dealt 14:14:26 with at that point, they had two years before they 14:14:31 with at that point, they had two years before they 14:14:31	8 77 3 3 111 9 2
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	information that perhaps does not have the same 14:12:10 level of detail and that I also have not seen, 14:12:13 unfortunately. 14:12:17 Q. Okay, well, you mentioned that the 14:12:18 schedule doesn't include any line items for 14:12:21 negotiation with lenders; correct? 14:12:25 A. That's correct, it is a technical 14:12:27 schedule. 14:12:29 Q. Now, in the claimants' opening 14:12:30 arguments in this arbitration, they noted that the 14:12:34 six months between the renewable energy approval and 14:12:36 the Environmental Review Tribunal, that's when 14:12:39 negotiations would take place; are you aware of 14:12:43 that? 14:12:46 A. I'm not aware of that, 14:12:46 unfortunately. 14:12:47 Q. Okay, so I wanted to look at 14:12:48 tab 20 in your binder. And this is Exhibit C-1907 14:12:50 for the record. If we look at the flow chart there 14:13:10 about halfway down the page, this is for the 14:13:17 Dudgeon and correct me if I am entirely saying 14:13:19 that wrong, but I 14:13:25 A. Dudgeon. 14:13:25	of the flow chart that consents were authorized in 14:13:22 July 2012; do you see that? 14:13:31 A. I can see that, yes. 14:13:33 Q. And if we move ahead on the flow 14:13:34 chart it says financing was secured in July of 2014; 14:13:34 can you see that? 14:13:41 A. I can see that also. 14:13:42 Q. So for this chart, they have — or 14:13:43 for this project at least, there was a two-year 14:13:44 period between permitting and financial close; 14:13:46 correct? 14:13:50 A. I think it's correct. It's 14:13:50 interesting, but I don't think its relevant for this 14:13:52 specific project. This is a different environment 14:13:55 subject to different regulatory regimes, subject to 14:13:58 different permitting regime. So I'm not sure what 14:14:01 conclusions one can draw from this information in 14:14:17 leave the permitting regime aside, if we are looking 14:14:17 leave the permitting regime aside, if we are looking 14:14:12 so all delays relating to permitting would be dealt 14:14:26 with at that point, they had two years before they 14:14:29 with at that point, they had two years before they 14:14:29	8 77 3 3 111 9 2

	Page 188		Page 189
1	would appear to be correct. 14:14:34	1	is the same kind of representation, but for the 14:15:44
2	Q. And if we turn to the next tab, 14:14:36	2	Gemini project; correct? 14:15:46
3	Tab 21 14:14:37	3	A. I can see pictorially it is the 14:15:47
4	MS. SEERS: Again, Mr. Chair, this 14:14:40	4	same. But I'm this information is 14:15:50
5	witness is not an expert in financing or financial 14:14:41	5	project-specific and only applies to this project. 14:15:55
6	close. We have other experts that are experts in 14:14:44	6	One could go and choose, cherry pick other projects 14:15:58
7	that area. As you'll have noted, there are a lot of 14:14:46	7	that showed different durations, shorter durations. 14:16:02
8	experts who contributed to this schedule because it 14:14:49	8	Q. Okay, so I guess the point then to 14:16:06
9	spans a lot of ground and so, again, I would ask 14:14:51	9	take from what you're saying is that you have chosen 14:16:08
10	that only questions relevant to Mr. Irvine's direct 14:14:54	10	six months but in some circumstances that can be 14:16:11
11	expertise be posed to him. And, of course, the 14:14:59	11	less; in other circumstances that could be more - 14:16:13
12	mechanics of how the schedule operates. 14:15:03	12	or someone has chosen six months for you, and in 14:16:15
13	PRESIDENT: Well, it's fine to explore 14:15:05	13	some circumstances that's less, some circumstance it 14:16:18
14	the limits of what his role was in putting together 14:15:07	14	could be more? 14:16:20
15	the overall schedule. How useful it is, it's for 14:15:10	15	MS. SEERS: Again, Mr. Chair, 14:16:21
16	you to determine, then, and it's for you to put the 14:15:13	16	something is being put to the witness that we've 14:16:22
17	questions in such a way that the information will be 14:15:17	17	already indicated is not his input, and so we 14:16:24
18	useful for the Tribunal. 14:15:18	18	maintain the objection that only questions relevant 14:16:28
19	But it is about exploring the limits 14:15:20	19	to Mr. Irvine's specific input into this schedule 14:16:32
20	of his role in the in putting together the 14:15:24	20	should be put to him, and we object to propositions 14:16:36
21	overall schedule. 14:15:28	21	like the one Ms. Squires just put to him about 14:16:39
22	BY MS. SQUIRES: 14:15:31	22	whether six months was inserted by him or by 14:16:44
23	Q. So, on that note, let's turn to 14:15:32	23	somebody else. 14:16:47
24	Tab 21. And again, I'm just asking for confirmation 14:15:35	24	PRESIDENT: Well, we are following the 14:16:48
25	on the dates here. This is Exhibit C-1908 and this 14:15:38	25	questioning and we take note of the answers. 14:16:51
	Page 190		Page 191
1	Page 190 Again, it is for the Respondent to put 14:16:54	1	Page 191 a hypothetical project could be constructed. We 14:18:05
1 2	-	1 2	
	Again, it is for the Respondent to put 14:16:54		a hypothetical project could be constructed. We 14:18:05
2	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57	2	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08
2	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04	2 3	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12
2 3 4	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06	2 3 4	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14
2 3 4 5	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04	2 3 4 5	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23
2 3 4 5 6	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12	2 3 4 5 6 7 8	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20
2 3 4 5 6 7 8	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14	2 3 4 5 6 7 8	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26
2 3 4 5 6 7 8 9	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14 Q. Sure. Perhaps then one very small 14:17:14	2 3 4 5 6 7 8 9	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28
2 3 4 5 6 7 8 9 10	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14 Q. Sure. Perhaps then one very small 14:17:14 question on this then: On the schedule itself you 14:17:17	2 3 4 5 6 7 8 9 10	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28 question should be in terms of whether it was 14:18:31
2 3 4 5 6 7 8 9 10 11 12	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14 Q. Sure. Perhaps then one very small 14:17:17 noted that there was input from SgurrEnergy, Baird, 14:17:21	2 3 4 5 6 7 8 9 10 11 12	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28 question should be in terms of whether it was 14:18:31 appropriate to exclude financing from this schedule. 14:18:32
2 3 4 5 6 7 8 9 10 11 12	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14 Q. Sure. Perhaps then one very small 14:17:14 question on this then: On the schedule itself you 14:17:17 noted that there was input from SgurrEnergy, Baird, 14:17:21 WSP, COWI and Weeks Marine. Can you tell me which 14:17:24	2 3 4 5 6 7 8 9 10 11 12 13	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28 question should be in terms of whether it was 14:18:31 appropriate to exclude financing from this schedule. 14:18:32 MS. SQUIRES: Okay, I think that's 14:18:37
2 3 4 5 6 7 8 9 10 11 12 13	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. Can you tell me which 14:17:24 one of those five individuals, questions on 14:17:28 financing should have been addressed to? 14:17:32 A. From my knowledge, none of these 14:17:45 companies have got a detailed working knowledge of 14:17:46 the financing process. 14:17:49 PRESIDENT: Maybe I'll put the 14:17:50 question then in these terms: You didn't look at 14:17:55 technical – it's not in the critical path of the 14:17:57 technical project? 14:18:00	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28 question should be in terms of whether it was 14:18:31 appropriate to exclude financing from this schedule. 14:18:32 MS. SQUIRES: Okay, I think that's 14:18:37 clear to us now on who to ask those questions to. 14:18:38 MS. SEERS: And, of course, in 14:18:42 addition, the developers themselves would have that 14:18:43 information. So, Mr. Baines, Mr. Mars, rather. 14:18:46 PRESIDENT: Yes, although the issue 14:18:50 with the financial experts would be about the timing 14:18:57 to be taken for financing, whereas here we are 14:19:00 exploring whether there is any relevant interface 14:19:02 between the technical program and the arrangements 14:19:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Again, it is for the Respondent to put 14:16:54 the questions in such a way that the information 14:16:57 extracted from the witness is useful for the 14:16:59 Tribunal. 14:17:02 It's fine, again, to explore the 14:17:04 limits of his role, but try to keep it on that 14:17:06 limit. He won't be able to comment on issues that 14:17:09 go outside his area of expertise. 14:17:12 BY MS. SQUIRES: 14:17:14 Q. Sure. Perhaps then one very small 14:17:14 question on this then: On the schedule itself you 14:17:17 noted that there was input from SgurrEnergy, Baird, 14:17:21 WSP, COWI and Weeks Marine. Can you tell me which 14:17:24 one of those five individuals, questions on 14:17:28 financing should have been addressed to? 14:17:32 A. From my knowledge, none of these 14:17:45 companies have got a detailed working knowledge of 14:17:46 the financing process. 14:17:49 PRESIDENT: Maybe I'll put the 14:17:50 question then in these terms: You didn't look at 14:17:55 technical it's not in the critical path of the 14:17:57	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a hypothetical project could be constructed. We 14:18:05 were not looking at the feasibility with regards to 14:18:08 whether it could be financed. 14:18:12 MS. SEERS: And if I may assist, 14:18:14 Mr. Chair, the relevant witness to put questions of 14:18:16 that nature to are the Deloitte witnesses. 14:18:20 PRESIDENT: The issue though here is 14:18:23 something different. It's a question of whether 14:18:24 arrangements for financing would have been or 14:18:26 should have been part of the schedule. Maybe the 14:18:28 question should be in terms of whether it was 14:18:31 appropriate to exclude financing from this schedule. 14:18:32 MS. SQUIRES: Okay, I think that's 14:18:37 clear to us now on who to ask those questions to. 14:18:38 MS. SEERS: And, of course, in 14:18:42 addition, the developers themselves would have that 14:18:43 information. So, Mr. Baines, Mr. Mars, rather. 14:18:46 PRESIDENT: Yes, although the issue 14:18:50 with the financial experts would be about the timing 14:18:57 to be taken for financing, whereas here we are 14:19:00 exploring whether there is any relevant interface 14:19:02

	Page 192		Page 193
1	that there is no there is no connection in terms 14:19:15	1	receiving its permitting to commercial operation in 14:20:19
2	of in terms of the technical program. It's not 14:19:19	2	approximately 27 months; correct? 14:20:24
3	part of financing, arranging for financing is not 14:19:23	3	MS. SEERS: Just to I apologize, 14:20:27
4	part of the technical process. 14:19:28	4	I don't mean to continuously interject, but I would 14:20:28
5	THE WITNESS: That's correct. 14:19:30	5	request that Ms. Squires state the questions 14:20:32
6	PRESIDENT: So I think we can move 14:19:30	6	accurately. 14:20:34
7	on to another subject. 14:19:31	7	The permitting would have been 14:20:35
8	MS. SQUIRES: All right, well, we'll 14:19:36	8	received six months before the conclusion of the ERT 14:20:37
9	move on to something else. 14:19:37	9	proceeding according to this schedule. 14:20:40
10	BY MS. SQUIRES: 14:19:39	10	MR. SPELLISCY: I'm sorry, that 14:20:50
11	Q. Let's look at line 69 of your 14:19:39	11	seemed to be testimony from Ms. Seers. 14:20:50
12	schedule. 14:19:46	12	PRESIDENT: Well, these are the kinds 14:20:50
13	Again, I'm merely asking to confirm 14:19:47	13	of questions you can raise in the redirect. 14:20:50
14	that a certain event takes place on a certain day 14:19:48	14	BY MS. SQUIRES: 14:20:55
15	but I'm not going to look into the accuracy of that 14:19:51	15	Q. I'll ask my question again then, 14:20:55
16	event. 14:19:53	16	from the Environment Review Tribunal to operation, 14:20:57
17	It says there that the Environment 14:19:54	17	that's 27 months; correct? 14:21:00
18	Review Tribunal will be done as of February 11th, 14:19:58	18	A. Numerically, that would appear to 14:21:02
19	2014; is that correct? 14:20:01	19	be correct. 14:21:04
20	A. I can see that, yes. 14:20:02	20	Q. And are you aware that no other 14:21:05
21	Q. And if we look at line 8, we see 14:20:03	21	offshore wind project in the 200 to 400 megawatt 14:21:07
22	there that you have indicated a commercial operation 14:20:11	22	range has gone from permitting to commercial 14:21:11
23	date of May 23rd, 2016; correct? 14:20:13	23	operation in 27 months, and, in fact, Windstream's 14:21:13
24	A. I can see that also. 14:20:16	24	project would be un-precedented in this regard? 14:21:16
25	Q. So this project has gone from 14:20:18	25	A. Again, I'm reliant on the local 14:21:19
	D 104		D 105
	Page 194		Page 195
1	knowledge from WSP, with regards to what it believes 14:21:21	1	Q. My questions pertain though to 14:22:49
2	can be achieved regarding permitting. 14:21:26	2	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50
2	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29	2 3	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54
2 3 4	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32	2 3 4	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56
2 3 4 5	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35	2 3 4 5	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58
2 3 4 5 6	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38	2 3 4 5 6	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59
2 3 4 5 6 7	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39	2 3 4 5 6 7	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03
2 3 4 5 6 7 8	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44	2 3 4 5 6 7 8	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05
2 3 4 5 6 7 8	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49	2 3 4 5 6 7 8	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06
2 3 4 5 6 7 8 9	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51	2 3 4 5 6 7 8 9	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08
2 3 4 5 6 7 8 9 10	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55	2 3 4 5 6 7 8 9 10	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10
2 3 4 5 6 7 8 9 10 11	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03	2 3 4 5 6 7 8 9 10 11 12	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:10 operations, you have your consents in hand? 14:23:12
2 3 4 5 6 7 8 9 10 11 12	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06	2 3 4 5 6 7 8 9 10 11 12 13	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15
2 3 4 5 6 7 8 9 10 11 12 13	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08	2 3 4 5 6 7 8 9 10 11 12 13 14	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:15 based on the analysis I have done. It's within the 14:23:17
2 3 4 5 6 7 8 9 10 11 12 13 14	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:08 examples of projects that have been developed, your 14:22:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19
2 3 4 5 6 7 8 9 10 11 12 13 14 15	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:33
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	can be achieved regarding permitting. 14:21:26 I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25 A. Well, when one is comparing what 14:22:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:32 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:33 some examples then, perhaps to show the other time 14:23:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	can be achieved regarding permitting. I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25 A. Well, when one is comparing what 14:22:30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:37 periods for different projects. So let's turn to 14:23:40
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	can be achieved regarding permitting. I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25 A. Well, when one is comparing what 14:22:30 are not comparable. So that's it's fast. I can 14:22:33	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:37 periods for different projects. So let's turn to 14:23:40 tab 14 in your binder. 14:23:49
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	can be achieved regarding permitting. I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25 A. Well, when one is comparing what 14:22:30 are not comparable. So that's it's fast. I can 14:22:33 only assume that my colleagues in WSP believe that 14:22:38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:37 periods for different projects. So let's turn to 14:23:40 tab 14 in your binder. 14:23:51
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	can be achieved regarding permitting. I'm also assuming that there was some 14:21:29 appetite from the Canadian government with regards 14:21:32 to stimulating and developing offshore wind. 14:21:35 There would have been some 14:21:38 encouragement, but for putting these projects into 14:21:39 moratorium. Presumably at some time it had a desire 14:21:44 to see offshore wind built, and, therefore, one 14:21:49 would expect there would be an encouragement to put 14:21:51 the necessary components in place to facilitate the 14:21:55 development achieved, the desired financial close, 14:22:03 and the desired operational date. 14:22:06 Q. Okay, so, in comparison to other 14:22:08 examples of projects that have been developed, your 14:22:12 conclusion is that Windstream would have gone from 14:22:15 permitting to commercial operation in faster than 14:22:20 any other project because of the situation that they 14:22:23 were in? 14:22:25 A. Well, when one is comparing what 14:22:30 are not comparable. So that's it's fast. I can 14:22:33	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. My questions pertain though to 14:22:49 after the permitting to commercial operation, so 14:22:50 it's not related to the permitting process itself 14:22:54 but after that. 14:22:56 Your testimony is that Windstream 14:22:58 would have done that process in an unprecedented 14:22:59 pace, in a new market? 14:23:03 A. You mean constructing the 14:23:05 development? 14:23:06 Q. So, from the time that you have 14:23:08 your permitting to the time you reach commercial 14:23:10 operations, you have your consents in hand? 14:23:12 A. I don't think it is unprecedented 14:23:15 based on the analysis I have done. It's within the 14:23:17 range of projects that I have seen developed, all of 14:23:19 the constituent components are sufficiently in that 14:23:23 range that I can believe the schedule is believable 14:23:28 and accurate. 14:23:32 Q. Okay, well, we can walk through 14:23:37 periods for different projects. So let's turn to 14:23:40 tab 14 in your binder. 14:23:49

Page 196 Page 197 1 1 from the 4C database; can you see that? 14:24:11 compare north sea projects and the issues that they 14:25:26 2 2 suffer, with this development which has got A. Yes I can see that. But I'm not 14:24:14 14:25:29 3 3 a completely different risk profile. sure how -- what use comparing Greater Gabbard, for 14:24:16 14:25:34 4 4 example, which is known to have had serious Q. Okay, so to confirm your testimony 14:25:36 14:24:20 technician problems because they sourced their 5 5 is that the Windstream project would have -- again, 14:25:40 14:24:22 6 6 been unprecedented in time. We can agree there that 14:25:45 towers from China, which were of very, very poor 14:24:28 7 7 quality. They sourced steels towers from China, 14:24:29 this is faster than any other project? 14:25:48 8 they had various issues with this development, and 14:24:34 8 A. I don't agree that is the case. 14:25:50 9 9 pretty much everything that could go wrong, did go 14:24:34 My analysis would suggest that it's in the zone for 14:25:52 10 10 what can be achieved for offshore wind development. 14:25:55 11 Q. Okay, so issues arose with that 14:24:38 11 (Simultaneous speakers - unclear) 14:26:00 12 12 project and that's what leads to approximately 78 14:24:41 Q. And have you provided any 14:26:01 13 months for that period for that project; correct? 14:24:44 13 documents or examples to support that time frame in 14:26:01 14 A. Yes, because of issues that were 14:24:46 14 your report? 14:26:04 15 15 specific for this project in the north sea, not 14:24:49 A. I have not. I have done my own 14:26:05 16 a project in Lake Ontario. 16 14:24:53 personal assessment of projects that are in our 14:26:07 17 17 Q. Right, so --14:24:55 database and compared them with what is being 14:26:13 18 18 A. It's not exposed to the same 14:24:55 claimed in our schedule to make me happy that this 14:26:17 19 risks. And I listed the reasons why that is less 14:24:57 19 schedule is achievable. 14:26:20 20 20 risk, if I can say, on a spectrum of risk with 14:25:03 Q. And are you aware that URS has 14:26:24 21 21 regards to projects, I view this one being at the 14:25:07 done that type of analysis for projects between 200 14:26:29 22 22 low end because of where it is being built, because 14:25:11 and 400 megawatts and have not been able to come 14:26:31 23 23 of the sea state, because of the proximity that it 14:25:16 close to that number? 14:26:36 24 24 is to the coastline. 14:25:21 A. I am sure I could go and cherry 14:26:39 25 25 It's not fair, in my opinion, to 14:25:23 pick projects that had issues and paint a very black 14:26:41 Page 198 Page 199 1 1 14:26:45 picture of the possible. could be certain issues with the schedule as it 14:28:14 2 2 So we have to remember that those 14:26:47 pertains to the floating of the turbines, the 14:28:19 3 3 various issues that have caused project delays in 14:26:49 manufacturing, that sort of thing. 14:28:21 4 the North Sea. There is the whole TenneT issue with 14:26:52 4 And to the extent that those risks 14:28:23 5 regard to the German grid, where it was responsible 14:26:59 5 exist, your view is still that this project could be 14:28:24 6 for building the infrastructure required to evacuate 14:27:03 6 completed in that amount of time? 14:28:27 7 power from a lot of these projects, and it failed in 14:27:09 7 A. Yes, that is my contention. 14:28:29 8 8 its mission to do that which caused very lengthy 14:27:14 I don't know if you are aware in 1944, there were 14:28:31 delays for many of the projects in the German 9 9 14:27:18 over 400 concrete caissons sat on the bottom of the 14:28:36 10 10 sea around the UK, which were filled with air, sector. 14:27:22 14:28:41 11 11 The same sort of thing could be seen 14:27:23 refloated, and towed to the Normandy beaches in 14:28:44 12 12 where novel techniques are being deployed in the 14:27:25 order to make artificial harbours to facilitate the 14:28:50 13 13 14:28:56 offshore environment to bury both the inter-turbine 14:27:28 D-Day invasions. 14 14 cables and the cable that runs from the turbines to 14:27:34 The concepts that we've been talking 14:28:58 15 the on-shore location grid, where the plows have 15 about here have been tried and tested. 14:29:00 14:27:38 16 16 failed, there's been mechanical failure. This will 14:27:44 And 70 years ago, a first-of-a-kind 14:29:02 17 17 not happen on Lake Ontario because the cables are 14:27:47 development managed to support the Allied invasion 14:29:05 18 14:29:06 18 laid directly on the surface. 14:27:50 of northern Europe. 19 19 So I do not think that it's reasonable 14:27:52 Q. Right, Mr. Irvine but I guess 14:29:10 20 20 to compare projects that are ongoing, that are being 14:27:54 my --14:29:12 21 21 14:29:13 built in the North Sea to projects on Lake Ontario. 14:28:00 A. So I am totally behind the 22 22 It's two completely different environments. It's 14:28:03 commentary I have made with regards to the ability 14:29:14 23 23 not comparing apples with apples. 14:28:08 for this project to be constructed on the schedule 14:29:19 24 24 14:29:22 Q. Okay, well, we heard from 14:28:10 as presented. 25 Mr. Cooper and Mr. Palmer this morning that there 14:28:11 25 Q. Okay, well, let's move on to 14:29:23

