| 3 | THE CHAIRMAN: Mr Bundy, you can go on. | 3 | Others, such as Lieutenant Bayldon and |
| 4 | Submissions by MR BUNDY (continued) | 4 | Lieutenant Walsh, were sent to the region with |
| 5 | MR BUNDY: Thank you very much, Mr President, members of | 5 | specification instructions to explore the rivers, |
| 6 | the Tribunal. Yesterday I had started to address one | 6 | including the Ragaba ez Zarga, the Lol, the Bahr el Arab |
| 7 | of the core issues in the case, which is: what is the | 7 | and the Kiir. It wasn't referred to as the |
| 8 | area of the nine Ngok Dinka chiefdoms transferred to | 8 | Ragaba ez Zarga at that time. |
| 9 | Kordofan in 1905? I had been looking at it from the | 9 | It is submitted that the accounts of this latter |
| 10 | point of view of the contemporaneous documentation | 10 | group of individuals, that ones that were sent there |
| 11 | referring to that transfer. | 11 | with specific instructions to explore the relevant |
| 12 | I started by going through the four documents from | 12 | rivers, is entitled to greater probative value as |
| 13 | the relevant period that specifically refer to the | 13 | a result of the much more detailed surveys they |
| 14 | transfer: the March 1905 intelligence report, the annual | 14 | undertook of the relevant features and the fact that |
| 15 | reports for Kordofan and Bahr el Ghazal in 1905 and | 15 | these surveys and explorations were being undertaken at |
| 16 | Governor-General Wingate's memorandum in which he | 16 | the time of the transfer and were specifically referred |
| 17 | described the transferred area in 1905. | 17 | to by Governor-General Wingate in his memorandum in |
| 18 | I mentioned that the only genuine question that | 18 | which he described the transferred area. |
| 19 | Wingate's memorandum could give rise to was what river | 19 | Now, on some of the basic facts the parties do not |
| 20 | he was referring to when he said that the districts of | 20 | have major differences, and this results from the fact |
| 21 | the two Sultans, Sultan Rob and Sultan Okwai, to the | 21 | that for the most part the parties have been referring |
| 22 | south of the Bahr el Arab and formerly a portion of the | 22 | to the same documents recording the trips of the various |
| 23 | Bahr el Ghazal province, had been incorporated into | 23 | individuals to the rivers in question. Where the |
| 24 | Kordofan. What river was he referring to when he | 24 | parties differ is in their appreciation of these facts |
| 25 | mentioned the Bahr el Arab? It's to that subject that | 25 | for purposes of determining the area transferred to |

| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | As Sudan pointed out in its rejoinder, in our submission in assessing the evidence relating to the Bahr el Arab there are two general conditions that should first be borne in mind. The first is to appreciate the evidence on record in the order in which it was documented. It appears to be common ground between the parties that the knowledge of Condominium officials of the rivers of the region was evolving over the first few years after 1900. By taking a chronological approach to the evidence it's possible to ascertain what was known to Sudanese Government officials, including to Governor-General Wingate, at the time the transfer was referred to in the documents that I addressed yesterday. The second general consideration is to assess the evidence qualitatively in terms and in the light of the amount of time that the relevant officials who visited the area during the first five years of the 20th century actually spent crossing or exploring the relevant rivers. Certain individuals, such as Wilkinson and Percival, on whom the SPLM/A's pleadings rely quite heavily, crossed the Ragaba ez Zarga and the Bahr el Arab in | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | The SPLM/A's main thesis is that there was confusion over the identity and location of the Bahr el Arab before the 1905 transfer, and that this confusion persisted up until 1907 or 1908, after the transfer had occurred. The Government, on the other hand, submits that the Bahr el Arab had been correctly identified by March 1905; and that Wingate's memorandum, in which he described the transferred area in relation to that river, and in which he also referred to the exploration activities that had been carried out on that river, shows that Wingate knew what he was writing about; and that when he authored his 1905 memorandum reporting on the events of that year in the annual report, he was referring to the correctly identified Bahr El Arab River. Because the material on the record has been extensively canvassed by the parties in the written pleadings, I do not intend to repeat obviously all that's been said, but I do wish to focus on a number of essential facts. It's not disputed that in 1900 Saunders travelled to |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | As Sudan pointed out in its rejoinder, in our submission in assessing the evidence relating to the Bahr el Arab there are two general conditions that should first be borne in mind. The first is to appreciate the evidence on record in the order in which it was documented. It appears to be common ground between the parties that the knowledge of Condominium officials of the rivers of the region was evolving over the first few years after 1900. By taking a chronological approach to the evidence it's possible to ascertain what was known to Sudanese Government officials, including to Governor-General Wingate, at the time the transfer was referred to in the documents that I addressed yesterday. The second general consideration is to assess the evidence qualitatively in terms and in the light of the amount of time that the relevant officials who visited the area during the first five years of the 20th century actually spent crossing or exploring the relevant rivers. Certain individuals, such as Wilkinson and Percival, on whom the SPLM/A's pleadings rely quite heavily, crossed the Ragaba ez Zarga and the Bahr el Arab in a day or two, in the course of rather long general | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | The SPLM/A's main thesis is that there was confusion over the identity and location of the Bahr el Arab before the 1905 transfer, and that this confusion persisted up until 1907 or 1908, after the transfer had occurred. For present purposes, I would simply recall that the parties agree that Wilkinson correctly identified the Kiir River, south of which lay Sultan Rob's village and district, but that he misidentified the Ragaba ez Zarga as the Bahr el Arab at the two points where he crossed it. Nonetheless, although he misidentified the Ragaba ez Zarga as the Bahr el Arab, he did note in his route report another matter that Professor Crawford will | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | called the Bahr el Arab was uninhabited, or appeared to be uninhabited. The parties agree that the river that Percival said he took to be the Bahr el Arab was actually, as I noted, the Ragaba ez Zarga. Percival's route report indicates that he had seen Wilkinson's sketch map. Thus Percival misidentified the Bahr el Arab, as Wilkinson had done, at the points where he crossed it, although his report was not entirely unequivocal because he simply stated that he came to what he took to be the Bahr el Arab, probably based on Wilkinson's sketch map. His mistake was repeated by Boulnois on, I think, 23rd December. Percival had arrived in Wau in Bahr el Ghazal on the 21st or 22nd, and Boulnois reported Percival's principal findings to Wingate on that date. Boulnois himself did not visit any of the rivers in question and had no firsthand knowledge of them; he was simply forwarding on Percival's remarks when he arrived at Wau. |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | report does, but Wilkinson's doesn't. But it seems clear from the fact that Wilkinson covered a great deal of ground in less than two months that it means that at most he could have only spent a couple of days on the relevant rivers. A map of his itinerary outlining where he went is being placed on the screen for ease of reference. It's a map you've seen before; it's been in the parties' pleadings. Professor Crawford will be discussing Wilkinson's route report in greater detail later this morning. For present purposes, I would simply recall that the parties agree that Wilkinson correctly identified the Kiir River, south of which lay Sultan Rob's village and district, but that he misidentified the Ragaba ez Zarga as the Bahr el Arab at the two points where he crossed it. Nonetheless, although he misidentified the Ragaba ez Zarga as the Bahr el Arab, he did note in his route report another matter that Professor Crawford will deal with: that he only saw Arab settlements, to the | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | called the Bahr el Arab was uninhabited, or appeared to be uninhabited. | 09:43 1 | There was no dispute on the Kiir. | 09:46 1 | report it is stated: |
|--|---|--|---|
| 2 | He reached the Kiir on 23rd November, and he also | 2 | "Sub-Lieutenant Bayldon HN left Khartoum on the |
| 3 | noted and this appears in the route report that, | 3 | 18th instant [18th December] by steamer with |
| 4 | according to Sultan Rob himself, the Ragaba ez Zarga, | 4 | instructions to explore the Bahr el Arab from its mouth |
| 5 | which was Percival's Bahr el Arab, was uninhabited | 5 | and if possible the other little-known rivers in the |
| 6 | except for occasional wandered parties of Arabs. | 6 | northwest of the Bahr el Ghazal." |
| 7 | Now, Sultan Rob's own account, told to a Condominium | 7 | Bayldon wasn't coming from Khartoum; at that time he |
| 8 | official, rebuts the SPLM/A's thesis that the Dinka | 8 | had been in Bahr el Ghazal at Wau exploring rivers |
| 9 | lived as far north as the Ragaba ez Zarga, much less to | 9 | further south, and he was now sent with explicit |
| 10 | the 10°22'30" north parallel or the 10°35' north | 10 | instructions to explore rivers such as the Bahr el Arab |
| 11 | parallel. | 11 | and other features in the area. |
| 12 | By November 1904, therefore, while individuals such | 12 | The March 1905 intelligence report, which |
| 13 | as Wilkinson and Percival had crossed the rivers in | 13 | I mentioned yesterday in connection with the transfer, |
| 14 | question, the Government had not sent any party | 14 | contains a detailed summary prepared by Bayldon dated |
| 15 | specifically to explore the relevant rivers, with the | 15 | 20th March 1905 on the status of the Bahr el Arab and on |
| 16 | exception of the early 1900 trips of Saunders and Peake | 16 | the Ragaba ez Zarga, which he called the Bahr el Homr. |
| 17 | which had been limited to the very eastern reaches of | 17 | It was in this report dated 20th March 1905 that Bayldon |
| 18 | the Bahr el Arab, in the region where it met up with the | 18 | recorded his conclusion that the river usually spoken of |
| 19 | Bahr el Ghazal River. | 19 | as the Bahr el Arab ie spoken of as the Bahr el Arab |
| 20 | But that situation changed at the end of 1904, when | 20 | by people such as Percival and Wilkinson is really |
| 21 | Lieutenant Bayldon was sent to the region with the | 21 | the Bahr el Homr, or as we now know it, the |
| 22 | express task of exploring the relevant rivers. In his | 22 | Ragaba ez Zarga or the Ngol. So he cleared up that what |
| 23 | memorandum included with the 1904 annual report for | 23 | Wilkinson and Percival had called the Bahr el Arab was |
| 24 | Sudan I'm not in 1905, the 1904 annual report for | 24 | not the Bahr el Arab; it was what Bayldon said was the |
| 25 | Sudan Governor-General Wingate referred to this | 25 | Bahr el Homr, which is the Ragaba ez Zarga. |

With respect to Lloyd, the SPLM/A refers to |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | "He knew everything about the rivers". By October 1905 the intelligence reports noted that Bayldon's replacement, who was Lieutenant Huntley-Walsh, was expected soon and stated that work on widening the passage of the Bahr el Arab was nearly complete. The November 1905 intelligence report also contained another marginal heading called "Bahr el Arab Sudd" in which it was reported that the sudd had been cleared up to open water, which according to all reports existed up to Sultan Rob's. From this report it's clear that Sultan Rob was still regarded by Condominium officials as living on the Bahr el Arab, the real Bahr el Arab. It's in the light of these accounts throughout 1905 that it's useful to come back to Governor-General Wingate's memorandum included in the annual report for Sudan at the end of 1905. In that memorandum, which I discussed yesterday, Wingate noted that, as a result of the march of Captain Percival and the reconnaissance of Lieutenant Bayldon, light had been thrown on the | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | suggest that when he made the reference to "the districts to the south of the Bahr el Arab" he was referring to a different Bahr el Arab than he had mentioned a few pages earlier in his memorandum. That is a further reason why the Government of Sudan says that it's clear from the contemporary records that the transferred areas lay to the south of that river. Because the crucial date in this case is to determine the area that was transferred in 1905, post-1905 events are of marginal relevance unless they shed further light on the limits of the area that was transferred in that year. In this connection there's nothing in the record covering the post-1905 period that contradicts Wingate's description of the area that was transferred that he referred to in his memorandum. Notwithstanding this, the SPLM/A argues that confusion over the identity of the Bahr el Arab persisted after 1905. And it points to references made by Lloyd and O'Connell to support this thesis. With respect to Lloyd, the SPLM/A refers to an article that he authored, or some notes he published |

He wasn't speaking of provincial boundaries here; he was |

| 09:57 | 1 | account Lloyd wrote that the southern boundary of the | 10:01 1 | 2007, immediately corrected by Percival, had absolutely |
|-------|----|--|---------|--|
| | 2 | Dar Homr Arabs: | 2 | no bearing on Governor-General Wingate's memorandum and |
| | 3 | " is between the Bahr el Arab and the River Kiir, | 3 | his description in his 1905 annual report. Wingate |
| | 4 | the latter [ie the River Kiir] being occupied by the | 4 | makes no reference to Lloyd in his memorandum, and Lloyd |
| | 5 | Dinkas under Sultan Rob." | 5 | had neither visited the rivers in question at that time |
| | 6 | That passage is relied on by our colleagues on the | 6 | nor written his article at the point when Wingate |
| | 7 | other side to show that, as of 1907, Lloyd was | 7 | described the transferred area. |
| | 8 | distinguishing between the Bahr el Arab and the Kiir, | 8 | The same comments can be made about the very brief |
| | 9 | and still treating them as two separate rivers. | 9 | reference by O'Connell in the 1906 annual report, where |
| | 10 | Let me clarify a number of points that the SPLM/A | 10 | he states that he had visited and it's a very short |
| | 11 | has chosen not to discuss in its pleadings. First, | 11 | passage Hasoba "on the Bahr el Arab"; you'll find |
| | 12 | Lloyd made only one trip to the region, and that was not | 12 | that in the common bundle, tab 52. |
| | 13 | until February 1906. It's reported in Annex E to the | 13 | Now, O'Connell was mistaken in referring to Hasoba |
| | 14 | March 1906 intelligence report. | 14 | as being on the Bahr el Arab, but O'Connell had never |
| | 15 | That 1906 intelligence report referring to Lloyd's | 15 | travelled down to the read Bahr el Arab or Kiir. But |
| | 16 | one trip to the region at the time makes no reference to | 16 | that account also, written at the end of 1906 or early |
| | 17 | the Bahr el Arab or the Kiir. In fact Lloyd at that | 17 | 1907, had no influence on Wingate's prior description of |
| | 18 | time only travelled as far south as Hasoba. He didn't | 18 | the transferred area for 1905 in his 1905 memorandum, |
| | 19 | visit the Kiir or the real Bahr el Arab at the time, as | 19 | and in fact O'Connell himself did not purport to |
| | 20 | had been previously identified by Bayldon. That same | 20 | describe the transferred area; that was described by |
| | 21 | intelligence report from March 1906 also discussed the | 21 | Wingate a year earlier. |
| | 22 | further operations of Walsh on the real Bahr el Arab. | 22 | Once again, as the SPLM/A emphasises, it is |
| | 23 | Second, Lloyd's implicit reference in 1907 to the | 23 | important to focus on what Government administrators |
| | 24 | Bahr el Arab and the Kiir as two different rivers was | 24 | said they transferred in 1905, and not to rewrite or |
| | 25 | immediately corrected; immediately corrected by none | 25 | second-guess those accounts. What they said and it |
| | | Page 17 | | Page 19 |
| | | Tage 17 | | 1 age 17 |
| | | | | |
| 09:59 | 1 | other than Percival. Lloyd's account had been published | 10:02 1 | was said by the seniormost official in the colony was |
| | 2 | in the June 1907 Geographical Journal. On 2nd July | 2 | that the districts of the two Sultans, Sultan Rob and |
| | 3 | Percival wrote that the June 1907 journal had just | 3 | Sultan Okwai, Rob on the Kiir, Sheihk Rihan Okwai |
| | 4 | reached him, and he offered the following corrections on | 4 | between the Lol and the Kiir, those districts to the |
| | 5 | Lloyd's notes, and I'll put the relevant passage on the | 5 | south of the Bahr el Arab were transferred to Kordofan. |
| | 6 | screen. I'll just read it, it's just as easy. This is | 6 | In 1905, when they said this, the Bahr el Arab had been |
| | 7 | what Percival said: | 7 | correctly identified as the same river as the Kiir. |
| | 8 | "The Bahr el Arab is the River Kiir, and takes this | 8 | I now turn to the third factor that supports the |
| | 9 | name Kiir when it enters the Dinka country either before | 9 | Government's position on the area that was transferred |
| | 10 | or after joining the rivers that join the River Lol | 10 | in 1905, and that's the understanding of Condominium |
| | 11 | below Sultan Rob's." | 11 | officials at that time of where Sultan Rob's territory |
| | 12 | In any event, of course, Lloyd had indicated that | 12 | or district lay. Now, on this issue I can be quite |
| | 13 | Sultan Rob was on the Kiir still, not way up north | 13 | brief because it's a subject that Professor Crawford |
| | 14 | somewhere. So that's an immediate correction to Lloyd | 14 | will be coming back to in more detail later this |
| | 15 | by Percival. | 15 | morning. |
| | 16 | Lloyd thereafter himself corrected his own mistakes | 16 | The key point here, we would submit, is to focus on |
| | 17 | in notes he wrote in 1910 in which he described the | 17 | where the Sudanese administrators themselves considered |
| | 18 | Bahr el Arab as the separate river, the real | 18 | Sultan Rob's territory to be situated based on their |
| | 19 | Bahr el Arab flowing 30 miles south and nearly parallel | 19 | knowledge as of 1905. It's self-evident that as of 1905 |
| | 20 | to the Bahr el Homr, which was the Ragaba ez Zarga; and | 20 | Government officials would have no knowledge of tribal |
| | 21 | he referred to Lieutenant Huntley-Walsh's explorations | 21 | locations or other factors that only emerged after that |
| | 22 | on the Bahr el Arab that I discussed earlier and which | 22 | date. The transfer decision was based on the facts as |
| | 23 | were taking place on the real Bahr el Arab. | 23 | they were known at the time. |
| | 24 | Fourth, any assessment that Lloyd reached in these | 24 | Now, the key information available to Government |
| | 25 | notes on a separate subject in a geographical journal in | 25 | officials as of 1905 includes the following. |
| | | Page 18 | | Page 20 |
| | | | | |
| | | | | |

| 10:04 1 | In 1902 we have Wilkinson's trek report and his | 10:07 1 | engaged in his sudd-cutting operations on the real |
|----------|---|----------|---|
| 2 | sketch map indicating where Sultan Rob's village and | 2 | Bahr el Arab, up to Sultan Rob's, there was open water. |
| 3 | where his district was. As I noted earlier, Wilkinson's | 3 | Thus, as of that time, Sultan Rob was viewed by |
| 4 | route report stated the following when he arrived at the | 4 | Condominium officials as still living on the Kiir or |
| 5 | Kiir River: | 5 | Bahr el Arab. And of course Lloyd said the same thing |
| 6 | "The district on the north bank of the Kiir is | 6 | in his 1907 article. |
| 7 | called Mareig, the district on the south bank is called | 7 | All of these accounts are consistent with Wingate's |
| 8 | Massian, and Sultan Rob lives in the latter. Much dura | 8 | description of the transferred area and they're equally |
| 9 | is cultivated." | 9 | consistent with the Government's position in this case |
| 10 | I think this is a quote that Mr MacDonald was | 10 11 | that such areas, the transferred areas, lay on or to the south of the Bahr El Arab River. |
| 11 | referred to yesterday as well. "The district on the | | |
| 12 13 | south bank is called Massian", and Sultan Rob lives in that district. | 12 13 | We would respectfully suggest that in contrast these accounts cannot possibly be reconciled with the SPLM/A's |
| 13 | Now, the relevant portion of Wilkinson's sketch map | 14 | position that the transferred area was considered by |
| 15 | is now being displayed on the screen. Sultan Rob's | 15 | Government officials at the time to extend up to the |
| 16 | village is identified on the sketch as lying just south | 16 | 10°35' latitude or the 10°22'30" latitude decided by the |
| 17 | of the Kiir River, down at the bottom. You can see that | 17 | experts. |
| 18 | Wilkinson labelled the Ragaba ez Zarga further north | 18 | The final issue I'd like to address concerns the |
| 19 | wrongly as the Bahr el Arab, but that's where he found | 19 | relevance of the provincial boundary between Kordofan |
| 20 | only Arab settlements, to the extent he found anything | 20 | and Bahr el Ghazal for purposes of determining and |
| 21 | at all. | 21 | assisting to determine the area that was transferred in |
| 22 | Just below Sultan Rob's village on the sketch map | 22 | 1905. |
| 23 | are the words "Mathiang district" and this district, | 23 | The SPLM has argued that this matter is irrelevant, |
| 24 | Sultan Rob's district, identified by Wilkinson, lies to | 24 | but that cannot be right. The contemporary transfer |
| 25 | the south of the river, the river that Bayldon | 25 | documents, as I mentioned yesterday, record the fact |
| | Page 21 | | Page 23 |
| | 1 age 21 | | 1 age 23 |
| | | | |
| 10:06 1 | subsequently correctly identified as the Bahr el Arab. | 10:09 1 | that an area, described as the districts of Sultan Rob |
| 2 | Next we have Percival's account and sketch map | 2 | and Sultan Okwai, was transferred from one province to |
| 3 | recording his march to the area in 1904 that I mentioned | 3 | another in 1905. It was under the rubric "principal |
| 4 | earlier. While Percival noted that Sultan Rob was | 4 | alterations to the provincial boundaries" that Wingate's |
| 5 | living at Burakol at the time, his sketch map is really | 5 | memorandum stated that these districts, formerly |
| 6 | quite revealing. It shows, as you can see on the screen | 6 | a portion of the Bahr el Ghazal province, had been |
| 7 | in large letters, Sultan Rob's territory to the south of | 7 | incorporated now into Kordofan. |
| 8 | the Kiir. As I also mentioned, Percival reported that | 8 9 | Obviously this entailed a change to the provincial boundary. It must therefore be pertinent to compare the |
| 9 | Sultan Rob told him at that time that there were only | 10 | way in which the provincial boundary was described |
| 10 11 | Arabs to the west of him and that the so-called | 10 | before the transfer with the way it was described and |
| 12 | Bahr el Arab Percival's Bahr el Arab, which was the | 12 | depicted afterwards, in order to assess and to help in |
| 13 | Ragaba ez Zarga was uninhabited except for wandered | 13 | determining the location of the areas that Government |
| 14 | Arabs; not Dinka, Arabs. | 14 | officials considered were subject to the transfer. |
| 15 | Then we have the references in the February and | 15 | Let me start with the pre-transfer boundary. |
| 16 | March 1905 intelligence reports placing | 16 | Bahr el Ghazal became a province in 1902, and it's from |
| 17 | Sheihk Rihan Gorkwei's district or territory between the | 17 | that date up to 1905 that it's appropriate to examine |
| 18 | Lol and the Kiir Rivers, and Sultan Rob's country, which | 18 | how its boundary with Kordofan was described. But |
| 19 | presumably included his people, on the Kiir; not at | 19 | before doing so, let me make just a quick preliminary |
| 20 | 10°35' or 10°22', on the Kiir. | 20 | comment. |
| 21 | And we have the account of Lieutenant Walsh, who, | 21 | Had the Government's intention at the time been to |
| 22 | as I said, had replaced Bayldon in connection with the | 22 | fix the boundary between Bahr el Ghazal and Kordofan |
| 23 | operations ongoing on the Bahr el Arab recorded in the | 23 | along a parallel of latitude, such as the 10°35' or the |
| 24 | November 1905 intelligence report, which had indicated | 24 | 10°22'30", it would have been perfectly possible for |
| 25 | that from the point that Walsh had reached when he was | 25 | Condominium officials to say so. The fixing of just |
| | Page 22 | | Page 24 |
| | | | |

| 10.12 provincial boundary, wherever it tay. And again 2 Suggest that it's worth readility what the Chamber of 3 the International Court said in the El Salvador v 4 Honduma case, a reference which we've made before in 5 corn written pleadings, but which the SPI MrA has not 6 commented on: 6 The Chamber considers, particularly in the light of 8 the materials before it, that it is entitled to start 10 Fino a presumption that an inter-provincial boundary 10 which follows a river is likely to continue to follow it 11 a long as is counter must in the same green. 12 direction.* 13 That's from paragraph 244 of the 1992 judgment. 14 The SPLMA's position is that some of this is 15 elsevant. They first point nor that no provincial 16 boundaries ut the time were prescribed in any 17 constitutional, legislative or executive decree or 18 proclamation, and no official mays were issued showing 19 to the fact that because Wilkinson and Percival land 20 misodentified the Bahr of Arab, references to the 21 Bahr of Arab, references to the 22 Bahr of Arab, references to the 23 bare been reasted as a working administrative boundary, 24 but not a definite or permanent boundary. 25 They then contend—and I Philis this is probably to the fact that because Wilkinson and Percival land 26 misodentified the Bahr of Arab, references to the 27 Share or and a proper were necessarily indeterminate. At hest, a secording to the SPLM/A rejoinable, the blart of Arab area, the provincial boundary in the pre-1905 26 Arab to the lock of my legislative or executive decree establishing provincial boundary in the pre-1905 27 Araba to the lock of my legislative or executive decree establishing provincial boundary in the pre-1905 28 Arab to the lock of my legislative or executive decree establishing provincial boundary in the pre-1905 39 They then contend—and I Philis this is probably that this was not a legislate or executive decree establishing provincial boundary in the pre-1905 40 They t | , | | | |
|--|---------|---|---------|---|
| the International Court said in the El Sahvador v Handmare case, a reference which we've made before in our written pleadings, but which the SPLM/A has not commented on: The Chamber considers, particularly in the light of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it is likely to continue to follow it as long as its course runs in the same general it is only as it is constituted in the start of t | 10:17 1 | | | |
| that M MacDonald was asked about yesterday. I would suggest that although it may not have been produced by commented on: The Chamber considers, particularly in the light of the materials before it, that it is entitled to start of the materials before it that it is entitled to start of the materials before it is likely to continue to follow it as ong as its course runs in the same general direction." That's from paragraph 244 of the 1992 judgment. That's from paragraph 244 of the 1992 judgment. The SPI MA's position is that none of this is relevant. They first point out that no provincial boundaries, at the time were prescribed in any constitutional, legislative or executive decree or proclamation, and no official amps were issued showing hondrares until well after the transfer. They then contend — and I think this is probably the main argument — that provincial boundaries were proclamation, and no official almay may be a not a definite or permanent boundary. They den contend — and I think this is probably to the fact that because Wilkinson and Percival hand in the fact that because Wilkinson and Percival hand approximate, vague and frequently modified. They point to the fact that because Wilkinson and Percival hand approximate, vague and frequently modified. They point to the fact that because Wilkinson and Percival hand and the fact of the SPI-MA rejoindare, the Bart el Arab have the tensor, it is supproximate, vague and frequently modified. They point to the fact that because Wilkinson and Percival hand and that's why Baydon was ever criticised or stated to be inaccurately Condomination officials. Now, with respect to the contrision over the identity and course of the Bart el Arab, the Kitis and the LoI, and that's was not a legal requirement. Certainly the transfer wastr referred to in a proclamation or decree eight and the provincial boundary in the previous | 2 | - | 2 | - |
| out written pleadings, but which the SPLM/A has not commented on: The Chamber considers, particularly in the light of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the materials before it, that it is entitled to start of the star | 3 | | | |
| 6 Coverment officials, there was no question that 7 The Chamber considers, particularly in the light of 8 the materials before it, that it is entitled to start 9 from a presumption that an inter-provincial boundary in the previous laboration of the Sphrad Parks and the state of the sphrad Parks and the | | | | |
| The Chamber considers, particularly in the light of the materials before it, that it is entitled to start from a presumption that an inter-provincial boundary which follows a river is likely to continue to follow it as one as its course runs in the same general direction." That's from paragraph 244 of the 1992 judgment. That's from paragraph 244 of the 1992 judgment. The SPLMA's position is that none of this is relevant. They first point out that no provincial boundaries at the time were prescribed in any constitutional, legislative or executive decree or provincial boundaries at the time were prescribed in any constitutional, legislative or executive decree or provincial boundaries were such as the provincial boundaries were approximate, vegue and frequently modified. They point to the fart that becames Wilkinson and Perevial hand to the fart that becames Wilkinson and Perevial hand be an or fart and becames wilkinson and Perevial hand. The spl. MA's position is that none of this is relevant. They first point out that no provincial boundaries at the time were prescribed in any constitutional, legislative or executive decree or provincial boundaries, the point of the Bahr el Arab the places where they condominium officials. They then contend — and I think this is probably to the fart that becames Wilkinson and Perevial hand and the fart that becames Wilkinson and Perevial hand. The spl. MA's position is that none of this is relevant. They first point out that no provincial boundaries, were approximate, vegue and frequently modified. They point to the Bahr el Arab the places were refiseded to stated to be inaccurate by Condominium officials. The spl. Marcho's register and perevial hand and the provincial boundary in the pre-1905 Page 29 The provincial boundary in the pre-1905 Page 29 The provincial boundary in the pre-1905 Page 29 The provincial boundary in the pre-1905 Page 31 The should be pre-1905 Page 31 The provincial boundary in the pre-1905 The provincial boundary in the pre-1905 The prov | | 2 - | | |
| 8 the materials before it, that it is entitled to start 9 from a presumption that an inter provincial boundary 10 which follows a river is likely to continue to follow it 11 as long as its course runs in the same general 12 direction." 13 That's from paragraph 244 of the 1992 judgment. 14 The SPI.M/AS position is that none of this is 15 relevant. They first point out that no provincial 16 boundaries at the time were prescribed in any 17 constitutional, legislative or executive decree or 18 proclamation, and no official maps were issued showing 19 boundaries at the time that provincial boundaries were 20 They then contend – and I think this is probably 21 the main argument – that provincial boundary in the pre-1905 22 approximate, vague and frequently modified. They point to the fact that because Wilkinson and Percival mistook 24 misdentified the Bahr el Arah, references to the 25 Bahr el Arab as the provincial boundary in the pre-1905 26 As to the lack of any legislative or executive 27 decree establishing provincial boundary. 28 has been treated as a working administrative boundary, 30 have been treated as a working administrative boundary, 4 but not a definite or permanent boundary, 5 As to the lack of any legislative or executive 6 decree establishing provincial boundary in the pre-1905 6 decree establishing provincial boundary in the pre-1905 6 decree establishing provincial boundary, and that has wan not a legal requirement. Certainly the 9 transfer wasn't referred to in a proclamation or decree 16 either, but nobody questions the validity of the 17 transfer. 18 We also had a map that was discussed yesterday, 19 Mardon's revised muscling have already explained 10 that were sent to Claro and to London, and no one ever 10 to province the description of the boundary contained in the corner of the course of the rivers such as the Bahr el Arab as the povincial boundary in the pre-1905 19 the factor of the factor of the place of the course of the rivers such as the Bahr el Arab as the povincial boundaries, the e | | | | |
| 9 from a presumption that an inter-provincial boundary which follows a river is likely to continue to follow it as long as its course runs in the same general 12 direction." 13 That's from paragraph 244 of the 1992 jadgment. 14 The SPLMA's position is that none of this is 15 relevant. They first point out that no provincial to boundaries at the time were prescribed in any 16 constitutional, legislative or executive decree or 17 constitutional, legislative or executive decree or 18 proclamation, and no official maps were issued showing 19 boundaries at the tamaster. 20 They then contend - and I think this is probably 21 the main argument - that provincial boundaries were 22 approximate, vague and frequently modified. They point 23 to the fact that because Wilkinson and Percival had 24 misidentified the Bahr el Arab, references to the 25 Bahr el Arab as the provincial boundaries, the 26 according to the SPI M'A rejoinder, the Bahr el Arab may 27 have been treated as a working administrative boundary, 38 have been freated as a working administrative boundary, 4 but not a definite or permanent boundary, 5 As to the lack of any legislative or executive 6 decree establishing provincial boundaries, the 9 transfer wasn't referred to in a proclamation or decree 10 either, but nobody questions the validity of the 11 transfer. 12 Noneetheless, there were definite and repeated 13 references to the Bahr el Arab as the provincial 14 Doundary in official documents, official amoust reports 15 that were sent to Cairo and to London, and no one ever 16 questioned the description of the boundary of the bundary contained in the 17 thus very control to the other contend that this was not a legal equirement. Certainly the 18 transfer wasn't referred to in a proclamation or decree 19 that were sent to Cairo and to London, and no one ever 19 that were sent to Cairo and to London, and no one ever 10 either, but nobody questions the validity of the 11 transfer. 12 Noneetheless, there were definite and repeated 13 references to the Bahr e | | | | |
| 10 which follows a river is likely to continue to follow it as long as its course runs in the same general direction. 12 direction. 13 That's from pargraph 244 of the 1992 judgment. 14 The SPILMA's position is that none of this is relevant. They first point out that no provincial boundaries at the time were prescribed in any constitutional, legislative or executive decree or constitutional, legislative or executive decree or ground and the state of the Bahr el Arab as the provincial boundaries the point of the main argument – data provincial boundaries are stated to the course of the Bahr el Arab in tiss proclamation, and no official maps were issued showing problematic and the main argument – data provincial boundaries were 22 approximate, vague and frequently modified. They point 22 approximate, vague and frequently modified. They point 23 to the fact that because Wilkimson and Percival had missidentified the Bahr el Arab bath el Arab betone the ransfer, it's obviously true that both Wilkinson and Percival missook the Ragaba ez Zanga for the Bahr el Arab or the places where they crossed it. Bat it was responsible to the fact that because Wilkinson and Percival mate and the places where they crossed it. Bat it was responsible to the same part of the SILMA rejoinder, the Bahr el Arab and the Lol, and that shis was not a felline to permanent boundary. 10:19 1 annual reports were necessarily indeterminate. At best, a both of the lack of any legislative or executive decree establishing provincial boundaries, the decree establishing provincial boundaries, the control and the substance of the places where they crossed it. Bat it was responsible to the same part of the substance of the places where they crossed it. Bat it was responsible to the places where they crossed it. Bat it was responsible to the places where they crossed it. Bat it was responsible to the places where they crossed it. Bat it was responsible to the places where they crossed it. Areas to the south of it formerly were in | 21 | Kordofan/Bahr el Ghazal boundary following the | | |
| 24 cannot be considered to be an official map. I would 25 point out, however, that this map was contained in the 26 abar el Arab to have been the pre-transfer provincial 27 boundary. Areas to the south of it formerly were in | 22 | | 22 | Bayldon. |
| point out, however, that this map was contained in the 25 boundary. Areas to the south of it formerly were in | 23 | Our colleagues on the other contend that this map | 23 | This shows that Wingate considered the actual |
| | 24 | | 24 | |
| Page 30 Page 32 | 25 | point out, however, that this map was contained in the | 25 | boundary. Areas to the south of it formerly were in |
| | | | | |
| | | Page 30 | | Page 32 |

| 10:23 | 1 | Bahr el Ghazal province; as a result of the transfer, | 10:27 1 | documentary record as a whole is examined, the record |
|-------|----|--|---------|--|
| | 2 | now they weren't. As a result of the transfer the | 2 | fits together with really quite remarkable clarity, and |
| | 3 | districts of the two Sultans to the south of that river, | 3 | it supports the Government's position that the area |
| | 4 | formerly part of the Bahr el Ghazal province, were | 4 | transferred in 1905 lay to the south of the |
| | 5 | incorporated into Kordofan, thus changing the provincial | 5 | Bahr el Arab. |
| | 6 | boundary. | 6 | That's precisely where the Governor-General of the |
| | 7 | It was for this reason that the 1905 annual reports | 7 | Sudan said the transferred area lay. It's consistent |
| | 8 | for Kordofan and Bahr el Ghazal no longer stated that | 8 | with the March 1905 intelligence report, and with the |
| | 9 | the boundary was the Bahr el Arab, as they had done in | 9 | annual reports for Kordofan and Bahr el Ghazal of that |
| 1 | 0 | earlier editions; instead they referred to the transfer. | 10 | year; it's consistent with the Government's knowledge of |
| 1 | 1 | Now, the parties agree that the southern limits of | 11 | the correct identity of the Bahr el Arab by the time |
| 1 | 12 | the transferred areas were not defined in 1905, either | 12 | that the transfer was made and was referred to; it's |
| 1 | 13 | in Wingate's memorandum or elsewhere. It's for this | 13 | consistent with where Condominium officials considered |
| 1 | 14 | reason that the Watkiss Lloyd map of 1910 and the whole | 14 | the districts of Sultan Rob and Sheihk Rihan Gorkwei |
| 1 | 15 | series of sheet 65 maps that have been produced by the | 15 | were situated; and it's consistent with the fact that |
| 1 | 16 | parties that began to be published afterwards in some | 16 | the pre-transfer provincial boundary was recorded as |
| 1 | 17 | instance labelled the new boundary as "approximate". | 17 | being the Bahr el Arab, while the post-transfer boundary |
| 1 | 18 | This has been highlighted by the SPLM/A, for example, on | 18 | lay to the south of that river. |
| 1 | 19 | the Lloyd map. This is a 1910 map. | 19 | In contrast, we would suggest that the SPLM/A's |
| 2 | 20 | Now, the Tribunal will observe that, even if | 20 | position cannot be reconciled with any of these facts. |
| 2 | 21 | approximate, the provincial boundary no longer tracks | 21 | There is not a single mention anywhere in the record |
| 2 | 22 | the Bahr el Arab; it lies south of it. | 22 | that the pre-transfer boundary was located along the |
| 2 | 23 | Because the southern limits of the transferred area | 23 | 10°35' latitude or halfway between that latitude and |
| 2 | 24 | had not been delimited at that time they didn't | 24 | 10°10'. None of those latitudes are ever mentioned in |
| 2 | 25 | necessarily follow any river, like the Bahr el Arab | 25 | any of the contemporary documents. You can't find them. |
| | | D 22 | | D 25 |
| | | Page 33 | | Page 35 |
| | | | | |
| 10:25 | 1 | and because the Twic, formerly under Sheihk Rihan, were | 10:28 1 | They didn't exist. They simply weren't in the |
| | 2 | re-transferred back to Kordofan in the 1920s, post-1905 | 2 | Condominium official' minds. |
| | 3 | maps of the area do not show the boundary in exactly the | 3 | Nor is there any suggestion from contemporary |
| | 4 | same place. Both parties have illustrated this fact on | 4 | reports that Sultan Rob's territory was viewed as |
| | 5 | illustrative maps: ours is at page 146 of our memorial; | 5 | somehow extending up to 10°35'. Even Sultan Rob had |
| | 6 | the SPLM/A's is at map 60. I will use the SPLM/A's map | 6 | told Percival that the Ragaba ez Zarga was uninhabited |
| | 7 | to illustrate the position. | 7 | except for wandered parties of Arabs. |
| | 8 | The Tribunal will note that these are all post-1905, | 8 | Nothing suggests that the Government at the time had |
| | 9 | post-transfer, post-change in the provincial boundary | 9 | the slightest intention to transfer or did transfer |
| 1 | 0 | maps. The various depictions of the post-1905 boundary | 10 | areas stretching up to the SPLM/A's claim line from |
| 1 | 1 | do not match but they all show in the relevant area the | 11 | Bahr el Ghazal to Kordofan at that time. Areas north of |
| 1 | 12 | boundary lying to the south of the Bahr el Arab in the | 12 | the Bahr el Arab were already part of Kordofan before |
| 1 | 13 | same general place. | 13 | the transfer. They were not and they could not have |
| 1 | 14 | Now, ultimately the Kordofan/Bahr el Ghazal boundary | 14 | been transferred to that province in that year. |
| 1 | 15 | became fixed upon independence in 1956 that's the red | 15 | That is why the Government submits that the area of |
| 1 | 16 | line being highlighted and both parties accept that | 16 | the nine Ngok Dinka chiefdoms transferred to Kordofan in |
| 1 | 17 | line as the southern limits of the transferred area. | 17 | 1905 is the area lying between the Bahr el Arab river |
| 1 | 18 | But for the transfer, however, the boundary would have | 18 | and the southern limits of the 1956 provincial boundary. |
| 1 | 19 | remained the Bahr el Arab, as referred before the | 19 | Thank you for your patience and attention, |
| 2 | 20 | transfer. It's thus the area between the Bahr el Arab | 20 | Mr President. I think at this point we were going to |
| 2 | 21 | and the post-1905 provincial boundary that was the area | 21 | move to the witness phase. |
| 2 | 22 | of the Ngok Dinka chiefdoms transferred to Kordofan in | 22 | My understanding but it perhaps can be confirmed |
| 2 | 23 | 1905. | 23 | by colleagues on the other side is we were originally |
| 2 | 24 | Mr President, members of the Tribunal, the | 24 | going to present two witnesses that the SPLM/A wanted to |
| 2 | 25 | Government of Sudan submits that when the contemporary | 25 | cross-examine; I understand they may only want to |
| | | | | |
| | | Daga 24 | | Dogg 26 |
| | | Page 34 | | Page 36 |

| Day 4 | | | Tuesday, 21st April 2009 |
|---------|---|---------|---|
| 10:30 1 | cross-examine one of those witnesses now. If that is | 10:38 1 | (11.03 am) |
| 2 | the case, we propose to call that witness. | 2 | MS MILES: Atem-dit, you are from the Anyiel section of |
| 3 | THE CHAIRMAN: Mr Born, can you confirm? | 3 | the nine Ngok Dinka; right? |
| 4 | MR BORN: Yes, Mr Chairman. We will be cross-examining | 4 | A. Yes. |
| 5 | Zakaria Atem, the only Ngok Dinka witness tendered by | 5 | Q. And the Jong yom subsection is your subsection? |
| 6 | the Government. | 6 | A. Yes, Anyiel is the main section I belong to. |
| 7 | MR BUNDY: Right, thank you. So if somebody can get | 7 | Q. In your witness statement you say you were born in |
| 8 | Mr Zakaria and bring him in, I will relinquish the | 8 | Huk Lonlual; correct? |
| 9 | floor. (Pause) | 9 | THE INTERPRETER: Repeat again, please. |
| 10 | (10.31 am) | 10 | MS MILES: In your witness statement you say you were born |
| 11 | MR ZAKARIA ATEM DIYIN THIBEK DENG KIIR (called) | 11 | in Huk Lonlual? |
| 12 | (Evidence interpreted) | 12 | |
| 13 | THE CHAIRMAN: I welcome Mr Zakaria Atem Diyin Thibek Deng | 13 | Q. Noong Lual? |
| 14 | Kiir. Please be kind enough to read the affirmation | 14 | A. Noong Lonlual. |
| 15 | which is in front of you in Arabic. | 15 | Q. And "Lonlual" means "monkey"; correct? |
| 16 | THE WITNESS: I solemnly declare upon my honour and | | A. Yes, it is true. At the time when I was not born yet |
| 17 | conscience that I will have to say the truth, the | 17 | there were so many monkeys, that's why the area is |
| 18 | whole truth, and nothing but the truth. | 18 | • • • |
| | | | called after the monkeys. |
| 19 | THE CHAIRMAN: I invite questions from the part of the | 19 | Q. And Noong Lonlual is on the eastern bank of the Nyamora? |
| 20 | SPLM. | 20 | THE INTERPRETER: Repeat again, please; to the west bank |
| 21 | (10.34 am) | 21 | of what? |
| 22 | Cross-examination by MS MILES | 22 | MS MILES: Eastern bank of the Nyamora. |
| 23 | Q. Atem-dit, choibak. I have a few questions for you | 23 | THE INTERPRETER: Of what? Can I ask again, please? |
| 24 | today. You are from the Anyiel section of the | 24 | MS MILES: Umm Biero. |
| 25 | Ngok Dinka; yes? | 25 | A. If you are going to Abyei, towards Na'am, it is |
| | Page 37 | | Page 39 |
| 10:35 1 | (Pause to resolve a technical problem) | 11:07 1 | located It is located to the west if you are going |
| 2 | We will start again. Atem-dit, choibak. I have | 2 | towards Na'am. |
| 3 | a few questions for you today. You are from the Anyiel | 3 | Q. Towards Na'am? |
| 4 | section of the Ngok Dinka? You are from the Anyiel | 4 | A. Yes. |
| 5 | section of the nine Ngok Dinka; is that correct? | 5 | Q. In Dinka, Noong? |
| 6 | I don't think the witness can hear the headphones. | 6 | A. Na'am. |
| 7 | MR BORN: Perhaps, Mr Chairman, just as a practical | 7 | Q. And in Dinka, Noong? |
| 8 | solution and in light of the time, would it be | 8 | A. Noong. |
| 9 | possible for an interpreter to just come and sit next | 9 | Q. Thank you. Could we get a map up, please. |
| 10 | | 10 | So your birthplace is near Na'am, or Noong in Dinka, |
| 11 | | 11 | and you were born there in 1938 or 1939? |
| 12 | | 12 | A. Yes. The date of birth on the birth certificate was |
| 13 | | 13 | always approximate and not exact, according to the exact |
| 14 | | 14 | date of birth. |
| 15 | | 15 | Q. That's something I'm learning, thank you. |
| 16 | - | 16 | If you look at the above map, this is a map dated |
| 17 | | 17 | from 1936, so it is dated around your approximate birth |
| 18 | | 18 | date. Do you see the red box pointing to Abyei Town, |
| | | | |
| 19 | MR BORN: We are fully agreed. | 19 | and the box pointing to Noong, or Na'am as it is on the |

21 A. Yes, I have seen them.

22 Q. And Noong Lual is, did I hear you correctly, immediately

23 south of Noong?

24 A. Repeat again, please.

25 Q. On the map, could you please show me -- just point on

Page 40

Page 38

a solution even if it doesn't use the full

(A short break)

technological sophistication.

20 THE CHAIRMAN: We will take a break now for half an hour. 21 MR BORN: Perhaps the parties will endeavour to find

22

23

24 (10.38 am)

THE GOVERNMENT OF SUDAN / THE SUDAN PEOPLE'S LIBERATION MOVEMENT/ARMY Day 4 11:09 1 11:17 1 defer to him. the screen, I can see -- where your birthplace of Noong Lonlual is on that map. 2 PROFESSOR CRAWFORD: No, sir, I indicated no desire 3 A. Noong Lonlual is the birthplace of my mother, and not my 3 whatever to ask a question. 4 JUDGE AL-KHASAWNEH: I speak first in Arabic, and say ... birthplace ... 5 THE INTERPRETER: Repeat again. 5 (Addresses the witness in Arabic) 6 A. I went to Noong Lonlual because my maternal uncle asked 6 (Interpreted) I would like to thank you very much that my mother come to give birth to me in Noong 7 for accepting to come before this court to answer our 8 questions. I will ask these questions in English. 8 9 (In English) First, there have been allegations that 9 O. You said in your witness statement that you were born in 10 you had been intimidated and threatened. Those 10 Huk Lonlual. Is that where you were born? 11 allegations have been denied. Could you briefly tell us 11 12 12 Q. Can you tell me where you were initiated? Sorry, the truth or otherwise of those allegations? initiated: where he entered his age set. 13 A. When I came here I was pretty sure for the fact that 13 14 A. Malual Ador. anyone who is not giving testimony in favour of the 15 15 Q. Malual Ador. If it is okay, I'm going to move to SPLM, that person is not a good one. 16 a different map. This one is not terribly clear. To be 16 JUDGE AL-KHASAWNEH: Please translate correctly. What he 17 said was, "I'm threatened with [my] life". This is 17 fair to you, the map I'm putting up is a map submitted 18 18 by the SPLM called the "Ngok presence map". very important. Can you ask him again to repeat. The 19 19 It is still not clear, and I apologise. I thought translation has to be correct and precise. THE INTERPRETER: Repeat the question, please. 20 we had it bigger. I am going to go through some of the JUDGE AL-KHASAWNEH: It's not my question. I asked 21 places mentioned in your witness statement, and plot 22 them very approximately on this map. 22 a question. You did not translate the answer as fully 23 23 I said "very approximately"; that was wrong. I am as you should have. 24 24 going to take you to places in your statement that the Could you translate it as he said: a person who does 25 community members of the nine Ngok Dinka have GPSed, or 25 not give evidence in support of the SPLM/A is thought of Page 41 Page 43 11:14 1 11:19 1 as a bad person, and would be threatened in his life. places we have obtained from other maps that are all together on this map, and just point to the places that 2 That is literally the translation. So, please, be you've named so we know where they are. 3 careful with the next. THE INTERPRETER: Okay. 4 A. What you said is not clear to me. All my statement 5 pertinent to this point, I have stated them in a written 5 JUDGE AL-KHASAWNEH: Thank you very much. 6 statement, and you have to refer to it. The second question, and this is about a different 7 7 Q. And I'm just asking you, please, Atem-dit, to help me, matter. In your written testimony, and I refer in 8 because I am not familiar with these lands, to find 8 particular to paragraph 28 of that testimony, you said where the places you refer to are. that as a member of the ABC nominated by the Government 10 10 A. Name the places you want me to locate. of Sudan you attended all meetings of the Commission and

- 11 Q. Abin Anguui.
- 12 A. This is not a language I understand, the way you
- pronounce the terms, or the names.
- 14 MS MILES: Yin shileich, Atem-dit. I have no further
- 15
- 16 A. I have answered all these questions in a written paper,
- and I am an old man, I'm always telling the truth. 17
- 18 THE CHAIRMAN: I thank you. I understand that
- 19 Judge Al-Khasawneh wants to ask a question to the
- 20 witness.
- 21 (11.17 am)
- 22 Questions from THE TRIBUNAL
- 23 JUDGE AL-KHASAWNEH: Before that, Mr President, I notice
- 24 that counsel for the Government of the Sudan had
- 25 indicated that he wished to ask a question. I would

- 11 participated in all field visits. And I am now quoting:
- 12 "The leaders of the two parties and the experts made
- 13 it clear in all public meetings that the ABC task is to
- define and demarcate the area [I repeat, 'the area'] of 14
- 15 the nine Ngok Dinka chiefdoms transferred to Kordofan
- 16 from Bahr el Ghazal ..."
- 17 And you also said --
- 18 A. The question is so long, please just ask -- make the
- 19 question shorter, be shorter.
- 20 JUDGE AL-KHASAWNEH: Okay, now I put the question. This
- 21 was an introduction to the question. Now I will ask
- 22 the question.
- 23 Did the experts make it clear, and say so in
- 24 an express way, that the ABC task is to define the area
- 25 of those nine chiefdoms transferred in 1905?