Page 204 Page 205 1 1 Q. So, that's about 18 months, in 14:35:43 2 total, I believe, if my math is correct. 14:35:46 3 A. Okay, I'll agree with you on that. 14:35:51 4 Q. All right. Now, you don't provide 14:35:53 5 a quote or any industry evidence to support your 14:34:35 MS. SQUIRES: Okay, I think we can 14:34:37 6 conclusion in that regard; is that correct? It's 14:35:58 6 7 7 come out of the confidential session. 14:34:40 based on your own knowledge? 14:36:01 8 --- Confidential transcript ends 8 A. No, it's not based on my own 14:36:03 14:34:42 9 BY MS. SQUIRES 9 14:34:57 knowledge. It is based on the knowledge of COWI 14:36:05 10 10 O. Before we leave our discussion on 14:34:57 because they are the expert in this space. I can't 14:36:07 11 11 major equipment, I want to discuss the elevator 14:34:57 claim to have any knowledge of the procurement or 14:36:10 12 12 platform for a minute. 14:35:01 delivery or installation times of an elevator 14:36:14 13 And if we can go to your schedule 13 platform. That sits with COWI and they explained 14:36:16 14:35:03 14 again and we turn to 273. This line discusses the 14:35:05 14 that this morning in some detail, I believe. So 14:36:21 15 15 I have it rely on experts to furnish me with 14:36:25 procurement of the elevator platform; are you with 14:35:14 14:35:21 16 information to go into this program. 16 me there? 14:36:30 17 17 A. Yes, I see that. 14:35:22 Q. Let's look at line 379 then. And 14:36:32 18 O. Line 273. And it indicates 14:35:24 18 it notes there that installation of the 14:36:34 19 a start date of December 5th, 2012 and an end date 14:35:24 19 gravity-based foundation is to begin on June 4th, 14:36:46 20 20 of April 2nd, 2014; correct? 2014; correct? So five days after the elevator 14:35:28 14:36:50 21 21 A. I can see that also. 14:35:32 platform is installed. June 11th, sorry -- no, 14:36:53 22 22 June 6th. 14:37:02 Q. And the next line, line 274, then 14:35:34 23 14:37:04 23 indicates two months for installation of that 14:35:37 A. Yes, I can see that. 24 Q. So you've only allowed yourself 14:37:05 24 elevator platform; correct? 14:35:40 25 25 A. I can see that also. 14:35:42 a five-day buffer then between the time the elevator 14:37:07 Page 206 Page 207 1 14:37:10 1 platform goes in and the time that the foundation to. 14:38:12 2 2 installation starts. 14:37:13 MR. SPELLISCY: And I would suggest 14:38:13 3 3 Actually, I'm looking at the schedule. 14:37:15 that the proper person to be providing that 4 4 I believe we you have an 11-day. We may have read 14:37:17 explanation is actually the witness whose testimony 14:38:15 5 5 this one wrong. Just give me one second. 14:37:20 is -- who are here. 6 PRESIDENT: The expert is not only 6 MS. SEERS: Again, Mr. Chair, I really 14:37:24 14:38:21 7 7 don't mean to keep interjecting but these are 14:37:26 somebody who put together this information; he's 14:38:22 8 also an expert on scheduling. So it's fine to 8 matters that Mr. Cooper testified about this morning 14:37:29 9 explore whether the input that he has received from 14:38:27 9 and this is within his field of expertise. 10 other experts is something that is consistent with 14:38:30 10 PRESIDENT: This is a different issue. 14:37:33 11 his experience in other projects, whether it's 14:38:32 11 This is an interface between his area of expertise 14:37:35 12 something that is reasonable, whether it's 14:38:34 and the expertise of other experts, so it's fine to 14:37:36 12 13 acceptable, whether he tested this information. 14:38:36 13 explore this. 14:37:40 14 I think this is a fully legitimate area of -- and 14:38:38 14 MS. SEERS: Well if I may -- okay. 14:37:41 15 the witness is doing fine. 14:38:42 15 I would just like to explain for the record, though, 14:37:42 16 MS. SEERS: Thank you, Mr. Chair. 14:38:44 16 that, while Sgurr definitely inputted the data that 14:37:45 17 PRESIDENT: And the Tribunal 14:38:46 17 was prepared or provided by these various experts, 14:37:49 18 appreciates this information. 14:38:47 18 the various experts are responsible for the accuracy 14:37:53 19 THE WITNESS: I have tested all of the 14:38:49 19 of that data. And so if there's a question about 14:37:58 20 individual components for the schedule. I've tested 14:38:50 20 the length of time that certain things take, that's 14:37:59 21 it against relevant projects in Europe, not ones 14:38:53 21 an appropriate question for Mr. Cooper in his area 14:38:01 22 that are not comparable. I've tried to compare 14:38:58 22 of expertise. 14:38:04 23 apples with apples and I'm comfortable with the 14:39:01 23 If the matter is whether the data was 14:38:05 24 detail in the schedule and that it has been achieved 14:39:03 24 correctly inputted into Microsoft project, then 14:38:06 25 in other locations that are similar to Lake Ontario. 14:39:07 25 perhaps that's something that Mr. Irvine can speak 14:38:09

Page 208 Page 209 1 1 BY MS. SQUIRES: 14:39:30 14:40:45 what actually happens in the development of 2 2 an offshore wind project or any project for that 14:40:48 Q. Okay, so, I want to go back then 14:39:31 3 3 to what I was just talking about and that there's 14:39:36 matter. It's all about risk identification and 14:40:52 4 a five-day period between the time the mitigation. It's about getting more information to 14:40:57 4 14:39:38 5 foundations -- between the time that the elevator 14:39:39 5 come into the project and better inform those that 14:41:02 6 6 are involved in its delivery. 14:41:04 platform is installed and the time that the 14:39:42 7 7 gravity-based foundations start going in the water; 14:39:45 Q. Okay, I'll just ask you to give me 14:41:07 is that right? 8 14:39:48 8 one second then. 14:41:09 9 A. I will trust your opinion on that 14:39:50 9 14:41:13 [Counsel confers] 10 10 number. Mr. Irvine, so I can understand a bit 14:42:20 11 Q. And based on your opinion with 11 more about the scope so I don't ask you questions 14:42:22 12 scheduling then, any lead time longer than that, any 14:39:56 12 about topics that you have not provided any sort of 14:42:25 13 delays would lead to a delay in the project in 13 opinion on. The inclusion of the offshore 14:39:59 14:42:28 14 getting the foundations in the water; correct? 14 substation in the schedule, is that something in 14:42:31 14:40:03 15 15 A. On the hypothetical project, based 14:40:06 your purview or is that another expert? 14:42:33 on this scenario, yes, that's possible, but I keep 14:40:09 16 16 A. I'm happy to take questions on 14:42:39 17 17 stressing that building a project is about multiple 14:40:14 that. 14:42:40 18 iterations of the program. This is just one. That 14:40:19 18 Q. So let's go to page 98 of your 14:42:42 19 when you're building a project, you introduce risks. 14:40:22 19 first report. 14:42:46 20 20 You introduce stresses. You find out where the 14:40:26 You will see there toward the bottom 14:43:03 21 weaknesses are in the program, and you build 14:40:29 21 of the page there is a Section entitled "Offshore 14:43:04 22 22 substation"? 14:43:07 an appropriate mitigation. 23 23 So to try and pick holes and do all of 14:40:33 A. Yes, I can see that. 14:43:08 24 this and say "Therefore, the project would wander 14:40:38 24 Q. So you note there that the project 14:43:09 25 into the sunset," I don't think is reflective of 25 substation will be located at the offshore site and 14:43:10 Page 210 Page 211 1 1 will start to collect the 35 kilovolts power itself, i.e. we had an island on which we would 14:44:19 2 2 generated by the individual turbines, and then that 14:43:17 develop a substation and associated electrical 14:44:22 3 3 will then step the voltage up to 230 kilovolts for 14:43:19 infrastructure. That's the scenario that we 14:44:26 4 the cable; correct? 14:43:24 4 developed this program schedule, and if we were 14:44:28 5 A. Yes. 14:43:26 5 given a different scenario we would have developed 14:44:32 6 Q. So it is my understanding that the 14:43:27 6 a different schedule. 14:44:34 7 offshore substation is a 35 kilovolt offshore 7 14:43:28 Q. Okay, so when you were told that 14:44:35 8 8 substation; is that right -- or sorry, 230-kilovolt 14:43:32 an offshore substation could be developed on that 14:44:37 9 9 offshore substation; correct? 14:43:36 island, you were not made aware that they were 14:44:39 10 10 A. Yes. 14:43:38 refused access to that island for a smaller MET 14:44:42 11 11 Q. Now, in your presentation you 14:43:40 tower: correct? 14:44:45 12 mentioned that one of the scheduling advantages for 14:43:42 12 A. I was asked to develop a schedule 14:44:46 13 13 Windstream was the use of an on-shore, rather than 14:43:45 based upon that island being utilized. If I was 14 14 a offshore substation: correct? 14:43:47 given a different scenario, I would have come up 14:44:53 15 A. That's correct, in the 14:43:49 15 with a different schedule? 14:44:56 16 hypothetical scenario we looked at and were tasked 14:43:50 16 In the UK right now, there is what is 14:44:58 17 17 with assessing. 14:43:52 called the renewables obligation, and we are working 14:44:59 18 18 Q. And are you aware that Windstream 14:43:56 for a client who is trying to get a wind farm built 14:45:03 19 19 was not able to use Pigeon Island, the location of 14:43:58 in the offshore environment before the time runs out 14:45:07 20 the proposed offshore substation, they were not 20 with regards to its ability to receive a subsidiary 14:45:13 21 allowed to use that to build an -- a MET tower; are 14:44:04 21 for that development. So it has started with an end 14:45:16 22 22 vou aware of that? date, and we work back and we developed a schedule 14:45:19 14:44:09 23 23 A. I don't see the relevance of that 14:44:12 that is robust enough to receive finance, for 14:45:22 24 24 with the schedule we were tasked to develop. We example, we stress tested. We check it. We make 14:45:27 25 25 were given that was the situation that would present 14:44:17 sure that the schedule is sufficiently robust. So 14:45:30

	Page 212		Page 213
1	we are basing this upon a scenario that we were 14:45:35	1	substation is required, there is nothing in the 14:47:04
2	given, and that was Pigeon Island would be available 14:45:40	2	schedule that speaks to that sorry, an offshore 14:47:05
3	to install an offshore substation on. 14:45:42	3	substation not on Pigeon Island, there is nothing 14:47:08
4	Q. So, correct me if I'm wrong then, 14:45:49	4	that speaks to that? 14:47:11
5	you didn't do a scheduling, or you didn't input into 14:45:51	5	A. That's correct. That would be 14:47:12
6	the schedule the possibility of having a substation 14:45:53	6	another scenario, and we could develop another 14:47:13
7	that's not on Pigeon Island, so a floating 14:45:55	7	schedule around that. We can manufacture all our 14:47:16
8	substation, a gravity-based foundation substation? 14:45:58	8	gravity base. You can get the appropriate equipment 14:47:22
9	A. That was not considered in that 14:46:03	9	to come in and install the transformer on there 14:47:25
10	scenario. If we were to look at multiple scenarios, 14:46:04	10	are many scenarios one could have here. We could 14:47:29
11	then, yes, I've said repeatedly what the process of 14:46:07	11	relocate to Wolfe Island, for example. We could 14:47:32
12	project development is about, and it's about 14:46:11	12	have an offshore collector station where you just 14:47:34
13	understanding the possible, if things don't go to 14:46:15	13	assemble the electrical cables and run them to 14:47:37
14	your original plan you come up with a Plan B. You 14:46:18	14	another location where would you have a substation. 14:47:42
15	continually input into the program and find 14:46:22	15	There are multiple scenarios that one 14:47:48
16	solutions that will help you get to your end date. 14:46:25	16	could build into a project program. This one 14:47:50
17	Q. All right. I want to look at your 14:46:35	17	assumes that we will build on Pigeon Island. 14:47:53
18	schedule, then, at line 345. 14:46:36	18	Q. Okay, under the FIT contract, 14:47:56
19	Is the offshore substation that you 14:46:51	19	barring any event of force majeure occurring, 14:48:02
20	are referring to here, then, is that the one on 14:46:52	20	Windstream had five years to develop its project; 14:48:04
21	Pigeon Island? 14:46:55	21	correct? 14:48:07
22	Is that the only one that you've 14:46:55	22	A. That's my understanding, but I'm 14:48:07
23	A. That is the only one that I've 14:46:58	23	not an expert in the details behind the FIT 14:48:08
24	been made aware of. That's my understanding. 14:47:00	24	contract. I know I have to give a program that 14:48:12
25	Q. So to the extent an offshore 14:47:02	25	links to a specific end date, and I come up with 14:48:17
23	Q. 50 to the extent an offshore 14.47.02		miks to a specific character, and reonic up with 14.46.17
	Page 214		Page 215
1	engineering solutions that is will make that happen. 14:48:19	1	the essence in to the OPA with 14:49:42
2	Q. But your understanding is five 14:48:22	2	respect to obtaining commercial 14:49:45
3	years? 14:48:24	3	operation of the contract facility 14:49:46
4	A. Five years, I believe there's a 14:48:24	4	by the milestone date for 14:49:48
5	a degree of slip allowed in that, as one would 14:48:27	5	commercial operation set out in 14:49:49
6	expect. That's what we see in projects globally. 14:48:31	6	Exhibit A." 14:49:51
7	There may be a period of time that you have to build 14:48:35	7	Do you see that? 14:49:54
8	your project, but if you are started if you are 14:48:39	8	A. I can see that. 14:49:54
9	demonstrating to those that are issuing the FIT-type 14:48:42	9	Q. And it notes further: 14:49:55
10	contracts that you have begun work that you have 14:48:48	10	"The parties agree that commercial 14:49:56
11	committed capital to a project, there's typically 14:48:50	11	operation shall be achieved in 14:49:58
12	some leeway in that. It's not a cliff edge. It's 14:48:53	12	a timely manner and by the 14:50:00
13	not a hard stop. There is some porosity in that end 14:48:57	13	milestone date for commercial 14:50:02
14	date. 14:49:01	14	operation." 14:50:03
15	Q. Okay, we can come back to that 14:49:01	15	[As read] 14:50:04
16	buffer period in a minute because I do understand 14:49:02	16	Do you see that? 14:50:04
17	what you are getting at there, that period that 14:49:05	17	A. I can see that also. 14:50:06
18	extends beyond the five years, but if we could come 14:49:07	18	Q. Now, I want to take you to page 15 14:50:08
19	to tab 9 of your binder, which is Exhibit R-0092. 14:49:10	19	of your second report. And you'll note there, 14:50:10
20	This is a copy of the standard form FIT contract, 14:49:20	20	I believe it's toward the bottom of the page, it 14:50:38
21	and we're going to look at page 9. 14:49:22	21	says: 14:50:40
22	In Section 2.5 it notes that. 14:49:36	22	"The project could have been 14:50:41
23	"The supplier" 14:49:38	23	developed and constructed in a 14:50:42
24	So in this case, Windstream: 14:49:39	24	period of approximately 5.25 years 14:50:43
25	" acknowledges that time is of 14:49:40	25	or 63 months." 14:50:46

	Page 216		Page 217
1	[As read] 14:50:48	1	to discuss what is or is not consistent with the FIT 14:51:37
2	A. Yes. 14:50:48	2	program or, Mr. Irvine, tell me if I'm wrong? 14:51:40
3	Q. So, in your professional opinion 14:50:49	3	A. Well, I'm reliant on those who 14:51:43
4	then, the project could not reach commercial 14:50:52	4	have a good working knowledge of the FIT program to 14:51:45
5	operation within the five years required in the FIT 14:50:54	5	feed into our report. I do not have a good working 14:51:48
6	contract; it required extra time; correct? 14:50:56	6	knowledge of the FIT program. 14:51:53
7	A. Well, that's correct; that's what 14:50:59	7	Q. So when you said that it was 14:51:55
8	our schedule has thrown up. 14:51:00	8	consistent with the constraint of the FIT program, 14:51:57
9	MS. SEERS: Mr. Chair, I hesitate in 14:51:04	9	that was without an understanding of the FIT program 14:51:59
10	interjecting again, but Ms. Squires has just put to 14:51:08	10	itself? 14:52:02
11	the witness whether something was required under the 14:51:12	11	A. Yes, about those who have gotten 14:52:02
12	FIT contract or not. And so I'd just like to 14:51:14	12	a better understanding of the FIT program than 14:52:05
13	register an objection that there have been other 14:51:17	13	I have. 14:52:08
14	witnesses that have testified already as to what was 14:51:19	14	Q. All right. Those are, 14:52:08
15	and wasn't required and this witness is not 14:51:21	15	I believe just give me one second again. 14:52:10
16	an expert on that. 14:51:24	16	[Counsel confers] 14:52:16
17	BY MS. SQUIRES: 14:51:25	17	MS. SQUIRES: Nothing else from me, 14:52:49
18	Q. So, I would note in that very same 14:51:26	18	Mr. Irvine. 14:52:50
19	paragraph in Mr. Irvine's report he says that: 14:51:27	19	PRESIDENT: Thank you, Ms. Squires. 14:52:51
20	"That schedule means that the 14:51:29	20	I trust there will be questions in redirect? 14:52:53
21	project could have been developed 14:51:30	21	MS. SEERS: You will be surprised to 14:52:55
22	and constructed in a period that 14:51:31	22	note that there are not. 14:52:56
23	was consistent with the 14:51:33	23	PRESIDENT: There are not? 14:52:58
24	constraints of the FIT program." 14:51:34	24	MS. SEERS: We have no questions. 14:52:59
25	So, I believe Mr. Irvine is prepared 14:51:35	25	PRESIDENT: Anything from the 14:53:01
	D 010		D 410
	Page 218	1	
_	•		Page 219
1	Tribunal? 14:53:01	1	turbines. So those turbines aren't directly 14:54:17
2	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01	2	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20
2	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04	2 3	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23
2 3 4	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06	2 3 4	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24
2 3 4 5	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10	2 3 4 5	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26
2 3 4 5	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14	2 3 4 5 6	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30
2 3 4 5 6 7	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14	2 3 4 5 6 7	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33
2 3 4 5 6 7 8	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18	2 3 4 5 6 7 8	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36
2 3 4 5 6 7 8	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20	2 3 4 5 6 7 8	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39
2 3 4 5 6 7 8 9	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21	2 3 4 5 6 7 8 9	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in – I cannot 14:54:40
2 3 4 5 6 7 8 9 10	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27	2 3 4 5 6 7 8 9 10	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in – I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44
2 3 4 5 6 7 8 9 10 11	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32	2 3 4 5 6 7 8 9 10 11	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47
2 3 4 5 6 7 8 9 10 11 12	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36	2 3 4 5 6 7 8 9 10 11 12 13	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50
2 3 4 5 6 7 8 9 10 11 12 13 14	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37	2 3 4 5 6 7 8 9 10 11 12 13 14	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56
2 3 4 5 6 7 8 9 10 11 12 13 14 15	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15	turbines. So those turbines aren't directly 14:54:17 comparable with the proposition that's under 14:54:20 discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00
2 3 4 5 6 7 8 9 10 11 12 13 14 15	Tribunal? 14:53:01 QUESTIONS BY THE TRIBUNAL: 14:53:01 MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:03
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:42 Sea so that project was it's spelled 14:53:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:03 offshore and 35 metres of water. 14:55:08
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:42 Sea so that project was it's spelled 14:53:53 N-Y-S-T-E-D. 14:53:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:55:00 the possible, rather than those 80 kilometres 14:55:08 MR. BISHOP: Are there any others that 14:55:12
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:53 That project utilized gravity-based 14:53:55	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:08 MR. BISHOP: Are there any others that 14:55:12 you consider comparable, other than those two? 14:55:14
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:55 That project utilized gravity-based 14:53:55 foundation and I would argue that it's a better 14:53:56	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:08 MR. BISHOP: Are there any others that 14:55:12 you consider comparable, other than those two? 14:55:18
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:53 That project utilized gravity-based 14:53:55 foundation and I would argue that it's a better 14:53:56 representative location because it's in a more 14:54:00	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:08 MR. BISHOP: Are there any others that 14:55:12 you consider comparable, other than those two? 14:55:18 it's challenging for me to recall what might be 14:55:19
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:55 foundation and I would argue that it's a better 14:53:56 representative location because it's in a more 14:54:00 sheltered sea. 14:54:04	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:03 offshore and 35 metres of water. 14:55:08 MR. BISHOP: Are there any others that 14:55:12 you consider comparable, other than those two? 14:55:18 it's challenging for me to recall what might be 14:55:19 appropriate. I could certainly follow that up, if 14:55:24
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:53 That project utilized gravity-based 14:53:55 foundation and I would argue that it's a better 14:53:56 representative location because it's in a more 14:54:00 sheltered sea. 14:54:04 And it is also, using gravity-based 14:54:05	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:03 offshore and 35 metres of water. 14:55:12 you consider comparable, other than those two? 14:55:14 THE WITNESS: Off the top of my head, 14:55:18 it's challenging for me to recall what might be 14:55:24 that would be appropriate. 14:55:27
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Tribunal? QUESTIONS BY THE TRIBUNAL: MR. BISHOP: Yes. You said that at 14:53:04 one point that you compared apples to apples and 14:53:06 that you looked at projects similar to that in 14:53:10 Ontario. 14:53:14 What projects did you consider to be 14:53:14 analogous to this project? 14:53:18 THE WITNESS: Basically, a number of 14:53:20 projects that operate in the Baltic sea that utilise 14:53:21 gravity-based foundation, for example, Nysted, which 14:53:27 is one that has been discussed by others. 14:53:32 MR. BISHOP: Could you speak up 14:53:36 a little bit? I'm having trouble hearing you. 14:53:37 THE WITNESS: Nysted is a project that 14:53:39 is situated just south of Copenhagen in the Baltic 14:53:42 Sea so that project was it's spelled 14:53:55 foundation and I would argue that it's a better 14:53:56 representative location because it's in a more 14:54:00 sheltered sea. 14:54:04	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	turbines. So those turbines aren't directly comparable with the proposition that's under discussion. 14:54:23 Many of those other projects that are 14:54:24 being compared to the Lake Ontario project are using 14:54:26 4 megawatts turbines, 6 megawatts turbines. They 14:54:30 have potential technology issues, they have 14:54:33 different foundation requirements, so they are not 14:54:36 directly comparable. 14:54:39 Those other projects in I cannot 14:54:40 remember the lake in Sweden, but it's in my 14:54:44 presentation that I gave this morning, which is very 14:54:47 similar to the proposed project in Lake Ontario. So 14:54:50 I would consider those in the Baltic Sea using 14:54:56 gravity-based foundation to be better comparators of 14:55:00 the possible, rather than those 80 kilometres 14:55:03 offshore and 35 metres of water. 14:55:08 MR. BISHOP: Are there any others that 14:55:12 you consider comparable, other than those two? 14:55:18 it's challenging for me to recall what might be 14:55:19 appropriate. I could certainly follow that up, if 14:55:24