Page 44

Page 42

| Day 4 | | Ī | Tuesday, 21st April 200 |
|--|---|--|--|
| 11:24 1 2 3 4 | A. Actually I'm the president of the or I'm representing the NCP in Abyei, and I am the political supervisor in Abyei. I was part of the five representatives of the Government in the ABC. | 11:31 1 2 3 4 | in clear in all public meetings that the ABC task", et cetera. THE INTERPRETER: He said that there is no conformity between |
| 5 6 7 8 | We went to Mathiang Diil, we travelled by car. Yes, went to the house of the Sheikh, of Arop Biong, we went to visit his house. This was his old house, and all of us, the representatives of the SPLM, the representatives | 5 6 7 8 | MR BORN: Can you perhaps translate the paragraph 28 you have in Arabic there in front of you? (Paragraph translated) A. That is the mandate of the experts, but they have not |
| 9 10 11 | of the Government and the experts, all of us paid money. And the area so-called Mathiang Kiir is located to the southern part of to the south of Abyei. So | 9 10 11 | adhered to the area according to 1905. We went to the same area but they have not focused on the area in question which is referred to in their mandate. |
| 12 13 14 15 | because there are some troubles the sheikh goes there and the Dinka are living to the north of Abyei, and to the south with the Nazir as well. So this is the truth, we went there and we have found Mathiang Diil. Then we went back. | 12 13 14 15 16 | PROFESSOR REISMAN: Excuse me, interpreter, I had posed a simple question to the witness and I just wanted an answer: had he read the second sentence of paragraph 28, and is it an accurate translation? That's all I want to know from the witness. |
| 17 18 19 20 | Any further questions, please don't hesitate. JUDGE AL-KHASAWNEH: (Addresses the witness in Arabic) (Interpreted) Explaining their mission, the experts, were they clear in stating that their mission is to | 17 18 19 20 | THE INTERPRETER: But the witness elaborated. PROFESSOR REISMAN: No, I don't want an elaboration, I didn't want an elaboration; I am asking the witness a factual question. |
| 21 22 23 24 | define and demarcate the area transferred to Kordofan, the area of the nine chiefdoms of the Dinka Ngok transferred to Kordofan in 1905? | 21 22 23 24 | The second sentence of paragraph 28, is that a correct statement of what happened? THE INTERPRETER: Yes. PROFESSOR REISMAN: Could you please confirm with the |
| 25 | agreement, and he said that this is the place where the Page 45 | 25 | witness? Page 47 |
| 11:28 1 2 3 4 5 6 7 8 | Dinka have been transferred, but this is a small triangle, so it is not enough to accommodate even the owners of the area. So as a Dinka tribe member I think that this is unfair, because Dinka used to extend from the south from the north and to the south as well. JUDGE AL-KHASAWNEH: Shukran jazeelan, thank you very much. THE CHAIRMAN: There is a question from the part of | 11:35 1 2 3 4 5 6 7 8 | A. Yes, the answer I have given you is the answer. PROFESSOR REISMAN: I'm sorry, I don't mean to belabour it, and I will relieve the witness if he can't answer the question. But the question solicits either a "yes" answer or a "no" answer. "n'am" or "laa"? A. No. No. The answer is: no. PROFESSOR REISMAN: That what he gave in that statement is not correct? |
| 9 10 11 12 13 14 15 | Professor Reisman. PROFESSOR REISMAN: I have a simple question for the witness, please translate. Could you be kind enough to look at the second sentence of paragraph 28. Could I ask the interpreter to read that sentence to the witness in Arabic. THE INTERPRETER: The whole paragraph? PROFESSOR REISMAN: Just the second sentence. | 9 10 11 12 13 14 15 | THE INTERPRETER: He has elaborated. You said you just want a yes or no [answer], and he said: no. Is that the task PROFESSOR REISMAN: Thank you. I have no other questions. MR BORN: Mr Chairman, can I raise a small point of housekeeping. I haven't checked personally myself, but I'm told that we have not received a copy of the Arabic version of the witness statement which the |

(Sentence translated) 17

18 A. So it is not a grave, it is a house of the -- which

19 locates 2.5 kilometres to the south of the --

20 PROFESSOR REISMAN: I beg your pardon, interpreter,

I don't mean to be rude to interrupt. Are we talking 21

22 about paragraph 28?

23 THE INTERPRETER: Yes.

PROFESSOR REISMAN: I read the second sentence as saying: 24

"The leaders of the two parties and the experts made 25

Page 46

19 THE CHAIRMAN: I'm sure that the Government will provide 20 you with a copy.

witness has in front of him. We would be grateful if

21 PROFESSOR CRAWFORD: Of course you can have it. I'm

22 sorry, I have to make sure that he has the right

23 version, but we'll fix that as soon as there's

we could be given that copy.

24

17

18

25 MR BORN: Wouldn't it be easier if I just took what's in

Page 48

| 11:38 1 | front of him? That's what he was referring to. | 11:47 1 | (11.47 am) |
|----------------------|--|----------------------------------|---|
| 2 | PROFESSOR CRAWFORD: Yes, you can have it. I'm sorry, | 2 | MR AYOM MATIT AYOM (affirmed) |
| 3 | I don't know the provenance of it, but you're welcome | 3 | (Evidence interpreted) |
| 4 | to the piece of paper. | 4 | JUDGE AL-KHASAWNEH: Mr Ayom Matit Ayom, thank you very |
| 5 | MR BORN: I guarantee you that I will make a copy | 5 | much for agreeing to testify before us. Thank you for |
| 6 | immediately and hand it to you. He has looked at it | 6 | testifying before us. |
| 7 | during the testimony, he said it's his statement. | 7 | I would be grateful if you could answer only one |
| 8 | I suggest that you just ask him to hand it to me now, | 8 | question that I would like to put to you, and that |
| 9 | please. The PCA will copy it. | 9 | question is: have you been intimidated with regard to |
| 10 | THE CHAIRMAN: Thank you. No other questions? | 10 | your testimony or asked not to appear before us or to |
| 11 | JUDGE AL-KHASAWNEH: Mr President, I think there was | 11 | modify it? Thank you. |
| 12 | a misunderstanding. The answer was literally lost in | 12 | A. Actually it is not me who has been actually threatened, |
| 13 | translation. | 13 | but my brother who is coming after me. He was told: if |
| 14 | I think what was meant by Professor Reisman is | 14 | you go to The Hague you will do one of the two things, |
| 15 | whether the experts were clear in saying that their | 15 | either change your statements or refuse to go; otherwise |
| 16 | mandate is confined to delimiting the area of the nine | 16 | you will bear the consequences. And don't ask us, you |
| 17 | Ngok Dinka chiefdoms that were transferred to Kordofan | 17 | will be responsible for that. |
| 18 | in 1905. The witness in his earlier elaboration said | 18 | JUDGE AL-KHASAWNEH: If that's all, that's the only thing |
| 19 | that they did not follow that task, and when you asked, | 19 | that I wanted to ask about. |
| 20 | "Can you answer me by saying 'yes' or 'no", he was | 20 | THE CHAIRMAN: So I thank you, and I call now |
| 21 | thinking of that, that they did not follow their task, | 21 | Mr Majak Matet Ayom. |
| 22 | and that is what he meant by "no". | 22 | (11.52 am) |
| 23 | That is my understanding, but this is a very | 23 | MR MAJAK MATET AYOM (affirmed) |
| 24 | important point, and I think there should be a way of | 24 | (Evidence interpreted) |
| 25 | verifying this. | 25 | JUDGE AL-KHASAWNEH: Mr Majak Matet Ayom, I would like to |
| | Page 40 | | Page 51 |
| | Page 49 | | Page 51 |
| | | | |
| 11:40 1 | I'm sorry, I understand that the witness has come | 11:53 1 | thank you for agreeing to answer my questions. |
| 2 | from a long way, and he might be tired, and I've no wish | 2 | I would like first to ask you whether you were in |
| 3 | whatever to detain him, but I think this is something | 3 | any way intimidated or threatened in an attempt to cause |
| 4 | that we should think about. | 4 | you not to testify before us, or to change your |
| 5 | PROFESSOR REISMAN: I had simply wished to confirm that | 5 | testimony. We heard something to this effect from your |
| 6 | the second sentence of paragraph 28 of the English | 6 | brother, but I would like to hear it from you. |
| 7 | translation of the witness's statement says that "the | 7 | A. For me, I don't find myself subject to threat by any |
| 8 | leaders of the two parties and the experts said", and | 8 | person. I only can feel threatened by God. But any |
| 9 | not simply that "the experts said", and I simply | 9 | person, I don't see that there is room for any person to |
| 10 | wanted a confirmation that that was correct. | 10 | threaten me. |
| 11 | A. So the experts have neglected the area. We have visited | 11 | Please go ahead. If you have anything to ask me, |
| 12 | Mathiang Diil, they have neglected it and they have not | 12 | ask me. |
| 13 | reported it in their final report to the presidency. It | 13 | JUDGE AL-KHASAWNEH: My second question is as follows: you |
| 14 | was not clear in their report. They left aside the | 14 | mentioned in paragraph 4 of your written testimony |
| 15 | issue of Mathiang Dill according to 1905 and they | 15 | that the Ngok migrated in two stages, first composed |
| 16 | started doing other work which is not clear in the | 16 | of six chiefdoms, and the second of three, and that: |
| 17 | mandate. So they made a new map of their own creation. | 17 | "By the end of the Turkish rule both groups were |
| 18 | So they put in the map areas which belonged to the | | reciding in Develit poyt to the Twii " |
| 19 | so they put in the map areas which belonged to the | 18 | residing in Baralil, next to the Twij." |
| | Arabs, and not belonged to the Dinka. | 18 19 | I take it this is south of the River Kiir, or |
| 20 | | | |
| 20 21 | Arabs, and not belonged to the Dinka. | 19 | I take it this is south of the River Kiir, or |
| | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we | 19 20 | I take it this is south of the River Kiir, or Bahr el Arab. |
| 21 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for | 19 20 21 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your |
| 21 22 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for Judge Al-Khasawneh to ask questions to other | 19 20 21 22 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your testimony, that is in paragraph 5, that the Alei |
| 21 22 23 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for Judge Al-Khasawneh to ask questions to other witnesses. (Pause) | 19 20 21 22 23 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your testimony, that is in paragraph 5, that the Alei subsection of the Ngok is known as the chiefdom that: |
| 21 22 23 24 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for Judge Al-Khasawneh to ask questions to other witnesses. (Pause) So Judge Al-Khasawneh would like to ask questions to Mr Ayom Matit Ayom. | 19 20 21 22 23 24 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your testimony, that is in paragraph 5, that the Alei subsection of the Ngok is known as the chiefdom that: " went far to the north and east but returned south of the River Kiir by the end of Turkish rule." |
| 21 22 23 24 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for Judge Al-Khasawneh to ask questions to other witnesses. (Pause) So Judge Al-Khasawneh would like to ask questions to | 19 20 21 22 23 24 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your testimony, that is in paragraph 5, that the Alei subsection of the Ngok is known as the chiefdom that: " went far to the north and east but returned |
| 21 22 23 24 | Arabs, and not belonged to the Dinka. THE CHAIRMAN: Okay, I thank you very much. I think we should stop here and have a possibility for Judge Al-Khasawneh to ask questions to other witnesses. (Pause) So Judge Al-Khasawneh would like to ask questions to Mr Ayom Matit Ayom. | 19 20 21 22 23 24 | I take it this is south of the River Kiir, or Bahr el Arab. You also mention in the next paragraph of your testimony, that is in paragraph 5, that the Alei subsection of the Ngok is known as the chiefdom that: " went far to the north and east but returned south of the River Kiir by the end of Turkish rule." |

| | | 12.04 | |
|--|--|--|--|
| 11:55 1 | Are you saying that the nine Ngok chiefdoms were | 12:06 1 | Deng Monyluak, and they came to me as representatives of |
| 2 | situated south of the Kiir by the end of Turkish rule? | 2 | SPLA, and they came and told me, "Majid, your statement |
| 3 | That is my question. | 3 | is a clear manifest of a sellout of Dinka land to |
| 4 | A. Well, it could all be true except for one point I beg to | 4 | Government of Sudan. We are coming here for two main |
| 5 | refute. That is related to Baralil. I think it is | 5 | purposes: one, either you change the course of your |
| 6 | a misconcept and a miswriting. I didn't say Baralil, | 6 | statements and testimony, or create, by a way or |
| 7 | but I said Baar, and this Baar is a point which is | 7 | another, some means to disable you not to go The Hague. |
| 8 | located at Ngol area, where my grandfather Biar was | 8 | Otherwise you will face consequences. |
| 9 | born; Baar in Ngol, where my grandfather was born. | 9 | JUDGE AL-KHASAWNEH: Thank you very much. I would like |
| 10 | About the nine chiefdoms of Ngok, three of them are | 10 | now to put a question relating to a different matter |
| 11 | located around Ngol area, and some around Abyei, and | 11 | to you. |
| 12 | others in the area of Kiir. But regarding Alei tribe, | 12 | In your written testimony you describe your people, |
| 13 | Alei tribe is centred in Ngol area. They have been well | 13 | the Ngok Dinka, as "warrior cattle herders". This is in |
| 14 | in that until 1964, when the war broke out. | 14 | paragraph 3 of your testimony. |
| 15 | JUDGE AL-KHASAWNEH: Thank you. I think my question is | 15 | THE INTERPRETER: I beg your pardon, can you repeat that |
| 16 | not where are they situated now or in 1965; my | 16 | again? |
| 17 | question is whether the nine chiefdoms and this is | 17 | JUDGE AL-KHASAWNEH: Yes. In Mr Kur's testimony, in |
| 18 | what is found in your statement were all situated | 18 | paragraph 3 of that testimony, he describes his |
| 19 | south of the river at the end of Turkish rule. That | 19 | people, the Ngok Dinka as "warrior cattle herders". |
| 20 | is what you say in your statement. | 20 | The Messiriya, like the Ngok Dinka, are also warrior |
| 21 | So the question is not where | 21 | cattle herders. Both are pastoralist nomadic people, |
| 22 | A. I thought I have just told you that six tribes of the | 22 | who practice sometimes seasonal agriculture. |
| 23 | Ngok Dinka are in different areas. But particularly | 23 | Is there any basis for a distinction in their |
| 24 | there are three tribes by name Bongo, Alei, Achak are in | 24 | relationship to the land, given that this is the |
| 25 | the Ngol area. | 25 | characteristic of both people? |

A. Yes, I've been threatened. JUDGE AL-KHASAWNEH: Would you kindly elaborate a little bit on it? A. Well, after this change of the testimony records, two | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | until 1965. Earlier to that they were living as true brothers, and there was no point of Dinka saying that, yes, sell a piece of land to an Arab, or an Arab saying that they had sold a piece of land to a Dinka. They were just living as true brothers. JUDGE AL-KHASAWNEH: Thank you. This was not my question, I will pose it again. My question is whether they it has been argued that the one people have different rights in the land than the other because one people, the Ngok, are less nomadic or less pastoralist than the Messiriya. In practice in southern Kordofan was there a distinction in relation to the land based on the two groups, based on the fact that one was more nomadic and the other one was more agriculturalist? I'm very sorry, thank you very much for the interpretation. I wonder if I may put this in Arabic, maybe it will be clearer for the witness. (Addresses the witness in Arabic) A. We in southern Kordofan, we have procedures and rules to govern the procedures of these nomads, but the land belongs to the state. And this makes that the local traditional laws to come up with some rules and |

| 12:14 1 | believing that the land belongs to the Government, and | 12:18 1 | the questions of excess of mandate. It's also relevant |
|----------|--|----------|--|
| 2 | | 2 | to your interpretation of the formula, to which I will |
| 3 | | 3 | revert in due course, but not in this presentation. |
| 4 | | 4 | When it comes to delimitation, however, the extent |
| 5 | · | 5 | of the transfer is a question of fact and not of law, |
| 6 | | 6 | whether you accept the territorial interpretation or the |
| 7 | • | 7 | tribal interpretation. Identifying the transferred area |
| 8 | - | 8 | or the area of the transferred people, whichever of the |
| 9 | | 9 | two interpretations you adopt, is certainly not |
| 10 | | 10 | a question of international law. International law did |
| 11 | | 11 | not speak about the modalities of inter-provincial |
| 12 | (12.15 pm) | 12 | transfer within the Condominium in 1905. |
| 13 | | 13 | Nor is it a question of Ngok or Messiriya customary |
| 14 | - | 14 | law, which were not part of the land law of Sudan at |
| 15 | I come next. I'm afraid it will be some little time | 15 | relevant times, and are not part today, as you can see |
| 16 | before I conclude. | 16 | from the provisions of the Comprehensive Peace Agreement |
| 17 | The slides for this presentation are in your folder, | 17 | providing for the future recognition of customary law. |
| 18 | but I apologise that because of the pressures of time | 18 | Nor is there any basis for an alleged system of |
| 19 | they're not necessarily in the order in which we will be | 19 | inter-tribal law, even though the ABC experts tried to |
| 20 | showing them. I hope they're all there, but I'll do my | 20 | construct a spurious principle of preference for Ngok |
| 21 | best to be coherent, if not as coherent as one might | 21 | housing over Homr or Messiriya tents. "tukuls trump |
| 22 | have been. | 22 | tents" is the three-word description of that particular |
| 23 | Mr President, members of the Tribunal, this | 23 | principle, and I will come back to it later on. It is |
| 24 | presentation will run into the afternoon to some degree, | 24 | entirely illegitimate in the context of the Tribunal's |
| 25 | I'm afraid, because of the amount of time that's been | 25 | mandate, which is to determine a transferred area, |
| | Page 57 | | Page 59 |
| | rage 37 | | rage 39 |
| | | | |
| 12:16 1 | taken in cross-examination and Tribunal questions. | 12:20 1 | a question of fact. |
| 2 | We'll do our best, but I believe we're still within | 2 | In terms of the law of Sudan at the time of the |
| 3 | time. | 3 | transfer, the only proposition that matters is that the |
| 4 | As I explained on Saturday, the SPLM/A's definition | 4 | Condominium authorities had the power to decide on |
| 5 | of the formula refers to an area occupied and used by | 5 | provincial boundaries. The Condominium administration, |
| 6 | the nine Ngok Dinka chiefdoms in 1905. As I also | 6 | led by the Governor-General, had general authority to |
| 7 | The state of the s | 7 | act, including the power to define provincial |
| 8 | | 8 | boundaries. The fact is that that power was exercised |
| 9 | • | 9 | frequently and often informally; a matter which will |
| 10 | | 10 | cause no surprise to a tribunal including members who |
| 11 | 2 2 | 11 | have had to deal with internal provincial boundaries in |
| 12 | • | 12 | other disputes. |
| 13 | | 13 | The SPLM/A makes the point that the 1905 change was |
| 14 | | 14 | never formally gazetted, unlike certain other changes to |
| 15 | _ | 15 | provincial boundaries. That is true. The official |
| 16 | | 16 | practice was inconsistent, especially but not only in |
| 17 | • | 17 | the early years of the Condominium. But nothing can |
| 18 | - | 18 | turn on this. |
| 19 | | 19 | No one ever challenged a provincial boundary change |
| 20 | - | 20 | in the Sudan for want of form or publication. |
| 21 | | 21 | Administration proceeded, as it had on the basis of the |
| 22 | 1 0 | 22 | Turkish-Egyptian administration in the 19th century, on |
| 23 | | 23 | the basis that the provinces existed, and if boundary |
| 24 25 | | 24 25 | changes or clarifications were necessary they were made. Even the boundary of Darfur before 1916, a tributary |
| 23 | an applicable law clause, and that's highly relevant to | 23 | Even the boundary of Darth before 1910, a dibutary |
| | Page 58 | | Page 60 |
| | | | |

| 12:22 1 | state and not a province, was changed by rather informal | 12:25 1 | Mr President, members of the Tribunal, for all the |
|---|---|--|---|
| 2 | means. It was only in 1916 that Darfur became | 2 | reasons we have given, the territorial interpretation of |
| 3 | a province. I have referred already to | 3 | the formula is the correct one. The corollary is that |
| 4 | Sir Rudolf Slatin laying down the boundary in 1903. | 4 | the area transferred to Kordofan in 1905 is the area of |
| 5 | Overall, many provincial boundary changes occurred | 5 | Kordofan that lies between the Bahr el Arab and the |
| 6 | by some combination of provincial action, endorsement in | 6 | southern boundary of Kordofan. That's the area |
| 7 | Khartoum and depiction by the Sudan Survey Department or | 7 | presently in Kordofan by reason of the transfer of |
| 8 | the War Office in new maps. That's what happened in the | 8 | Sultan Rob's district to Kordofan. |
| 9 | case of the provincial boundaries that concern us here. | 9 | But for the purpose of the argument counsel will |
| 10 | But there are three points to be made about the | 10 | leap on me and say this is a concession; it is not |
| 11 | SPLM/A's complaint that this boundary change was not | 11 | a concession I want to address you on the assumption |
| 12 | gazetted. | 12 | that the SPLM/A is right in its interpretation of the |
| 13 | The first point is that the SPLM/A itself relies on | 13 | formula. On that assumption, made solely for the |
| 14 | boundaries that were determined in this markedly | 14 | purposes of argument, the question is the following: |
| 15 | informal way. As I pointed out, its Abyei Area is only | 15 | what was the area of the nine Ngok Dinka chiefdoms in |
| 16 | conceived of as tribal it's a very orderly tribe | 16 | 1905? |
| 17 | in the north. Perhaps the tribe had GPS indicators to | 17 | The SPLM/A accepts that the crucial date is 1905, as |
| 18 | walk up and down their boundary. | 18 | I have said; they accept that the question is one of |
| 19 | It is only when they face north that their passion | 19 | identifying an area of occupation and use by the |
| 20 | for tribal boundaries strikes them. Facing east, south | 20 | chiefdoms in that year. That too is a question of fact. |
| 21 | or west, they have a pronounced affection for provincial | 21 | It's a very complicated question of fact; I would call |
| 22 | boundaries; the very boundaries that for the most part | 22 | it an anthropological fact, and I have to say that the |
| 23 | have never been gazetted. The parties agree on the | 23 | only anthropological witness that we have is on our |
| 24 | southern boundary of the Abyei Area, yet that was never | 24 | side. |
| 25 | gazetted. | 25 | Like many anthropological facts, it raises a host of |
| | | | |
| | Page 61 | | Page 63 |
| | | | |
| 12:23 1 | The second point is that the whole premise of the | 12:27 1 | methodological issues, and is one to which no |
| 2 | Abyei Protocol is that there was a transfer to Kordofan | 2 | comprehensive answer can be given. Contrary to what the |
| 3 | in 1905. It happened, it was officially recorded, but | 3 | ABC experts seem to have assumed, it's a much more |
| 4 | it was not gazetted. By the standards of African | 4 | difficult question of fact than the question of fact |
| 5 | boundary disputes, there was a decent amount of | 5 | "What were the boundaries of Kordofan between 1905?" |
| 6 | information about it. | 6 | That question falls in the elementary category for |
| 7 | Assume hypothetically that instead of being | 7 | |
| 8 | incorporated in the Sudan in 1902, Bahr el Ghazal had | | a tribunal of this standing. |
| | | 8 | 5 |

Their allocation of half |

| , | | | |
|----------|---|----------|--|
| 12:28 1 | Messiriya was on its face a new allocation of territory | 12:31 1 | What I am calling area 3 is the area between the |
| 2 | which had nothing conceivable to do with 1905. | 2 | Ragaba Umm Biero and the Ragaba ez Zarga. This is |
| 3 | That makes it even more surprising and this is my | 3 | an even larger area; it's 3,500 kilometres in extent. |
| 4 | second preliminary point that the answers to the | 4 | Again I will come back to the question of occupation and |
| 5 | anthropological question given by the ABC experts and by | 5 | use in relation to that in a while. You will be pleased |
| 6 | the SPLM/A are now virtually the same. True, there is | 6 | to [hear] that will be after lunch. |
| 7 | a slight difference: the SPLM/A claims all the way north | 7 | In this area 4, this is the area above the |
| 8 | to 10°35'; whereas the ABC experts split the difference | 8 | Ragaba ez Zarga, up to the experts' boundary at |
| 9 | between 10°35' and 10°10' in order to arrive at their | 9 | 10°22'30" north. This is a huge area, 11,000 square |
| 10 | compromise allocation line. But that's a rather minor | 10 | kilometres in extent. It's more than half the |
| 11 | difference compared with the large areas at stake in | 11 | "transferred area", according to the experts. |
| 12 | this case. | 12 | I say "transferred area" in inverted commas because |
| 13 | You can see this from the graphic which is now on | 13 | no one can seriously suggest that area 4 was transferred |
| 14 | the screen. It will be modified from our memorial | 14 | in 1905, or that the Ngok Dinka made my use of it in |
| 15 | figure 11. We can split the relevant area into five | 15 | 1905, indeed that they made any significant use of it at |
| 16 | segments, south to north, as follows. | 16 | a later time. They certainly never had primary rights |
| 17 | First there is the area between the present southern | 17 | anywhere in area 4 in 1905, even if one accepts the |
| 18 | boundary of Kordofan and the Bahr el Arab. Let's call | 18 | distinction between primary and secondary rights, which |
| 19 | this area 1. It's about 2,700 square kilometres in | 19 | we do not. Its inclusion in the Abyei Area is frankly |
| 20 | extent, a non-trivial area about the size of Luxembourg. | 20 | incredible. Act IV of Professor Pellet's tragedy, |
| 21 | The parties agree this is part of the Abyei Area, so | 21 | spoken in the language of Shakespeare. |
| 22 | it's not actually in dispute. But it's worth observing | 22 | Finally there is area 5, which is the difference |
| 23 | that the reasons for that conclusion, the reasons for | 23 | between the ABC experts' line and the SPLM/A claim line |
| 24 | that agreement, must be different. | 24 | at 10°35'. It's outside the Abyei Area, even as the |
| 25 | For the Government of Sudan it is the territory | 25 | experts saw it; though, acting manifestly outside their |
| | Page 65 | | Page 67 |
| | | | |
| | | | |
| 12:30 1 | which is part of Kordofan by virtue of the transfer of | 12:33 1 | mandate, they purported to recognise Ngok grazing rights |
| 2 | 1905, and it doesn't matter that it may well be the case | 2 | in that area. It's 5,000 square kilometres in extent, |
| 3 | that the Messiriya claim use rights south of the | 3 | again a non-trivial area. |
| 4 | Bahr el Arab. That's irrelevant to the question of the | 4 | To summarise, although the experts the ABC |
| 5 | identification of the transferred area on the | 5 | experts; I should use the qualifier effectively |
| 6 | territorial interpretation, but it's not irrelevant to | 6 | abandoned the crucial date of 1905, while the SPLM/A |
| 7 | the identification of that area on the tribal | 7 | maintain that date, the two produced much the same |
| 8 | interpretation. | 8 | claim, as you will see. The SPLM/A claim is somewhat |
| 9 | It must be for the SPLM/A to show which areas below | 9 | more extreme but, over these vast areas, that is |
| 10 | the Bahr el Arab were actually occupied and used by the | 10 | a detail. What is more significant is that on this part |
| 11 | Ngok Dinka, by the nine tribes or some of them. They've | 11 12 | of the case, the part I'm addressing now, the SPLM/A is committed to proving that already in 1905 the Ngok Dinka |
| 12 13 | never made any attempt to do that. They tend to say, "But it's rather unoccupied". If it's unoccupied, it's | 13 | had rights of use and possession over all five areas, in |
| 13 | part of Kordofan, and not part of the Ngok Dinka | 13 | totality. |
| 15 | transferred territories. | 15 | The implication of their claim is that, despite the |
| 16 | They can't have it both ways. They can't be | 16 | huge demographic, political and other changes that have |
| 17 | territorial below the river and tribal above it. But, | 17 | occurred in that period, even if one takes the critical |
| 18 | of course, we've already seen that their claim is | 18 | date as 1956, the area of Ngok occupation and use has |
| 19 | a complete hybrid. This is another example of it. | 19 | not expanded during that period. That suggestion is |
| 20 | The second component of the area in dispute, which | 20 | contrary to all the evidence. |
| 21 | we'll call area 2, is the area between the Bahr el Arab | 21 | That finishes my introduction. I move to the |
| 22 | and the Ragaba Umm Biero. This is 1,100 square | 22 | methodological issues which face you in determining, if |
| 23 | kilometres in extent. I will come back shortly to the | 23 | you have to determine, the anthropological fact of Ngok |
| 24 | question of the extent of Ngok and use and occupation of | 24 | use and occupation in 1905. |
| 25 | area 2. | 25 | There are three main points: the relevance of |
| | | | |
| | Page 66 | | Page 68 |
| | | | |

| * | | | |
|--|---|--|--|
| 12:35 1 | post-1905 developments in determining the 1905 | 12:38 1 | The 1949 Abyei local government area is relevant |
| 2 | anthropological fact; second, the SPLM/A's reliance on | 2 | a contrario. It shows you that the SPLM/A claim can't |
| 3 | oral evidence; and third, the relationship between the | 3 | possibly be right because that was the area of local |
| 4 | difference kinds of evidence in the record: maps, | 4 | government of the Ngok at a later date. I'll come back |
| 5 | contemporary official and unofficial records, subsequent | 5 | to that. It sheds light on the transfer, even though |
| 6 | expert opinion, et cetera. | 6 | the transferred area must be a different one. |
| 7 | The first of these then is the relevance of | 7 | I move to my second methodological point concerning |
| 8 | post-1905 developments. If the question, as we agree, | 8 | modern oral tradition. And I do so, Mr President, |
| 9 | relates to the year 1905, then what weight is to be | 9 | members of the Tribunal, after a pronounced example this |
| 10 | given to evidence dating from later years? | 10 | morning of the difficulties of translation, |
| 11 | There are three possible solutions. One is to | 11 | inter-cultural, in three or four languages. |
| 12 | reject such evidence entirely. But that would be | 12 | I must first stress the extent to which the SPLM/A |
| 13 | unreasonably strict, as well as making it practically | 13 | relies on oral tradition. Having next to zero I will |
| 14 | impossible to fulfil the mandate on the SPLM/A's | 14 | establish this having next to zero documentary or |
| 15 | interpretation. | 15 | cartographic evidence of their claim, they are forced to |
| 16 | A second crude solution is simply to assume that any | 16 | create some substitute, and they do so by wholesale and, |
| 17 | evidence of Ngok occupation and use from any date is | 17 | I have to say with great compliments, remarkably |
| 18 | valid for 1905, and that is effectively what the ABC | 18 | imaginative reliance on oral tradition. Very good for |
| 19 | experts did, as I have said. That is completely | 19 | the makers of GPS systems, for example. |
| 20 | untenable, and involves an excess of mandate because it | 20 | You will no doubt hear songs of praise tomorrow, and |
| 21 | is not in dispute between the parties that the mandate | 21 | even later today, from counsel for SPLM/A of oral |
| 22 | refers to the year 1905. | 22 | tradition, and its creative power is indeed worth |
| 23 | A determination of the scope of territory whether | 23 | singing about. Some of the great societies in the world |
| 24 | territory transferred or territory occupied by | 24 | depend upon oral tradition. That's why we have Homer. |
| 25 | reference to another date is simply not doing what | 25 | It was Rudyard Kipling, the great poet of the |
| | | | |

I quote Vansina again: "With oral traditions the process of mnemonic or conscious selection and streamlining continue so that they show the impact of x generations of past presents, which are experienced as a whole and can no longer be unravelled." So what of the epic of 10°35"? Today the Ngok claim their settlements extended far to the north of Ragaba ez Zarga, yet when did this idea germinate? Was it in 1805, 1905, or 2005, or any of the years intervening? Their traditions cannot answer that question; and even if we could, how reliable would the answer be in the light of the overwhelming weight of documentary evidence to the contrary of that proposition? | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | What has been stressed here is that the fluid and self-validating character of oral tradition, of oral history, lends itself to being twisted. It's vital that the raw data be deposited alongside the interpretation of it so that the two can be compared. This principle has not been observed by the SPLM/A. In an adversary system where each side is expected to have an agenda, all oral information gathered by one party is potentially tainted and must be treated with great care; we say that about ourselves as much as the other side. The final products of the information must be placed alongside the raw data; the full story told by the informant free from innuendo and leading questions. Turning to the SPLM/A's methodology, because we do not rely upon oral tradition except for the purpose of displaying to you a competing oral tradition which shows the unreliability of reliance on tradition in principle, we know next to nothing about how the data was gathered or in what manner it was given. I will come back to this when I deal with the community mapping report after the break. How the questions that the community mapping report deal with relate to a straight-line boundary in 1905 is completely puzzling. It's even more puzzling when the |

| , | | | |
|----------|--|----------|--|
| 12:48 1 | answers turn out to be related to provincial boundaries | 12:51 1 | screen because it's difficult to read: |
| 2 | which were established by means which have nothing to do | 2 | "Shaded areas shall approx grazing areas. Areas |
| 3 | with the traditions in question. Perhaps the boundaries | 3 | left white are either waterless or grassless." |
| 4 | created the traditions rather than the other way round. | 4 | Then you have listed cattle and approximate area for |
| 5 | One can only wonder how the rest of the oral data | 5 | each of the Fayirim, the Matinin and the Awad Kamil. |
| 6 | was compiled, since we don't have access to it. | 6 | The total number of cattle listed in aggregate for those |
| 7 | I turn to my third point: the relationship between | 7 | three groups is 18,500 head, and the approximate area is |
| 8 | different kinds of evidence and opinion, and here I can | 8 | 370 square miles. Then the Ngok Dinka: listed cattle |
| 9 | be brief. | 9 | 50,000, approximate area 500 square miles. Then the |
| 10 | Given the obvious shortcomings of oral evidence, in | 10 | point: |
| 11 | particular produced after the dispute has arisen, it | 11 | "Ngok cattle figures are approximate only. Real |
| 12 | goes without saying that documentary evidence should be | 12 | figures are somewhere between 50,000 and 60,000." |
| 13 | given preference. In addition, contemporary evidence | 13 | That's a lot of cows. |
| 14 | should be given preference over later evidence. | 14 | It's interesting to note that many of the areas |
| 15 | Thirdly, as I've said, evidence created before the | 15 | which the SPLM/A claims now are permanently and have |
| 16 | dispute arose should be given strong preference over | 16 | been permanently inhabited by the Ngok since 1905 are |
| 17 | evidence created later; a general principle well | 17 | marked as waterless. This is odd for a people whose |
| 18 | recognised in international law in the notion of the | 18 | cattle are especially adapted for living in swampy |
| 19 | critical date in its proper sense. | 19 | areas. Then again, it's no more peculiar than them |
| 20 | We have sometimes referred in this case to 1905 as | 20 | living in the goz, which is also dry, certainly dry for |
| 21 | being the critical date, but it's not the critical date | 21 | large numbers of cattle, as Cunnison's book shows. |
| 22 | in the sense of international law. The critical date in | 22 | I'm sure the members of the Tribunal feel they have |
| 23 | the sense of international law is the point at which | 23 | enough to read, but if you're trying to get to sleep at |
| 24 | a dispute arose between the parties over the Abyei Area, | 24 | night I do recommend Cunnison. He's very interesting |
| 25 | and all the collection of oral evidence that has gone on | 25 | about the people of that period. |
| | Page 77 | | Page 79 |
| | | | |
| | | | |
| 12:50 1 | has been after that date. | 12:53 1 | The SPLM/A wishes the Tribunal to ignore the "Civsec |
| 2 | 1905 is a crucial date because it's the date by | 2 | sketch", as I will call it. They state that no |
| 3 | reference to which the mandate must be fulfilled, but | 3 | inference may be drawn from the map, as the official |
| 4 | it's not a critical date in the other sense. There was | 4 | meeting for which the map was prepared did not involve |
| 5 | no dispute in 1905; it was to resolve a potential | 5 | either Ngok Dinka or Kordofan officials. Clearly the |
| 6 | dispute that the area was transferred and peace brought, | 6 | ABC experts thought otherwise. The maps and minutes of |
| 7 | with great success, for more than half a century to the | 7 | that meeting are cited in the ABC report without |
| 8 | relations between the Homr and the Ngok. | 8 | criticism. |
| 9 | I turn then to consider the documentary evidence. | 9 | According to the ABC experts, the hand-drawn |
| 10 | There is one original document in the record from | 10 | sketch the Civsec sketch map was produced in the |
| 11 | the Condominium office depicting the nine Ngok Dinka | 11 | civil secretary's office in Khartoum, based on |
| 12 | tribes. It's a 1933 document taken from the civil | 12 | information provided by local officials, including from |
| 13 | secretary's files. You can see the original coloured | 13 | both Bahr el Ghazal and Kordofan provinces. It was |
| 14 | version on the screen. Let me describe it to you. | 14 | created to help settle grazing disputes between the Homr |
| 15 | The sketch depicts the areas surrounding Abyei, | 15 | and the Ngok. It was created for an official purpose, |
| 16 17 | which of course is named; in 1933 it was the centre of | 16 | though we don't know who created it. Whoever prepared |
| 17 | Ngok life. It divides the grazing area into coloured | 17 | it took some care. |
| 18 | zones. Red is the Fayirim. Orange is the Matinin and what is described as the Aw Kamil; that's short for | 18 | The sketch provides detailed information about the |
| 19 20 | Awad Kamil. Blue is the Ngok Dinka, although you might | 19 20 | Homr and the Ngok. We may note the following six features. |
| 20 | think it was purple. Red and orange stand for Humr or | 20 | First, a significant fraction of the Ngok grazing |
| 21 22 | Messiriya tribal groups which are otherwise referred to | 21 22 | area is south of the Bahr el Arab; we make it |
| 23 | as omodiyas. | 22 23 | approximately one-third. |
| 23 24 | There's a caption in the top right-hand corner which | 23 24 | Second, the Ngok grazing area occupies some but by |
| 25 | reads as follows we've transliterated it on the | 25 | means not all of what is called the "Bahr". There's |
| 23 | reads as ronows — we ve transmented it on the | 2.5 | means not an or what is caned the Dani . There's |
| | Page 78 | | Page 80 |
| | | | |

| 12.55 1 also of terminology in this case, and had we had more 2 times we would have sport more time explaining it 3 upiront: I suppose we should have done that. But the 4 Bolar is the region between the Bolar of Arab and the 5 Ragabor or Zarga, expectally in the area which is shown 6 on this map. It's a watered urea; it's a rivertine area. 7 The Ngok gerating area concepties some but by no means all 8 of the Bolar. There are yellow area there as well as 9 purple areas. 10 Thirdly, the Ngok are to be found in the wetter 11 areas, not the waterless areas: In tote in particular 12 the caption. Home waterless area' in the top left-hand 13 side of the map. That's below 0'f more, his cent the ABC 14 experit decision, that area has been reamed; it's now 15 the "Ngok waterless area" of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere more the Ragaba ez Zarg. 18 Fifth (sic), these is no relationship on this map 19 between the Ngok area and any provincial boundary, 22 as well lise. In every other respect the Ngok area: 23 miles away from any provincial boundary, Ist many 24 miles away from any the death of the other and any provincial boundary. 25 of Kordofan. Page N1 12.56 1 The SPLMA highlights the fact that the Ngok are 2 reported to have had more caulte than the Horn, and 3 that farm (40,000). They ance than the Horn, and 3 that farm (40,000). They are so and the absence of the Ngok translaturate pattern. While they continually insist that no no regaritive inference can be made from the absence of the Ngok are and an any provincial boundary in the same of many from the three south because of the Ngok are 2 than 30,000. They are than the Horn, and 3 that farm (40,000), and the external and of the Ngok are 4 the absence of more Ngok cattle, all of the coloured are reported to have had more caulte than the Horn, and 5 that farm (40,000), and the special of the Ngok are and the second than the Horn, and the second that the share of the Ngok are and the second that | , | | | |
|--|----------------|--|----------------|--|
| 2 time we would have spent more time explaining it approvers the should have done than. But the 4 Babit is the region between the Babit et Arab and the 5 Ragaba er Zarga, especially in the area which is shown on his map. The a watered area; if so a riverine area. 7 The Ngoic grazing area occupies some but by no means all of the Babit. There are yellow areas there as well as purple areas. 9 purple areas. 10 Thirdly, the Ngoic are to be found in the wetter area, not the waterless areas. In the top left-hand side of the map. That's below 10° north. Since the ALC experts' decision, that are has been remardel; it's now the foundation of the Ngoic grazing area occupies an area of the Ragaba ez Zarga. 11 area to show the northern limit of the Ngoic grazing area is nowhere near the Ragaba ez Zarga. 12 are alcationship; and that relationship is not accidental. 22 a miles away from any provincial boundary, where there is a data way to make provincial boundary, where there is a data way to make provincial boundary, and that's trues (0000, let's say, as compared with less than 30.000. They note than most of the Ngoic art is now the more cartle than the Homr, and that's trues (0000, let's say, as compared with less transfarmant pattern. While they continually insist that no engine form the absence of the Ngoic art than the Age area of the Ngoic ar | 12:55 1 | a lot of terminology in this case, and had we had more | 12:58 1 | there were 15,000 Ngok. All the accounts of the Ngok |
| supfront, I suppose we should have done that. But the 4 Bolts ris the region between the Baller Land and the 5 Ragaba ez Zarga, especially in the area which is shown 6 on this map. It's a watered area; it's a riverine area and 8 of the Bahr. There are yellow areas there as well as 9 purple areas. 10 Thirdly, the Ngok grazing area occupies some but by no means all 11 areas, not the waterless area, I not e in particular 12 the caption "Hourt waterless area" in the top left-hand 13 side of the map. That's theore (17 Bont's). Since the ABC 14 experts' decision, that urea has been returned, it's now 15 the "Ngok waterless area". Of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere near the Ragaba ez Zarga. 18 Hift (sc), there is no relationship on this map 19 between the Ngok area and any provincial boundary, 22 except for the southern boundary, where there is 23 a relationship, and that relationship is not accidental, 24 a miles away from any provincial boundary, 25 of Kordolau. Page 81 12.56 1 The SPLMA highlights the fact that the Ngok are 2 reported to have had more eartile than the Hourt, and 3 that's true; 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok area 5 to risk and the saver more than 90.01 of the Ngok cartle, a to no negative inference can be made from the absence of 6 the box, May, the year and the Ngok cartle, 8 that the absence of more Ngok cartle, a lighter 10 mumber than 60,000, may lead: 11 min. In the assumption that for all of the year save 12 for the several morthe of dry the Ngok cartle, a lighter 13 mile saperard depiction of it. Despite the fact that the Most of the Ngok, figure of the Ngok grazing 14 the cartles or many morte than 90.01 of the coloured 15 to colour certainly greater than 10 of the year save 16 the treates or many morte than 90.01 of the coloured 17 to the cartles or many morte than 90.01 of the Ngok cartle, a lighter 18 minument than 60,000, may lead: 19 the cartles of the Ngok a | 2 | | 2 | - |
| 4 Rahr is the region between the Rahr al Arab and the 5 Ragabase Zarga, specially in the area which is shown 6 on this map. It's a watered area; it's a rivertine area. 7 The Ngok grazing area occupies some but by no means all of the Bahr. There are yellow areas there as well as 9 purplic areas. 9 purplic areas. 10 Thirdly, the Ngok are to be found in the wetter area, not the waterless areas. In tote in particular the caption "Horn waterless areas" in the up felt-hand side of the map. That's below I'D morth. Since the ABC experts" decision, that are has been remanded it's now the "Ngok waterless area". Of critical importance for this case is that the nothern limit of the Ngok grazing area is nowhere mear the Ragabase az Zarga. 19 between the Ngok area and any provincial boundary, 20 except for the southern boundary, where there is 2 an alterationship, and that relationship is not baccidental, 22 and 32 and 33 and 34 and 34 that's true (60,00), ler's say, as compared with less 4 than 30,000. They note than most of the Ngok are a population and the absence of the Ngok, static and 10 and | 3 | | 3 | |
| do not his map. It's a watered area; it's a twenten area. The Ngok grazing area occupies some but by no means all of the Bahr. There are yellow areas there as well as pupple areas. The Ngok grazing area occupies some but by no means all of the Bahr. There are yellow areas there as well as pupple areas. Thirdly, the Ngok are to be found in the wetter area, or the wateress areas. I note to plet chand side of the map. That below 10° route. Since the ABC experts' decision, that area has been renamed; it's now the "Ngok waterless area". Of critical importance for this case is that the unothern limit of the Ngok grazing area is nowhere near the Ngok area area and provincial boundary, even there is a relationship, and that relationship is not accidental, as a well see. In every other respect the Ngok are well see. In every other respect the Ngok are well see. In every other respect the Ngok are see will see. In every other respect the Ngok are see will see. | 9 purple areas. 10 Thirdly, the Ngok are to be found in the wetter 11 areas, not the waterless areas. I note in particular 12 the caption "Homr waterless areas" in the top lert-hand side of the map. That's below 10' north. Since the ABC 14 experts' decision, that area has been renamed; it's now 15 the "Ngok waterless area". Of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere near the Nagaba ez Zarga. 18 Fifth (sic), there is no relationship on this map 19 between the Ngok area and any provincial boundary, 20 except for the southern boundary, where there is 21 a relationship, and that relationship is not accidental, 22 as we will see. In every other respect the Ngok area is miles away from any provincial boundary. It's many 24 miles away from any provincial boundary. It's many 25 of Kordofan. Page 81 12:56 1 The SPI M/A highlights the fact that the Ngok are 25 of Kordofan. Page 81 12:56 1 The SPI M/A highlights the fact that the Ngok are 36 that's true: 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok cattle 4 than 10,000. They note that most of the Ngok cattle 4 than 30,000. They note that most of the Ngok's and that's true: 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok's cattle, and 10 number than 60,000, may lead: 10 number than 60,000, may lead: 11 mongative inference can be made from the absence of 6 the Ngok keep still manage to extrapolate from this map 9 that the absence of more Ngok cattle, a higher 17 mins. " to the assumption that for all of the year save for the several months of dry the Ngok cattle, all of their cattle so many more than 50,000, would be spread 12 for the several months of dry the Ngok cattle, all of their cattle so many more than 50,000, would be spread 14 throughout the Abpel Area — over an area at least equal 15 to (but certainly greater than) all of the coloured 17 mins. " to the assumption that for all of the year save for the several m | 8 | | 8 | • |
| Thirdly, the Ngok are to be found in the wetter 11 areas, not the waterless areas. I note in particular 12 the caption "Home waterless areas" in the top left-hand 13 side of the map. That's below 10" north. Since the ABC 14 experts' decision, that are has been renamed; it's now 15 the "Ngok waterless area". Of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere near the Nagaba ez Zarga. 18 Fifth (sic), there is no relationship on this map 19 between the Ngok area and any provincial boundary, 20 except for the southern boundary, where there is 21 a relationship, and that relationship is not accidental, 22 as we will see. In every other respect the Ngok area is 23 miles away from both the eastern and western boundaries 24 miles away from both the eastern and western boundaries 25 of Kordofan. Puge 81 12.56 1 The SPI.M/A highlights the fact that the Ngok are 2 reported to have had more cattle than the Homr, and 3 that's true: 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok cattle 5 would have been further south bocause of the Ngok cattle 4 the Ngok, they still manage to extrapolate from this map 5 the Ngok, they still manage to extrapolate from this map 6 the Ngok, they still manage to extrapolate from this map 7 the throughout the Abpel Area — over a mare at least equal 16 areas through the goz and toward Keilak in the 17 rains." 18 And at this rate they'll get to Muglad, and possibly 18 Khartoum. 20 This desperate hypothesis I will call "the theory of 21 the invisible Ngok." I'll revert to it in our progress 22 through the sources. 23 But the core question raised by the map is this: in 24 1934, the year after this sketch map was created, 25 Newbold, the then governor of Kordofan, estimated that 26 the Ngok they still manage to water policy and the ABC experts' when we superimpose the Civse map onto the ABC experts' 27 the first policy and the sources. 28 But the core question rais | | • | 9 | as much? Yet that is the SPLM/A claim. |
| 11 areas, not the waterless area. I frotte in particular 12 the caption "Homr waterless area" in the top left-hand 13 side of the map. That's below 10" north. Since the ABC 14 experts' decision, that area has been renamed; it's now 15 the "Ngok waterless area". Of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere near the Rugahu ez Zargu. 18 Fifth (sic), there is no relationship on this map 19 between the Ngok area and amy provincial boundary, 20 except for the southern boundary, where there is 21 a relationship, and that relationship is not accidental, 22 as we will see. In every other respect the Ngok area is 23 miles away from any provincial boundary. It's many 24 miles away from any provincial boundary. It's many 25 of Kordofan. Page 81 12.56 1 The SPLM/A highlights the fact that the Ngok are 2 reported to have had more cattle than the Homr, and 3 that's true: 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok cautle 5 would have been further south because of the Ngok 6 transhumant pattern. While they continually insist that 7 no negative inference can be made from the absence of 8 the Ngok, they still manage to extrapolate from this map 9 that the absence of more Ngok cattle, a higher 10 number than 60,000, may lead: 11 " to the assumption that for all of the year save 12 for the several months of dry the Ngok cattle, a higher 10 number than 60,000, may lead: 11 " to the assumption that for all of the year save 12 for the several months of dry the Ngok cattle, all of 13 their cattle so many more than 50,000, would be spread 14 throughout the Abyei Area – over an area at least equal 15 to (but certainly greater than) all of the coloured 16 areas through the goz and toward Keilak in the 17 rains." 18 And at this rate they'll get to Muglad, and possibly 19 Khartoum. 20 This desperies hypothesis I will call "the theory of 21 the invisible Ngok." I'll revert to it in our progress 22 through the sources. 23 But | 10 | Thirdly, the Ngok are to be found in the wetter | 10 | Mr President, this would be a convenient moment to |
| 13 side of the map. That's below 10° north. Since the ABC 14 experts' decision, that area has been renamed; it's now 15 the 'Nygok waterless area". Of critical importance for 16 this case is that the northern limit of the Ngok grazing 17 area is nowhere near the Ragaba ez Zarga. 18 Fifth (sic), there is no relationship on this map 19 between the Ngok area and any provincial boundary, 20 except for the southern boundary, where there is 21 a relationship, and that relationship is not accidental, 22 as we will see. In every other respect the Ngok mea is 23 miles away from both the custern and western boundaries 24 of Kordofan. Page 81 12:56 1 The SPLM/A highlights the fact that the Ngok are 2 reported to have had more cattle than the Homr, and 3 that's true: 60,000, let's say, as compared with less 4 than 30,000. They note that most of the Ngok's 5 would have been further south because of the Ngok's 6 transhumant pattern. While they continually insist that 7 no negative inference can be made from the absence of 8 the Ngok, they still manage to extrapolate from this map 9 that the absence of more Ngok cattle, all of 11 "" to the assumption that for all of the year save 12 for the several months of dry the Ngok cattle, all of 13 their cattle so many more than 50,000, would be spread 14 throughout the Abyei Area — over an area at least equal 15 to (but certainly greater than) all of the coloured 16 areas through the gov and toward keilak in the 17 rains." 18 And at this rate they'll get to Muglad, and possibly 19 Khartoum. 20 This desperate hypothesis I will call "the theory of 21 the invisible Ngok". I'll revert to it in our progress 22 through the sources. 23 But the core question raised by the map is this: in 24 1934, the year after filis sketch map was created, 25 Newbold, the then governor of Kordofan, estimated that | 11 | areas, not the waterless areas. I note in particular | 11 | break. |
| 14 experts' decision, that area has been renamed; it's now the "Ngok waterless area". Of critical importance for this case is that the northern limit of the Ngok grazing area is nowhere near the Ragaba ez Zarga. 18 Fifth (sic), there is no relationship on this map between the Ngok area and any provincial boundary, except for the southern boundary, where there is a case of the southern boundary, where there is a case of the southern boundary, where there is a case of the southern boundary, where there is a case of the Tribunal, I was a class way from both the eastern and western boundaries of Kordofan. Page 81 12-56 1 The SPLM/A highlights the fact that the Ngok are a preported to have had more cattle than the Homr, and that's true: 60,000, let's say, as compared with less than 30,000. They note that most of the Ngok cattle when the Ngok cattle is the Ngok are and would have been further south because of the Ngok's at the ABC experts' depiction of it. | | 5 | protein, so it would be a weary walk. | 5 | The second question involves the trend of movement |
| | 6 | Any claim by the Ngok to the Ragaba ez Zarga is | 6 | in terms of visits by administration officials before |
| | 7 | likewise foolish when one considers where the Ngok are | 7 | and after 1905, and this is a chart taken from our |
| | 8 | said to be in 1933. It should be noted that the sketch | 8 | pleadings. |
| | 9 | does not say that it depicts dry seasonal grazing, as | 9 | The red notations on the graphic demonstrate visits |
| | 10 | suggested by the SPLM/A; but even if it does, there's no | 10 | before 1905, the black ones visits slightly afterwards. |
| | 11 | evidence of any significant Ngok movement to the north | 11 | We detect although I confess that it's perhaps not |
| | 12 | in the wet season beyond the area depicted, as we will | 12 | a very strong indication a movement to some degree to |
| | 13 | see. | 13 | the north. |
| | 14 | This brings us to the second question I identified | 14 | What is absolutely clear from this graphic, however, |
| | 15 | this morning. When we find relevant information after | 15 | is two things: first of all that the Ngok were on or |
| | 16 | 1905, it is necessary to ask the next question: what's | 16 | around the Bahr el Arab; and secondly that there was no |
| | 17 | the relationship between that information and what we | 17 | contraction to the south in the period after 1905. It |
| | 18 | can reasonably say about 1905, given that 1905 is the | 18 | is fair to say and indeed it is fair to say that the |
| | 19 | crucial date? There are two points here, population and | 19 | SPLM/A don't deny this that the area occupied by the |
| | 20 | vastly improved administration, and they are related to | 20 | Ngok in 1905 cannot have been larger than that depicted |
| | 21 | each other. | 21 | on the Civsec sketch. |
| | 22 | In our memorial we proposed by way of estimate that | 22 | Against this background I want to take you rather |
| | 23 | the Ngok may have numbered of the order of 5,000 in | 23 | rapidly on a considering the character of the roads, |
| | 24 | 1905. The SPLM/A proposed a competing figure of 50,000. | 24 | a busman's tour would be the wrong words but a tour |
| | 25 | The way they did that was to postulate without any | 25 | of the evidence in the record on the extent of the Ngok |
| | 20 | The way they did that was to postalate without any | 23 | of the evidence in the record on the extent of the rigor |
| | | Page 85 | | Page 87 |
| | | | | |
| 15:03 | 1 | evidence that the Ngok constituted 10% of the population | 15:07 1 | area before and after 1905 in strictly chronological |
| 13.03 | 2 | of Kordofan in 1908, which Governor Lloyd had estimated | 2 | order. |
| | 3 | at roughly half a million. That gave them the 50,000. | 3 | The contemporary sketches and reports which either |
| | 4 | By contrast, Professor Daly states: | 4 | depict or describe where the Ngok lived in and after |
| | 5 | "The Ngok population must have been quite small in | 5 | 1905 are essentially convergent. This is vital for two |
| | 6 | 1905." | 6 | reasons. |
| | 7 | He notes and this methodology, though of course | 7 | First, the ABC experts were supposed to base their |
| | 8 | it covers the later period, has something to be said for | 8 | conclusions on scientific evidence and research, not on |
| | 9 | it that in the 1955 census of the Sudan the Ngok | 9 | mythology or on unfounded preference for transhumance |
| | 10 | comprised 32,000 people or 1.8% of the population. | 10 | over a nomadic lifestyle. Secondly the question, as the |
| | 11 | Applying 1.8% of the population to Governor Lloyd's | 11 | SPLM/A agrees, is the position in 1905 when the ABC |
| | 12 | estimate, we get 9,000 Ngok in 1908. | 12 | experts treated themselves as unconstrained by that |
| | 13 | The SPLM/A estimate of 50,000 ignores the population | 13 | date. |
| | 14 | estimates in the record: 15,000 in 1934 these are | 14 | Let's go to the indications before 1905, and we |
| | 15 | estimates 20,000-25,000 in 1948, 30,000 in 1951 and | 15 | start with Wilkinson in his 1902 journey. He provided |
| | 16 | 1952, and the census of just over 31,000. These numbers | 16 | crucial data as to where the Ngok lived in 1902. He may |
| | 17 | are in line with our position that the population of the | 17 | have got the name of the Ragaba ez Zarga wrong, or he |
| | 18 | Ngok in 1905 was of the order of 5,000-10,000; 5,000 may | 18 | may have thought that the Bahr el Arab went up for |
| | 19 | be a slight underestimate, but the order of magnitude is | 19 | a short period to the Ragaba ez Zarga; but that's |
| | 20 | right. You can see the contrast in the table on the | 20 | independent of the point I'm making now. His |
| | 21 | screen. | 21 | observations still allow us to say pretty much where the |
| | 22 | Given the improvements that occurred in health, food | 22 | Ngok actually lived at the time of his visit. |
| | 23 | distribution, the definitive abolition of slaving and | 23 | According to his travel itinerary from El Obeid to |
| | 24 | raiding after the transfer, it is inconceivable that the | 24 | Sultan Rob's, the first Dinka village he reached was the |
| | 25 | Ngok population declined after 1905. That produces the | 25 | village of Bombo; it's called "Bongo" on the map; 9°32' |
| | | | | |