	Page 220		Page 221
1	testify about these matters; you made the statement 14:55:34	1	MR. BISHOP: Okay. Thank you. 14:57:01
2	that you were looking at apples to apples in similar 14:55:37	2	THE WITNESS: Thanks. 14:57:01
3	projects, so I'm simply asking you what you're 14:55:41	3	PRESIDENT: Mr. Irvine, if I could 14:57:06
4	referring to. 14:55:44	4	take you to your presentation pages let me see, 14:57:07
5	THE WITNESS: Well, I'm referring to 14:55:45	5	do we have page numbers here? So, starting with the 14:57:14
6	those projects that we have on our database. Many 14:55:46	6	project specific SgurrEnergy experience, probably 14:57:23
7	of them are listed in the presentation. I've done 14:55:51	7	page 8, 9, I suppose. You have listed on three 14:57:28
8	numerical analysis on the information that was 14:55:55	8	pages, you have listed your experience. You have - 14:57:43
9	presented to adequately normalize that information, 14:55:58	9	THE WITNESS: Yes. 14:57:47
10	such that we can look at installation rates in terms 14:56:02	10	PRESIDENT: First as lender's 14:57:48
11	of megawatts per one installed, in terms of turbines 14:56:05	11	engineer. Then as independent engineer or advisor 14:57:50
12	per month installed, in terms of the overall project 14:56:12	12	in the in acquisition. 14:57:54
13	duration from the start to finish. So I'm sorry I'm 14:56:14	13	THE WITNESS: Yes. 14:57:56
14	unable to recall the precise names of those 14:56:22	14	PRESIDENT: And then as owner's 14:57:58
15	projects, but I do have that data. 14:56:24	15	engineer. 14:57:59
16	MR. BISHOP: So when you are referring 14:56:30	16	THE WITNESS: Yes. 14:58:00
17	to apples to apples, though, you're talking about 14:56:31	17	PRESIDENT: So you have looked at this 14:58:00
18	projects that would have similar technical - 14:56:35	18	from different angles. 14:58:01
19	technical issues, technical requirements? You're 14:56:38	19	THE WITNESS: That's correct. 14:58:03
20	talking about the technical aspects of the project. 14:56:40	20	PRESIDENT: And the one that would 14:58:04
21	THE WITNESS: Similar technical 14:56:42	21	probably be closest to what you are doing here would 14:58:09
22	aspects, but we have big issues in Germany, 14:56:45	22	be which one of these poles? Perhaps, well, as 14:58:13
23	specifically, with regards to the grid support, so 14:56:48	23	an expert you would probably be an independent 14:58:19
24	this is adding years of delay on the project, so 14:56:55	24	expert engineer. 14:58:21
25	it's not fair to rope these into the comparison. 14:56:57	25	THE WITNESS: I would call myself 14:58:22
	Page 222		Page 223
1	an independent engineer in the context within which 14:58:23	1	these projects. London array has 3.6 megawatt 14:59:57
2	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27	2	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01
2	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30	2 3	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08
2 3 4	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32	2 3 4	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09
2 3 4 5	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33	2 3 4 5	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12
2 3 4 5	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42	2 3 4 5 6	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14
2 3 4 5 6 7	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47	2 3 4 5 6 7	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16
2 3 4 5 6 7 8	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53	2 3 4 5 6 7 8	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized cost of energy. 15:00:20
2 3 4 5 6 7 8	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56	2 3 4 5 6 7 8	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22
2 3 4 5 6 7 8 9	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00	2 3 4 5 6 7 8 9	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24
2 3 4 5 6 7 8 9 10	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01	2 3 4 5 6 7 8 9 10	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:29
2 3 4 5 6 7 8 9 10 11 12	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06	2 3 4 5 6 7 8 9 10 11	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:29 fishing the turbine up into the higher atmosphere 15:00:32
2 3 4 5 6 7 8 9 10 11 12 13	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09	2 3 4 5 6 7 8 9 10 11 12 13	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going 15:00:35
2 3 4 5 6 7 8 9 10 11 12 13	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14	2 3 4 5 6 7 8 9 10 11 12 13 14	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:39
2 3 4 5 6 7 8 9 10 11 12 13 14	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18	2 3 4 5 6 7 8 9 10 11 12 13 14 15	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? THE WITNESS: Well, the purpose of 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized cost of energy. So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically fishing the turbine up into the higher atmosphere 15:00:32 where you're able to capture more energy, so going bigger is designed to make the project more cost 15:00:39 effective to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? THE WITNESS: Well, the purpose of going bigger is designed to reduce the levelized cost of energy. So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer deployment operations you need. You are typically fishing the turbine up into the higher atmosphere sheep you're able to capture more energy, so going bigger is designed to make the project more cost bigger is designed to make the project more cost 15:00:39 effective to 15:00:44 PRESIDENT: So in this instance where
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:45
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:29 fishing the turbine up into the higher atmosphere 15:00:32 where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:45 bicycles or turbines, why would it would it not 15:00:53
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:29 fishing the turbine up into the higher atmosphere 15:00:32 where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient 15:00:58
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32 would that compare with the ones that you have 14:59:36	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	these projects. London array has 3.6 megawatt 14:59:57 turbines for example. 15:00:01 PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is 15:00:09 it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized 15:00:16 cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:29 fishing the turbine up into the higher atmosphere 15:00:32 where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient 15:00:58 turbines, 6 megawatts? 15:01:01
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32 would that compare with the ones that you have 14:59:36 listed on these three pages? 14:59:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of going bigger is designed to reduce the levelized cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically fishing the turbine up into the higher atmosphere 15:00:32 where you're able to capture more energy, so going bigger is designed to make the project more cost effective to 15:00:42 PRESIDENT: So in this instance where PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient 15:00:58 turbines, 6 megawatts? 15:01:01 THE WITNESS: Yes. And that could be 15:01:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32 would that compare with the ones that you have 14:59:36 listed on these three pages? 14:59:39 THE WITNESS: Well, again, typically 14:59:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going bigger is designed to make the project more cost 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient 15:00:58 turbines, 6 megawatts? 15:01:01 THE WITNESS: Yes. And that could be 15:01:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:59:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32 would that compare with the ones that you have 14:59:36 listed on these three pages? 14:59:39 THE WITNESS: Well, again, typically 14:59:41 there is reduced number of turbines in larger sites. 14:59:43	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? THE WITNESS: Well, the purpose of going bigger is designed to reduce the levelized cost of energy. So, the bigger you make the turbines, 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going where you're able to capture more energy, so going 15:00:35 bigger is designed to make the project more cost 15:00:44 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient THE WITNESS: Yes. And that could be 15:01:05 basing this on the information that was available 15:01:08
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	an independent engineer in the context within which 14:58:23 I've been asked to look as these projects and give 14:58:27 evidence. 14:58:30 PRESIDENT: So looking at all of 14:58:32 these, how would the current project compare in 14:58:33 terms of size, in terms of the megawatts that the 14:58:42 project would produce, and the number of 14:58:47 I believe, one expert used the term "Bicycle" and 14:58:53 the number of bicycles to be set up? 14:58:56 THE WITNESS: It's smaller at 14:59:00 300 megawatts. The sort of block size that we're 14:59:01 looking at in terms of these projects are in excess 14:59:06 of 500 megawatts. London Array, for example, is in 14:59:09 excess of 700 megawatts. It is one of the biggest 14:59:14 offshore wind farm in the world. So, this is what 14:59:18 I'm saying about taking data and trying to normalize 14:59:23 it a manner that gives you a direct comparison. 14:59:27 PRESIDENT: And in terms the number of 14:59:31 130 turbines in this project, I understand, how 14:59:32 would that compare with the ones that you have 14:59:36 listed on these three pages? 14:59:39 THE WITNESS: Well, again, typically 14:59:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	these projects. London array has 3.6 megawatt turbines for example. PRESIDENT: So what would determine 15:00:08 whether you use 6 or 3 megawatts, for instance? Is it the wind resource? 15:00:12 THE WITNESS: Well, the purpose of 15:00:14 going bigger is designed to reduce the levelized cost of energy. 15:00:20 So, the bigger you make the turbines, 15:00:22 the fewer foundations you need. The fewer 15:00:24 deployment operations you need. You are typically 15:00:32 where you're able to capture more energy, so going bigger is designed to make the project more cost 15:00:35 bigger is designed to make the project more cost 15:00:39 effective to 15:00:42 PRESIDENT: So in this instance where 15:00:44 you have where the plan was to build around 130 15:00:53 have been cost efficient to use more efficient 15:00:58 turbines, 6 megawatts? 15:01:01 THE WITNESS: Yes. And that could be 15:01:05

(613)564-2727

	Page 224		Page 225
1	you were given, that there would be 3.2 megawatts. 15:01:15	1	PRESIDENT: Okay, we'll find out. 15:02:20
2	THE WITNESS: 2.3. 15:01:19	2	Yes, I think that's all I have. 15:02:26
3	PRESIDENT: 2.3. 15:01:21	3	DR. CREMADES: I have a small 15:02:28
4	THE WITNESS: Yes. So that's the 15:01:22	4	question. I have a small question is the following: 15:02:29
5	scenario, and as I've said on several occasions, you 15:01:24	5	Your company was engaged in February 2011, for this 15:02:34
6	would keep refining the situation. 15:01:28	6	project. You started working for this project in 15:02:42
7	We've seen projects that start with 15:01:31	7	February, 2011. 15:02:45
8	2 megawatts turbine that could end up with 15:01:33	8	THE WITNESS: No, that's not my 15:02:48
9	a 4 megawatts turbine in fewer locations. 15:01:36	9	understanding. No, I think we started later than 15:02:50
10	It is a development process that's 15:01:40	10	that. This is a hypothetical situation that I've 15:02:53
11	continually refined as we move through the 15:01:42	11	looked at. 15:02:57
12	development phase, and there is always 15:01:46	12	DR. CREMADES: We did you when were 15:02:59
13	an opportunity to capture the best available 15:01:49	13	you contracted by Windstream to work on this 15:03:00
14	technology at a given time. 15:01:52	14	project? 15:03:02
15	PRESIDENT: Were you involved in the 15:01:58	15	THE WITNESS: Prior to the first 15:03:03
16	project in Sweden, in Lake Vänern? 15:01:59	16	report, which I'm assuming is roundabout 2012. 15:03:04
17	THE WITNESS: Personally? No. 15:02:03	17	DR. CREMADES: '12, so after the 15:03:11
18	PRESIDENT: Do you know how big that 15:02:06	18	moratorium? 15:03:13
19	project is in terms of the number of turbines and 15:02:07	19	THE WITNESS: Yes. 15:03:13
20 21	the size? 15:02:09	20	DR. CREMADES: In order to understand, 15:03:15
22	THE WITNESS: It's in a report. 15:02:12	21 22	do you think that your work was done for the project 15:03:18 or in preparation of this arbitration? 15:03:23
23	PRESIDENT: It's not on this on 15:02:15 the 15:02:17	23	or in preparation of this arbitration? 15:03:23 THE WITNESS: Well, I was asked to 15:03:26
24	the 15:02:17 THE WITNESS: It is not on the 15:02:18	24	look at a theoretical situation, the question being: 15:03:28
25	presentation? 15:02:19	25	Would it be theoretically possible to build this 15:03:32
	•		
	Page 226		Page 227
1	project? So we have taken an engineering view upon 15:03:36	1	questions from the Tribunal? 15:04:57
2	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39	2	questions from the Tribunal? 15:04:57 MS. SQUIRES: Yes, just one brief 15:05:02
2	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48	2 3	questions from the Tribunal? 15:04:57 MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03
2 3 4	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53	2 3 4	questions from the Tribunal? 15:04:57 MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04
2 3 4 5	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58	2 3 4 5	questions from the Tribunal? 15:04:57 MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10
2 3 4 5 6	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02	2 3 4 5	questions from the Tribunal? 15:04:57 MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12
2 3 4 5 6 7	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03	2 3 4 5 6 7	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16
2 3 4 5 6 7 8	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06	2 3 4 5 6 7 8	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:04:57 15:05:02 15:05:03 15:05:10 15:05:10
2 3 4 5 6 7 8	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08	2 3 4 5 6 7 8	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:22
2 3 4 5 6 7 8 9	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12	2 3 4 5 6 7 8 9	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22
2 3 4 5 6 7 8 9 10	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14	2 3 4 5 6 7 8 9 10	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25
2 3 4 5 6 7 8 9 10 11	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16	2 3 4 5 6 7 8 9 10 11	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28
2 3 4 5 6 7 8 9 10 11 12	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20	2 3 4 5 6 7 8 9 10 11 12 13	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:28 Q. And it has 72 turbines; correct? 15:05:29
2 3 4 5 6 7 8 9 10 11 12 13	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23	2 3 4 5 6 7 8 9 10 11 12 13 14	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24	2 3 4 5 6 7 8 9 10 11 12 13	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:32 Q. And it is backed by Dong; is that 15:05:32
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:25	2 3 4 5 6 7 8 9 10 11 12 13 14 15	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:25 relevant and best experts to build into this 15:04:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:25 relevant and best experts to build into this 15:04:31 project, to build into our reports, so this would 15:04:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:35
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:35 relevant and best experts to build into this 15:04:35 all stand very good stead with regards to 15:04:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:31 project, to build into our reports, so this would 15:04:35 all stand very good stead with regards to 15:04:39 progressing the report the project if that was 15:04:44	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:31 project, to build into our reports, so this would 15:04:39 progressing the report the project if that was 15:04:44 the desire. 15:04:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:29 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:37 comparison; correct? 15:05:40
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:31 project, to build into our reports, so this would 15:04:39 progressing the report the project if that was 15:04:44 the desire. 15:04:47 DR. CREMADES: Thank you. 15:04:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:37 comparison; correct? 15:05:40 A. No, I disagree. I think it is 15:05:41
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	project? So we have taken an engineering view upon 15:03:36 that development, so, the work we have done, 15:03:39 I guess, it's useful, but it's based on this 15:03:48 theoretical situation which is designed to get 15:03:53 answers for this Tribunal. 15:03:58 DR. CREMADES: Well, I want to be more 15:04:02 concrete. The fees you were paid, did you think 15:04:03 should be considered costs of the project or costs 15:04:06 of this arbitration? 15:04:08 THE WITNESS: Well, I believe our work 15:04:12 stands and can be utilized with regards to the 15:04:14 development of the project. So it could be, if the 15:04:16 project was to be progressed. 15:04:20 DR. CREMADES: Uh-hmm. 15:04:23 THE WITNESS: It would be a cost to 15:04:24 the project. We have used information from the 15:04:31 project, to build into our reports, so this would 15:04:39 progressing the report the project if that was 15:04:44 the desire. 15:04:47 DR. CREMADES: Thank you. 15:04:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	questions from the Tribunal? MS. SQUIRES: Yes, just one brief 15:05:02 question. 15:05:03 PRESIDENT: Yes, please. 15:05:04 FURTHER CROSS-EXAMINATION BY MS. SQUIRES: 15:05:10 Q. Mr. Irvine, you mentioned Nysted as 15:05:12 an appropriate project when Mr. Bishop asked for 15:05:16 a comparator; do you recall that? 15:05:19 A. I recall that, yes. 15:05:22 Q. Now that project is built in water 15:05:22 about 6 to 9 metres in depth; correct? 15:05:25 A. Correct. 15:05:28 Q. And it has 72 turbines; correct? 15:05:29 A. Correct. 15:05:32 Q. And it is backed by Dong; is that 15:05:32 correct? 15:05:34 A. That's correct, yes. 15:05:35 Q. So if we're looking to compare 15:05:37 comparison; correct? 15:05:40 A. No, I disagree. I think it is 15:05:41 a relevant comparison. It is an evolution of the 15:05:43

¹ are comparable. 15:05:59	selv it came on 15:07:01
2 Q. So in spite of it being in 15:06:00 2 the market, we helped with the lender	•
shallower with water with less turbines, and being 15:06:02 3 assignment on that, so I think we're lo	
backed by the world leader in offshore wind 15:06:06 4 perhaps, two years ago, three years ago	
development, you consider it comparable? 15:06:07 5 first project that got through the project thro	
	5:07:21
7 There are useful learnings to be gained from that. 15:06:10 7 Q. Okay, and Dr. Heiskanen	
8 And Wolfe Shoals does have machines that are in the 15:06:13 8 you questions about the comparison by	
9 same water depth, although some are deeper. 15:06:13 9 may have been Mr. Bishop, I apologiz	
MS. SQUIRES: That's my only question. 15:06:21 10 sure about the comparison between	
Thank you. 15:06:22 11 Wolfe Island Shoals project and other	
PRESIDENT: Ms. Seers? 15:06:22 12 including, you mentioned projects in the second projects in the second project in the second proje	
MS. SEERS: Yes, we have some 15:06:24 13 Could you elaborate on why	
questions. 15:06:25 14 consider projects in the Baltic sea, con	-
PRESIDENT: Please. 15:06:26 15 this particular project?	15:07:49
16 RE-EXAMINATION BY MS. SEERS: 15:06:26 16 A. Well, largely because of t	
Q. Mr. Irvine, Dr. Heiskanen asked 15:06:34 17 benign sea state.	15:07:53
you a question about why you use a 2.3 megawatt 15:06:37 18 There is less risk associated v	
Siemens turbine as opposed to a 6 megawatt Siemens 15:06:39 19 development of a project. There is like	
turbine. Can you explain when the 6 megawatts 15:06:45 20 less downtime with regards to weather	
Siemens turbine became available on the marketplace 15:06:47 21 into the more northerly parts of the B	<u> </u>
and how that would have fit or not fit within the 15:06:50 22 they're far less saline compared to the	
project schedule that you developed here? 15:06:52 23 for example.	15:08:14
A. Well, it was not available to the 15:06:54 So we are moving into zones	s where 15:08:15
marketplace in 2011, which was the theoretical 15:06:55 25 there is basically less weather risk and	
Page 230	Page 231
utilization of gravity-based foundation in a more 15:08:22 schedule uncharacteristically perhaps	s ahead of 15:09:42
benign environment. 15:08:25 2 schedule.	15:09:42
Q. Thank you very much. 15:08:31 3 PRESIDENT: That is entirely	
	15:09:46
5 PRESIDENT: Thank you. Actually, 15:08:32 5 MS. SEERS: It must be becar	
6 I have one more question: You mentioned in your 15:08:32 6 Sunday. We had Mr. Clarke scheduled	<u> </u>
7 presentation that you used radar to investigate wind 15:08:35 7 and continue tomorrow, and I'm certain	
8 resource. 15:08:39 8 proceed, however, I had contemplated	
9 THE WITNESS: It is LiDAR. 15:08:40 9 tomorrow and so I would ask for the T	
PRESIDENT: Yes. Well, the question 15:08:42 10 indulgence, if possible, to get as far as	
is why are airlines so bad in detecting turbulence, 15:08:45 today and then continue tomorrow mor	-
	5:10:07
THE WITNESS: Well, they actually use 15:08:51 13 PRESIDENT: Certainly. The	
LiDAR to detect turbulence, and they avoid it. 15:08:52 14 to start today, and I don't see any reaso	-
Sometimes you can't fly over it or around it, but 15:08:56 15 should change the program.	15:10:16
that is deployed on aircraft. 15:09:00 16 MS. SEERS: No, and certain	•
PRESIDENT: Okay, so maybe we can 15:09:03 17 prepared to start today. I just had cont	•
explore that during I trust this doesn't give any 15:09:05 also continuing tomorrow morning.	15:10:22
rise to further questions? 15:09:08 19 PRESIDENT: You were plar	_
MS. SQUIRES: Just curiosity. 15:09:11 20 continue anyway tomorrow so, we may	
, , , , , , , , , , , , , , , , , , , ,	5:10:30
very much. 15:09:14 22 MS. SEERS: If possible, that THE WITNESS: Thank you. 15:09:15 23 appreciated.	
Tr · · · · · · · ·	15:10:33
a procedural issue. I see we're actually ahead of 15:09:40 25 objections to that, but I'd like to hear the	ne 15:10:35