| , | | | |
|--|---|--|---|
| 15:08 1 | north, 28°49' east. This village was, however, much to | 15:12 1 | Arabs west of him." |
| 2 | the SPLM/A's disapproval, empty. The SPLM/A finds the | 2 | That's Sultan Rob. |
| 3 | observation of emptiness specious, but it's a fact. | 3 | The river that Percival tentatively took to be the |
| 4 | A fact is neither specious nor unspecious. | 4 | Bahr el Arab, but we know really was the |
| 5 | Repeatedly the SPLM/A claims that no negative | 5 | Ragaba ez Zarga, was, according to Sultan Rob and |
| 6 | inference can be observed from the fact that Wilkinson | 6 | I quote again words from him himself: |
| 7 | and others didn't observe any Ngok. They are said to | 7 | " uninhabited except for occasional parties |
| 8 | have been hiding, or the Condominium officials only | 8 | of wandering Arabs." |
| 9 | visited the relevant areas in the dry season when they | 9 | The phrase "wandering Arabs" has a nice touch to it |
| 10 | were further south. | 10 | in the context of the competition between a transhumant |
| 11 | It's fair to say that no negative inference can be | 11 | and a nomadic society. But he thought there was no one |
| 12 | drawn from a single occasion of a visit from not seeing | 12 | there except wandering Arabs. |
| 13 | someone; but the point is the comprehensive absence of | 13 | There are only two rivers: one was the Kiir, the |
| 14 | evidence. In this case the absence of evidence is the | 14 | real Bahr el Arab, and one was the Ragaba ez Zarga. The |
| 15 | evidence of absence: there is not a single sighting of | 15 | Kiir was of course inhabited. Sultan Rob was talking |
| 16 | the Ngok in areas to north of where they were sighted by | 16 | about the Ragaba ez Zarga when he said it was only |
| 17 | Wilkinson at the relevant period. | 17 | inhabited by wandering Arabs. |
| 18 | In any case, the dry season claim is easily | 18 | Instead of accepting the observation that the |
| 19 | rebutted. Wilkinson's sketch states that Bongo or Bombo | 19 | Ragaba ez Zarga was uninhabited except by wandering |
| 20 | was "inhabited in the rains". He and other officials | 20 | Arabs, the SPLM/A may suggest that the Ngok were hiding, |
| 21 | such as Willis, to whom we will return, knew where the | 21 | or that Percival was only referring to: |
| 22 | Ngok lived during the rains. | 22 | " the immediate area on or around the southern |
| 23 | Moreover, Wilkinson and others reported everything | 23 | bank of the Ngol/Ragaba ez Zarga." |
| 24 | from cattle tracks to abandoned villages. Wilkinson did | 24 | They also suggest as an alternative to their hiding |
| 25 | not encounter any Ngok before he got to Etai at 9°29' | 25 | hypothesis that Sultan Rob might have been lying. It's |
| 23 | not encounter any 1 got before he got to Etai at 7 27 | 23 | nypoulesis unit suitain 100 might have seen lying. 105 |

They're contemporary sources of information, and the SPLM/A don't have any better contemporary sources. In any event it's the cumulative effect of all of the sources. We now turn to Hallam's route report of 1907. Hallam was an inspector in the Condominium Administration. In 1907 Sultan Rob's new village was recorded on the Ragaba Umm Biero. His new village is described as: " covering the country between the Umm Biero and |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | far south of the Ragaba ez Zarga. We won't talk about 10°35'. By comparison, all of the indications along the Ragaba ez Zarga are of Arab that is Homr settlement. Numbers of rivers were called Bahr el Homr, but the Ragaba ez Zarga in this period dominantly was called the Bahr el Homr. Wilkinson notes: "The positions of Arab settlements marked with a query are from information supplied by Sheikh Ali Gula Nazir of Homr Arabs." There are several villages marked with a query. There are other villages not marked with a query which we know to have been Arab villages. There are no villages on the Ragaba ez Zarga at this period which have been identified as Ngok Dinka villages. I turn to Percival's 1904 sketch map. As you can see, he clearly has Sultan Rob south of the Kiir, not far from the village of Bongo. The village of Burakol is mentioned just north of the Kiir. He states that | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | SPLM/A suggested may have been lying on some point was the transferred leader himself. I turn to Comyn's sketch map. This is a sketch map from Comyn, another official of 1906. It clearly indicates the Homr on the Bahr el Arab. The SPLM/A rejoinder states that this sketch and report place both the Ngok Dinka and the Messeriya almost entirely outside the Arab area, and are not credible sources of information. They're contemporary sources of information, and the SPLM/A don't have any better contemporary sources. In any event it's the cumulative effect of all of the sources. We now turn to Hallam's route report of 1907. Hallam was an inspector in the Condominium Administration. In 1907 Sultan Rob's new village was recorded on the Ragaba Umm Biero. His new village is described as: " covering the country between the Umm Biero and the Gurf near their junction." |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | far south of the Ragaba ez Zarga. We won't talk about 10°35'. By comparison, all of the indications along the Ragaba ez Zarga are of Arab that is Homr settlement. Numbers of rivers were called Bahr el Homr, but the Ragaba ez Zarga in this period dominantly was called the Bahr el Homr. Wilkinson notes: "The positions of Arab settlements marked with a query are from information supplied by Sheikh Ali Gula Nazir of Homr Arabs." There are several villages marked with a query. There are other villages not marked with a query which we know to have been Arab villages. There are no villages on the Ragaba ez Zarga at this period which have been identified as Ngok Dinka villages. I turn to Percival's 1904 sketch map. As you can see, he clearly has Sultan Rob south of the Kiir, not far from the village of Bongo. The village of Burakol is mentioned just north of the Kiir. He states that Sultan Rob was "at present living in Burakol", which | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | SPLM/A suggested may have been lying on some point was the transferred leader himself. | 2 | to Gerinti, and again only Homr north of Mek Kwal's | 2 | was not before Lukji, which is approximately |
| 3 | village. He mentioned Ngok villages along the | 3 | 16 kilometres north of the Bahr el Arab, that he |
| 4 | Bahr el Arab. The villages are there for you to see. | 4 | reported the first Ngok houses, and these are |
| 5 | For a man who only made topographical observations, | 5 | distinctive houses. |
| 6 | Heinekey noted quite a few. | 6 | The SPLM/A states: |
| 7 | For approximately 85% of his lengthy journey he was | 7 | "Henderson's account of a single 200-kilometre truck |
| 8 | travelling through what the SPLM/A memorial puts forward | 8 | ride in a dry season did not even remotely purport to |
| 9 | was Ngok Dinka country, the vast area below 10°35'. Yet | 9 | survey the extent of Ngok Dinka territories and provided |
| 10 | for most of his trip the Ngok were notable only for | 10 | only a limited glimpse through a very narrow keyhole." |
| 11 | their absence. | 11 | Let's consider the facts. In 1933 he was travelling |
| 12 | Finally he says that from Gerinti, north of the | 12 | on the motor road that passes through the famous |
| 13 | Bahr el Arab near the Darfur boundary, to Mek Kwal's | 13 | settlement of Tebeldiya. He travelled on the very road |
| 14 | village: | 14 | that the Ngok were said to be responsible for, according |
| 15 | " there is no track of any sort." | 15 | to SPLM/A witness statements. He reports that the first |
| 16 | So he confirms the view which you would get from the | 16 | Dinka houses were seen at Lukji. That is well south of |
| 17 | Civsec map that this area was uninhabited. That's | 17 | the Ragaba ez Zarga and much further south of Tebeldiya. |
| 18 | consistent with what Sultan Rob himself said. | 18 | It would be a very long walk to work. |
| 19 | The SPLM/A finds the notion of an unpopulated | 19 | I now refer to the 1941 Kordofan Native |
| 20 | stretch of land here "entirely implausible", but of | 20 | Administration Act. The 1941 Administration Act sets |
| 21 | course anything that conflicts with their claim is | 21 | out the native administrations in Kordofan at that time, |
| 22 | implausible, irrespective of the fact of its multiple | 22 | and you will see at the bottom, in the southeasterly |
| 23 | confirmation in the written sources. | 23 | corner of Kordofan, an area which says "Dinka", which is |
| 24 | I turn now to Dupuis's sketch of Dar Homr of 1921. | 24 | located where Abyei is located. That was the local |
| 25 | This is what it's called, a wheel-and-compass sketch, | 25 | government area map of that time. |
| | Page 97 | | Page 99 |
| | | | |
| | | | |
| 15:22 1 | but I don't propose to recall Mr MacDonald to explain | 15:26 1 | The SPLM/A states that the map is unsophisticated, |
| | what that ie. His skatch shows no sign of Nigok presence | • | |
| 2 | what that is. His sketch shows no sign of Ngok presence | 2 | and it's not very sophisticated, that's true, but |
| 3 | in the area claimed by the SPLM/A. The most northerly | 3 | sophistication is not a criterion of evidence. Indeed, |
| 3 4 | in the area claimed by the SPLM/A. The most northerly indication of Ngok presence that we can find is the word | 3 4 | sophistication is not a criterion of evidence. Indeed, some of the most sophisticated evidence one hears is |
| 3 4 5 | in the area claimed by the SPLM/A. The most northerly indication of Ngok presence that we can find is the word "dugdug", which is indicative of a Ngok cattle camp, | 3 4 5 | sophistication is not a criterion of evidence. Indeed, some of the most sophisticated evidence one hears is some of the most unreliable. |
| 3 4 5 6 | in the area claimed by the SPLM/A. Then we have Titherington's 1924 sketch map. I'll come back to it later in the context of the southern boundary. But it should be noted that there is an adaption on the left bank of the Umm Biero, just north of the Bahr el Arab, when it says: "Abyei" Spelt properly: " [Chief Kwal Arob's since 1918]." This is the best evidence in the record of the date from which Kwal Arob took up residence in Abyei the modern Abyei in 1918. The final route report I would like to address is that of Henderson of 1933. Henderson was a distinguished scholar as well as a long-time civil servant in the Sudan. He was Governor of Darfur province from 1949 to 1953. In 1933 Henderson travelled from Muglad to Abyei on the main road by way of Tebeldiya, Antila, Lukji and Na'am. As various travellers, he did not notice any | 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | sophistication is not a criterion of evidence. Indeed, some of the most sophisticated evidence one hears is some of the most unreliable. The SPLM/A further complains that: "Whatever information it is based on is unknown, and it almost certainly did not involve any consultation with the Ngok." Now, we don't suggest that the British set up a local administration area in the furtherance of the principle of self-determination. It was a local government area for the Ngok; that was all it was. But that's not the point. The point for present purposes is the location of the Ngok in 1905. In 1949, when there were possibly five times as many Ngok as in 1905, the Condominium Government established a local government area for them. No doubt some Ngok would have been living outside that area but the concentration of them must have been within it; that's the point of having local government. The rest of the local government area in that part of Kordofan was, of course, for the Homr. The map clearly indicates where the Ngok were exercising local government or self-administration in |
| 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | in the area claimed by the SPLM/A. The most northerly indication of Ngok presence that we can find is the word "dugdug", which is indicative of a Ngok cattle camp, some miles north of Lukji on the Umm Biero. Then we have Titherington's 1924 sketch map. I'll come back to it later in the context of the southern boundary. But it should be noted that there is an adaption on the left bank of the Umm Biero, just north of the Bahr el Arab, when it says: "Abyei" Spelt properly: " [Chief Kwal Arob's since 1918]." This is the best evidence in the record of the date from which Kwal Arob took up residence in Abyei the modern Abyei in 1918. The final route report I would like to address is that of Henderson of 1933. Henderson was a distinguished scholar as well as a long-time civil servant in the Sudan. Consistently with the Civsec map of 1933, we would expect a 1905 tribal boundary to include not more than this area; we would expect it not to have contact with the Darfur boundary; we would expect it to be limited to a line to the south; we would expect it not to go very far east. |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | contemporary publications at the time he was doing it, in the early 1950s, and later in his classic book Baggara Arabs of 1966. You can see where he puts the Dinka on the map in his 1954 sketch map of Dar Homr. Now you can see, taken from the 1966 book his indication of where the Homr omodiyas migrated to on their summer migration; well south of the shared rights area. You will of course have read what Professor Cunnison says in his two witness statements on that subject, which are merely "merely" is perhaps the wrong word which are entirely consistent with his published writings deriving from his fieldwork. Then we have, slightly out of chronological order, Mr Tibbs. Mr Tibbs was the last assistant district administrator to Dar Messiriya. He published a charming well, published, it was self-published book published in 1999, but he was actually in the area for a couple of years at the same time as Cunnison, who he met with. Cunnison was there much more continually than Tibbs, who was normally further north. But you can | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | between the river and the Umm Biero and just on the other side of it; not I repeat not on the Ragaba ez Zarga. Let me consider then, after this chronological review, the evidence for a Ngok boundary in 1905, which is after all, if you accept the SPLM/A's interpretation of the formula, what you have to decide in this part of the case. We don't suggest that there is enough information, as it were, to draw the line for you. Some level of assessment is required. But there is enough information for you to establish in general terms where the Ngok lived. Let's recall the 1933 map. Consistently with the Civsec map of 1933, we would expect a 1905 tribal boundary to include not more than this area; we would expect it not to have contact with the Darfur boundary; we would expect it to be limited to a line to the south; we would expect it not to go very far east. Let me take each of those boundaries. First, and in |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | contemporary publications at the time he was doing it, in the early 1950s, and later in his classic book Baggara Arabs of 1966. You can see where he puts the Dinka on the map in his 1954 sketch map of Dar Homr. Now you can see, taken from the 1966 book his indication of where the Homr omodiyas migrated to on their summer migration; well south of the shared rights area. You will of course have read what Professor Cunnison says in his two witness statements on that subject, which are merely "merely" is perhaps the wrong word which are entirely consistent with his published writings deriving from his fieldwork. Then we have, slightly out of chronological order, Mr Tibbs. Mr Tibbs was the last assistant district administrator to Dar Messiriya. He published a charming well, published, it was self-published book published in 1999, but he was actually in the area for a couple of years at the same time as Cunnison, who he met with. Cunnison was there much more continually than Tibbs, who was normally further north. But you can see where Tibbs puts the Ngok, and it's well south of | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | between the river and the Umm Biero and just on the other side of it; not I repeat not on the Ragaba ez Zarga. Let me consider then, after this chronological review, the evidence for a Ngok boundary in 1905, which is after all, if you accept the SPLM/A's interpretation of the formula, what you have to decide in this part of the case. We don't suggest that there is enough information, as it were, to draw the line for you. Some level of assessment is required. But there is enough information for you to establish in general terms where the Ngok lived. Let's recall the 1933 map. Consistently with the Civsec map of 1933, we would expect a 1905 tribal boundary to include not more than this area; we would expect it not to have contact with the Darfur boundary; we would expect it to be limited to a line to the south; we would expect it not to go very far east. Let me take each of those boundaries. First, and in some respects easiest, is the southern boundary. |

| 15:39 1 | "The Homrs cultivate around Muglad and Baraka, but | 15:42 1 | to the same conclusion: there were no Ngok on the |
| 2 | as soon as the water dries up they migrate towards the | 2 | Ragaba ez Zarga; there were no Ngok permanent |
| 3 | Bahr el Homr." | 3 | inhabitants north of the Ragaba ez Zarga. Contemporary |
| 4 | He was talking about the Ragaba ez Zarga. He | 4 | and later evidence all confirm the conclusion that they |
| 5 | specifies the precise locations of the dry season camps | 5 | were on and around the Bahr el Arab, not further south |
| 6 | along the river; you've seen them in the graphic. There | 6 | than the village of Bongo at 9°32'. |
| 7 | is no mention of Ngok in this area in that report. | 7 | Where 10°35' gets you from there; well, you can set |
| 8 | Thus the evidence is the evidence of contemporary | 8 | aside that for yourself. |
| 9 | documents that there were no Ngok on the | 9 | The SPLM/A, of course, do make an extraordinary |
| 10 | Ragaba ez Zarga at the time of the transfer. On the | 10 | claim for Ngok habitation so far north. They've never |
| 11 | contrary, this river was inhabited in the dry season by | 11 | been observed living there, but that's because they |
| 12 | the Homr, as stated by Lloyd in his 1908 report. | 12 | habitually disappear; a bit like the Scarlet Pimpernel |
| 13 | I turn to the position north of the Ragaba ez Zarga. | 13 | Mr President, "damned elusive". |
| 14 | In this regard it's relevant to quote Professor Daly, as | 14 | Let's consider the facts under various headings; |
| 15 | I do. He says: | 15 | first of all the SPLM/A argument based on toponymy, or |
| 16 | "For the area north of the Ragaba ez Zarga, the goz | 16 | the naming of places. |
| 17 | region of stabilised sand dunes growing scrub that | 17 | The SPLM/A relies extensively on toponymy, the idea |
| 18 | sustains seasonal grazing, we are left to consider | 18 | that knowledge of Ngok place names attributed to modern |
| 19 | evidence from oral sources recorded during the | 19 | towns suggests that they were in 1905 Ngok places. Yet |
| 20 | post-colonial disputation of Abyei boundaries; evidence | 20 | many places throughout the Bahr el Ghazal have Arab |
| 21 | of archaeology and etymology." | 21 | names. That doesn't mean that they were originally |
| 22 | That is a very polite way of saying that there is no | 22 | Arab. In fact, it's a quite general pattern that places |
| 23 | contemporary evidence of Ngok occupation north of the | 23 | in this region are named in both languages. |
| 24 | Ragaba. In that respect Professor Daly gets it | 24 | Ngok toponymy nonetheless appears to have struck |
| 25 | absolutely right. | 25 | a chord with the experts, who emphasised in their |
| | D 100 | | D 111 |
| | Page 109 | | Page 111 |
| | | | |
| 15:41 1 | No documentary sources support the proposition of | 15:44 1 | summary that the Ngok gave a detailed account of place |
| 2 | Ngok habitation, permanent or transitory, to the north | 2 | names for permanent settlements and grazing grounds for |
| 3 | of the Ragaba ez Zarga. Of course, individual Ngok | 3 | each of the nine Ngok Dinka chiefdoms and said that this |
| 4 | would have travelled across that area, as they did on | 4 | contrasted with the sparse details given by Messiriya |
| 5 | their way to the provincial capital, but that's | 5 | witnesses. |
| 6 | different. That's not the sort of occupation which | 6 | The fact that the places are named in a certain |
| 7 | gives you the Abyei Area. The only sources on which | 7 | language does not, however, mean that they were part of |
| 8 | this claim relies is made up of witness statements, oral | 8 | a transferred area in 1905. A name does not connote |
| 9 | traditions and Ngok toponymy. | 9 | ownership, much less physical possession or usage in |
| 10 | Professor Daly goes on to say: | 10 | 1905. The name Khartoum, for example, is said to be |
| 11 | "Because our terms of reference specify the position | 11 | a Dinka name. Places such as El Oddaya and Muglad have |
| 12 | in 1905, we have no way precisely to delimit the | 12 | Dinka names as well, but not even the SPLM/A were |
| 13 | northern border of the Ngok territory in the goz." | 13 | prepared to claim them. |
| 14 | Well, you can decode that sentence for yourself, | 14 | Even the ABC experts had limits to their toponymic |
| 15 | "Because our terms of reference specify the position of | 15 | tolerance. During the Khartoum interviews a member of |
| 16 | 1905"; it's not Professor Daly's terms of reference, | 16 | the Alei tribe listed 28 Ngok place names, including |
| 17 | it's your mandate that specifies that definition. | 17 | El Oddaya and Muglad. The response, according to the |
| 18 | According even to Professor Daly, there is no way | 18 | ABC experts' report, was as follows: |
| 19 | | 19 | "We pointed out that the Ngok were not claiming to |
| | precisely to delimit the northern border of the Ngok | | |
| 20 | territory in the goz. Since the burden of proof at this | 20 | return to Muglad and El Oddaya. What we needed was |
| 21 | territory in the goz. Since the burden of proof at this stage is on them in relation to this question, that is | 20 21 | return to Muglad and El Oddaya. What we needed was evidence of Pawol, Nyama, et cetera." |
| 21 22 | territory in the goz. Since the burden of proof at this stage is on them in relation to this question, that is an acceptance that they haven't demonstrated that | 20 21 22 | return to Muglad and El Oddaya. What we needed was evidence of Pawol, Nyama, et cetera." That's the experts telling the Ngok which places |
| 21 22 23 | territory in the goz. Since the burden of proof at this stage is on them in relation to this question, that is an acceptance that they haven't demonstrated that matter. Of course, Professor Daly's expertise is | 20 21 22 23 | return to Muglad and El Oddaya. What we needed was evidence of Pawol, Nyama, et cetera." That's the experts telling the Ngok which places they want to name, and rejecting some names because |
| 21 22 23 24 | territory in the goz. Since the burden of proof at this stage is on them in relation to this question, that is an acceptance that they haven't demonstrated that matter. Of course, Professor Daly's expertise is geographical, not anthropological. | 20 21 22 23 24 | return to Muglad and El Oddaya. What we needed was evidence of Pawol, Nyama, et cetera." | 15:45 | 1 | to refer to Tebeldiya. | 15:49 1 | 1 | made towards the end of the dry season, mainly around |
|-------|----|--|---------|--------------|--|
| | 2 | We'll return in due course to the rest house at | 2 | 2 | the largest water course, the Ragaba Umm Biero and the |
| | 3 | Tebeldiya. Suffice it to say that toponymy proves far | 3 | 3 | Ragaba ez Zarga. Finally much of the Bahr ['much of the |
| | 4 | too much, and therefore nothing at all. | 4 | 1 | Bahr'] has permanent Dinka settlements. Though during |
| | 5 | I refer next to the oral evidence. I've already | 5 | 5 | most of the time the Homr occupy it, the Dinka are with |
| | 6 | made some remarks about oral evidence in general. It's | 6 | 5 | their cattle south of the Bahr el Arab." |
| | 7 | time to refer to some specific SPLM/A arguments in the | 7 | 7 | That is an entirely independent study by the |
| | 8 | mode of tribal lays. | 8 | 3 | anthropologist of the Baggara Arabs of the early 1950s. |
| | 9 | I'm going to take just one argument by way of | 9 |) | It's totally inconsistent with the story that the |
| | 10 | example: the repeated refrain in Ngok witness statements | 10 | \mathbf{c} | Baggara did not migrate south with cattle at that time. |
| | 11 | that they never saw the Messiriya until the | 11 | 1 | Totally inconsistent. |
| | 12 | mid-20th century, and that it was only after the middle | 12 | 2 | Moreover, Professor Cunnison goes on to say that he |
| | 13 | part of the 20th century that the Messiriya acquired | 13 | 3 | has no reason, based on his study of the subject and of |
| | 14 | cattle. | 14 | 4 | the literature and of the documentation, to believe that |
| | 15 | The SPLM/A present 26 witness statements in their | 15 | 5 | this pattern was not of long-standing. |
| | 16 | original pleading. We obviously don't have time to go | 16 | 6 | Of the 14 Ngok witnesses who give evidence about |
| | 17 | through those 26 witness statements, and indeed you'll | 17 | | contacts with the Messiriya, eight testify that the Homr |
| | 18 | only find in the text of my speech the references to | 18 | | did not bring cattle into the region until after the |
| | 19 | some of them. The SPLM/A advances the view that these | 19 | | mid-20th century. Apparently Professor Cunnison was |
| | 20 | witness statements ought to be preferred over | 20 | | imagining things on those long hot walks. The virtual |
| | 21 | documentary sources, which provide no support for the | 21 | | unanimity in the Ngok oral evidence in favour of |
| | 22 | propositions in the witness statements, because the | 22 | | incredible propositions discredits the whole corpus. |
| | 23 | witness statements are highly detailed and consistent. | 23 | | Mr President, I was going to go on to say some words |
| | 24 | Indeed, they're suspiciously consistent. They tell | 24 | | about the community mapping project, but we'll leave |
| | 25 | us the Messiriya did not start coming down to the Ngok | 25 | | those comments for a brief cross-examination tomorrow. |
| | 23 | us the Messifya did not start confing down to the Ngok | 2. | , | those comments for a brief cross-examination tomorrow. |
| | | Page 113 | | | Page 115 |
| | | | | | |
| | | | | | |
| 15:47 | 1 | lands until the mid-1950s. Moreover, the Ngok assert in | 15:50 1 | l | We've dealt with it in the pleadings, and we refer to |
| | 2 | these witness statements that when the Messiriya did | 2 | 2 | what we said on the community mapping project. |
| | 3 | eventually come down to the Ragaba and the Bahr el Arab | 3 | 3 | I refer now to Tebeldiya. Like many names in Sudan |
| | 4 | they were merely traders, not cattle herders. It | 4 | 1 | this one derives from a tree. The 1931 gazetteer lists |
| | 5 | appeared that they subsequently diversified. | 5 | 5 | 18 towns called Tebeldiya. But there's not a shred of |
| | 6 | These assertions are extraordinary. As we've | 6 | 5 | documentary evidence that supports the assertion that in |
| | 7 | already seen, there is a wealth of documentary evidence | 7 | 7 | 1905 the boundaries of the Ngok extended to Tebeldiya. |
| | 8 | showing the Homr grazing south of the Ragaba ez Zarga in | 8 | 3 | It's a submission entirely reliant upon Ngok oral |
| | 9 | and after the period of the transfer. | 9 |) | tradition. |
| | 10 | Let me take the writings of the only professional | 10 | 0 | The rest house at Tebeldiya is the only evidentiary |
| | 11 | anthropologist to give evidence in this case, | 11 | 1 | basis on which the experts proposed the 10°35' claimed |
| | 12 | Professor Ian Cunnison. He records his experiences | 12 | 2 | border as entitled to any weight. And it was entitled |
| | 13 | travelling with the Homr, with large herds of cattle | 13 | | to weight, even though it was rejected: it is one half |
| | 14 | they left some behind, but they travelled with most of | 14 | | of the reasoning which leads you to 10°23'30". |
| | 15 | them travelling through the goz down to the Bahr. He | 15 | | The SPLM/A witness statements regarding Tebeldiya |
| | 16 | is an impartial witness. He knew where he was. He | 16 | | have been dealt with in our counter-memorial, and I will |
| | 17 | travelled with the tribes. He went as far south as the | 17 | | not repeat them. I've already taken you to Vansina's |
| | 18 | Bahr el Arab. Describing the Homr migration, he says: | 18 | | comments regarding methodology. It's illustrative to |
| | 19 | "The Bahr is the name which the Homr give to the | 19 | | note the way in which our colleagues opposite attempted |
| | 20 | whole of the dry season watering country. Within it | 20 | | to gather witness testimony on Tebeldiya in the |
| | 21 | they recognise different districts. The Ragaba is the | 21 | | following question: |
| | 22 | northern part of the Bahr, where the Homr make their | 22 | | "Did your grandfather and his father help to clear |
| | 23 | earliest dry season camps." | 23 | | the road to Tebeldiya that was constructed when the |
| | 24 | That's consistent with what Lloyd said in 1908. | 24 | | British colonial administration began? When did your |
| | 25 | "The Bahr proper is the region where the camps are | 25 | | chiefdom clear the road?" |
| | | FF and regioneve the entires are | | | |
| | | Page 114 | | | Page 116 |

| | | <u> </u> | |
|----------|--|----------|---|
| 15:52 1 | That is a totally improper question, because it | 15:55 1 | terra nullius. They're not terra nullius in |
| 2 | contains first of all a statement which is very probably | 2 | international law, and they're not terra nullius on any |
| 3 | false. There's no indication that the British colonial | 3 | other basis. They're part of Kordofan. |
| 4 | administration constructed the road when the | 4 | I refer now very briefly to the SPLM/A's tribal |
| 5 | administration began. The probability is that the road | 5 | maps. The SPLM/A, as part of their argument, have tried |
| 6 | was always there as a path, and that the improvement of | 6 | to, as it were, display oral evidence in all sorts of |
| 7 | the road happened later on. | 7 | forms as a method of making up for the absence of actual |
| 8 | Secondly, it implies that the great-grandfather was | 8 | documentary evidence. |
| 9 | there when the British colonial administration began; | 9 | Here they have a person in a rather unusual posture. |
| 10 | which, in terms of the chronology, is in many cases | 10 | We speculated about what the posture was, whether it's |
| 11 | unlikely. | 11 | a posture of surrender, but we think not. Anyone who |
| 12 | "Where did your chiefdom clear the road?" implies | 12 | gets that much territory has not surrendered. We think |
| 13 | the answer that they did. | 13 | it could be crossing the winning post and celebrating, |
| 14 | But the remarkable feature about this is: we didn't | 14 | though we're not sure whether the celebration is in the |
| 15 | even get the answers. The question having been asked in | 15 | 3.10 race to get to the north, or the 4.15 gallopers' |
| 16 | a wholly improper way, the answers were not included in | 16 | contest to grab the oilfields. At least there's some |
| 17 | the report. We can only infer that they would not have | 17 | prize at the end of it. |
| 18 | assisted the SPLM/A case. | 18 | But it's instructive to look this is the |
| 19 20 | I turn to the ABC experts' argument based on | 19 20 | composite it's instructive to look at each of the nine tribes. What we did was to take the specific |
| 20 | dominant and secondary rights. It's true that | | _ |
| 21 22 | an anthropologist would say that there was a distinction in the lifestyle between the [Baggara] and the Ngok. | 21 22 | references to the nine tribes that we could find in maps of the period up to 1936, and compare it with references |
| 23 | The Ngok are technically transhumant; the Baggara are | 23 | to that chiefdom that were made by the SPLM/A. |
| 23 24 | technically nomadic. | 23 | This is the Abyior chiefdom; I'm taking them in |
| 24 25 | The beginning of my academic career and professional | 25 | alphabetical order. You can see where they're supposed |
| 23 | The beginning of my academic career and professional | 23 | alphabetical order. Tou can see where they le supposed |
| | Page 117 | | Page 119 |
| | | | |
| 15.52 1 | and the second of the second o | 15.57 1 | to be The second of the Alexander |
| 15:53 1 | career as an international lawyer was marked by the | 15:57 1 | to be. The actual map references to the Abyior are in |
| 2 3 | Western Sahara case, a great decision which got rid of the inherent bias associated with colonial theories of | 2 3 | what might be described politely as the "underarm" of the successful athlete; they're nowhere near the north. |
| 4 | the acquisition of territory. It's somewhat remarkable | 4 | Then we have the Achak chiefdom. Again you can see |
| 5 | to find the social scientists who'd criticise the | 5 | where they're supposed to be in accordance with oral |
| 6 | international lawyers for their terra nullius theories | 6 | tradition, and where the maps show them as being. The |
| 7 | adopting it here. | 7 | colours represent different periods in relation to the |
| 8 | On what basis can you say that one sort of lifestyle | 8 | overall period from the early 20th century up to 1936. |
| 9 | trumps another? On what basis can you say that rights | 9 | Then we have the Acheung chiefdom; a vaster area in |
| 10 | of use of different sorts and they're functional | 10 | a light grey, unexplained in the SPLM/A pleadings, |
| 11 | rights in all cases; none of them amount to ownership | 11 | together with references further south, consistently |
| 12 | under the applicable law trump another? That is | 12 | with the pattern of actual occupation that I've shown |
| 13 | simply pulled out of a hat. It's part of an applicable | 13 | you. |
| 14 | law by a body that did not have an applicable law | 14 | Then we have next the Alei. The Alei, I'm afraid, |
| 15 | clause, and had no authority to decide a transferred | 15 | miss out entirely. Perhaps they don't share in the |
| 16 | area as a matter of 1905 by reference to concoctions of | 16 | spoils. |
| 17 | a post-colonial but still colonialist law. | 17 | The Anyiel, all to the south. |
| 18 | As Ambassador Dirdeiry stressed in his opening, this | 18 | Quite a number of references to Bongo in the south; |
| 19 | case, we hope, is not a confrontation between Ngok and | 19 | absolutely nothing in the north. |
| 20 | Messiriya. There are people on all sides of this | 20 | The Diil. Quite lot of references to the Diil, and |
| 21 | dispute. The position is much more complicated than | 21 | this is perhaps the most accurate of the correspondences |
| 22 | might be thought. | 22 | between references in maps to reference to tribal areas. |
| 23 | The region itself is populated by many different | 23 | But still it's the southern half of the imputed tribal |
| 24 | groups. There are parts of it that remain, even today, | 24 | area, and not the northern half. |
| 25 | 4 1 1 1 1 7 7 1 1 1 1 1 | 25 | The Manyyon comy I'm twing to good at this |
| | permanently uninhabited. That doesn't mean they're | 23 | The Manyuar sorry, I'm trying to read at this |
| | | 23 | |
| | Page 118 | 23 | Page 120 |

|----------|---|----------|--|
| 15:58 1 | distance and my eyes are fading again, well in the | 16:01 1 | we had not seen this before at all. It's now on the |
| 2 | south. | 2 | screen. Here it is in its geographical context. |
| 3 | The Mareng: lots of references in the south. | 3 | Only a small section of this sketch lies within the |
| 4 | That's it, that's the nine. Well, I'm afraid the | 4 | area claimed by the SPLM/A. Again, the only point of |
| 5 | winning post was a long way further away than the | 5 | relevance is that El Debekir is highlighted as a Homr |
| 6 | athlete thought. | 6 | settlement. |
| 7 | I now want to refer to the new maps which the SPLM/A | 7 | That's really the only comments we have on the |
| 8 | have put in as a result of the flurry of recent | 8 | Wilkinson material. |
| 9 | activity, trying to discover what's in the archives. | 9 | Then there was a new Whittingham map. On 3rd April |
| 10 | I'm just going to take you through the maps and comment | 10 | the SPLM/A produced a route sketch prepared by |
| 11 | on them in turn. | 11 | Whittingham in 1910 which they titled "Turda to Koak & |
| 12 | The first is Wilkinson 1902. The SPLM/A complained | 12 | Bara to Mellum", although the sketch itself is untitled. |
| 13 | that we only submitted part of the Wilkinson route | 13 | The Government had already submitted a sketch by |
| 14 | | 14 | Whittingham from 1910 in its counter-memorial covering |
| 15 | on the screen. That's correct. We received two | 15 | the route that you can see on the screen now, and I have |
| 16 | | 16 | described what Whittingham saw on that particular |
| 17 | Department, and submitted one of them, covering the | 17 | voyage. |
| 18 | lower part of the area, in our counter-memorial atlas. | 18 | The new sketch produced by the SPLM/A certainly covers an area of relevance to this case, and we're |
| 19 | The second extract we received covers the more | 19 20 | grateful to them for finding it. It fills one of the |
| 20 21 | northerly area which is highlighted. It's now displayed in full. We had seen that before but we did not include | 20 | _ |
| 21 22 | it in the counter-memorial atlas because it did not | 21 22 | gaps. The first point is that its attempt to assemble the |
| 23 | strike us as containing any particularly relevant | 23 | sketch from its constituent parts went a little awry. |
| 23 | information. All it shows that the El Debekir is | 23 | The southwest corner of the collage actually covers an |
| 25 | clearly labelled as Homr. That's highlighted now. | 25 | area further south, near Sultan Rob's old village. It |
| 23 | clearly labelled as Hollin. That's highlighted flow. | 23 | area further south, hear Sultan Rob's old village. It |
| | Page 121 | | Page 123 |
| | | | |
| 16:00 1 | We submitted this section to the Tribunal and to the | 16:02 1 | goes like that (indicates). |
| 2 | SPLM/A when requested to do so. We have you may not | 2 | Sadly for the SPLM/A, Whittingham's sketch of the |
| 3 | believe it tried rather hard to limit the burden of | 3 | area in question contains no information on the location |
| 4 | paper on you, so we didn't show you everything we had. | 4 | of Ngok Dinka tribes, or indeed anything of real |
| 5 | We are certainly happy to respond to any requests, even | 5 | relevance to this case, though we may be told the |
| 6 | now. | 6 | contrary when they speak. |
| 7 | The area of the sketch highlighted in yellow was | 7 | Mr President, members of the Tribunal, the other day |
| 8 | obtained from the Sudan Survey Department by the SPLM/A | 8 | we were told that further maps would be submitted; they |
| 9 | and sent to us on 3rd April. We hadn't seen that | 9 | have not been submitted. I think I can stop on that |
| 10 | before; why I do not know. But I have to say, | 10 | point here. |
| 11 | Mr President, members of the tribunal, this has been | 11 | The new material submitted and not submitted shows |
| 12 | from a forensic point of view the case from hell. We | 12 | nothing of relevance to this case. |
| 13 | have had to plead three rounds in seven months, and | 13 | Mr President, members of the Tribunal, just as the |
| 14 15 | getting the documentary record together has been difficult, as you can imagine. | 14 15 | 1933 Civsec map constitutes the best depiction of Ngok territory for the Condominium period, so does the |
| 16 | We hadn't seen this. An examination of the little | 15 | following account by Inspector Willis provide the best |
| 17 | bit that's shown reveals only one point of interest: | 17 | written description of it, and it has the advantage of |
| 18 | namely that Wilkinson understood Fauwel to be a Homr | 18 | being much closer to the relevant date. The description |
| 19 | settlement. We knew that already, of course. The ABC | 19 | dates from 1909, "An Account of the Western Kordofan |
| 20 | experts treated it as falling well within the area of | 20 | Dinka". Let me read it to you: |
| 21 | Ngok primary rights. Fauwel is a Ngok settlement, | 21 | "All along the Gurf [the Gurf is the Bahr el Arab] |
| 22 | apparently. | 22 | are villages consisting of perhaps two or three houses |
| 23 | On 3rd April the SPLM/A also submitted a sketch of | 23 | each." |
| 24 | Wilkinson's journey from Debiri to Keilak and Debekir | 24 | Not indications of a very large population: |
| 25 | before he travelled down to Sultan Rob on the Kiir, and | 25 | "The ones I saw at the ferry by Rob's old village |
| | Page 122 | | Page 124 |
| | | | |

| 16:04 1 | were about a mile apart, and I was told they continued | 16:07 1 | the presentation, and Martin Pratt of IBRU Durham for |
|--|---|--|---|
| | 2 all along the Gurf both ways. Total distance from | 2 | his work on the maps. I should like to note that |
| | end-to-end in which these Dinkas live (Lar and Rob) is | 3 | a significant fraction of the Government material |
| 2 | • | 4 | presented to you has been collected by them. The fact |
| 5 | | 5 | that these two young lawyers with no prior knowledge of |
| 6 | | 6 | the Sudan were able to collect and digest all this |
| | • | 7 | information, mostly from libraries and archives in the |
| 8 | | 8 | United Kingdom, puts the work of the experts to shame. |
| g | | 9 | Of course, the experts took a little less time to |
| 10 | | 10 | _ |
| 1: | - - | 10 | that was their choice, and they were starting as |