	Page 232		Page 233
1	Respondent's comments. 15:10:37	1	prepared a presentation which we look forward to 15:30:57
2	MS. SQUIRES: I am sure Mr. Clarke 15:10:40	2	hearing, but before we start, will there be any 15:30:59
3	would like to be like to be free of this process. 15:10:42	3	questions on direct also from the Respondent? 15:31:02
4	He is available tomorrow morning. 15:10:45	4	MS SQUIRES: Yeah, after the 15:31:09
5	PRESIDENT: Yes. Okay, but let's have 15:10:45	5	presentation there will be 15:31:10
6	a break. We will continue at 3:25 with Mr. Clarke. 15:10:45	6	PRESIDENT: After the presentation 15:31:12
7	Thank you. 15:10:50	7	Thank you very much 15:31:13
8	Recess taken at 3:10 p m. 15:10:53	8	Please go ahead, Mr Clarke 15:31:13
9	Upon resuming at 3:30 p.m. 15:10:53	9	PRESENTATION BY GARETH D CLARKE, AECOM UK 15:31:13
10	PRESIDENT: Good afternoon, 15:30:06	10	THE WITNESS: Good afternoon 15:31:27
11	Mr. Clarke. So you have been here so you know how 15:30:07	11	MS WATES: Mr President, if I could 15:31:46
12	it works. So if you could please state your name 15:30:11	12	just ask for a few moments so we can advance the 15:31:47
13	for the record and read the declaration for expert 15:30:14	13	slides to the start of 15:31:48
14	witness. 15:30:15	14	PRESIDENT: Yes, of course 15:31:48
15	THE WITNESS: Yes, good afternoon. My 15:30:16	15	THE WITNESS: Thank you 15:31:49
16	name is Gareth De Villiers Clarke. 15:30:17	16	Good afternoon, my name is Gareth 15:31:49
17	I solemnly declare upon my honour and 15:30:21	17	Clarke I am a Chartered Engineer, which is the UK 15:31:51
18	conscience that my evidence and my opinions will be 15:30:25	18	designation I think it's equivalent to 15:31:55
19	in accordance with my sincere belief. 15:30:28	19	a Professional Engineer in other jurisdictions 15:31:59
20	AFFIRMED: GARETH DE VILLIERS CLARKE 15:30:30	20	I have 35 years of experience, of 15:32:02
21	PRESIDENT: Thank you very much. 15:30:31	21	which two years were in the mining industry I then 15:32 07
22	The URS report has already been 15:30:34	22	spent four years with a transmission utility where 15:32:11
23	subject to cross-examination in part earlier in this 15:30:39	23	primarily I was involved in project management of 15:32:15
24	proceeding last week. So this is now the 15:30:42	24	a major project, and I've now been a consulting 15:32:19
25	engineering aspect of it. We understand you have 15:30:54	25	engineer for 29 years 15:32:22
	Page 234		Page 235
1	In that time, I've been in both 15:32:26	1	the activities of the team, and I've also been 15:34:10
2	a technical leadership and project management roles 15:32:28	2	responsible for directly reviewing the technical 15:34:17
3	with direct involvement in projects throughout that 15:32:35	3	parts of the both URS reports. 15:34:19
4	time. 15:32:39	4	As Mr. Rose indicated last week, the 15:34:31
5	I'm currently a technical director in 15:32:42	5	URS approach to this project covered three key 15:34:35
6	the AECOM UK Power & Energy business unit where 15:32:46	6	issues: Recognizing the time constraints imposed by 15:34:40
7	I have been involved in a wide range of projects in 15:32:53	7	the FIT contract, clearly one of the key issues was 15:34:47
8	the power sector covering thermal generation, 15:32:57	8	the project schedule. 15:34:51
9	renewable energy generation and transmission and 15:33:05	9	We also then looked at the project 15:34:55
10	distribution. 15:33:08	10	risks, and the risks facing the project during both 15:34:58
11	I have personal direct involvement in 15:33:09	11	its development and construction phase, and we also 15:35:02
12	one offshore wind project and numerous on-shore wind 15:33:14	12	looked at the cost and commercial implications 15:35:09
13	projects. 15:33:18	13	insofar as they were influenced by the technical 15:35:15
14	For this particular assignment, my 15:33:24	14	aspects of the project. 15:35:20
15	role was the leadership and management of the 15:33:27	15	Effectively, what we were doing was 15:35:23
16	technical team in the UK, particularly the 15:33:33	16	looking to provide assumptions or review of the 15:35:26
17	environmental work was done from our Canadian 15:33:39	17	assumptions made by Deloitte. 15:35:32
18	office, but I was leading the technical team in the 15:33:42	18	The methodology we applied in our 15:35:40
19	UK. 15:33:45	19	analysis is we analyzed the documents and 15:35:43
20	I assembled a team of experts for this 15:33:47	20	submissions made by Windstream. It was specifically 15:35:51
21	project from both within URS as we were at the time 15:33:50	21	not our intent or object or objective to consider 15:35:57
22	of appointment and specialist sub-consultants, all 15:33:58	22	the design or develop the design or other aspects of 15:36:02
23	of whom we have, in fact, worked with for a number 15:34:02	23	the project. 15:36:06
24	of years prior to this appointment. 15:34:06	24	In this respect, I guess you could say 15:36:08
25	During the project, I've coordinated 15:34:08	25	we were more like lenders' engineers as described by 15:36:10

	Page 236		Page 237
1	Mr. Guillet last week where he said a lender's 15:36:17	1	profile. 15:38:13
2	engineer role was to challenge the project and the 15:36:21	2	The FIT contract imposed a fixed time 15:38:15
3	risks facing it, and how those might impact the 15:36:26	3	or fixed milestones for the project. And those, 15:38:20
4	project. 15:36:29	4	when taken into consideration that this was a first 15:38:27
5	In assessing the risks facing the 15:36:37	5	of a kind project, and that it was in the early 15:38:30
6	project, we recognise that risks can have both 15:36:39	6	stages of development, meant or led to our 15:38:39
7	direct cost and schedule impacts or implications. 15:36:43	7	conclusion that it had a significant risk profile. 15:38:41
8	And in undertaking our work, we identified 15:36:50	8	If we just look at each of those in 15:38:49
9	a significant number of risks. 15:36:55	9	turn, we considered that the project was in early 15:38:54
10	We fully acknowledge that not all of 15:36:57	10	stage of development, because if I summarize those 15:38:56
11	those risks would have materialized, and that some 15:37:00	11	points there, it still had a number of studies, both 15:39:03
12	of them that did materialize could have been 15:37:05	12	technical, environmental and other work to do to 15:39:08
13	mitigated. But we also considered considered it 15:37:08	13	develop the project. 15:39:12
14	unrealistic that in a project of this size and 15:37:12	14	In addition, it still was in the 15:39:17
15	complexity, that no risks would materialize that 15:37:15	15	process of securing sponsors and funding. And we 15:39:19
16	would have an impact on project on schedule 15:37:21	16	considered that this is the definition of a project 15:39:23
17	and/or costs. 15:37:26	17	in the early stage of development. 15:39:27
18	The other thing that is important is 15:37:33	18	Implicit in a project being in the 15:39:30
19	our analysis is based on the status of the project 15:37:35	19	early stage of development is that it has a higher 15:39:32
20	and the industry, as at the effectively the 15:37:39	20	risk profile than in later stages. The purpose of 15:39:34
21	11th of February, 2011. 15:37:47	21	the development process is to reduce the risk 15:39:38
22	In other words, looking at the project 15:37:51	22	profile of the project as has been mentioned many 15:39:41
23	as if it had continued under the scenario that is 15:37:53	23	times. 15:39:45
24	being dealt with in this hearing. Essentially, we 15:38:00	24	You iteratively work through the 15:39:45
25	found that the project had a significant risk 15:38:10	25	solutions, identify more you obtain more 15:39:50
	Page 238		Page 239
1	information, develop solutions and therefore reduce 15:39:52	1	first time associated with the inevitable learning 15:41:50
2	the risks facing the project. 15:39:56	2	curve that they would have to go through, 15:41:56
3	If we right, we're there now. 15:40:10	3	notwithstanding their experience in all other 15:41:58
4	Confusing me we also concluded that the project 15:40:21	4	similar or analogous types of technology and 15:42:02
5	was the first of a kind. I think it is essentially 15:40:31	5	projects. 15:42:06
6	obvious that the project would have been the first 15:40:34	6	If we now move onto the schedule, 15:42:13
7	offshore wind project permitted in North America and 15:40:36	7	clearly we looked we considered the schedule 15:42:20
8	particularly under the REA process. 15:40:40	8	presented by Windstream in both their initial 15:42:22
9	That inherently would have meant the 15:40:42	9	their claim memorial and their second submission. 15:42:29
10	project would have been subject to more scrutiny 15:40:46	10	And one of the things we did was to compare that 15:42:35
11	since the different agencies involved would have 15:40:49	11	against experience internationally with offshore 15:42:40
12	wanted to make sure that they weren't setting any 15:40:54	12	wind projects. 15:42:44
13	unintended precedence by accepting certain 15:40:58	13	We used the 4C database for this 15:42:46
14	processes, approvals or solutions. 15:41:04	14	analysis. And in order to provide a consistent 15:42:53
15	In terms of technology, we've already 15:41:07	15	measure, because there are many different measures 15:42:57
16	heard today from COWI that the use of semi-floating 15:41:09	16	of dates, but the one which is normally reasonably 15:43:01
17	gravity-based foundation for offshore wind farms is 15:41:20	17	consistently available is the date when the permits 15:43:05
18	an innovative — it is the new solution. So this 15:41:23	18	were obtained or the permitting process was 15:43:11
19	would have been at that time the first project to 15:41:26	19	completed to the date of commercial operation. 15:43:13
20	employ this particular technology in the offshore 15:41:30	20	What this graphic shows is that the 15:43:16
21	wind sector. 15:41:33	21	Windstream project would have achieved at that 15:43:21
22	Finally, in terms of construction, as 15:41:38	22	what's effectively construction period, if you 15:43:26
23	the first offshore wind project to be constructed in 15:41:40	23	like faster than any other project 15:43:29
24	North America, the supply chain would have been 15:41:45	24	internationally to date. 15:43:35
25	doing the project this type of project for the 15:41:48	25	I would stress that we heard earlier 15:43:36

Page 240 Page 241 1 1 that Sgurr's representative indicated that we maybe 15:43:38 schedule which had significant changes from the 15:45:41 2 2 original Windstream schedule. cherry-picked our projects for this graphic. I'd 15:43:44 15:45:45 3 3 emphasise that this represents all the projects for 15:43:48 Notwithstanding those significant 15:45:52 4 4 which this information was available in the 4C 15:43:51 changes when we looked at that schedule, we 15:45:54 5 5 database. identified a number of areas where we still had 15:45:58 6 6 Windstream, in their first submission, 15:44:07 concerns as to the schedule being proposed by 15:46:02 7 7 submitted a schedule, which I believe was included 15:44:11 Windstream. Specifically, they were proposing that 15:46:09 8 as appendix B of the first Sgurr report, which, in 15:44:18 8 construction would be -- start before receipt of the 15:46:16 9 9 many respects, as was again, Ms. Squires took Sgurr 15:44:25 REA, and the notice to proceed from OPA. 15:46:21 10 10 through earlier, was very similar to the schedules 15:44:31 Alternatively, if they were wanting to 15:46:26 11 11 in use in earliest documents referenced by the 15:44:34 start construction ahead of receiving that, they 15:46:30 12 12 Claimant, including schedules in use by Windstream 15:44:42 would have needed significant self financing ahead 15:46:34 13 back in late 2010. 15:44:52 13 of -- because that would have been ahead of 15:46:38 14 15:44:53 14 financial close. In our first report, we identified 15.46.40 15 15 a number of concerns, discrepancies, errors, if you 15:44:55 Secondly, as has been discussed 15:46:44 16 like, in that schedule included in the Windstream 15:45:01 16 actually on a couple of occasions already in various 15:46:47 17 17 submission. 15:45:07 witness statements, the time to obtain the REA in 15:46:53 18 As a result of that, we analyzed and 15:45:08 18 that schedule was shorter than that proposed by 19 developed our own schedule which we found led to 15:45:12 19 Windstream's own experts and the time -- and within 15:47:02 20 20 a commercial operation date of July 2020. I believe 15:45:18 that, the time for -- allowed for environmental 21 21 that's approximately four years after -- or three 15:45:23 field studies had been reduced, without explanation. 15:47:10 22 22 years after supply and default date. 15:45:26 The schedule also showed that 15:47:19 23 23 As a result of our first report in 15:45:30 financial close would be achieved concurrently with 15:47:21 24 24 this second submission, Windstream submitted -- or 15:45:32 completion of the ERT process. 15:47:28 25 25 through SgurrEnergy they submitted a revised 15:45:37 In our experience, this is unusual and 15:47:33 Page 242 Page 243 1 1 possibly unlikely to be achieved for a first of into account the concerns we had. I'm not going to 15:49:17 2 2 a kind project, arguably unlikely to be achieved. 15:47:38 go into those in detail, but they are available on 15:49:24 3 3 We identified some bottlenecks in the 15:47:43 the record if necessary. 15:49:28 4 gravity-based foundation' manufacturing schedule. 15:47:47 4 The impact of that was that when we 15:49:29 5 Those have been discussed with COWI today who 15:47:51 5 analysed the schedule, our schedule showed that the 15:49:32 6 indicated that perhaps we had not understood or the 15:47:58 6 earliest date that commercial operation could be 7 process that would be involved. 15:48:03 7 achieved would have been August 2018. That's 15:49:43 8 8 15:48:05 approximately 13 months after the supplier default 15:49:48 However, we believed that the 9 9 date which, again, arguably could have rendered the 15:49:53 submission or description of the process provided in 15:48:06 10 10 project not viable. 15:49:58 the document was very clear, that the project went 15:48:11 11 11 through certain stages, in which case, those 15:48:14 This next page is simply graphical 15:50:06 12 12 bottlenecks would occur. 15:48:17 representation of that previous slide. You might 15:50:08 13 13 find that easier to understand. Finally, as has also been discussed, 15:48:20 15:50:14 14 14 the delivery time for the wind turbines was assumed 15:48:22 One point which I should have made and 15:50:17 15 to be shorter than that provided by the TSA. 15 I omitted from what I've just said, is that we had 15:50:19 15:48:26 16 16 We tried to analyse using the Sgurr 15:48:40 assumed -- or in preparing our schedule, we used the 15:50:23 17 15:48:43 17 schedule. We had that in MS project format. We same timeframes as proposed in the Windstream 15:50:30 18 18 tried to use that to analyse the impact of those. 15:48:48 schedule in all aspects, in all elements except 15:50:33 19 19 We found that because the schedule was 15:48:51 those five or six points where we had concerns. 15:50:37 20 20 not robustly linked in its activities, that wasn't 15:48:53 In all other respects, we had accepted 15:50:44 21 21 the specific durations and timeframes imposed by practical. So we produced our own high-level 15:48:57 22 22 schedule which was deliberately focused on the 15:50:51 15:49:01 Windstream. 23 23 critical path items, the Sgurr schedule as I think, 15:49:06 So finally, I just say that we believe 15:50:57 24 24 approximately 400 lines long. 15:49:11 our schedule depicts the earliest possible 15:51:01 25 25 We reduced that significantly and took 15:49:15 commercial operation date based on the assumptions 15:51:04

	Page 244		Page 245
1	and the evidence submitted by Windstream in their 15:51:08	1	Can you explain briefly for the 15:52:40
2	second submission. 15:51:12	2	Tribunal what impact this would have on the Sgurr 15:52:41
3	I've spoken extensively about the 15:51:14	3	schedule? 15:52:45
4	risks that the – I've spoken about the risks that 15:51:16	4	A. I have had a brief look at that. 15:52:48
5	the project faced and we referred to these 15:51:20	5	It's unfortunately not a very straightforward 15:52:52
6	extensively in our reports, and we note that in our 15:51:22	6	analysis because of the difficulties I referred to 15:52:55
7	schedule, apart from whether a mechanical breakdown 15:51:28	7	earlier, that the Sgurr schedule has not got 15:52:58
8	delays that have been used in respect of the marine 15:51:34	8	a complete set of links between different 15:53:03
9	operations, we have not made any provision for 15:51:37	9	activities. 15:53:06
10	delays arising from risks being realised. 15:51:44	10	However, I did try to run it and 15:53:08
11	And therefore, we would normally 15:51:47	11	I found that what it was likely to do but I can't 15:53:11
12	consider it prudent at these early stages in 15:51:49	12	be certain right now is it was likely to delay 15:53:16
13	a project and in early development stages, that some 15:51:51	13	the installation of the turbines by a full season, 15:53:19
14	form of contingency is provided within the schedule. 15:51:55	14	because it would have shifted the delivery of the 15:53:22
15	That's all I have to say. 15:52:02	15	moving the REA process out by six months, 15:53:29
16	PRESIDENT: Thank you very much. And 15:52:08	16	effectively extended the time for financial close by 15:53:35
17	will there be questions. 15:52:11	17	six months or the notice to proceed by six months, 15:53:38
18	MS. SQUIRES: Yes, just two very brief 15:52:14	18	at which time the project the allowing the 14 15:53:40
19	questions. 15:52:16	19	months for delivery of the first turbine, assumed by 15:53:46
20	EXAMINATION-IN-CHIEF BY MS. SQUIRES: 15:52:17	20	Windstream, or that would have possibly shifted the 15:53:51
21	Q. Mr. Clarke, you would have heard 15:52:27	21	installation of the turbines into the next summer. 15:53:57
22	earlier when Mr. Irvine responded to my questions 15:52:28	22	So, effectively a whole construction 15:54:00
23	with respect to possibly delaying the renewable 15:52:32	23	season might have been lost. 15:54:02
24	energy approval based on Ms. Powell's testimony by 15:52:35	24	Q. All right. And you would have 15:54:05
25	six months. 15:52:38	25	heard Mr. Cooper this morning from COWI explain that 15:54:06
	Page 246		Page 247
1	the bottleneck in production that you had identified 15:54:10	1	supply default date would have been missed by 15:55:38
2	in your report could be fixed. 15:54:13	2	a considerable period. 15:55:41
3	Can you tell me can you tell the 15:54:15	3	
4			Q. And lastly, can you briefly 15:55:42
	Tribunal what this means for the schedule and for 15:54:18	4	3, 3
5		4 5	explain for all of our benefits, how the scheduling 15:55:43
5 6	other items that might arise on the critical path? 15:54:21		explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46

Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57
6 7 8 9	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40	5 6 7 8 9	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a - 15:55:59
6 7 8 9	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47	5 6 7 8 9	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a - 15:55:59 essentially one of four types of linkage. 15:56:06
6 7 8 9 10 11	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51	5 6 7 8 9 10	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a - 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11
6 7 8 9 10 11 12 13 14	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54	5 6 7 8 9 10 11 12 13	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13
6 7 8 9 10 11 12	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58	5 6 7 8 9 10 11 12	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23
6 7 8 9 10 11 12 13 14	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58	5 6 7 8 9 10 11 12 13	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30
6 7 8 9 10 11 12 13 14	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:08	5 6 7 8 9 10 11 12 13 14	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34
6 7 8 9 10 11 12 13 14 15 16 17	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:08 Because the two were quite closely 15:55:10	5 6 7 8 9 10 11 12 13 14 15 16 17	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:37
6 7 8 9 10 11 12 13 14 15 16 17 18	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:10 linked time-wise, and therefore, even if that was 15:55:14	5 6 7 8 9 10 11 12 13 14 15 16 17 18	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:37 after one activity finished and the next activity 15:56:40
6 7 8 9 10 11 12 13 14 15 16 17 18 19	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:10 linked time-wise, and therefore, even if that was 15:55:19	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a - 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:37
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:10 linked time-wise, and therefore, even if that was 15:55:19 and the time could have been achieved, the overall 15:55:24	5 6 7 8 9 10 11 12 13 14 15 16 17 18	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:40 started, you would put in a positive lag of two weeks. 15:56:46
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:08 Because the two were quite closely 15:55:10 linked time-wise, and therefore, even if that was 15:55:14 fixed in the gravity-based manufacturing process, 15:55:19 and the time could have been achieved, the overall 15:55:24 time to commercial operation in our assessment would 15:55:28	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:40 started, you would put in a positive lag of two 15:56:43
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:08 Because the two were quite closely 15:55:10 linked time-wise, and therefore, even if that was 15:55:14 fixed in the gravity-based manufacturing process, 15:55:19 and the time could have been achieved, the overall 15:55:24 time to commercial operation in our assessment would 15:55:28 have not been significantly different. 15:55:30	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a - 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:40 started, you would put in a positive lag of two 15:56:43 weeks. 15:56:46 So that's the most commonly used 15:56:48 relationship. 15:56:50
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	other items that might arise on the critical path? 15:54:21 A. Assuming that it could be fixed, 15:54:25 and the 120 days schedule period for fabrication 15:54:28 of each turbine sorry, each foundation could 15:54:37 be or was achieved, the impact of that would be 15:54:40 that instead of, as per our schedule, the 15:54:47 gravity-based foundation being on the critical path, 15:54:51 the turbine delivery would have been on the critical 15:54:54 path. 15:54:58 And again, if you look at our 15:54:58 schedule, you will see that the impact of that is 15:55:02 maybe one or two months. I can't give you the exact 15:55:05 figure offhand, but it's a short period. 15:55:08 Because the two were quite closely 15:55:10 linked time-wise, and therefore, even if that was 15:55:14 fixed in the gravity-based manufacturing process, 15:55:19 and the time could have been achieved, the overall 15:55:24 time to commercial operation in our assessment would 15:55:28	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	explain for all of our benefits, how the scheduling 15:55:43 links work in that type of program? 15:55:46 A. Oh, now that is a challenging 15:55:50 thing to do briefly. 15:55:52 Effectively how this type of software 15:55:57 works is that you link activities by a 15:55:59 essentially one of four types of linkage. 15:56:06 The most common one is what's called a 15:56:11 "finish-to-start" relationship where the first 15:56:13 activity finishes, and then the next activity 15:56:17 starts. 15:56:20 You can modify that or extend that by 15:56:23 putting either positive or negative lags on that. 15:56:30 So, if, for example, you needed 15:56:34 a two-week delay while something was processed, 15:56:40 started, you would put in a positive lag of two 15:56:43 weeks. 15:56:46 So that's the most commonly used 15:56:48

		Т	
	Page 248		Page 249
1	an activity one activity can start as soon as or 15:56:59	1	see where we go, but that will take us to the end of 15:58:58
2	at the same time as another activity starts. 15:57:03	2	my notes, and then I would be grateful to start 15:59:00
3	And again, you can you would 15:57:06	3	again tomorrow. 15:59:02
4	normally only use positive lags on that, but there 15:57:08	4	PRESIDENT: That will be fine. 15:59:03
5	is no hard and fast rule on that. 15:57:13	5	CROSS-EXAMINATION BY MS. SEERS: 15:59:04
6	The third type of relationship is 15:57:16	6	Q. Good afternoon, Mr. Clarke. 15:59:04
7	a finish to finish, and that is where an activity 15:57:17	7	If you could have in front of you, 15:59:09
8	can only finish when another activity has finished. 15:57:24	8	yes, this large schedule and the binder there, the 15:59:10
9	And again, you would normally put in 15:57:28	9	black binder and your two reports. And then if we 15:59:14
10	some sort of lag on that. 15:57:30	10	need to pull up anything else, I'll let you know. 15:59:17
11	The final one is not commonly used, 15:57:32	11	Okay. 15:59:20
12	which is a start-to-finish relationship, which is 15:57:35	12	Q. Just get myself organized here 15:59:21
13	the reverse of the finish to start relationship. 15:57:40	13	with the binders, the constant challenge around 15:59:24
14	In fact, the Sgurr program was one of 15:57:44	14	here, with the constrained space. 15:59:27
15	the first times I've seen that relationship used in 15:57:48	15	Mr. Clarke, I don't know if you were 15:59:58
16	over 20 years of developing these types of projects, 15:57:52	16	here on Thursday of last week. You were 16:00:01
17	but it was perfectly valid. How they used it, I was 15:57:56	17	A. I was, yes. 16:00:04
18	quite happy with it. 15:58:01	18	Q. So you will recall that we heard 16:00:05
19	I'm sorry if that was too it is 15:58:03	19	from Canada's other expert, Mr. Guillet? 16:00:06
20	quite a technical process. 15:58:05	20	A. I was there for that, yes. 16:00:12
21	MS. SQUIRES: Thank you. Those are my 15:58:09	21	Q. Okay. So I've included 16:00:13
22	questions. 15:58:10	22	a transcript from his evidence at Tab 1 of your 16:00:14
23	PRESIDENT: Thank you, Ms. Squires. 15:58:11	23	binder. 16:00:19
24	Q. I have what I think should be 15:58:53	24	If you look at page 187 I suppose 16:00:20
25	approximately one hour's worth of questions so we'll 15:58:55	25	the pages are not numbered. 16:00:35