His estimate of the width of Ngok territory from east to west as about 50 miles or two days' travel is consistent with Dupuis's detailed map and with the Civsec sketch map in its east-west orientation. Finally, Willis's description of temporary villages is consistent with Cunnison's analysis of the Ngok's transhumant lifestyle, occupying different areas at different times of the year, but always around the Kiir/Bahr el Arab. Mr President, members of the Tribunal, you will have noted that in our written pleadings we make no alternative submissions on tribal boundaries. What we do say is that the ABC experts' tribal boundary bears not the slightest relationship to the area occupied and used by the nine tribes in 1905, or for that matter in 1933; an area which for the reasons I have given was larger in 1933 than it would have been in 1905 and most certainly cannot have been smaller. Before concluding I'd like to thank Jacques Hartmann | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | reviewed, and bearing in mind the mandatory requirement on them to find the Abyei Area by means of scientific enquiry and research, the outcome of the report, their Abyei Area, is a scientific shambles. I go further: the bizarre shape that a 1905 tribal area would have in accordance with the contemporary documentary evidence shows that this can't have been intended. The area transferred to Kordofan can only be understood and determined on the basis of a territorial interpretation. It is the area of Kordofan to the south of the Bahr el Arab, the area attributed to Sultan Rob at the time of the transfer to Kordofan in 1905. That area, and only that area, can be shown to have been transferred. Mr President, members of the Tribunal, this concludes the Government of Sudan's first-round submissions on delimitation. I thank you for your attention. THE CHAIRMAN: Professor Crawford, I thank you very much. Mr Born, are you ready to begin? MR BORN: Could I suggest that we take the break a little early and then allow the presentation in one continuous piece? |

| 16:10 1 | MR BORN: Thank you very much. | 16:42 1 | friends. We will instead look at the real people, the |
|--|--|--|---|
| 2 | (4.10 pm) | 2 | real people of Sudan, and we will look at the land, the |
| 3 | (A short break) | 3 | rivers, the vegetation of Sudan. |
| 4 | (4.39 pm) | 4 | When you see that, when you look at that in the |
| 5 | THE CHAIRMAN: Mr Born. | 5 | whole, we submit the Government's case will crumble. |
| 6 | Submissions by MR BORN | 6 | You will see that the submissions by the SPLM/A are |
| 7 | MR BORN: Thank you, Mr Chairman. | 7 | confirmed consistently and uniformly by a wide range of |
| 8 | The Tribunal will recall our presentation on Sunday. | 8 | evidence which you can rely on, which is objective, |
| 9 | That presentation demonstrated that we don't really need | 9 | independent and coming at the same issues from a variety |
| 10 | to be here today. The ABC experts did not exceed their | 10 | of directions. |
| 11 | mandate, and as a result the experts' delimitation and | 11 | As you can see on the current slide, we will begin |
| 12 | definition of the Abyei Area in the ABC report is | 12 | with the geography of the Abyei Area and the Bahr |
| 13 | entitled to final and binding status, and pursuant to | 13 | region. We will spend some time addressing scientific |
| 14 | Article 2(b) the consequences of that are clear. | 14 | evidence about the Bahr region. You will recall |
| 15 | That resolves the parties' dispute before this | 15 | Professor Crawford touched briefly on this; I will refer |
| 16 | Tribunal and, as I say, makes it unimportant for us to | 16 | to the way he described the Bahr region subsequently, |
| 17 | be here today. | 17 | but I would emphasise now, at the outset, that you go |
| 18 | Only in the extraordinary unlikely case that the | 18 | back and look at the transcript as to how he tries to |
| 19 | Tribunal were to conclude that the experts did exceed | 19 | formulate and then reformulate and reformulate again how |
| 20 | their mandate is there any need for it to do anything | 20 | he describes the Bahr. |
| 21 | else beyond Article 2(b). In that event, and only that | 21 | We will turn next to the historic evidence of the |
| 22 | event, would the Tribunal be presented with the question | 22 | Ngok Dinka migration to the Bahr region. To an extent |
| 23 | under 2(c), with which we are all by this point well | 23 | it is oral tradition, but again has substantial |
| 23 | familiar. | 24 | credibility because it's shared, it's agreed by the two |
| 25 | If the Tribunal does go on to consider the question | 25 | parties, save in some respects which I will address. |
| 2.5 | if the Tribulial does go on to consider the question | 23 | parties, save in some respects which I will address. |

First there are two preliminary points that I would like to touch on. Initially there's a question, which I thought we had addressed in the mandate section, of the definition of the Abyei Area. You will recall that Professor Crawford spent an hour, an hour and a half discussing it, and I answered it in rebuttal. We then saw Mr Bundy come |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | Area as set forth in the SPLM/A's written submissions. That area, briefly stated, encompasses the territory extending north from the current Kordofan/Bahr el Ghazal boundary to latitude 10°35' north and east from the current Darfur/Kordofan boundary to 29°32' east. Our submissions set out in detailed evidence from a wide variety of sources establishing that this area, this territory, was that of the nine Ngok Dinka chiefdoms transferred to Kordofan in 1905. It is this historic ancestral tribal territory of the Ngok people that comprises the Abyei Area. In the coming presentations we will review the evidence the historical evidence, the environmental evidence, the scientific evidence relevant to the definition and delimitation of the Abyei Area. Our approach and you can see a résumé of what we will be looking at on the current slide will differ from that of the Government. It will differ from that of the Government in that we will focus on Sudan and we will focus on the Sudanese people. We will focus on the Ngok Dinka and on the Messiriya. We will not confine ourselves, as the Government has | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | record, such as it is, and we will see, as Mr Bundy put it well today, that it isn't much. We will look at the post-1905 documents, which suffer from some of the same difficulties, but we will spend considerable amounts of time with Professor Cunnison, who figured hardly at all in Professor Crawford's discussion, save to say that it puts one to sleep. We will suggest that it does not put one to sleep but rather commands your attention as it commanded that of the ABC experts. Then we will discuss the Ngok Dinka witness testimony, as well as the community mapping report. We will be assisted in that by Dr Peter Poole, who I will introduce to you shortly. First there are two preliminary points that I would like to touch on. Initially there's a question, which I thought we had addressed in the mandate section, of the definition of the Abyei Area. You will recall that Professor Crawford spent an hour, an hour and a half discussing it, and I answered it in rebuttal. We then saw Mr Bundy come back and address it, and Professor Crawford do it again. |

As a consequence, though, we have submitted the | 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | Third, you'll hear from Dr Peter Poole. He's one of the world's leading authorities on community mapping. He's conducted dozens of studies in the field, including the first. He will address the community mapping report that was prepared here, and can speak to the Government's complaints about it, the ones that Mr Crawford held back and didn't discuss with you. Finally Mr Richard Schofield, a distinguished geographer and specialist on boundaries, who'll address some of the same issues that Mr MacDonald did. I'd like to come back, though, to the fundamental difference between how the SPLM/A has approached this case and how the Government has approached it. Look around the room. The people of Sudan, the people of the Abyei Area, are very different from us. They're different, but they have a complex and rich culture; two complex and rich cultures. They're different from mine and Professor Crawford's, but that |
| 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | Therefore, insofar as an excess of mandate were only to affect one issue, it does not taint other aspects of the experts' report. That only stands to common sense; it only makes sense. If the experts rendered what would be a completely valid decision on a number of issues, the fact that they might have stepped over the line, were one to think that, on some other issue in no way taints the rest of their report. It is common ground, moving on now, that the factual and historical evidence in this case is exceptionally complex and difficult. Professor Crawford called it and I can quote from the transcript at page [63], line [18] "a very complicated question of fact", a question of anthropological fact. That's true; we don't disagree. | 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 | Third, you'll hear from Dr Peter Poole. He's one of the world's leading authorities on community mapping. | 17:00 1 | lie further river systems and vast swamplands, variously | 17:03 1 | White Nile. |
| 2 | called the sudd or the tooc. That river delta has been | 2 | Those rivers are fed by seasonal rains that |
| 3 | described as one of the world's largest swamps. | 3 | characterise the Bahr region. There's a dry season, |
| 4 | To the west of the Abyei Area, as well as in parts | 4 | which Professor Crawford didn't talk to you about. |
| 5 | of the east, lie desert regions or mountains. | 5 | During the dry season, between December and March, this |
| 6 | Taking a step back, the Abyei Area is a well-watered | 6 | area is hot and parched; "semi-desert", in the words of |
| 7 | and very fertile irregular rectangle, roughly | 7 | one observer. |
| 8 | three-quarters the size of Belgium, lying between | 8 | In contrast, between April and November the region |
| 9 | largely arid desert zones to the north and west and | 9 | is marked by torrential rains. In the words of another |
| 10 | a vast swamp to the south. | 10 | observer and this is recorded in our submissions |
| 11 | As we will see, it was in this fertile rectangle | 11 | there are "awesome crashing downpours" which produce |
| 12 | that the Ngok Dinka developed their traditional | 12 | widespread flooding. In turn, we will see that that |
| 13 | lifestyle and had their ancestral homelands. We will | 13 | flooding inevitably and naturally produces |
| 14 | see how that lifestyle, observed and recorded | 14 | an extraordinarily fertile soil. |
| 15 | consistently by objective scientific observers, matched | 15 | This slide shows the geography and soil composition |
| 16 | that region precisely. That evidence we will suggest | 16 | of the Bahr region. In the northwest, labelled in |
| 17 | provides some of the most reliable information on which | 17 | yellow, we can see the goz, which extends south in that |
| 18 | you, as the ABC experts, could base your decisions. | 18 | part of the Abyei Area to around 10°10' north. The goz, |
| 19 | The record before the Tribunal contains | 19 | as I mentioned, is a sandy strip, generally arid, with |
| 20 | a substantial body of environmental evidence about the | 20 | some, but relatively few, permanent Ngok settlements. |
| 21 | Abyei Area. You will recall that Professor Crawford | 21 | The Bahr, the region beneath the goz, beginning |
| 22 | mentioned this not once, although he was content to | 22 | immediately beneath the goz, extends south from that |
| 23 | consign the experts' work to the dustbin as a scientific | 23 | sandy region to the Ngol and on to the Kiir and a little |
| 24 | shambles. | 24 | south. |
| 25 | This evidence concerns the climate and seasonal | 25 | In the eastern parts of the Abyei region and |
| | Page 142 | | Page 144 |
| | | | |

| 17:05 1 | I mentioned there was one area on which we disagreed at | 17:08 1 | MENAS report. MENAS explains that the Bahr is |
|----------|---|----------|--|
| 2 | least to a small extent with the ABC experts in the | 2 | characterised by fertile black clay soil, while the soil |
| 3 | eastern region of the Abyei Area, the Bahr extends | 3 | in the Muglad region is reddish clay, interspersed with |
| 4 | somewhat further north, up to around or at least 10°35' | 4 | sand ridges. |
| 5 | north, before the land begins to turn alkaline and arid. | 5 | Professor Allan has addressed this issue in the |
| 6 | The Bahr continues east to Lake Keilak, which you can | 6 | MENAS report and he will present his findings now to the |
| 7 | see on the current slide. | 7 | Tribunal. It's one things for me as counsel to make |
| 8 | Importantly and again not mentioned by the | 8 | submissions about scientific evidence; it is something |
| 9 | Government there are extraordinary differences | 9 | else to hear it from an expert. In particular |
| 10 | between the soil in the Bahr region, south of the goz, | 10 | Professor Allan will explain the complexity of the Bahr |
| 11 | and the soil of the goz itself and going further north | 11 | river system and its seasonal changes. |
| 12 | in Muglad. | 12 | Professor Allan, if you could take the floor. |
| 13 | The Bahr region is characterised by a black, fertile | 13 | (5.09 pm) |
| 14 | cracking clay, which results from the seasonal flooding | 14 | PROFESSOR JOHN ANTHONY ALLAN (called) |
| 15 | that I mentioned. In contrast, in the goz and Muglad, | 15 | THE CHAIRMAN: Professor Allan, the Tribunal welcomes you |
| 16 | further to the north, there's a different kind of soil; | 16 | and invites you to read the affirmation. |
| 17 | a reddish sandy soil intersected by sandy ridges with | 17 | THE WITNESS: I solemnly declare upon my honour and |
| 18 | a name Cunnison gave it the name Baggara repeating | 18 | conscience that my statement will be in accordance |
| 19 | pattern. | 19 | with my sincere belief. |
| 20 | There is in the record before you a wealth of | 20 | Presentation by PROFESSOR ALLAN |
| 21 | uncontroverted scientific and environmental evidence | 21 | THE WITNESS: Mr President and distinguished members of |
| 22 | that establishes the vital differences between the soil, | 22 | the Tribunal, and other experts who know a lot about |
| 23 | in the way that I have just described, in the south of | 23 | Abyei in the room today, in addition to the experience |
| 24 | the Bahr and in the north of the goz and further on in | 24 | on the screen, I have expertise in using satellite |
| 25 | Muglad. | 25 | imagery. My experience to a great extent complements |
| | Page 145 | | Page 147 |
| | 1 480 143 | | Tage 147 |
| | | | |
| 17:06 1 | Lloyd described it in 1907 as: | 17:09 1 | that of Mr MacDonald. |
| 2 | "In the north the soil is reddish sand, interspersed | 2 | Conventional surveying and cartography serve and |
| 3 | with tracts of sand and clay mixed this gradually | 3 | have served the interests of the powerful. It |
| 4 | increases further south until the red sand disappears | 4 | especially served the interests of the colonial powers. |
| 5 | and black soil commences. South of latitude 10°30' | 5 | Colonial cartographers, usually military people, mapped |
| 6 | black soil predominates." | 6 | fixed strategic assets such as roads, railways, power |
| 7 | I would remind you again of Professor Crawford's | 7 | lines, canals and settlements. |
| 8 | protestations about how there's no evidence of such | 8 | The natural resources, in the white spaces between |
| 9 | latitudes in the record. We'll come back to further | 9 | those lines and dots, were the resources on which local |
| 10 | evidence. | 10 | * * * |
| 11 | Likewise, Gleichen wrote in 1905 of a "rich black | 11 | |
| 12 | clay loam" in the Bahr, and observed that it was very | 12 | |
| 13 | suitable for cultivation. | 13 | |
| 14 | Professor Cunnison, who we are going to spend a lot | 14 | 6 |
| 15 | of time with we can agree with Professor Crawford at | 15 | |
| 16 | least on his importance described the Bahr south of | 16 | |
| 17 | the goz as having: | 17 | |
| 18 | " dark, deeply cracking clays and numerous | 18 | • |
| 19 | winding water courses all connected eventually to the | 19 | · · · · · · · · · · · · · · · · · · · |
| 20 | Bahr el Arab, a tributary at the White Nile. It also | 20 | |
| 21 | contains two almost permanent lakes, Keilak, which lies | 21 | <u> </u> |
| 22 | slightly southeast from Muglad, and Abeyard, to the | 22 | |
| 23 | southeast corner of the country." | 23 | · |
| 24 25 | These conclusions are elaborated in the expert evidence of Professor Allan, which is contained in the | 24 25 | |
| 23 | evidence of Froressor Anali, which is contained in the | 23 | That have projection of the goz is the projection of |
| | | | |
| | Page 146 | | Page 148 |
| | Page 146 | | Page 148 |

| 17:11 1 | the goz which covers the area to the north right across | 17:14 1 | year out there. When the rains come, the rains fill the |
|--|--|--|--|
| 2 | Sudan. It's a huge track, 200 or more kilometres wide. | 2 | crack, and then the crack is closed through the swelling |
| 3 | So this little projection of the goz into the Abyei Area | 3 | of the clay. But the important thing is that, unlike |
| 4 | is just part of that massive tract, which is of course | 4 | the sandy goz, where the water goes down, the water |
| 5 | where the Messiriya have their lives and livelihoods. | 5 | stays at the surface, where it evaporates. |
| 6 | The contrast between the two, that sandy area and | 6 | So the loss of this water in this Bahr area, as well |
| 7 | the dark area, is very clear on this dry season image. | 7 | as in all the cracking clay areas of the Sudan as |
| 8 | If we could have the first extracts, you can see in that | 8 | a whole, as well as in the swamps of the sudd, it is |
| 9 | case that the Kiir River, which is below Abyei, and the | 9 | normal to lose a huge amount of water during this period |
| 10 | tributary on which Abyei lies, you can see that not | 10 | in that time. But at the same time, because they do not |
| 11 | so clearly on there, but you can see it clearly on the | 11 | allow water to infiltrate, you get the large areas of |
| 12 | screens here. | 12 | floods, and the ragaba and the khor all filled up with |
| 13 | You can see that the tributary is a much bigger | 13 | water for many months of the year. |
| 14 | river than the Kiir. So what I'm trying to show is the | 14 | Finally I would like to just look at the vegetation. |
| 15 | complexity of the drainage, and the fact that you can | 15 | As a geographer, as part of my professional experience, |
| 16 | show that the Kiir, which is the stream going off to the | 16 | geographers learn that environmental determinism doesn't |
| 17 | west, or coming from the west, in this season, the dry | 17 | work. You can't say, "Well, that particular tract of |
| 18 | season, is a discontinuous river; I hope it's clear on | 18 | land will lead to that particular livelihood", because |
| 19 | your screens; and that the tributary is a much bigger | 19 | you can't; people have choices, they can easily do |
| 20 | stream. | 20 | different things with land. So I'm not at all |
| 21 | So the advantage of satellite images is that you can | 21 | suggesting that the Bahr region determines anything, or |
| 22 | show these dynamics. | 22 | the goz region determines anything. |
| 23 | The next area is an important area, because this is | 23 | All I'm saying is that these areas are, both of |
| 24 | the area where the travellers crossed the Zarga. Again, | 24 | them, susceptible to useful livestock rearing. One can |
| 25 | especially on the screens at the front here, and I trust | 25 | see and this is not relevant, I know but the goz |
| | Page 149 | | Page 151 |
| | 1 age 149 | | 1 age 131 |
| | | | |
| | | | |
| 17:13 1 | on your screens, you can see very clearly that this | 17:16 1 | region, you could easily see now, if I was to give you |
| | on your screens, you can see very clearly that this river is quite clear and evident. If we were to look at | 17:16 1 2 | region, you could easily see now, if I was to give you more detail, that there's a vast amount of cultivation |
| 17:13 1 2 3 | on your screens, you can see very clearly that this river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, | | more detail, that there's a vast amount of cultivation |
| 2 | river is quite clear and evident. If we were to look at | 2 | |
| 2 3 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, | 2 3 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more |
| 2 3 4 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, | 2 3 4 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even |
| 2 3 4 5 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. | 2 3 4 5 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. |
| 2 3 4 5 6 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have | 2 3 4 5 6 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being |
| 2 3 4 5 6 7 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. | 2 3 4 5 6 7 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in |
| 2 3 4 5 6 7 8 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at | 2 3 4 5 6 7 8 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's |
| 2 3 4 5 6 7 8 9 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first | 2 3 4 5 6 7 8 9 10 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the |
| 2 3 4 5 6 7 8 9 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got | 2 3 4 5 6 7 8 9 10 11 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. |
| 2 3 4 5 6 7 8 9 10 11 12 13 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how | 2 3 4 5 6 7 8 9 10 11 12 13 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little |
| 2 3 4 5 6 7 8 9 10 11 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. | 2 3 4 5 6 7 8 9 10 11 12 13 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can |
| 2 3 4 5 6 7 8 9 10 11 12 13 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference | 2 3 4 5 6 7 8 9 10 11 12 13 14 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those rains, the area both of the goz, but especially the |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that is that the sandy soils of the goz are interesting | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those rains, the area both of the goz, but especially the Bahr, is very much covered with vegetation. |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that is that the sandy soils of the goz are interesting because sandy soils, when rain falls on them, the water | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those rains, the area both of the goz, but especially the Bahr, is very much covered with vegetation. So, finally, thank you for your patience, |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that is that the sandy soils of the goz are interesting because sandy soils, when rain falls on them, the water does in fact infiltrate very easily, and goes down | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those rains, the area both of the goz, but especially the Bahr, is very much covered with vegetation. So, finally, thank you for your patience, Mr President and members of the Tribunal. I would just |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that is that the sandy soils of the goz are interesting because sandy soils, when rain falls on them, the water does in fact infiltrate very easily, and goes down beneath, and there will be groundwater sources between | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. We've heard something about the clay soils being fertile. They are certainly potentially more fertile in the goz. These areas are in fact ideal for or let's say people have adapted extremely well to the agro-pastoral grazing activity. So, looking just here finally at the dry season image, we can see that there's very little vegetation. There's a certain amount in the Bahr region, very little in the goz. Then if we look at the wet season you can see how the previous speaker has mentioned the rains, and how they come, and you can see how, with those rains, the area both of the goz, but especially the Bahr, is very much covered with vegetation. So, finally, thank you for your patience, Mr President and members of the Tribunal. I would just like to conclude by putting up these three points. The |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | river is quite clear and evident. If we were to look at the pixels we could easily measure the width of it, which is 30-100 metres. Further to the west, of course, it becomes much bigger. So those are the dry season images, which have helped us show the complexity of the drainage. The wet season images are rather even better at showing the complexity of the [drainage]. Let's have the two extracts again. Here you can see that we've got a very dark area to the west of Abyei in that first extract. The second extract, which one is wanting to show you the complexity of the streams, you can see how very complex those streams are. Turning to the soils, the next image, the difference between the we've already heard a little about soils, and I would just like to add some other detail, and that is that the sandy soils of the goz are interesting because sandy soils, when rain falls on them, the water does in fact infiltrate very easily, and goes down beneath, and there will be groundwater sources between the goz; and it almost certainly feeds the northern | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | more detail, that there's a vast amount of cultivation taking place in the goz region; mainly because of more modern technology, but it was possible to cultivate even in the goz region. 17:18 1 The Bahr region is more fertile than the goz; it's 17:21 1 Q. Could you point me to any contemporary document from the 1902, 1903, 1904, 1905 period where Condominium 2 well watered, at least in the wet season. The Bahr 3 region is hospitable to and consistent with the 3 officials state that there is no provincial boundary 4 agro-pastoral lifestyle, and it does extend not only in 4 between the two provinces? 5 A. I cannot. 5 the area between the two major rivers that we've been 6 talking about, but also in the area to the north and the Q. Were you responsible primarily for the last part of the report dealing with the vegetation, climatic -- those 8 8 Thank you very much. factors? 9 THE CHAIRMAN: I thank you very much, Professor. A. That's right. 10 I turn to the Government. 10 Q. Could you point me to any contemporary document around (5.18 pm)the time of the transfer in 1905 -- whether it's 1903, 11 12 Cross-examination by MR BUNDY 12 1904, 1905 or 1906, any time around there -- which shows Q. Thank you, Mr President. Professor Allan, I know that 13 that Condominium officials were considering 13 14 we know each other very well, but for the record, I'm 14 environmental evidence such as soils, climate, animal 15 Rodman Bundy, counsel for the Government of Sudan. It's 15 husbandry in connection with the transfer? 16 A. I cannot, and of course you understand why that is: 16 nice to see you. 17 Do you have the MENAS report in front of you? 17 because at that time people were not looking at those 18 A. Yes. 18 sort of issues. It doesn't mean that the people who 19 were living and making their livelihoods in those areas 19 Q. Could you turn to the very last page, page 42, please. 20 were not deeply aware of the differences between the 20 A. Yes. 21 21 Q. Am I right there that it says: different sorts of soil and the ability to cross areas 22 22 and cross streams and all the other environmental issues "We confirm ['we' meaning Richard Schofield and 23 23 yourself] that the facts stated in this report and the which are important to people making their livelihoods. 24 opinions expressed present our true and complete 24 Q. Yes, I have no doubt that the people took into account 25 professional opinion." these factors in their day-to-day life, but my question Page 153 Page 155 17:19 1 That "we" is referring to the two of you? 17:22 1 was: is there any evidence that Government officials 2 A. Yes. 2 took into account these factors when they effectuated 3 Q. Did you assist in preparing the entire report? 3 the transfer in 1905? A. Of course I'll answer "no", but I leave the Tribunal to 4 4 A. Did I ...? 5 5 Q. You were involved in the entire report's preparation? deduce what they will from that answer because the 6 A. What do you mean by "entire"? From the beginning of 6 direction you're taking the questions seems to me to 7 7 a certain month, or -give no consideration to what was happening with the 8 Q. No, from page 1 to page 42; the report. Were you 8 people on the ground. 9 Q. The SPLM/A in its counter-memorial, and I will refer to responsible for only part of this report, or jointly 10 10 responsible for all of it? paragraph 1580, which I don't expect you to have in 11 A. I am responsible for part of it. 11 front of you, the SPLM/A there, in speaking of the 12 Q. But you confirm all of it in this statement, do you not? 12 transfer, says: 13 "The more direct, less speculative and reliable 14 14 Q. Can I ask you about other aspects of the report then? approach is simply to look at what the Condominium 15 A. Yes. 15 administrators said that they transferred in Kordofan in 16 Q. Could I ask you to turn to page 1 of the report, 16 1905, which was the Ngok Dinka and their territory." 17 "Summary of Conclusions". Could you look under 17 So there the SPLM says: just look at what the 18 18 paragraph 3(a). Government administrators of the time said they were 19 transferring. 19 A. This is on page --Q. Page 1, paragraph 3 -- actually I'm going to look at 20 Am I right that as far as you are aware, the 21 paragraph 2, if I may. Could you read paragraph 2 under 21 Government officials or administrators never said 22 anything about the environmental factors that you've 22 "Summary of Conclusions", please. 23 23 A. "Our primary conclusion is that in 1905 there existed no discussed in connection with the transfer? 24 provincial boundary between Bahr el Ghazal and Kordofan A. I agree with that. Yes, I agree. 25 provinces." MR BUNDY: Thank you very much, I have no further Page 154 Page 156