They're one of the two 16:01:09 companies (to) do that. It's 16:01:11 either Mott or Sgurr. And half of 16:01:13 the Sgurr team has gone over to 16:01:18 are amongst the key technical 16:01:22 experts in offshore wind. 16:01:23	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	SgurrEnergy is among the top technical experts in the sector and highly credible, if that's that Mr. Guillet had that's that's that Mr. Guillet had that's that's that you have no reason to disagree with Mr. Guillet that Sgurr is one of the top technical advisors in that's that you have no reason to disagree with Mr. Guillet that's that'
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Yes, it's right at the top where he 16:00:37 says: 16:00:39 "I mean, if you want me to attest 16:00:39 that Sgurr is one of the top 16:00:41 technical experts in the field" 16:00:44 PRESIDENT: You're looking at Tab 1? 16:00:45 BY MS. SEERS: 16:00:48 Q. Right at the top. The original 16:00:48 I was working from had numbering. Unfortunately, 16:00:49 this one doesn't. It is for the record, I believe 16:00:51 to be page 187 in the version of the transcript that 16:00:55 does have numbers. 16:00:58 So, Mr. Guillet testified: 16:01:00 "I mean, if you want me to attest 16:01:03 that Sgurr is one of the top 16:01:05 top technical experts in the 16:01:06 field, I'm happy to stipulate to 16:01:07 that. They're one of the two 16:01:09 companies (to) do that. It's 16:01:11 either Mott or Sgurr. And half of 16:01:13 the Sgurr team has gone over to 16:01:18 are amongst the key technical 16:01:22	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	SgurrEnergy is among the top technical experts in the sector 16:01:29 and highly credible, if that's 16:01:31 what you want to get at." 16:01:33 And then on what I understand to be 16:01:34 page 189, which would be two pages later, Mr. Terry 16:01:35 took Mr. Guillet to an article that Mr. Guillet had 16:01:45 written about the Veja Mate project off the coast of 16:01:50 Germany, and Mr. Guillet said he describes Sgurr as: 16:01:55 "Having brought credibility to the 16:01:57 project and comfort to the 16:02:01 And Mr. Guillet stood by that 16:02:01 statement. 16:02:03 So, my question, Mr. Clarke, I take it 16:02:05 that you have no reason to disagree with Mr. Guillet 16:02:08 that Sgurr is one of the top technical advisors in 16:02:12 offshore wind? 16:02:16 A. I agree with that. I have no 16:02:17 difficulty in agreeing with that at all. 16:02:23 Mr. Terry asked Mr. Guillet: 16:02:26 "Question: Has URS been involved 16:02:32

	Page 252		Page 253
1	And Mr. Guillet answered on the next 16:02:36	1	worth bidding for one of the round 3 licenses in the 16:03:38
2	page. He said: 16:02:38	2	UK. 16:03:42
3	"Answer: I've been in contact 16:02:39	3	The other aspect that or two 16:03:45
4	with them recently over this 16:02:41	4	aspects where we've actually done significant work 16:03:48
5	project, but I'm not very familiar 16:02:42	5	in the offshore wind industry is in foundation 16:03:51
6	with them. If they were involved, 16:02:44	6	design, and specifically the design of, I would say, 16:03:55
7	it would be more in the early 16:02:46	7	foundations in more difficult under more 16:04:06
8	stages, early engineering, which 16:02:48	8	difficult technical conditions. 16:04:11
9	we don't usually touch, so I don't 16:02:49	9	And, in fact, I understand that we 16:04:12
10	know them that well." 16:02:50	10	were involved in the design of the foundations for 16:04:16
11	And then Mr. Terry asked: 16:02:54	11	the first offshore wind farm in the UK waters 16:04:19
12	"Question: Have they been 16:02:57	12	undertaken by GE at that time. 16:04:24
13	involved in any of your projects 16:02:57	13	Q. Well, we'll go through the CVs of 16:04:27
14 15	that you've worked on? 16:02:59	14 15	your project team and you can elaborate that on that 16:04:31
16	"Answer: No." 16:03:01	16	in a moment. 16:04:34
17	So is it fair to say, Mr. Clarke, that 16:03:02	17	But let's start with yours since 16:04:36
18	unlike Sgurr, URS is not known amongst the offshore 16:03:05 wind facility development industry as having 16:03:10	18	you're the one here testifying. And I'm sure I'm 16:04:38 going to be accused with being too enamoured by 16:04:40
19	expertise in this area? 16:03:14	19	resumés, but I'm of the view that when it comes to 16:04:45
20	A. That would only be partially 16:03:16	20	experts, it is important to start there. So I've 16:04:49
21	correct. If you there's two things there. 16:03:18	21	included yours at Tab 2 of your binder, if it 16:04:53
22	Certainly, the project I had mentioned that I had 16:03:24	22	assists you. 16:04:56
23	specific involvement in one offshore wind, and that 16:03:27	23	Of course, it is in appendix to your 16:04:57
24	was an early stage development project where 16:03:29	24	first report. 16:04:59
25	a company was looking to understand whether it was 16:03:34	25	So I understand that you are 16:05:07
	Page 254		Page 255
1	a technical director in the US power unit with 16:05:07	1	words, at the higher voltages. 16:05:59
1 2	a technical director in the US power unit with 16:05:07 responsibility for the transmission and distribution 16:05:10	1 2	words, at the higher voltages. 16:05:59 Q. So these are the lines that 16:06:02
	a technical director in the US power unit with 16:05:07 responsibility for the transmission and distribution 16:05:10 sector? 16:05:11	1	
2	responsibility for the transmission and distribution 16:05:10	2	Q. So these are the lines that 16:06:02
2	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11	2 3	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07
2 3 4	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13	2 3 4 5 6	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08
2 3 4 5	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15	2 3 4 5 6 7	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10
2 3 4 5	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19	2 3 4 5 6 7 8	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11
2 3 4 5 6 7 8 9	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23	2 3 4 5 6 7 8	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15
2 3 4 5 6 7 8 9	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25	2 3 4 5 6 7 8 9	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17
2 3 4 5 6 7 8 9 10	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27	2 3 4 5 6 7 8 9 10	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17
2 3 4 5 6 7 8 9 10 11	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28	2 3 4 5 6 7 8 9 10 11	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19
2 3 4 5 6 7 8 9 10 11 12	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30	2 3 4 5 6 7 8 9 10	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22
2 3 4 5 6 7 8 9 10 11 12 13	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33	2 3 4 5 6 7 8 9 10 11 12 13	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35	2 3 4 5 6 7 8 9 10 11 12 13 14	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33
2 3 4 5 6 7 8 9 10 11 12 13 14 15	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	responsibility for the transmission and distribution 16:05:10 sector? A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33 A. In actually in Ireland, and 16:06:35
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:41 A. So, yes, I've tended to personally 16:05:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:43 Q. Would it be fair to say, 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my — 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46 farms. 16:05:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:22 overhead transmission line design. 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:43 Q. Would it be fair to say, 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48 transmission projects for clients, you work under 16:06:52
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46 farms. 16:05:49 Q. So I take it grid connection, 16:05:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:22 overhead transmission line design. 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:43 Q. Would it be fair to say, 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48 transmission projects for clients, you work under 16:06:52 deadlines imposed by your clients? 16:06:57
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46 farms. 16:05:49 Q. So I take it grid connection, 16:05:51	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48 transmission projects for clients, you work under 16:06:52 deadlines imposed by your clients? 16:06:57 A. That would be fair, yeah. 16:07:00
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46 farms. 16:05:49 transmission lines, distribution lines, that kind of 16:05:51	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48 transmission projects for clients, you work under 16:06:52 deadlines imposed by your clients? 16:06:57 A. That would be fair, yeah. 16:07:00 Q. Right. When you have an external 16:07:02
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	responsibility for the transmission and distribution 16:05:10 sector? 16:05:11 A. That's my current role, yes. 16:05:13 Q. And you are based in Bristol, UK? 16:05:15 A. That's correct. 16:05:17 Q. I see you've recently worked on 16:05:17 a number of projects, and I see from this involving 16:05:19 electricity grid transmission and connection issues 16:05:23 for various clients? 16:05:25 A. That's correct, yeah. 16:05:27 Q. And I take it, then, that you 16:05:28 specialize in that topic, electricity transmission? 16:05:30 A. I didn't actually state in my - 16:05:33 I realize in my presentation that I'm an Electrical 16:05:35 Engineer by background. 16:05:40 Q. Okay. 16:05:41 A. So, yes, I've tended to personally 16:05:42 be involved in grid connections associated with wind 16:05:46 farms. 16:05:49 C. So I take it grid connection, 16:05:51 thing? 16:05:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. So these are the lines that 16:06:02 connect power projects to the grid? 16:06:03 A. Would be a typical one of the 16:06:04 typical areas I work, yeah. 16:06:07 Q. What are some of the other areas, 16:06:08 transmission 16:06:10 A. We are significantly involved in 16:06:11 substation design 16:06:15 Q. Right. 16:06:17 A for all the major utilities 16:06:17 well, almost all the major utilities in the UK and 16:06:19 Ireland. We have done transmission line design, 16:06:22 overhead transmission line design. 16:06:28 Q. Mostly in the UK? 16:06:33 A. In actually in Ireland, and 16:06:35 then elsewhere in the world. Actually, not in the 16:06:37 UK specifically. 16:06:43 Q. Would it be fair to say, 16:06:47 Mr. Clarke, that when you work on electricity 16:06:48 transmission projects for clients, you work under 16:06:52 deadlines imposed by your clients? 16:06:57 A. That would be fair, yeah. 16:07:00

	Page 256		Page 257
1	to meet it? 16:07:07	1	Q. So sometimes you might tell your 16:08:06
2	A. Yes, we do. 16:07:08	2	clients, "I'm sorry, we can't do this." 16:08:07
3	Q. Of course that's all 16:07:09	3	But generally your objective would be 16:08:12
4	I understand that that doesn't always happen in the 16:07:11	4	to try to meet a deadline? 16:08:14
5	real world, but I take it to be the general 16:07:12	5	A. Clearly, that's what you would try 16:08:17
6	objective that engineers have when they work on 16:07:14	6	to do if it's possible, but I can also state that 16:08:18
7	projects? 16:07:18	7	there have been times, obviously, when we've gone in 16:08:22
8	A. That's the general objective, yes. 16:07:19	8	and told them a deadline was not achievable. 16:08:26
9	Q. Lawyers too, by the way, when we 16:07:21	9	And there has also been times when we 16:08:28
10	work on 16:07:23	10	have not been prepared to bid for work because the 16:08:34
11	A. That's also why you have 16:07:25	11	deadlines were unachievable, in our opinion, and we 16:08:36
12	variations and early warning notices in contracts. 16:07:26	12	made that clear to our client that that was the 16:08:39
13	Q. Certainly. Certainly. And so 16:07:30	13	reason we were not prepared to bid for the project. 16:08:42
14	I take it if engineers work like I work, you start 16:07:32	14	Q. I take it that one way to achieve 16:08:44
15	from your deadline and you come up with a project 16:07:38	15	a tight deadline if you have a client that is 16:08:46
16	plan to achieve that deadline so you can 16:07:42	16	insisting that it be achieved is sometimes you can 16:08:52
17	A. If that deadline is achievable. 16:07:45	17	do tasks in parallel, for example, or certain tasks. 16:08:54
18	Q. Yes. 16:07:48	18	Certainly not all tasks can be done in 16:08:57
19	A. And there are many occasions when 16:07:48	19	A. I think that's inherent in the 16:09:00
20	it turns out not to be and we have to break the bad 16:07:55	20	scheduling process. And as you say, some tasks can 16:09:01
21	news 16:07:58	21	be done in parallel, but some tasks have to be done 16:09:05
22	Q. Right. 16:07:59	22	sequentially, and those are the ones that cause the 16:09:10
23	A to our clients, that actually 16:07:59	23	difficulties with the deadlines. 16:09:13
24	the schedule they would like to achieve is not 16:08:02	24	Q. Certainly. Certainly. Before 16:09:15
25	achievable. 16:08:05	25	joining URS in 2005, I understand you were the head 16:09:17
	Page 258		Page 259
1	of the electrical and mechanical engineering 16:09:20	1	the UK was a much larger company than URS. 16:10:18
2	department at Scott Wilson Railways? 16:09:24	2	Q. Okay. 16:10:21
3	A. I should actually clarify that 16:09:26	3	A. But obviously internationally, URS 16:10:21
4	Scott Wilson was acquired by URS. 16:09:28	4	was much larger. 16:10:23
5	Q. Okay. 16:09:31	5	Q. Right. And so it's described 16:10:24
6	A. So actually 16:09:31	6	though as Scott Wilson Railways. So, do 16:10:26
7	Q. Same company? 16:09:32	7	I understand that you were responsible or worked 16:10:28
8	A. Same company. In fact what I can 16:09:33	8	within the railway division? 16:10:31
9	state is that I have been with the same company for 16:09:34	9	A. Within the railway division of 16:10:32
10	29 years. 16:09:37	10	Scott Wilson, that's correct, yes. 16:10:33
11	Q. Railway division then? 16:09:38	11	Q. So you worked, I take it, in 16:10:35
12	A. No, prior to joining when 16:09:40	12	transmission and distribution of power issues within 16:10:37
13	I moved to the UK in 2001, I joined the railway 16:09:44	13	the railways? 16:10:42
14	team. 16:09:47	14	A. Within the railways dealing with, 16:10:43
15	Q. Right. 16:09:48	15	primarily, electrical aspects of requirements for 16:10:45
16	A. Prior to that, I was actually in 16:09:49	16	the railway network. 16:10:48
17	Africa in Zimbabwe where I was essentially running 16:09:51	17	Q. I see. Okay. And then moving 16:10:49
18	an electrical engineering consultancy for Scott 16:09:57	18	then to your experience in Africa. 16:10:52
19	Wilson. 16:10:02	19	So you were based in Harare, Zimbabwe 16:10:56
20	Q. And we'll come to that employer 16:10:02	20	for a number of years, I take it doing mechanical 16:11:00
21	experience, but now we're focusing on your 16:10:03	21	and electrical engineering work? 16:11:04
22	experience with what's described in your resumé as 16:10:06	22	A. That's correct, yes. 16:11:07
23	Scott Wilson Railways, which I take it to be 16:10:10	23	Q. And I take it you were working on 16:11:08
24	a predecessor of URS in the UK? 16:10:13	24	developing the Zimbabwe transmission infrastructure? 16:11:10
25	A. It was. In fact, Scott Wilson, in 16:10:15	25	A. Actually, with Scott Wilson 16:11:14

	Page 260		Page 261
1	I didn't do very much of that. At the time when 16:11:15	1	Q. So as I understand it, it sounds 16:12:27
2	I was with prior to that I was with the grid 16:11:19	2	like a preliminary study of some kind to support 16:12:28
3	operator in Zimbabwe. 16:11:24	3	a bid? 16:12:30
4	Q. So developing country, obviously, 16:11:27	4	A. It was a preliminary study, 16:12:31
5	you were working on, I assume, issues surrounding 16:11:29	5	effectively for them to pass to make 16:12:33
6	that in the transmission grid, presumably 16:11:34	6	a recommendation to their board as to whether or not 16:12:36
7	under-developed transmission grid? 16:11:37	7	to make a bid for that project. 16:12:38
8	A. Yes, although it was at that time 16:11:39	8	Q. Right. So you, I take it, were 16:12:40
9	although it needed modernization, it was 16:11:40	9	not involved in any of the detailed design and 16:12:44
10	appropriate for the size of the country. 16:11:45	10	engineering work in connection with that project? 16:12:46
11	Q. And I take it that you weren't 16:11:47	11	A. No. 16:12:48
12	involved in any offshore wind in Zimbabwe? 16:11:48	12	Q. And you were not involved in any 16:12:49
13	A. Well, that was back in the 1980s 16:11:52	13	of the construction or procurement in connection 16:12:51
14	and as we heard earlier, the first offshore wind 16:11:55	14	with that project? 16:12:55
15	farm was only done in 1991. 16:11:59	15	A. No. In fact, on the basis of our 16:12:56
16	Q. So, that brings me to the one 16:12:05	16	report, they decided not to proceed 16:12:58
17	reference in your resumé about offshore wind that 16:12:06	17	Q. So the project did not 16:13:00
18	you mentioned. 16:12:09	18	A with the project. 16:13:01
19	So it's four years ago in 2012, I take 16:12:09	19	Q. So, sir, I suggest to you, based 16:13:04
20	it that you acted was project director and quality 16:12:12	20	on your experience which does sound impressive in 16:13:09
21	assurance for a pre-feasibility study to support 16:12:14	21	electricity transmission, but I'm going to suggest 16:13:13
22	a licensed bid for a 600 megawatts wind farm in the 16:12:19	22	to you that you're not, in fact, qualified to 16:13:16
23	Irish Sea? 16:12:23	23	testify as an expert witness with respect to the 16:13:19
24	Q. That's correct? 16:12:25	24	design and construction of an offshore wind 16:13:23
25	A. Correct. 16:12:26	25	facility? 16:13:26
25	A. Correct. 16:12:26 Page 262	25	facility? 16:13:26 Page 263
25	Page 262	25	Page 263
	Page 262 MR. SPELLISCY: I generally suggest 16:13:27		Page 263 working in the broader project environment. 16:14:53
1	Page 262 MR. SPELLISCY: I generally suggest 16:13:27 that credibility is determinations for the Tribunal 16:13:28	1	Page 263 working in the broader project environment. 16:14:53 Q. Okay. I appreciate that but my 16:14:56
1 2	Page 262 MR. SPELLISCY: I generally suggest 16:13:27 that credibility is determinations for the Tribunal 16:13:28 to make, but not for the Claimant to suggest to 16:13:30	1 2	Page 263 working in the broader project environment. 16:14:53 Q. Okay. I appreciate that but my 16:14:56 question was, was narrow. 16:14:58
1 2 3	MR. SPELLISCY: I generally suggest 16:13:27 that credibility is determinations for the Tribunal to make, but not for the Claimant to suggest to a witness. 16:13:33	1 2 3	Page 263 working in the broader project environment. Q. Okay. I appreciate that but my question was, was narrow. It was just I think you confirmed 16:15:00
1 2 3 4	MR. SPELLISCY: I generally suggest that credibility is determinations for the Tribunal to make, but not for the Claimant to suggest to a witness. 16:13:33 PRESIDENT: Yes, please, rephrase the 16:13:34	1 2 3 4	Page 263 working in the broader project environment. Q. Okay. I appreciate that but my question was, was narrow. It was just I think you confirmed 16:15:00 that you don't have personal experience in 16:15:02
1 2 3 4 5	MR. SPELLISCY: I generally suggest that credibility is determinations for the Tribunal to make, but not for the Claimant to suggest to a witness. 16:13:33 PRESIDENT: Yes, please, rephrase the 16:13:34	1 2 3 4 5	Page 263 working in the broader project environment. Q. Okay. I appreciate that but my question was, was narrow. It was just I think you confirmed 16:15:00 that you don't have personal experience in fabricating gravity-based foundation; right? Page 263 16:14:58 16:15:00 16:15:02
1 2 3 4 5	MR. SPELLISCY: I generally suggest that credibility is determinations for the Tribunal to make, but not for the Claimant to suggest to a witness. 16:13:38 PRESIDENT: Yes, please, rephrase the question. Page 262 16:13:27 16:13:38 16:13:39	1 2 3 4 5	Page 263 working in the broader project environment. Q. Okay. I appreciate that but my question was, was narrow. It was just I think you confirmed that you don't have personal experience in fabricating gravity-based foundation; right? A. Correct. Page 263 16:14:58 16:14:58 16:15:00 16:15:00 16:15:02
1 2 3 4 5 6	MR. SPELLISCY: I generally suggest that credibility is determinations for the Tribunal to make, but not for the Claimant to suggest to a witness. 16:13:33 PRESIDENT: Yes, please, rephrase the question. 16:13:35 BY MS. No, I just might point out the 16:14:06 statement I made in my presentation that my role in 16:14:09 this was to coordinate the activities of a group of 16:14:13 experts from within our organization, to manage 16:14:17 those activities, and to – yeah, effectively to 16:14:21 coordinate the multi-disciplinary aspect. 16:14:27 That's a feature of all the work I do 16:14:30 right now is that although I'm an electrical 16:14:33 engineer by training, almost without exception, all 16:14:36 the projects I'm involved with are 16:14:41	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	working in the broader project environment. Q. Okay. I appreciate that but my desired uses in Lake 16:14:53 Q. Okay. I appreciate that but my 16:14:56 question was, was narrow. 16:14:58 It was just I think you confirmed 16:15:00 that you don't have personal experience in 16:15:02 fabricating gravity-based foundation; right? 16:15:05 A. Correct. 16:15:07 Q. And you don't have personal 16:15:07 experience regarding transportation and installation 16:15:09 of gravity-based foundations? 16:15:13 A. No. 16:15:15 Q. Have you been to Ontario outside 16:15:23 the context of this proceeding? 16:15:24 A. No. 16:15:25 Q. And do you have any personal 16:15:26 experience regarding chartering vessels in Lake 16:15:27 Ontario? 16:15:32 A. No, as I said, this is where we 16:15:32 rely on the experts in our panel. 16:15:39 A. And my role was to coordinate 16:15:39
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MR. SPELLISCY: I generally suggest 16:13:27 that credibility is determinations for the Tribunal 16:13:28 to make, but not for the Claimant to suggest to 16:13:30 a witness. 16:13:33 PRESIDENT: Yes, please, rephrase the 16:13:34 question. 16:13:35 BY MS. SEERS: 16:13:36 Q. Well, perhaps it's a question for 16:13:50 submissions to the Tribunal separately. 16:13:51 You don't personally, sir, have 16:13:58 experience with the fabrication of gravity-based 16:14:01 foundation? 16:14:05 A. No, I just might point out the 16:14:06 statement I made in my presentation that my role in 16:14:09 this was to coordinate the activities of a group of 16:14:13 experts from within our organization, to manage 16:14:17 those activities, and to – yeah, effectively to 16:14:21 coordinate the multi-disciplinary aspect. 16:14:27 That's a feature of all the work I do 16:14:30 right now is that although I'm an electrical 16:14:33 engineer by training, almost without exception, all 16:14:36 the projects I'm involved with are 16:14:41 multi-disciplinary projects involving civil 16:14:42	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	working in the broader project environment. Q. Okay. I appreciate that but my question was, was narrow. It was just — I think you confirmed 16:15:00 that you don't have personal experience in 16:15:02 fabricating gravity-based foundation; right? A. Correct. Q. And you don't have personal 16:15:07 experience regarding transportation and installation 16:15:09 of gravity-based foundations? A. No. 16:15:15 Q. Have you been to Ontario outside 16:15:23 the context of this proceeding? A. No. 16:15:25 Q. And do you have any personal 16:15:26 experience regarding chartering vessels in Lake 16:15:27 Ontario? A. No, as I said, this is where we 16:15:32 rely on the experts in our panel. Q. Okay. 16:15:39 A. And my role was to coordinate 16:15:39 them.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. SPELLISCY: I generally suggest 16:13:27 that credibility is determinations for the Tribunal 16:13:28 to make, but not for the Claimant to suggest to 16:13:30 a witness. 16:13:33 PRESIDENT: Yes, please, rephrase the 16:13:34 question. 16:13:35 BY MS. SEERS: 16:13:36 Q. Well, perhaps it's a question for 16:13:50 submissions to the Tribunal separately. 16:13:51 You don't personally, sir, have 16:13:58 experience with the fabrication of gravity-based 16:14:01 foundation? 16:14:05 A. And do you have any personal 16:15:26 experience regarding chartering vessels in Lake 16:15:27 Ontario? 16:15:32 A. No, as I said, this is where we 16:15:32 rely on the experts in our panel. 16:15:39 A. And my role was to coordinate 16:15:39

	Page 264		Page 265
1	isn't, so I appreciate the confirmation. 16:15:49	1	Paul Norton of your team, which I've included at 16:16:49
2	So I take it that to that extent you 16:15:55	2	Tab 3. 16:16:52
3	also don't have personal experience regarding 16:15:57	3	So I take it that Mr. Norton is 16:16:56
4	chartering vessels in the Great Lakes or the St. 16:15:59	4	a coastal engineer, so did he prepare I take it 16:16:58
5	Lawrence Seaway? 16:16:01	5	he prepared the sections of the reports that deal 16:17:01
6	A. No. 16:16:01	6	with coastal engineering issues? 16:17:03
7	Q. Do you have any personal 16:16:09	7	A. He and his team, yeah. 16:17:06
8	experience with respect to permitting under the 16:16:11	8	Q. And his team. It says on his 16:17:08
9	Canadian Navigation Protection Act? 16:16:11	9	record that he appears to be quite well-traveled? 16:17:12
10	A. No. 16:16:15	10	A. He certainly worked 16:17:15
11	Q. Do you have any personal 16:16:15	11	internationally. 16:17:17
12	experience regarding ice conditions in Lake Ontario? 16:16:16	12	Q. I'm jealous. So it looks like 16:17:18
13	A. No. 16:16:19	13	he's worked on projects in a number of countries, 16:17:20
14	Q. Personal experience regarding wave 16:16:19	14	including the UK and several countries in Africa and 16:17:23
15 16	conditions in Lake Ontario? 16:16:21	15 16	the Middle East, Europe, with a lot of experience in 16:17:26
17	A. No. 16:16:22	17	those places; right? 16:17:34
18	Q. Do you have any personal 16:16:26 experience regarding sediment disbursal from in-lake 16:16:27	18	A. Right. 16:17:42 Q. But what I don't see, sir, on his 16:17:42
19	construction in Lake Ontario? 16:16:31	19	resumé is experience, experience with Lake Ontario 16:17:45
20	A. No. 16:16:33	20	or even with North America. 16:17:48
21	Q. Do you have any personal 16:16:33	21	Can you point me to any that he has? 16:17:49
22	experience with the protection of drinking water 16:16:34	22	A. I'm not aware of any, but, again, 16:17:53
23	under Ontario's Clean Water Act? 16:16:36	23	if you come back to what I said our role was in 16:17:55
24	A. No. 16:16:38	24	this, it was to analyze the submissions made by 16:17:59
25	Q. Turn up, please, sir, the CV of 16:16:47	25	Windstream 16:18:03
	Page 266		Page 267
1	Q. I understand. 16:18:04	1	technically qualified and experienced to do that. 16:19:28
2	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04	2	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31
2	 Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 	2	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32
2 3 4	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10	2 3 4	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35
2 3 4 5	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15	2 3 4 5	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37
2 3 4 5	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17	2 3 4 5 6	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38
2 3 4 5 6 7	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20	2 3 4 5 6 7	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39
2 3 4 5	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22	2 3 4 5 6	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40
2 3 4 5 6 7 8	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25	2 3 4 5 6 7 8	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42
2 3 4 5 6 7 8	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31	2 3 4 5 6 7 8	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44
2 3 4 5 6 7 8 9	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31	2 3 4 5 6 7 8 9	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42
2 3 4 5 6 7 8 9 10	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33	2 3 4 5 6 7 8 9 10	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45
2 3 4 5 6 7 8 9 10 11	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34	2 3 4 5 6 7 8 9 10 11	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48
2 3 4 5 6 7 8 9 10 11 12 13	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43	2 3 4 5 6 7 8 9 10 11 12 13	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50
2 3 4 5 6 7 8 9 10 11 12 13 14	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:44 URS report, but they don't have exhibit numbers. 16:18:44	2 3 4 5 6 7 8 9 10 11 12 13	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52
2 3 4 5 6 7 8 9 10 11 12 13 14	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57	2 3 4 5 6 7 8 9 10 11 12 13 14	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. I understand. 16:18:04 A. — not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:44 And I take it Mr. Wright works on 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. I understand. 16:18:04 A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:44 And I take it Mr. Wright works on 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. I understand. A not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00 America, Lake Ontario or Great Lakes experience on 16:19:03	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07 A. Not to my knowledge. 16:20:08
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. I understand. A. — not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00 America, Lake Ontario or Great Lakes experience on 16:19:03 his resumé; is that right? 16:19:06	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07 A. Not to my knowledge. 16:20:08 Q. Tabs 5 and 6 of your binder, you 16:20:13
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. I understand. A. — not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00 America, Lake Ontario or Great Lakes experience on 16:19:03 his resumé; is that right? 16:19:06 A. That's correct. But I might point 16:19:10	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07 A. Not to my knowledge. 16:20:08 Q. Tabs 5 and 6 of your binder, you 16:20:13 have the CVs of Mr. Chris Sturgeon of Red Penguin 16:20:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. I understand. A. — not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00 America, Lake Ontario or Great Lakes experience on 16:19:03 his resumé; is that right? 16:19:06 A. That's correct. But I might point 16:19:10 out that the modeling process as bid states use 16:19:15	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07 A. Not to my knowledge. 16:20:08 Q. Tabs 5 and 6 of your binder, you 16:20:13 have the CVs of Mr. Chris Sturgeon of Red Penguin 16:20:16 Associates, and Mr. Douglas Percy of Red Penguin 16:20:22
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. I understand. A. — not to develop them ourselves. 16:18:04 Q. I understand. I'm just exploring 16:18:08 your experience. And so, I take it, and you may not 16:18:10 know, but I take it that the questions I asked you 16:18:15 about experience with Lake Ontario, ice and waves 16:18:17 and other issues, drinking water in Lake Ontario, 16:18:20 I take it that Mr. Norton also doesn't have 16:18:22 experience with those matters? 16:18:25 A. Not to my knowledge, no. 16:18:31 Q. And in the next tab you have the 16:18:33 CV of Mr. Adrian Wright, Tab 4. 16:18:34 And those are appended to the first 16:18:43 URS report, but they don't have exhibit numbers. 16:18:49 projects for modeling oil spills for BP and Shell 16:18:53 and the like? 16:18:57 A. That's some of the work he does. 16:18:58 Q. And I also don't see any North 16:19:00 America, Lake Ontario or Great Lakes experience on 16:19:03 his resumé; is that right? 16:19:06 A. That's correct. But I might point 16:19:10	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	technically qualified and experienced to do that. 16:19:28 Q. But he wouldn't have any 16:19:31 experience with Ontario's Clean Water Act, for 16:19:32 example? 16:19:35 A. I couldn't answer that 16:19:37 specifically. 16:19:38 Q. And I take it he wouldn't have any 16:19:39 experience 16:19:40 A. I don't have any myself, no. 16:19:42 Q. And I take it he wouldn't have any 16:19:44 experience at the location, for example, drinking 16:19:45 water intakes in eastern Lake Ontario? 16:19:48 A. No, not prior to this study, 16:19:50 anyway. 16:19:52 Q. And I take it he wouldn't have any 16:19:56 experience with modeling sediment disbursal in the 16:19:57 particular conditions present in Lake Ontario, 16:20:02 personally, he wouldn't have done that before, 16:20:05 I take it? 16:20:07 A. Not to my knowledge. 16:20:08 Q. Tabs 5 and 6 of your binder, you 16:20:13 have the CVs of Mr. Chris Sturgeon of Red Penguin 16:20:16

	Page 268		Page 269
1	subcontractor of URS? 16:20:31	1	proposed Amherst Island on-shore wind project to the 16:21:26
2	A. That's correct. 16:20:33	2	mainland near the project site? 16:21:31
3	Q. And I take they are based in the 16:20:33	3	A. To my knowledge, he is not 16:21:32
4	UK as well and have experience with underwater 16:20:36	4	a consultant on that project. 16:21:33
5	cables? 16:20:40	5	Q. And you are not aware of him 16:21:35
6	A. That's their experience. 16:20:40	6	having any experience or of either of them having 16:21:36
7	Q. But, again, I don't see any 16:20:43	7	any experience in the permitting of such cables in 16:21:39
8	experience listed with underwater cables in Lake 16:20:44	8	Ontario; right? 16:21:42
9	Ontario? 16:20:47	9	A. No. 16:21:43
10	A. Again, I'm not aware of that. 16:20:48	10	Q. At Tab 7 I've included the CV of 16:21:51
11	Certainly Mr. Sturgeon is very experienced in most 16:20:51	11	Ben Gowers, and apart from the one pre-feasibility 16:21:53
12	parts of the world but not 16:20:55	12	study for an offshore project that you were involved 16:21:59
13	Q. But not in Lake Ontario? 16:20:57	13	with, he appears to be the only person on your team 16:22:01
14	A. But I didn't say "yes" or "no" 16:20:59	14	who has some experience with offshore wind 16:22:04
15 16	specifically. 16:21:01	15 16	facilities; is that correct? 16:22:06
17	Q. You are not aware of him having 16:21:01	17	A. No, that's not correct. 16:22:07
18	any experience with Lake Ontario? 16:21:03 A. No, no. 16:21:04	18	Q. Would you point me to the CV of 16:22:08 the other person? 16:22:10
19	Q. And you are not aware of him 16:21:05	19	the other person? 16:22:10 A. Certainly Mr. David Webb has 16:22:11
20	having any experience with the underwater cable that 16:21:06	20	experience of the design of offshore wind 16:22:14
21	was laid for the Wolfe Island on-shore project? 16:21:10	21	foundations. 16:22:20
22	A. I think that's reasonably obvious. 16:21:14	22	Q. So we'll go to Mr. Webb's CV 16:22:20
23	Q. It may also be reasonably obvious 16:21:16	23	afterward. 16:22:23
24	that you are not aware of him having any experience 16:21:18	24	Anyone else? 16:22:24
25	with the proposed underwater cable to connect the 16:21:21	25	A. Not that I'm aware of 16:22:25
		1	
	Page 270		Page 271
1	specifically, no. 16:22:26	1	So when you put them all together in 16:23:48
2	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27	2	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51
2	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33	2 3	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56
2 3 4	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37	2 3 4	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00
2 3 4 5	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41	2 3 4 5	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04
2 3 4 5 6	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44	2 3 4 5 6	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09
2 3 4 5 6 7	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46	2 3 4 5 6 7	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14
2 3 4 5 6 7 8	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47	2 3 4 5 6 7 8	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15
2 3 4 5 6 7 8	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51	2 3 4 5 6 7 8	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21
2 3 4 5 6 7 8 9	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54	2 3 4 5 6 7 8 9	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28
2 3 4 5 6 7 8 9 10	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55	2 3 4 5 6 7 8 9 10	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30
2 3 4 5 6 7 8 9 10 11 12	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57	2 3 4 5 6 7 8 9 10 11	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33
2 3 4 5 6 7 8 9 10 11 12 13	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:57 state is that if you add up the experience of those 16:23:05	2 3 4 5 6 7 8 9 10 11 12 13	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37
2 3 4 5 6 7 8 9 10 11 12 13	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:05 people, in fact, the ten people that I listed in my 16:23:09	2 3 4 5 6 7 8 9 10 11 12 13 14	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:37 A. I believe you did. I'm trying to 16:24:44
2 3 4 5 6 7 8 9 10 11 12 13 14	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12	2 3 4 5 6 7 8 9 10 11 12 13 14 15	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45
2 3 4 5 6 7 8 9 10 11 12 13 14 15	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26	2 3 4 5 6 7 8 9 10 11 12 13 14 15	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	specifically, no. 16:22:26 Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:29	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:48 A. He was offshore manager for 16:24:50
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:29 Q. So they have experience, then, in 16:23:31	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:53
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:31 the various components, you would say, that go into 16:23:32	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:58
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:29 Q. So they have experience, then, in 16:23:31 the various components, you would say, that go into 16:23:32 an offshore wind 16:23:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:58 offshore wind project? 16:25:02
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:29 Q. So they have experience, then, in 16:23:31 the various components, you would say, that go into 16:23:32 an offshore wind 16:23:35 A. That's correct. 16:23:37	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:58 offshore wind project? 16:25:02 A. That's correct. 16:25:03
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:29 Q. So they have experience, then, in 16:23:31 the various components, you would say, that go into 16:23:32 an offshore wind 16:23:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:58 offshore wind project? 16:25:02
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	specifically, no. Q. Okay. So you've included, by my 16:22:27 count, 111 pages of resumés with your two reports. 16:22:33 But again, the only one that I have seen that 16:22:37 disclosed experience with offshore wind facilities 16:22:41 was that of Mr. Gowers. 16:22:44 And I suppose we can look at 16:22:46 Mr. Webb's separately, but do you disagree with 16:22:47 that, of the 111 pages of resumés that's the only 16:22:51 experience? 16:22:54 A. I would agree that specifically 16:22:55 that is the case; however, where I what I would 16:22:57 state is that if you add up the experience of those 16:23:05 people, in fact, the ten people that I listed in my 16:23:09 presentation, the total there comes to over 16:23:12 250 years of experience, all in areas directly 16:23:20 related to the technologies and techniques used in 16:23:26 offshore wind. 16:23:31 the various components, you would say, that go into 16:23:32 an offshore wind 16:23:35 A. That's correct. 16:23:37 Q facility? So foundations on 16:23:37	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	So when you put them all together in 16:23:48 your in your I guess in your view, that gives 16:23:51 you the adequate experience to be giving expert 16:23:56 evidence about an offshore wind facility? 16:24:00 A. As the in the role that we were 16:24:04 playing or we were providing for this project. 16:24:09 Q. In the role that you were 16:24:14 providing for this project, so 16:24:15 I looked through Mr. Gowers' resumé. 16:24:21 I didn't see, and you will point me to it if 16:24:28 I missed it, but I didn't see any experience with 16:24:30 actually building an offshore wind facility. 16:24:33 Did I miss it? 16:24:37 A. I believe you did. I'm trying to 16:24:44 find it because he was actually construction manager 16:24:44 on one offshore it's my understanding 16:24:45 Q. You're right. I do see that. 16:24:48 A. He was offshore manager for 16:24:50 an offshore wind project. 16:24:58 offshore wind project? 16:25:02 A. That's correct. 16:25:03 Q. And for other projects, he seems 16:25:04

	Page 272		Page 273
1	A. Yes, in a variety of capacities 16:25:09	1	I understand it, experienced in ports design. 16:26:25
2	for offshore wind projects. 16:25:11	2	And again, I see a lot of 16:26:30
3	Q. So a lot of the entities are 16:25:12	3	international experience on their resumes, but what 16:26:32
4	listed as him having done tenders or providing 16:25:13	4	I don't see is Lake Ontario experience or even North 16:26:34
5	strategic support? 16:25:21	5	American experience? 16:26:37
6	A. That's true, yeah. 16:25:22	6	A. I would point out that we are a UK 16:26:39
7	Q. And based on he's not here to 16:25:25	7	consultancy, and it is quite unusual for offices in 16:26:41
8	tell us what his experience is obviously, so based 16:25:27	8	the UK to work in North America actually. 16:26:44
9	on this resumé, it seems to me, anyway, I would 16:25:29	9	Q. Certainly. Certainly. And they 16:26:50
10	suggest that his experience is perhaps limited; 16:25:36	10	are experienced in UK and elsewhere. 16:27:00
11	would you disagree? 16:25:47	11	But just for the record, there doesn't 16:27:03
12	A. I would not fully agree with that. 16:25:48	12	appear to be any experience with Lake Ontario? 16:27:06
13	He certainly demonstrated a very complete 16:25:50	13	A. That's correct. 16:27:08
14 15	understanding of the construction requirements for 16:25:53	14	Q. So, I take it that they too don't 16:27:11
16	an offshore wind farm. 16:25:58 O. Okay. And he's not here, of 16:25:59	15 16	have any experience, for example, with the 16:27:13 Navigation Protection Act? 16:27:15
17	Q. Okay. And he's not here, of 16:25:59 course, to testify so we can't ask him about his 16:26:01	17	
18	experience? 16:26:04	18	A. I'm not sure why, as ports experts 16:27:18 they would necessarily have that experience, even if 16:27:21
19	A. Right. 16:26:05	19	they did have experience in Lake Ontario. 16:27:24
20	Q. At Tabs 8 and 9 of your report 16:26:07	20	Q. So the contribution that they made 16:27:26
21	pardon me of your binder, you have the CVs of 16:26:09	21	to the report, I take it then, was with respect to 16:27:29
22	Ms. Eleanor Hadland and Mr. Chris Frith, which were 16:26:13	22	chartering vessels and not with respect to shipping 16:27:32
23	included with your second report, the AECOM report? 16:26:19	23	lanes? 16:27:35
24	A. Correct. 16:26:23	24	A. No, their contribution to the 16:27:36
25	Q. And they appear to be, as 16:26:24	25	report was in respect of, particularly, the on-shore 16:27:38
	Page 274		Page 275
1	manufacturing facility. 16:27:41	1	with offshore wind, but I'm not sure exactly how 16:28:44
2	Q. I see. 16:27:42	2	much of that was in Great Lakes. 16:28:48
3	A. And to an extent the use of 16:27:43	3	
4			Q. Okay. In several instances in 16:28:49
	precast or prefabricated concrete structures which 16:27:52	4	both of your reports, and you mentioned this a bit 16:28:54
5	has been evidenced on a number of occasions in this 16:27:56	5	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56
5 6	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58	5 6	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01
5 6 7	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59	5 6 7	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04
5 6 7 8	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00	5 6 7 8	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07
5 6 7 8 9	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04	5 6 7 8 9	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12
5 6 7 8 9	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08	5 6 7 8 9	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14
5 6 7 8 9 10	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12	5 6 7 8 9 10	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20
5 6 7 8 9	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12	5 6 7 8 9	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24
5 6 7 8 9 10 11 12	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14	5 6 7 8 9 10 11 12 13	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29
5 6 7 8 9 10 11	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17	5 6 7 8 9 10 11 12	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31
5 6 7 8 9 10 11 12 13 14	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18	5 6 7 8 9 10 11 12 13 14	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34
5 6 7 8 9 10 11 12 13 14	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17	5 6 7 8 9 10 11 12 13 14 15	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31
5 6 7 8 9 10 11 12 13 14 15	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20	5 6 7 8 9 10 11 12 13 14 15	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36
5 6 7 8 9 10 11 12 13 14 15 16 17	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21	5 6 7 8 9 10 11 12 13 14 15 16 17	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:07 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40
5 6 7 8 9 10 11 12 13 14 15 16 17	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24	5 6 7 8 9 10 11 12 13 14 15 16 17 18	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it — I take it — and you will at the me if I've 16:29:24 got it wrong — but I take it from the way your 16:29:31 Canada to identify the potential risks of the — 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43
5 6 7 8 9 10 11 12 13 14 15 16 17 18	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24 not; right? 16:28:27	5 6 7 8 9 10 11 12 13 14 15 16 17 18	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43 A. We were actually asked by Canada 16:29:45
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24 not; right? 16:28:30 say. 16:28:34 Q. Okay. 16:28:36	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it — I take it — and you will at the me if I've 16:29:24 got it wrong — but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the — 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43 A. We were actually asked by Canada 16:29:45 to analyze the project from a technical and 16:29:51 technical aspects, which is what we were asked to 16:29:59
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24 not; right? 16:28:27 A. I am not clear on that, I have to 16:28:30 say. 16:28:34 Q. Okay. 16:28:36 A. It was clear from Mr. Cooper's 16:28:36	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43 A. We were actually asked by Canada 16:29:45 to analyze the project from a technical and 16:29:51 technical aspects, which is what we were asked to 16:29:59 do, we obviously went through and identified the 16:30:01
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24 not; right? 16:28:27 A. I am not clear on that, I have to 16:28:30 say. 16:28:34 Q. Okay. 16:28:36 presentation that he's been involved in a lot of 16:28:38	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43 A. We were actually asked by Canada 16:29:45 to analyze the project from a technical and 16:29:46 environmental perspective. And in analyzing the 16:29:59 do, we obviously went through and identified the 16:30:01 risks that the project faced. 16:30:05
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	has been evidenced on a number of occasions in this 16:27:56 hearing. 16:27:58 Q. I see. 16:27:59 A. Are analogous or have been used as 16:28:00 a basis for justifying that this wasn't although 16:28:04 this might not have been this is common 16:28:08 technology. 16:28:12 Q. Right. So they're responding, 16:28:12 I take it, to Mr. Cooper's report primarily? 16:28:14 A. Primarily they were looking at the 16:28:17 offshore foundations, yes. 16:28:18 Q. And something but Mr. Cooper, 16:28:20 you'll agree with me, has substantial experience in 16:28:21 the Great Lakes and in Lake Ontario, and they do 16:28:24 not; right? 16:28:27 A. I am not clear on that, I have to 16:28:30 say. 16:28:34 Q. Okay. 16:28:36 A. It was clear from Mr. Cooper's 16:28:36	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	both of your reports, and you mentioned this a bit 16:28:54 in your presentation as well, you identify risks 16:28:56 associated with the project in terms of the 16:29:01 magnitude of the risk as you see it. 16:29:04 But you don't express a conclusion 16:29:07 flowing from your risk assessment. So my question 16:29:12 to you is: Your report, to me, reads like a list of 16:29:14 risks without any real conclusion and so I take 16:29:20 it I take it and you will at the me if I've 16:29:24 got it wrong but I take it from the way your 16:29:29 reports are structured, that you were asked by 16:29:31 Canada to identify the potential risks of the 16:29:34 that the project might face regardless of their 16:29:36 magnitude; you were just asked too identify the 16:29:40 risks; is it that fair? 16:29:43 A. We were actually asked by Canada 16:29:45 to analyze the project from a technical and 16:29:51 technical aspects, which is what we were asked to 16:29:59 do, we obviously went through and identified the 16:30:01

(613)564-2727

	Page 276		Page 277
1	you applied a label as to whether, in your view, it 16:30:12	1	Q. I don't see that, sir I don't 16:31:26
2	is a low risk, a medium risk or a high-risk? 16:30:14	2	see a likelihood assessment in your report, so 16:31:28
3	A. That's correct. 16:30:17	3	perhaps you can point us to it. 16:31:30
4	Q. But as I read your reports and as 16:30:23	4	A. Just as an example, I'll take you 16:31:44
5	I understand your presentation, you don't actually 16:30:25	5	to Appendix 9 of our second report in which we 16:31:46
6	conclude that the risks that you outlined will 16:30:27	6	summarize the risks that we'd identified in our 16:31:54
7	likely materialize or not likely materialize; is 16:30:29	7	first report. 16:31:56
8	that right? 16:30:33	8	And in that you'll see we had three 16:32:03
9	A. We don't specifically speculate on 16:30:34	9	columns. We had the first column was the 16:32:05
10	which risks will materialize. That's why they are 16:30:35	10	likelihood, and then we identified the potential 16:32:07
11	risks; they're not certainties. 16:30:39	11	impact on schedule and on cost. 16:32:10
12	We wouldn't describe them as risks if 16:30:42	12	Q. I see. So, in this appendix 16:32:14
13	they were going to materialize. 16:30:44	13	you've set out likelihoods? 16:32:16
14	Q. Right. 16:30:45	14	A. And that, if you went back into 16:32:19
15	A. I think what is reasonably clear 16:30:46	15	our first report, you would find that at the end of 16:32:21
16	from both our reports and my presentation was that 16:30:48	16	each risk, that analysis. 16:32:25
17	we assess that this project had a high-risk profile. 16:30:53	17	Q. Okay. We heard from Mr. Rose on 16:32:27
18	Q. I understand you assessed the risk 16:30:58	18	Friday about certain permitting issues, and I don't 16:32:33
19	profile, but my question is whether you assessed 16:31:00	19	think you'll disagree with me that there is a bit of 16:32:37
20	whether the risks were likely to materialize or not 16:31:01	20	confusion about who was responsible for what. You 16:32:39
21	likely to materialize? 16:31:06	21	were pointing at each other a little bit. And so 16:32:43
22	A. I think if you look at our 16:31:08	22	just to be clear, I just want to confirm that the 16:32:46
23	assessment, the one criteria that we used was the 16:31:09	23	responsibility for the accuracy of the information 16:32:51
24 25	like likelihood of the risk occurring or developing 16:31:17	24 25	contained in the rest of the two reports that 16:32:56
25	and then the impact of that risk so 16:31:23	25	Mr. Rose did not testify to, is either lies with 16:32:58
	Page 278		Page 279
1	you or Mr. Barillaro; is that correct? 16:33:03	1	Review Tribunal proceeding, and we have I don't 16:34:13
2	A. That's correct. 16:33:08	2	know if you were here to hear the testimony of 16:34:16
3	Q. So do I have it right that 16:33:09	3	Ms. Powell about that. But I think you said in your 16:34:19
4	Mr. Barillaro will be speaking about financing? 16:33:11	4	experience, in your presentation I think you said in 16:34:24
5	A. Yeah, finance and costs. 16:33:13	5	your experience that this would be unusual; did 16:34:28
6	Q. And costs? 16:33:16	6	I have that right? 16:34:32
7	A. And, specifically, aspects - 16:33:18	7	A. When I used the word "It was your 16:34:33
8 9	I might defer to him on aspects relating to 16:33:19	8	are our experience" that's collectively the team as 16:34:37
10	commercial implications as well because he's more 16:33:24	10	opposed to my personal experience. It is a question 16:34:41
11	knowledgeable in that area than I am. 16:33:27 Q. Certainly, so if I'm asking you 16:33:30	11	probably better directed to Mr. Barillaro because he 16:34:44 has the direct experience on that. 16:34:47
12	questions then I'll ask questions of you, and if 16:33:32	12	Q. He has the direct 16:34:49
13	we're treading into territory that I should be 16:33:34	13	A. He has personal experience. 16:34:50
14	asking Mr. Barillaro or my colleague should be 16:33:37	14	Q. He has personal experience with 16:34:52
15	asking Mr. Barillaro tomorrow, I think you'll let us 16:33:39	15	the FIT program? 16:34:53
16	know, okay? 16:33:43	16	A. Not with the FIT program, no. 16:34:55
17	A. I'll let you know. 16:33:44	17	Q. Does he have experience with the 16:34:56
18	Q. Okay. Now I believe you said in 16:33:45	18	Environment Review Tribunal proceedings? 16:34:59
19	your presentation and this may be one example 16:33:48	19	A. No. 16:35:00
20	that's for Mr. Barillaro, but you mention it in your 16:33:51	20	Q. Does he have personal experience 16:35:00
21	presentation so I thought I would give it a try. 16:33:56	21	with arranging financing of a FIT project in 16:35:01
22	Regarding the Environment Review 16:33:59	22	Ontario? 16:35:04
23	Tribunal proceeding and the fact that in the 16:34:02	23	A. No. 16:35:04
24	schedule prepared by Windstream's experts, financial 16:34:06	24	Q. Well, we'll ask him anyway. 16:35:05
25	close occurs right at the end of the Environment 16:34:08	25	Ms. Squires, in her 16:35:14

	Page 280		Page 281
1	examination-in-chief, asked you about shifting the 16:35:18	1	FIT contract or the FIT program; right? 16:36:20
2	Environment Review Tribunal process by six months so 16:35:20	2	A. No, I wasn't commenting on whether 16:36:22
3	what would happen I think the question was: If it 16:35:24	3	or not there was a six-month extension out there. 16:36:24
4	took six months longer, what would that do the 16:35:27	4	Q. I understand. I understand. You 16:36:29
5	schedule; right? 16:35:29	5	would have heard, I think, though, testimony on 16:36:31
6	A. That's correct. 16:35:30	6	Friday from your colleague, Mr. Rose, that projects 16:36:33
7	Q. And you answered, I understand you 16:35:31	7	got built, of course, even though they were facing 16:36:36
8	answered it would just shift the rest of the 16:35:33	8	permitting delays and that was because the OPA was 16:36:39
9	schedule back by six months? 16:35:36	9	pragmatic in dealing with the issue of permitting 16:36:43
10	A. I assessed the on a very 16:35:38	10	delays; do you recall that? 16:36:46
11	preliminary estimate or assessment, it could 16:35:41	11	A. I heard that, yes. 16:36:47
12	actually be more than that because of the shift into 16:35:43	12	-
13		13	Q. And so just to be clear on the 16:36:49
14	the next construction season. So, you potentially 16:35:46	14	record, while what you are saying about the schedule 16:36:51
15	lose the winter period as well. 16:35:51	15	may be true, I put it to you that that doesn't 16:36:56
16	Q. And we've already established 16:35:53	16	necessarily have implications under the contract and 16:37:00
17	though, sir, that you don't have experience with the 16:35:54	17	you are not here testifying about what the 16:37:04
	FIT program or FIT contracts; right? 16:35:57	18	implications under the contract might be; right? 16:37:06
18 19	A. Sorry, I don't understand the 16:35:59	19	A. I think the issue there is that 16:37:10
20	relevance of the link there, except insofar as I was 16:36:00	20	the FIT contract is specific on its deadlines. 16:37:16
	asked to comment on what would happen if we extended 16:36:03		Should Ontario should they decide 16:37:20
21 22	it by six months. 16:36:07	21 22	to exhibit leniency and work collaboratively as was 16:37:25
	Q. No, I understand, and you're not 16:36:09		suggested, currently that's speculation. And 16:37:31
23	being faulted for answering a question, of course. 16:36:10	23	I think one of the issues which might need to be 16:37:33
24	I just want, for the clarity of the record, there's 16:36:14	24	considered, and again you might ask Mr. Barillaro 16:37:39
25	no confusion that you don't have experience with the 16:36:18	25	his opinion on this is, how the lenders would view 16:37:41
	Page 282		Page 283
1	-	1	•
1 2	that as to whether a goodwill arrangement would be 16:37:44	1 2	are the URS person here who is responsible for the 16:39:02
	that as to whether a goodwill arrangement would be acceptable to lenders. 16:37:44		are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06
2	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58	2	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11
2	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00	2	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07
2 3 4 5 6 7 8 9 10 11	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21	2 3 4 5 6 7 8 9 10 11	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07
2 3 4 5 6 7 8 9 10 11 12	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24	2 3 4 5 6 7 8 9 10 11 12	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming to this 16:39:45 project assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I I yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08
2 3 4 5 6 7 8 9 10 11 12 13 14 15	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FTT program, the FTT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26	2 3 4 5 6 7 8 9 10 11 12 13 14 15	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming – to this 16:39:45 project – assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I – I – yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26 Q. Oh, that's correct. So 16:38:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming – to this 16:39:45 project – assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I – I – yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming to this 16:39:45 project assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I I yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:33	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming to this 16:39:45 project assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I I yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:17 confirmed, but I think we had evidence in both the 16:40:20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:39 proceeding, for the comments in the URS report about 16:38:39	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:17 confirmed, but I think we had evidence in both the 16:40:20 first submission from Windstream, and the second 16:40:23
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26 Q. Oh, that's correct. So 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:39 sediment disbursal and drinking water; right? 16:38:43	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17 confirmed, but I think we had evidence in both the 16:40:20 first submission from Windstream, and the second 16:40:23 submission that they were working to the basis that 16:40:26
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26 Q. Oh, that's correct. So 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:39 sediment disbursal and drinking water; right? 16:38:43 A. In terms of my role in this, yes, 16:38:49	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17 confirmed, but I think we had evidence in both the 16:40:20 first submission from Windstream, and the second 16:40:23 submission that they were working to the basis that 16:40:26 a five kilometre exclusion zone would be applied. 16:40:29
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26 Q. Oh, that's correct. So 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:39 sediment disbursal and drinking water; right? 16:38:49 in that I — obviously, that information or that 16:38:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17 confirmed, but I think we had evidence in both the 16:40:23 submission from Windstream, and the second 16:40:23 submission that they were working to the basis that 16:40:26 a five kilometre exclusion zone would be applied. 16:40:29 Q. I believe you had evidence of 16:40:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:33 proceeding, for the comments in the URS report about 16:38:39 sediment disbursal and drinking water; right? 16:38:43 A. In terms of my role in this, yes, 16:38:49 in that I obviously, that information or that 16:38:53 input into our report was provided by Mr. Norton, as 16:38:55	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming – to this 16:39:45 project – assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I – I – yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17 confirmed, but I think we had evidence in both the 16:40:20 first submission from Windstream, and the second 16:40:23 submission that they were working to the basis that 16:40:26 a five kilometre exclusion zone would be applied. 16:40:29 Q. I believe you had evidence of 16:40:34 a discussion paper to that effect, but that no 16:40:36
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	that as to whether a goodwill arrangement would be 16:37:44 acceptable to lenders. 16:37:51 Q. Sir, you just gave evidence about 16:37:58 the FIT program, the FIT contract. So do you 16:38:00 consider yourself to be qualified to give that 16:38:03 evidence? 16:38:05 A. I think I explained quite clearly 16:38:05 what my position was on that. 16:38:07 Q. Okay. We'll ask Mr. Barillaro for 16:38:13 his, as well. 16:38:16 Of course, you would have also heard 16:38:17 testimony from Mr. Cecchini of the OPA regarding 16:38:18 some of these matters, as well? 16:38:21 A. I did not hear that because I was 16:38:24 excluded from the room. 16:38:26 Q. Oh, that's correct. So 16:38:27 I understand from Mr. Rose then, that you were the 16:38:30 person responsible here, for the purpose of this 16:38:39 sediment disbursal and drinking water; right? 16:38:49 in that I — obviously, that information or that 16:38:53	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	are the URS person here who is responsible for the 16:39:02 accuracy of that information; correct? 16:39:06 A. That's correct, yeah. 16:39:11 Q. Starting at paragraph 319 of your 16:39:18 second report, could you pull that up? 16:39:20 You purport to apply the proposed five 16:39:42 kilometre exclusion zone, assuming — to this 16:39:45 project — assuming that the exclusion zone applies 16:39:48 from uninhabited islands, uninhabited spits and 16:39:52 uninhabited peninsulas; do I have that right? 16:39:57 A. That's correct. I — I — yes, 16:40:05 that's correct. 16:40:07 Q. Are you aware or were you aware, 16:40:07 sir, when this was drafted, that no five kilometre 16:40:08 exclusion zone had, in fact, been adopted by the 16:40:12 Ontario Government? 16:40:16 A. I'm unaware that it had not been 16:40:17 confirmed, but I think we had evidence in both the 16:40:23 submission from Windstream, and the second 16:40:23 submission that they were working to the basis that 16:40:26 a five kilometre exclusion zone would be applied. 16:40:29 Q. I believe you had evidence of 16:40:34

	Page 284		Page 285
1	made, but the layouts presented in both their 16:40:42	1	Q. That is your 16:41:48
2	submissions showed a five-kilometre exclusion zone. 16:40:46	2	A. That is our interpretation, which 16:41:48
3	Q. I'm simply asking for your 16:40:50	3	I might add is consistent with the layout presented 16:41:50
4	confirmation, sir, that no decision had been made on 16:40:52	4	by Windstream in their first in their original 16:41:55
5	that topic, as to whether there would be 16:40:54	5	claim. 16:41:58
6	a five-kilometre exclusion zone? 16:40:57	6	Q. I understand, but I'm just trying 16:41:58
7	A. That is my understanding. 16:41:00	7	to understand what you did what you were aware of 16:42:00
8	Q. And certainly no decision had been 16:41:01	8	and what you did when you put together this 16:42:02
9	made as to the definition of that exclusion zone; 16:41:02	9	paragraph or this section of your report, is you 16:42:05
10	correct? 16:41:06	10	interpreted I take it what you did is you took 16:42:08
11	A. Sorry, you'll need to rephrase 16:41:08	11	a guideline or not even a guideline, a discussion 16:42:11
12	that question. I don't understand. 16:41:09	12	paper. It's a discussion paper that's Exhibit 16:42:14
13	Q. So, you understand there had been 16:41:12	13	R-0119, you have a citation there and you 16:42:18
14	a definition of the exclusion zone in terms of 16:41:14	14	interpreted that discussion paper and you applied it 16:42:23
15	what what the exclusion zone covered or how the 16:41:16	15	in the way that you have; is that correct? 16:42:26
16	waters' edge would be defined? 16:41:19	16	A. That's partly correct. I think 16:42:29
17	A. My understanding was that the 16:41:23	17	that was the if you like a background, but 16:42:30
18	call it the discussion paper I'm not sure exactly 16:41:26	18	what I also point out is that in their first 16:42:37
19	what form it took, simply stated that five 16:41:29	19	submission, Windstream had applied the same 16:42:40
20	kilometres from the shore. 16:41:32	20	exclusions zone that we adopted. 16:42:43
21	Q. Right. And so you interpreted 16:41:35	21	They subsequently changed it. Again, 16:42:47
22	that to mean five kilometres from uninhabited 16:41:36	22	I don't believe they had any further information 16:42:51
23	island, uninhabited peninsulas, uninhabited spits; 16:41:40	23	which differed from I'm not aware of any 16:42:53
24	correct? 16:41:45	24	different information. 16:42:56
25	A. That is the shore. 16:41:45	25	Q. No, I understand what you're 16:42:58
	Daga 206		Dog 207
	Page 286		Page 287
1	saying, and I'm really not asking about what 16:42:59	1	a requirement to have a setback from an uninhabited 16:43:54
2	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01	2	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00
2	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03	2 3	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03
2 3 4	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07	2 3 4	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05
2 3 4 5	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11	2 3 4 5	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06
2 3 4 5 6	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12	2 3 4 5 6	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08
2 3 4 5 6 7	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13	2 3 4 5 6 7	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11
2 3 4 5 6 7 8	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14	2 3 4 5 6 7 8	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14
2 3 4 5 6 7 8	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15	2 3 4 5 6 7 8	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18
2 3 4 5 6 7 8 9	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16	2 3 4 5 6 7 8 9	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22
2 3 4 5 6 7 8 9 10	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18	2 3 4 5 6 7 8 9 10	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26
2 3 4 5 6 7 8 9 10 11	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18	2 3 4 5 6 7 8 9 10 11	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29
2 3 4 5 6 7 8 9 10 11 12	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20	2 3 4 5 6 7 8 9 10 11 12 13	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30
2 3 4 5 6 7 8 9 10 11 12 13	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24	2 3 4 5 6 7 8 9 10 11 12 13 14	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32
2 3 4 5 6 7 8 9 10 11 12 13 14	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30	2 3 4 5 6 7 8 9 10 11 12 13 14 15	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:34
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:33	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:34 Shoreline that does not contain a drinking water 16:44:39
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:33 a drinking water intake; correct? 16:43:36	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:39
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct, yeah, without 16:43:38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:42 A. No. 16:44:45
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct, yeah, without 16:43:38 studies. 16:43:41	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:42 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:46
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct? 16:43:41 Q. Okay, but you are in the aware, 16:43:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:42 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:46 you, sir, that the only relevant set back to protect 16:44:49
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct; 16:43:41 Q. Okay, but you are in the aware, 16:43:42 sitting here today, why there would be any reason 16:43:44	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:42 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:49 drinking water would be one measured, not from the 16:44:53
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct? 16:43:41 Q. Okay, but you are in the aware, 16:43:42 sitting here today, why there would be any reason 16:43:44 that would be the case? 16:43:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:45 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:49 drinking water would be one measured, not from the 16:44:53 shoreline or a spit or an island or a peninsula but 16:44:58
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:33 a drinking water intake; correct? 16:43:36 A. That's correct, yeah, without 16:43:38 studies. 16:43:41 Q. Okay, but you are in the aware, 16:43:42 sitting here today, why there would be any reason 16:43:44 that would be the case? 16:43:47 A. No, although you could speculate 16:43:48	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a requirement to have a setback from an uninhabited 16:43:54 island that does not create — does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would — I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. And I take it, sir, that 16:44:08 you are not aware of any reason relating to the 16:44:11 protection of drinking water, why an offshore wind 16:44:14 facility should be sited more than five kilometres 16:44:18 from an uninhabited spit or peninsula that does not 16:44:22 contain a drinking water intake; correct? 16:44:26 A. That's correct. I think it's more 16:44:29 or less exactly the same question. 16:44:30 Q. So there's no — you're right 16:44:32 about that. So same question again, shoreline. 16:44:39 intake? 16:44:42 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:49 drinking water would be one measured, not from the 16:44:53 shoreline or a spit or an island or a peninsula but 16:44:58 from a drinking water intake, would you agree with 16:45:02
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	saying, and I'm really not asking about what 16:42:59 Windstream did. I'm asking about what you did. So 16:43:01 do I have that right? You took the discussion 16:43:03 paper, you interpreted it and you applied it in this 16:43:07 manner; right? 16:43:11 MR. SPELLISCY: I think he's given 16:43:12 an answer to this question about three times. 16:43:13 MS. SEERS: Okay. 16:43:14 PRESIDENT: I think so. Please go 16:43:15 ahead. 16:43:16 BY MS. SEERS: 16:43:18 Q. So I take it, sir, that you are 16:43:18 not aware of any reason relating to the protection 16:43:20 of drinking water, why an offshore wind facility 16:43:24 should be sited more than five kilometres from 16:43:30 an uninhabited island that does not contain 16:43:36 A. That's correct? 16:43:41 Q. Okay, but you are in the aware, 16:43:42 sitting here today, why there would be any reason 16:43:44 that would be the case? 16:43:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a requirement to have a setback from an uninhabited 16:43:54 island that does not create does not contain 16:44:00 a drinking water intake? 16:44:03 A. No, that would I wouldn't 16:44:05 anticipate that, no. 16:44:06 Q. Right. So same question again, shoreline. 16:44:39 intake? 16:44:45 A. No. 16:44:45 Q. Okay. And if I were to suggest to 16:44:49 drinking water would be one measured, not from the 16:44:53 shoreline or a spit or an island or a peninsula but 16:44:58

	P 400		D 400
	Page 288		Page 289
1	the five-kilometre exclusion zone, I would. 16:45:07	1	paper and to the second witness statement of 16:46:23
2	Q. Right. 16:45:10	2	Ms. Doris Dumais; right? 16:46:25
3	A. But my understanding - 16:45:10	3	A. That's correct. 16:46:31
4	Q. Certainly. 16:45:14	4	Q. But I take it you won't disagree 16:46:32
5	A is that's not the only reason 16:45:14	5	with me that neither the discussion paper nor 16:46:34
6	a five-kilometre exclusion zone was introduced. 16:45:17	6	Ms. Dumais' statement reflect an actual regulatory 16:46:38
7	Q. Okay, but if the purpose of the 16:45:19	7	requirement that's been adopted by the government of 16:46:43
8	five-kilometre exclusion zone was to protect 16:45:21	8	Ontario; right? 16:46:47
9	drinking water, you would agree there would be no 16:45:24	9	A. I think we've discussed already 16:46:48
10	reason relating to drinking water to site it to 16:45:26	10	that that hasn't yet been formalized 16:46:49
11 12	have the definition of the exclusion zone sited away 16:45:30	11 12	Q. So that was pardon me? 16:46:52
13	from those elements that we've mentioned? 16:45:33	13	A. That was the basis on which we 16:46:54
14	A. If it was only drinking water, as 16:45:39	14	made our assessment. 16:46:55
15	you've postulated, I would agree. 16:45:41	15	Q. Right. So that's also the case in 16:46:56
16	Q. Okay. At paragraph 320 you state 16:45:43	16	your discussion of averaging here? 16:47:00
17	that MOECC that's the new we've been referring 16:45:54 to the Ministry of the Environment as the MOE, but 16:45:58	17	A. That's correct, but again, 16:47:02 I believe that the discussion paper is clear in that 16:47:03
18	it's name has changed to include climate change as 16:45:59	18	it states from the shoreline; it doesn't talk about 16:47:06
19	well, so it is MOECC, but they're the same entity. 16:46:06	19	averaging. 16:47:09
20	You state that MOECC's definition of 16:46:08	20	Q. All right. And we've already 16:47:10
21	the five-kilometre setback distance is an absolute 16:46:10	21	established that you interpreted the discussion 16:47:11
22	distance from the shoreline, not a mean distance; 16:46:13	22	paper. 16:47:13
23	right? 16:46:15	23	At paragraph 279 of your report. You 16:47:15
24	A. That's what's stated. 16:46:19	24	assert that Baird's analysis regarding drinking 16:47:30
25	Q. And you cite to MOE's discussion 16:46:20	25	water "Could be misleading." Do you see that? It's 16:47:34

2 3 4	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45	2 3 4 5 6	certain. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57
2 3 4 5	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47	2 3 4 5 6 7	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01
2 3 4 5 6	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57	2 3 4 5 6 7 8	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06
2 3 4 5 6 7	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02	2 3 4 5 6 7 8	certain. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10
2 3 4 5 6 7 8 9	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06	2 3 4 5 6 7 8 9	certain. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13
2 3 4 5 6 7 8 9 10	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10	2 3 4 5 6 7 8 9 10	certain. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16
2 3 4 5 6 7 8 9 10 11	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. 16:48:13	2 3 4 5 6 7 8 9 10 11	certain. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also 16:49:17
2 3 4 5 6 7 8 9 10 11 12	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. 16:48:13 Q. Right. 16:48:16	2 3 4 5 6 7 8 9 10 11 12 13	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21
2 3 4 5 6 7 8 9 10 11 12 13	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. 16:48:13 Q. Right. 16:48:16 A. And taking into account that we 16:48:17	2 3 4 5 6 7 8 9 10 11 12 13	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24
2 3 4 5 6 7 8 9 10 11 12 13 14	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:20 considered our calculations showed that over 16:48:20	2 3 4 5 6 7 8 9 10 11 12 13 14 15	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. Q. Certainly. Certainly there is no 16:49:29
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. 16:48:16 A. And taking into account that we 16:48:17 considered our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:27	2 3 4 5 6 7 8 9 10 11 12 13 14 15	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. 16:48:13 Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:27 there will be a significant increase in the quantity 16:48:32	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30 proceeding is being prepared on the basis that no 16:49:36
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:35	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	certain. Q. Okay. A. But it is a risk that was present 16:48:51 until the further studies are done. Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered — our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:35 Therefore, further study is necessary. 16:48:40	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Q. Okay. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. 16:49:28 Q. Certainly. Certainly there is no 16:49:30 proceeding is being prepared on the basis that no 16:49:36 further detailed studies were able to be conducted 16:49:38
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered — our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:43 Therefore, further study is necessary. 16:48:43	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Okay. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. 16:49:28 Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30 proceeding is being prepared on the basis that no 16:49:36 further detailed studies were able to be conducted 16:49:38 because of the moratorium. 16:49:42
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered — our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:43 Therefore, further study is necessary. 16:48:43 A. I would point out that this is 16:48:44	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Okay. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. 16:49:28 Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30 proceeding is being prepared on the basis that no 16:49:36 further detailed studies were able to be conducted 16:49:38 because of the moratorium. 16:49:42 But I take it, though, that you don't 16:49:42
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? 16:47:57 A. I think what we state is that 16:48:02 given and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:35 Therefore, further study is necessary. 16:48:43 A. I would point out that this is 16:48:44 a we've identified this is as a risk. 16:48:45	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Okay. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. 16:49:28 Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30 proceeding is being prepared on the basis that no 16:49:36 further detailed studies were able to be conducted 16:49:38 because of the moratorium. 16:49:42 But I take it, though, that you don't 16:49:42 have any — other than the fact that detailed 16:49:46
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	in the second paragraph under 279? A. Yes. 16:47:43 Q. And then on the next page, just to 16:47:43 summarize, my understanding of these paragraphs here 16:47:45 that you have, you criticize, as I understand it, 16:47:47 Baird's application of its model, and you note that 16:47:51 based on your calculations, three times more 16:47:54 sediment would be disbursed; is that correct? A. I think what we state is that 16:48:02 given — and as Baird have already said, as well, 16:48:06 that those were preliminary studies and needed to be 16:48:10 followed up with detailed studies. Q. Right. 16:48:16 A. And taking into account that we 16:48:17 considered — our calculations showed that over 16:48:20 three and a half times the volume of dredging was 16:48:24 needed, and, therefore, it's reasonable to assume 16:48:32 of sediment disbursed into the water as a result. 16:48:43 Therefore, further study is necessary. 16:48:43 A. I would point out that this is 16:48:44	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Okay. 16:48:49 Q. Okay. 16:48:50 A. But it is a risk that was present 16:48:51 until the further studies are done. 16:48:53 Q. Okay, and I take that you were — 16:48:55 I think you were here on Friday, Mr. Clarke, when 16:48:57 Mr. Kolberg testified in his presentation that even 16:49:01 an increased level of sediment, even a three-fold or 16:49:06 even greater fold increase in the level of sediment 16:49:10 would not make a difference to his analysis; were 16:49:13 you here when he testified to that? 16:49:16 A. I heard them say that. He also — 16:49:17 though, I note as I've just said, indicated that 16:49:21 further studies, detailed studies would be needed to 16:49:24 confirm that. 16:49:28 Q. Certainly. Certainly there is no 16:49:29 disagreement that this is information in this 16:49:30 proceeding is being prepared on the basis that no 16:49:36 further detailed studies were able to be conducted 16:49:38 because of the moratorium. 16:49:42 But I take it, though, that you don't 16:49:42 have any — other than the fact that detailed 16:49:46 studies will be required in the future, based on 16:49:48

	Page 292		Page 293
1	sitting here today? 16:49:58	1	MS. SEERS: Madam Court Reporter, can 16:51:20
2	A. I don't have any reason to 16:50:00	2	you read back the last question? 16:51:20
3	disagree with it, but equally I'm not in a position 16:50:01	3	COURT REPORTER: (Reading testimony): 16:51:21
4	to collaborate corroborate or validate it, and 16:50:05	4	"So drinking water, then, is a low 16:51:21
5	that's what the purpose of the additional studies 16:50:13	5	risk to the project with a low impact." 16:51:21
6	would be. 16:50:15	6	THE WITNESS: I'm sorry. Drinking 16:51:34
7	Q. Okay. 16:50:16	7	water we identified as a low risk, yes, but that was 16:51:34
8	A. I think you would find and I'm 16:50:16	8	our conclusion. 16:51:39
9	not sure exactly where we would find it, but we did 16:50:18	9	BY MS. SEERS: 16:51:40
10	indicate that this was a low risk to the project, 16:50:22	10	Q. Okay. Thank you. And so now 16:51:40
11	with actually probably a low impact. 16:50:26	11	we're at paragraph 309 of your report which 16:51:45
12	Q. So drinking water, then, is a low 16:50:29	12	discusses the shipping lane risk. 16:51:49
13	risk to the project with a low impact. 16:50:30	13	And you state at paragraph 311: 16:51:55
14	I think we've already established that 16:50:40	14	"Local Maritime organizations such 16:51:59
15	you're not an expert in navigation on the 16:50:42	15	as the St. Lawrence Seaway 16:52:01
16	Great Lakes, but you're here, and your reports 16:50:44	16	Development Corporation are likely 16:52:04
17	discuss this topic so let's give it a try. 16:50:46	17	to view this is a causing 16:52:05
18	Your discussion of the shipping lane 16:50:50	18	unnecessary additional risk to 16:52:07
19	starts at paragraph 309. 16:50:54	19	shipping, and, therefore, argue 16:52:09
20	Pardon me, my colleague informs me 16:51:09	20	for the greatest possible buffer 16:52:10
21	that in response to my last question, you nodded 16:51:10	21	zone." 16:52:13
22	your head instead of answering in the affirmative; 16:51:13	22	[As read] 16:52:14
23	would you please clarify that for the record? 16:51:16	23	Do you see that? 16:52:14
24	A. Sorry, can we just go back over 16:51:18	24	A. Yes. 16:52:15
25	that? 16:51:19	25	Q. And I don't see a reference, sir, 16:52:16
	Page 294		Page 295
1	Page 294 in support of that statement. I take it there isn't 16:52:18	1	Page 295 wasn't familiar with that organization. 16:53:17

PRESIDENT: I was asking him about his 16:53:25 report and not the reports of others. MS. SEERS: Certainly. BY MS. SEERS Q. You site at paragraph 312 you say: 16:53:29 "The Canadian navigation 16:53:46 authorities will review this 16:53:47 safety issue closely at the time 16:53:49 of permitting to minimize shipping 16:53:50 risks created by manmade hazards, 16:53:50 and since Canada has no previous 16:53:53 experience on this matter, it may 16:53:55 well consult agencies from other 16:53:57 companies where wind turbine 16:54:01 offshore." 16:54:02 [as read] 16:54:04
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	in support of that statement. I take it there isn't 16:52:18 one? 16:52:20 A. No, that's an opinion based on 16:52:20 experience which is cited elsewhere, for example, 16:52:23 the UK offshore wind industry and also the Cape Wind 16:52:30 project which was also cited. 16:52:36 Q. An opinion from whom, in the URS 16:52:39 team, sir, who has experience dealing with the 16:52:44 Seaway Development Corporation? 16:52:46 A. I would suggest that was a it 16:52:47 came from the Red Penguin personnel. 16:52:53 with the St. Lawrence Seaway Development 16:52:55 Corporation, sir? 16:52:55 A. Not directly, no, to my knowledge. 16:52:58 Q. Indirectly? 16:53:01 A. Yes. 16:53:02 Q. They don't have any direct 16:53:02 experience dealing with that organization. And you 16:53:03 heard, I take it on Friday, that Mr. Kolberg has 16:53:11 corporation? 16:53:12 A. I did not hear that, no. 16:53:13	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	wasn't familiar with that organization. BY MS. SEERS: Q. I believe the record is that he 16:53:21 wasn't familiar with its corporate bylaws, but we 16:53:23 presside the transcript. PRESIDENT: I was asking him about his 16:53:25 report and not the reports of others. MS. SEERS: Certainly. BY MS. SEERS Q. You site at paragraph 312 you say: 16:53:29 "The Canadian navigation authorities will review this 16:53:47 safety issue closely at the time 16:53:49 of permitting to minimize shipping 16:53:50 risks created by manmade hazards, 16:53:50 and since Canada has no previous 16:53:53 experience on this matter, it may 16:53:55 well consult agencies from other 16:54:00 generators have been located 16:54:01 offshore." 16:54:02 [as read] 16:54:04 So I take it, sir, that statement has 16:54:05

	Page 296		Page 297
1	A. That's correct. But I would 16:54:14	1	"A wind farm located in the 16:55:37
2	suggest that that is a reasonably logical conclusion 16:54:15	2	Great Lakes may require a smaller 16:55:39
3	or implication to draw from the situation. 16:54:18	3	separation zone." 16:55:41
4	Q. Okay. 16:54:20	4	[As read] 16:55:44
5	A. Again, based on the experience 16:54:20	5	And I take it you mean than one 16:55:44
6	elsewhere such as the UK and Cape Wind. 16:54:24	6	located in the UK or on the open ocean; is that the 16:55:47
7	Q. And you cite in the next paragraph 16:54:28	7	intent of that paragraph? 16:55:53
8	the UK guidelines and the world shipping council's 16:54:32	8	A. That's correct, yeah. 16:55:54
9	advocacy piece regarding buffers; right? 16:54:37	9	Q. And so this, I guess, sir, is 16:55:56
10	A. That's correct. 16:54:40	10	an example of a statement amongst many I've seen in 16:56:00
11	Q. And you heard, I take it, 16:54:41	11	your report that does not reach a conclusion about 16:56:03
12	Mr. Kolberg's evidence on Friday in response to 16:54:44	12	likelihoods based on available information. 16:56:07
13	questions by Ms. Squires that in his view, anyway, 16:54:48	13	So, can you clarify for us in your 16:56:09
14	those documents are not particularly relevant to the 16:54:52	14	opinion, sitting here today, whether the risk 16:56:13
15	determination of the appropriate buffer for the 16:54:54	15	whether you are saying whether URS is saying that 16:56:18
16	particular shipping channel in question. 16:54:57	16	the risk posed by the shipping lane is high or low? 16:56:20
17	I take it that you don't have any 16:55:00	17	A. We would suggest that the risk, 16:56:25
18	better information to disagree with Mr. Kolberg's 16:55:03	18	certainly with the layout proposed in the second 16:56:29
19	opinion on that matter? 16:55:07	19	Sgurr report, presents a high-risk still to the 16:56:34
20	A. I don't have any better 16:55:09	20	project. 16:56:36
21	information to agree or disagree with his opinion. 16:55:12	21	Q. Okay. 16:56:37
22	I think the conclusions he drew on Friday still 16:55:22	22	A. Because the turbines are located 16:56:38
23	present some risk to this project. 16:55:25	23	directly adjacent to the shipping lane. There is no 16:56:41
24	Q. Okay. And then at paragraph 314 16:55:27	24	buffer zone provided in that layout. 16:56:46
25	you make a statement that: 16:55:35	25	Q. Your report states in at 16:57:00
	Page 298		Page 299
			- 1.61 - 1.7
1	paragraph 393. Your reports states there: 16:57:01	1	
1 2	paragraph 393, Your reports states there: 16:57:01 "The Great Lakes environment is 16:57:15	1 2	a captain who he knew that was familiar with the 16:58:26
	"The Great Lakes environment is 16:57:15		a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29
2	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17	2	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33
2	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18	2 3	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34
2 3 4	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20	2 3 4	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35
2 3 4 5	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22	2 3 4 5	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37
2 3 4 5 6	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25	2 3 4 5 6	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39
2 3 4 5 6 7	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28	2 3 4 5 6 7	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41
2 3 4 5 6 7 8	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28	2 3 4 5 6 7 8	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47
2 3 4 5 6 7 8 9	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28	2 3 4 5 6 7 8	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48
2 3 4 5 6 7 8 9	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33	2 3 4 5 6 7 8 9	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49
2 3 4 5 6 7 8 9 10	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32	2 3 4 5 6 7 8 9 10	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50
2 3 4 5 6 7 8 9 10 11 12	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34	2 3 4 5 6 7 8 9 10 11	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50
2 3 4 5 6 7 8 9 10 11 12 13	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:37	2 3 4 5 6 7 8 9 10 11 12 13	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56
2 3 4 5 6 7 8 9 10 11 12 13	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:37 known according to URS about the wave conditions in 16:57:40	2 3 4 5 6 7 8 9 10 11 12 13 14	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:58
2 3 4 5 6 7 8 9 10 11 12 13 14	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42	2 3 4 5 6 7 8 9 10 11 12 13 14 15	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:58
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:37 known according to URS about the wave conditions in 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42 being recorded at all, let alone frequently. 16:57:47	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42 being recorded at all, let alone frequently. 16:57:49 A. I accept that the reference behind 16:57:52	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:59 and perhaps we could adjourn until tomorrow. 16:59:02 PRESIDENT: Thank you very much 16:59:05
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:37 known according to URS about the wave conditions in 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42 being recorded at all, let alone frequently. 16:57:49 A. I accept that the reference behind 16:57:52 that was, it came from Mr. Sturgeon. 16:57:55	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:59 and perhaps we could adjourn until tomorrow. 16:59:02 PRESIDENT: Thank you very much 16:59:05 Ms. Seers. 16:59:06
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:37 known according to URS about the wave conditions in 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42 being recorded at all, let alone frequently. 16:57:49 A. I accept that the reference behind 16:57:55 If you actually consulted with 16:58:02	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:59 and perhaps we could adjourn until tomorrow. 16:59:02 PRESIDENT: Thank you very much 16:59:05 Ms. Seers. 16:59:06 This is a bit inconvenient but 16:59:07
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:59 and perhaps we could adjourn until tomorrow. 16:59:02 PRESIDENT: Thank you very much 16:59:05 Ms. Seers. 16:59:06 This is a bit inconvenient but 16:59:07 Mr. Clarke, I should ask you not to speak with 16:59:09 anybody about your testimony until we continue 16:59:12
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	"The Great Lakes environment is 16:57:15 known to create conditions not 16:57:17 often found at sea with 16:57:18 a frequency and buildup of wave 16:57:20 peaks often resulting in confusing 16:57:22 seas with rogue waves frequently 16:57:25 recorded." 16:57:28 [As read] 16:57:28 Do you see that? 16:57:32 A. I see that. 16:57:33 Q. So I don't see a reference, sir, 16:57:34 in this section to establish what is known or not 16:57:37 known according to URS about the wave conditions in 16:57:40 the Great Lakes, or about any so-called rogue waves 16:57:42 being recorded at all, let alone frequently. 16:57:49 A. I accept that the reference behind 16:57:52 that was, it came from Mr. Sturgeon. 16:57:55 If you actually consulted with 16:58:02 a friend of his and I accept that that's only ITS 16:58:08 his who is a captain on the Great Lakes. 16:58:19	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a captain who he knew that was familiar with the 16:58:26 Great Lakes, but he didn't conduct wave modeling or 16:58:29 anything of the sort — 16:58:33 A. That wouldn't have been Mr. 16:58:34 Sturgeon's role. 16:58:35 Q. And you heard, I take it from the 16:58:37 evidence from Mr. Kolberg on Friday, in connection 16:58:39 with this paragraph that it is, quote, "absolutely 16:58:41 false"? 16:58:47 A. I heard that. 16:58:48 Q. And I take it you don't have any 16:58:49 information sitting here today to contradict 16:58:50 Mr. Kolberg's evidence on that point? 16:58:54 A. No, I don't. 16:58:56 MS. SEERS: I think that pretty much 16:58:59 and perhaps we could adjourn until tomorrow. 16:59:02 PRESIDENT: Thank you very much 16:59:05 Ms. Seers. 16:59:06 This is a bit inconvenient but 16:59:07 Mr. Clarke, I should ask you not to speak with 16:59:12 tomorrow. We don't have a special room in the 16:59:15

	Page 300	Page 301
1	going to be sleeping in that little room there. 16:59:25	PRESIDENT: As to whether there might 17:00:29
2	PRESIDENT: Okay. So that's fine. 16:59:30	be any confidential information in that 17:00:30
3	Thank you very much. 16:59:31	3 MR. TERRY: Yes, the idea essentially 17:00:34
4	MR. TERRY: And Mr. President, just 16:59:32	4 is to try to sanitize the information and make it 17:00:36
5	one small procedural note. I just wanted to give 16:59:33	useful, so it can be put to the damages experts 17:00:40
6	the Tribunal a heads-up that my friend and I are 16:59:37	since they weren't able to be in the room when that 17:00:42
7	trying to work out a basis for taking some of the 16:59:39	was used, and I'm fairly confident that can be done. 17:00:45
8	information that Mr. Cecchini provided you. 16:59:43	I know my friends have to check about 17:00:48
9	You will remember the session, I think 16:59:46	the appropriate OPA personnel to as to that being 17:00:50
10	it was last Friday, and put it into a form that we 16:59:49	done, but I just wanted to give that heads-up to the 17:00:54
11	can use for the purpose of examining the experts in 16:59:51	11 Tribunal in case we have to discuss that. 17:00:58
12	a setting that won't require the use of restricted 16:59:54	PRESIDENT: It will be something that 17:01:01
13	access information. 16:59:59	is prepared on the basis of the transcript. 17:01:01
14	So I just wanted to let you know that 17:00:00	MR. TERRY: Yes. On the basis of the 17:01:04
15	because it may result potentially if we can't reach 17:00:02	transcript, informed by additional 17:01:07
16	an appropriate way to do it, just for me wanting to 17:00:05	publicly-available information, and that's 17:01:09
17	get some public record information into the record. 17:00:09	consistent with what our discussions had been when 17:01:12
18	So I give you that heads-up and hopefully we will be 17:00:11	this was dealt with last Friday, as well. 17:01:16
19	able to resolve the issue. 17:00:14	PRESIDENT: So, hopefully that can be 17:01:18
20	PRESIDENT: So is this something that 17:00:16	²⁰ sorted out. 17:01:20
21	might come up tomorrow or 17:00:18	21 Mr. Neufeld? 17:01:20
22	MR. TERRY: It might come up tomorrow. 17:00:20	MR. NEUFELD: We'll do our best to 17:01:23
23	It won't be necessary, I don't think to be used in 17:00:21	sort something out. Now, just to mention, this is 17:01:24
24	examining anyone tomorrow, but just potentially to 17:00:25	highly preliminary as presented to us this morning, 17:01:26
25	resolve the issue if it can't be resolved. 17:00:27	that I think you probably put your finger on it 17:01:28
1 2 3 4	Page 302 immediately when you said this is on the basis of 17:01:31 the transcript. And it seems no, it's not. 17:01:33 So, anyway, we'll have our 17:01:35 discussions, and then we will revert to the Tribunal 17:01:37	
5	once we've 17:01:39	
6	PRESIDENT: Very good. So we will 17:01:41	
7	continue tomorrow morning at 9:00 o'clock with 17:01:43	
8	Mr. Clarke. Thank you. 17:01:45	
9	MS. SEERS: Yes. Thank you. 17:01:48	
10	Whereupon the proceedings concluded 17:01:49	
11	at 5:01 p m. 17:01:49