| 17:24 1 | questions, Mr President. Thank you, Professor Allan. | 17:27 1 | The same two researchers observed that the Ngok and |
|--|--|--|---|
| 2 | THE CHAIRMAN: I thank you very much. Are there any | 2 | other Dinka agricultural land is "for the most part |
| 3 | questions from the part of the Tribunal? No. | 3 | clean and well cultivated", showing "a high degree of |
| 4 | I thank you very much, Professor. | 4 | skill on the part of the cultivators". |
| 5 | MR BORN: And I thank you as well, Professor Allan. | 5 | The same researchers and others have explained that |
| 6 | (5.25 pm) | 6 | the Ngok in the Abyei region cultivate on small-scale |
| 7 | Submissions by MR BORN (continued) | 7 | farms based on the Ngok's household and village |
| 8 | MR BORN: The reason that the soil, the rivers and the | 8 | structure, which we're going to look at. |
| 9 | seasonal changes in the Bahr region are important is | 9 | The arable land is found "immediately around the |
| 10 | that the Ngok Dinka's lifestyle and agricultural | 10 | house in small gardens, together with larger fields |
| 11 | practices are precisely adapted to that environment of | 11 | a kilometre or so away". The result is comparatively |
| 12 | the Bahr. | 12 | extensive cultivation during the wet season. In one |
| 13 | At the same time the Bahr region, the area which is | 13 | report's words: |
| 14 | described by both Professor Cunnison and Professor Allan | 14 | "The total extent of permanent cultivation may |
| 15 | as beneath the goz, is overtly hostile to the Messiriya | 15 | easily, in the case of larger villages, amount to many |
| 16 | life, save for a short period of time during the dry | 16 | hundreds of acres." |
| 17 | season. Again, that is essentially unchallenged, | 17 | Of course, in smaller villages, which was the case |
| 18 | uncontroverted evidence in the record and the Government | 18 | with many Ngok villages, it would be much less |
| 19 | has not addressed it in the slightest, including in its | 19 | extensive. |
| 20 | cross-examination just now of Professor Allan. | 20 | The Ngok's particular crops and agricultural |
| 21 | The evidence shows that the Ngok are farmers, with | 21 | practices reflect the peculiar, the distinctive |
| 22 | the cultivation of sorghum (dura) playing a central role | 22 | characteristics, the geography and the climate of the |
| 23 | in their lifestyle. The cultivation takes place in and | 23 | Bahr. The Ngok's staple crop, sorghum or dura, is in |
| 24 | near Ngok villages during the wet season, before the | 24 | fact ideally suited to the landscape, the soil, the |
| 25 | ground parches through the heat that Professor Allan has | 25 | climate of the Bahr. |

| 17:29 1 | agricultural-pastoral lifestyle. The Bahr region | 17:32 1 | tooc land", in the Bahr. |
| 2 | itself, characterised by thick forest bush, vegetation | 2 | Cunnison also described the very limited agriculture |
| 3 | and crops, is an abundant resource and would clearly | 3 | that the Messiriya engaged in, limited to millet farming |
| 4 | support and promote a permanently settled community with | 4 | near Muglad. He said: |
| 5 | an agro-pastoral lifestyle and culture such as we | 5 | "Bulrush millet, which is grown almost to the |
| 6 | understand the Ngoks to be." | 6 | exclusion of other crops, does best on sand, and the |
| 7 | In contrast to the Ngok, the Messiriya are | 7 | Homr use the sand ridges in the Muglad for this reason. |
| 8 | principally nomadic herders. You will recall | 8 | Other areas used are parts of the goz and Babanusa, near |
| 9 | Article 1.1.3 of the Abyei Protocol. They have no | 9 | Muglad [that's to the north of Muglad]. While the |
| 10 | permanent homes or villages and virtually no | 10 | staple food is bulrush millet, few families cultivate |
| 11 | agricultural interest. That is not something to be | 11 | enough of this to last the whole year long." |
| 12 | devalued or, as Professor Crawford suggests, to be held | 12 | We will see in the subsequent evidence that they |
| 13 | against them; it is a noble and proud lifestyle, it is | 13 | trade with the Ngok villages that they camp near in the |
| 14 | just a different one. | 14 | dry seasons to get other kinds of food. |
| 15 | Cunnison, again the Government's own witness, | 15 | This environmental and cultural evidence is |
| 16 | remarks that: | 16 | objective, it's consistent and it's uncontroverted. It |
| 17 | "Nomadism is the only way of life to which the | 17 | demonstrates that the soil of the Bahr was fertile black |
| 18 | Misseriya are attuned, and they are masters of it." | 18 | clay to which the Ngok's agricultural lifestyle and |
| 19 | He observed that they are a nomadic tribe with no | 19 | crops were perfectly adapted. In particular the Ngok |
| 20 | permanent homes. | 20 | grew a staple crow, dura or sorghum, that not only |
| 21 | The Messiriya, also in part because they were | 21 | survived but flourished in the particular, and frankly |
| 22 | nomads, disdained agricultural labour. Based on living | 22 | particularly harsh, seasonal climate in the Bahr. |
| 23 | with the Messiriya, as Professor Crawford told you, for | 23 | In contrast, the soil in the north, in the goz and |
| 24 | two years, he wrote: | 24 | in Muglad, was airy and sandy. It was ill-suited for |
| 25 | "Homr share with many other cattle people [but not | 25 | agriculture. That was precisely fine for the Messiriya |
| | D 161 | | Page 163 |
| | Page 161 | | Fage 103 |
| | | | |
| 17:30 1 | the Ngok] a dislike of manual labour and particularly of | 17:33 1 | because they didn't like to farm; they were nomads and |
| 2 | cultivation." | 2 | they had cattle. The only kind of agriculture that |
| 3 | He explained that: | 3 | could be sustained in the north, in the area of Muglad |
| 4 | "Cultivation of any kind requires periods at fields | 4 | and Babanusa, was millet, which grew on sand, and which |
| 5 | at sowing and harvest, and these long periods in one | 5 | didn't grow in the south in the Bahr. |
| 6 | place are inconsistent with the needs of the Misseriya | 6 | That is not an isolated piece of evidence; it is |
| 7 | cattle." | 7 | instead a part of a consistent pattern. |
| 8 | Moreover, just as the soil and climatic conditions | 8 | If we look at the cattle of the two people, which |
| 9 | of the Bahr were ideal for Ngok agriculture, the | 9 | were extraordinarily close to both people's hearts, the |
| 10 | conditions further north in Muglad were ill-suited for | 10 | same thing applies: the Ngok cattle were physically |
| 11 | agriculture, and we heard Professor Allan address that | 11 | different and well suited to the Bahr than the Messiriya |
| 12 | briefly. Cunnison says this very concisely, saying: | 12 | cattle, which were suited to the areas to the north. |
| 13 | "The nature of the Misseriya's land itself favours | 13 | At the same time Ngok cattle-rearing and herding |
| 14 | cattle rather than grain." | 14 | practices were precisely adapted to the damper regions |
| 15 | What little farming the Messiriya undertook was | 15 | of the Bahr, while the Messiriya's cattle and husbandry |
| 16 | circumscribed in geographic scope, occurring in Muglad, | 16 | practices were adapted to the dryer regions in Muglad |
| 17 | referred to at the time and still as the Messiriya | 17 | and Babanusa and to their seasonal nomadic treks. At |
| 18 | headquarters. It focused on crops that were completely | 18 | the same time the Messiriya's cattle were very |
| 19 | unsuited to the Bahr. | 19 | ill-adapted and could not survive in the Bahr. |
| 20 | Stubbs and Morrison, scientists who studied this, | 20 | It is undisputed that there are significant physical |
| 21 | concluded: | 21 | differences between the Ngok and the Messiriya cattle; |
| 22 | "Messiriya cultivation was limited to millet rather | 22 | this is referred to by the witnesses and the ABC |
| 23 | than sorghum." | 23 | experts. |
| 24 | In turn, they explain that millet requires "a light, | 24 | Ngok cattle are short-legged, they have a small hump |
| 25 | sandy soil, found in the Muglad country but rare in the | 25 | and they don't move well in sandy or desert terrain. |
| | Page 162 | | Page 164 |
| | | | |

| | 3 | the flies and the mosquitoes and the other insects. | 3 | In contrast to the Ngok, who built these tukuls and |
| | 4 | Whereas the Ngok cattle would survive: they would | 4 | had these permanent villages, the Messeriya were |
| | 5 | survive in the mud, and they were resistant to the | 5 | nomadic, as we've seen. They lived in tents, and they |
| | 6 | diseases. | 6 | didn't live in them permanently; they carried them |
| | 7 | When you look at the Ngok cattle-keeping practices, | 7 | around with themselves. In Cunnison's words: |
| | 8 | the way that they dealt with how they handled their | 8 | "The tribesmen are continually on the move and do |
| | 9 | cattle, it is precisely the same. The Ngok constructed | 9 | not have permanent houses anywhere, and so they are |
| | 10 | substantial cattle byres, which are called "luaks" or | 10 | obliged to carry all their household possessions about |
| | 11 | "dugdugs", where their herds would be sheltered during | 11 | with them. All the baggage, and nearly all of the |
| | 12 | the rainy season. | 12 | people of the household, are transported from place to |
| | 13 | Professor Crawford noted today that a dugdug is | 13 | place on bulls." |
| | 14 | a Ngok cattle camp or corral; that's at page [98], | 14 | Again, the cultures of the Ngok and the Messiriya |
| | 15 | line [2] of the transcript. These were large, sometimes | 15 | were precisely adapted to their respective environments, |
| | 16 | two-storey structures. Sometimes they were built on | 16 | with the permanent Ngok homes enabling them to survive |
| | 17 | stilts. The idea was that they would protect the cattle | 17 | the torrential rains of the Bahr, and the diseases of |
| | 18 | in the wet season. | 18 | the Bahr, while the Messiriya instead moved north in |
| | 19 | The Messiriya did not build similar structures; and | 19 | their tents to the dry, arid region of the goz and |
| | 20 | they couldn't because their nomadic lifestyle kept them | 20 | beyond, in Muglad and Babanusa, where it was just fine |
| | 21 | from staying in one place long enough to build something | 21 | to have tents because, as we saw, it didn't rain. They |
| | 22 | like that. In any event, their cattle couldn't survive | 22 | did so because their tents would not have protected them |
| | 23 | in the Bahr during the wet season. | 23 | in the Bahr the way that the Ngok's tukuls protected |
| | 24 | The same point applies to Ngok and Messiriya | 24 | them. |
| | 25 | dwellings. The Ngok were known as the master builders | 25 | In sum, when you put all this environmental evidence |
| | | Page 170 | | Page 172 |
| | | | | |

| 17:45 | 1 | together and I realise to some extent it may be | 17:47 1 | such length is basically uncontroverted. It is |
|-------|----|--|---------|--|
| | 2 | tedious; it's not the most familiar, accessible source | 2 | different from what we international lawyers are used |
| | 3 | to international lawyers, but it is scientific evidence | 3 | to, but it is scientific evidence objectively recorded |
| | 4 | which the ABC experts looked at, which Professor Allan | 4 | by multiple people at different times in scientific |
| | 5 | looked at, which Stubbs and Morrison looked at, which | 5 | works. It deserves our respect, as did the ABC experts. |
| | 6 | all the other authorities in the record have | 6 | It paints a picture of the Ngok in the Bahr, throughout |
| | 7 | described it portrays a Ngok Dinka lifestyle, ranging | 7 | the Bahr. It paints a picture of the Messiriya, north |
| | 8 | from cattle, to the way they construct their houses, to | 8 | in their headquarters in Muglad, coming south into the |
| | 9 | their cattle byers, to the types of crops they used, the | 9 | Bahr to mingle with the Ngok during the dry season. |
| | 10 | way they grow them, that fits precisely with the Bahr, | 10 | That makes perfect sense and it is objectively recorded. |
| | 11 | whereas the Messiriya's lifestyle cannot survive in the | 11 | With that background, which hasn't been addressed at |
| | 12 | Bahr for eight or nine months the rainy season of | 12 | all by the Government, I'd like to move on to the |
| | 13 | the year. They can come there, and must come there to | 13 | migration evidence. Because it is essentially agreed in |
| | 14 | some extent, in the dry season; they're nomads. But | 14 | most part, I'm not going to spend much time on it. |
| | 15 | they can't live there in the wet season. It is instead | 15 | The sources regarding the migration describe the |
| | 16 | where the Ngok Dinka live. | 16 | Ngok as arriving in two directions, in two separate |
| | 17 | The Government no doubt will say, "Oh, just because | 17 | migrations: the Alei and the Achak chiefdoms migrated |
| | 18 | the Ngok could live in the Bahr doesn't mean they did | 18 | from the north and the regions around Muglad, and then |
| | 19 | live in the Bahr". In fact, as we'll see, that is | 19 | ended up around Turda and Nyama; the other Ngok Dinka |
| | 20 | contradicted by what Professor Cunnison says, it's | 20 | chiefdoms arrived from the east, settling around the |
| | 21 | contradicted by the witness evidence, and it is more | 21 | Ngol. |
| | 22 | importantly, in a sense contradicted by common sense. | 22 | The sources that describe this are written well |
| | 23 | The Government's case essentially is that the Bahr | 23 | before the current dispute arose, and they provide |
| | 24 | was empty, save for when the Messiriya came there in the | 24 | a consistent description of Ngok occupation of the |
| | 25 | dry season. Here you have a fertile, well-watered wedge | 25 | entire Bahr region; while less extensive Messiriya oral |
| | | Page 173 | | Page 175 |
| | | 1 age 173 | | 1 age 175 |
| | | | | |
| 17:46 | 1 | of land in between desert on the north, desert on the | 17:49 1 | tradition corroborates that. That evidence, at least up |
| | 2 | west, drier area and mountains on the east, and swamp on | 2 | to a certain point in the 19th century, is largely |
| | 3 | the south; a beautiful area of real estate, fertile, | 3 | undisputed. |
| | 4 | precisely suited to the Ngok Dinka's lifestyle, that is | 4 | The Government, as we've seen, originally said that: |
| | 5 | supposedly empty. That makes no sense. | 5 | "Prior to 1905 the western Dinkas, including the |
| | 6 | It also contradicts everything we know about the | 6 | Ngok Dinka, were located to the south of Bahr el Arab." |
| | 7 | Messiriya and the Ngok being brothers, and Abyei Area | 7 | They also claimed that the Ngok territory was |
| | 8 | being a bridge between the two people. How can it be | 8 | always: |
| | 9 | a bridge if it's empty and the Ngok don't live there? | 9 | " squarely south of the Bahr el Arab and in the |
| | 10 | If the Ngok congregate about the Bahr el Arab during | 10 | province of Bahr el Ghazal." |
| | 11 | the dry season, where do they come from? They migrate | 11 | The Government now says: when it said those things |
| | 12 | south in the dry season. They migrate south from | 12 | it really meant on the Bahr el Arab, or north and south |
| | 13 | somewhere to the Bahr el Arab. Where they migrate south | 13 | of the Bahr el Arab; I have some difficulty with that |
| | 14 | from is from the area north of the Ngol, around the | 14 | understanding. But in any event, they have changed |
| | 15 | Ngol, between the Ngol and the Kiir. They migrate from | 15 | their position. And instead they now say and I'll |
| | 16 | the drier, swampier regions on either sides of the river | 16 | quote from their reply memorial: |
| | 17 | to the rivers themselves. That is where they spend | 17 | " there is general agreement that some |
| | 18 | their dry seasons. And they cultivate the areas in | 18 | [Ngok] Dinka tribes in the 18th century migrated north |
| | 19 | between the rivers during the wet season, where their | 19 | of the Bahr el Arab." |
| | 20 | lifestyle is precisely suited to that territory. | 20 | More specifically the Government says: |
| | 21 | The Government's hypothesis that this bridge is | 21 | " the Ngok migrated to the north up around the |
| | 22 | empty, that these people who are brothers live in | 22 | Ragaba ez Zarga." |
| | 23 | completely different places, is profoundly wrong. | 23 | Professor Crawford spent some time criticising oral |
| | 24 | Moving on, it's important to emphasise that that | 24 | traditions. We have no disagreement that oral |
| | 25 | environmental evidence which I have gone on about at | 25 | traditions need to be handled delicately, need to be |
| | | Page 174 | | Page 176 |
| | | | | |
| | | | | l |

| 17:50 1 | looked at carefully, need to be corroborated. Here's | 17:53 1 | headquarters to Mirok; his headquarters, not his entire |
|--|---|--|---|
| 2 | a situation though where both the Government and the | 2 | people. Again, a description of the residences and |
| 3 | SPLM/A agree on what the oral tradition said up to | 3 | places where the paramount chief had their headquarters, |
| 4 | a certain point in time. What it said was that the Ngok | 4 | not the location of all the Ngok Dinka people. |
| 5 | had migrated to the areas around the Ngol; and, in the | | When you look through the writings of Francis Deng, |
| | | 5 | |
| 6 | case of the Alei, in the area of Muglad. | 6 | which are also described in the materials, exactly the |
| 7 | The Government changed its story in its subsequent | 7 | same thing comes out of that. He describes the Dinka |
| 8 | submissions, and said that although the Ngok moved | 8 | holding their territory, the paramount chief moving |
| 9 | there, migrated there in the 18th and 19th centuries, | 9 | south himself, but the Ngok Dinka holding their |
| 10 | they then moved further south. I would suggest that | 10 | territory, to which the Government admits/acknowledges |
| 11 | when you look at the historical evidence that is in the | 11 | they had migrated to and were in up until the |
| 12 | record on this point, it is entirely inconsistent with | 12 | mid-19th century. |
| 13 | that description. | 13 | I would suggest that when we take a snapshot there, |
| 14 | I'm not going to take you through it piece by piece. | 14 | at just before the Mahdiyya began, we have a picture of |
| 15 | But what is described, quite naturally, is that after | 15 | the Government essentially conceding, based on the oral |
| 16 | the Ngok had migrated to these regions individual | 16 | traditions which Professor Crawford found so |
| 17 | paramount chiefs moved south in particular cases. There | 17 | unpersuasive, that the Ngok had migrated into the area |
| 18 | is no description at all of all the Ngok Dinka people, | 18 | of the Bahr, where the environmental evidence indicates |
| 19 | as the Government claims, moving south from the areas in | 19 | they would be, and the Government's then suggesting that |
| 20 | which they lived. | 20 | they had moved further south. Again, there is no |
| 21 | If you look at the witness statements of the two | 21 | evidence at all suggesting any such sort of massive |
| 22 | parties, and in particular Majak Matet Ayom, they | 22 | population move by all of the Ngok Dinka to the south. |
| 23 | describe two stages of migration. They describe the | 23 | With that, I'd like to very briefly turn to the |
| 24 | Bahr being established by their grandparents, and so | 24 | Mahdiyya itself, moving through the evidence in |
| 25 | forth. | 25 | historical order. |
| 20 | | 23 | installed order. |
| | Page 177 | | Page 179 |
| | | | |
| | | | |
| 17:51 1 | You can look at that witness testimony, you can look | 17:54 1 | Professor Daly addressed this briefly. But with the |
| 2 | at the oral traditions that it reported. The | 2 | Ngok located in the Bahr, the Mahdiyya, beginning in |
| 3 | Government's account of how, although the Ngok were | 3 | 1881 and continuing through 1898, a 17-year-long bitter |
| 4 | located in exactly the place where the environmental | 4 | religious war had, as Professor Daly describes it, |
| 5 | evidence says that they would be, they moved all south, | 5 | an asymmetric effect on the two people. The Mahdiyya |
| 6 | is simply not supported by any of the evidence that they | 6 | affected the Messiriya significantly: they sided with |
| 7 | rely on. | 7 | the Mahdiyya. The Ngok Dinka remained essentially out |
| 8 | I'd like to move on quickly, though, and pick up | 8 | of the fray; they were unscathed by the Mahdiyya, |
| 9 | with the discussion of Stefano Santandrea. The | 9 | whereas the Messiriya suffered disastrous losses. |
| 10 | Government relies on Stefano Santandrea, and it | 10 | This is not something we need to spend significant |
| | acknowledges that he said that the first of the Ngok to | 1.1 | |

He described that as a relatively peaceable period for them, and one where the Dinka were "left alone by the Mahdists". Again, |

| , | | | |
|----------------------------|--|----------------------|---|
| 17:56 1 | this makes it extremely unlikely that the Ngok would | 17:59 1 | report where people were, or where the Ngok Dinka were, |
| 2 | somehow have been pushed out of their historic | 2 | in particular. They weren't there doing a survey of the |
| 3 | territories further south. | 3 | tribes; they were reporting on a wide range of different |
| 4 | With that I'd like to turn to the Condominium | 4 | things. References to the Ngok, and to the Messiriya |
| 5 | documentary record, beginning in 1898 or so. The | 5 | for that matter, were random and sporadic. |
| 6 | Government, as we've seen, puts huge reliance on this | 6 | I'd like to take us back to what Mr Bundy said about |
| 7 | particular part of the record. In particular it claims | 7 | what Condominium officials knew about the Ngok Dinka in |
| 8 | that this part of the record provides "an abundance of | 8 | 1905. He said: |
| 9 | evidence". I think it's important that we look at this | 9 | "It is self-evident that as of 1905 Government |
| 10 | evidence with the same sort of scepticism and reserve | 10 | officials would have had no knowledge of tribal |
| 11 | that we look at other parts of the record. | 11 | locations." |
| 12 | To some extent we, as lawyers, may gravitate towards | 12 | That's the transcript, page [20], line [19]. |
| 13 | documents or historical documents, in some ways. But | 13 | That's right. Percival and Wilkinson and Mahon and |
| 14 | these documents have profound limitations that it's very | 14 | others simply had no idea, based on what Mr Bundy called |
| 15 | important to understand as we try to interpret them. | 15 | "rapid treks" and a couple of days' visit to the region, |
| 16 | They are important evidence, we can learn important | 16 | where exactly the Ngok or even where roughly the Ngok |
| 17 | things from them, but they have limitations and need to | 17 | were. Their observations can therefore provide |
| 18 | be viewed with care. | 18 | occasional pinpricks or data points on an area |
| 19 | First, the documentary record from the early | 19 | three-quarters the size of Belgium, but they can't tell |
| 20 | Condominium years is extraordinarily sparse. The | 20 | us anything comprehensive. |
| 21 | parties have produced between them two dozen or so | 21 | These are extraordinarily limited observations and |
| 22 | documents that bear on the period between 1900 and 1910. | 22 | are not a reliable source of saying the Ngok weren't |
| 23 | In part that's because there simply weren't many | 23 | here in these places. |
| 24 | documents produced. | 24 | Professor Crawford referred to in, if you will, the |
| 25 | There was a very small, understaffed Condominium | 25 | most extreme example of this, Henderson's truck ride |
| | P. 101 | | D 102 |
| | Page 181 | | Page 183 |
| | | | |
| 17:57 1 | Administration in the first decade of the 20th century. | 18:00 1 | from Muglad to Abyei Town. He said Henderson was |
| 2 | The country had just moved from wartime conditions to | 2 | a serious official, a serious British administrator, and |
| 3 | semi-security, and the Condominium was focused on very | 3 | you can rely on his observations of what he saw on this |
| 4 | different things than producing documents about the | 4 | truck trip. |
| 5 | remotest parts of the country. The surest testimony, or | 5 | That's a 200-kilometre trip on a road. It's a bit |
| 6 | the surest evidence of that, is when you look at the | 6 | like driving from Brussels on the highway south from |
| 7 | very limited number of documents and the very short | 7 | Brussels, the E411, to the southern border of Brussels |
| 8 | length of the documents that are in the record about | 8 | and observing what you see out of your window. You |
| 9 | that region. | 9 | obviously aren't going to see very much of Belgium at |
| 10 | Second, those documents from the Condominium period | 10 | all. You'll report that Belgium doesn't have Belgian |
| 11 | which are available involve an extremely limited number | 11 | people in it, it has highway signs and gas stations. It |
| 12 | of visits by not even a whole handful of Condominium | 12 | doesn't enable you to see the vast expanse of what |
| 13 | officials to the Abyei region. All of those visits | 13 | Belgium is. |
| 14 | involved exploratory treks or reconnaissances that | 14 | Henderson could see no more from his truck trip than |
| 15 | lasted a few weeks or as we'll see days, and they | 15 | you or I could see if we drove down the motorway, just |
| 16 | followed a very limited number of routes, that did not | 16 | like Henderson drove down the road from Muglad to Abyei. |
| 17 | penetrate the huge expanse of the Bahr or the Abyei | 17 | Instead what we can look at is the observations of |
| 18 | region. | 18 | Cunnison and of Tibbs and other people who lived and |
| 19 | Mr Bundy, you will recall, said this morning that | 19 | worked in the region for substantial periods of time, |
| | | | |
| 20 | Wilkinson could have "spent only a couple of days on the | 20 | and of the people themselves, who can describe the area. |

| 18:02 1 | and to a substantial extent unexplorable. One of the | 18:05 1 | a little explanation the Condominium officials |
|--|--|--|--|
| 2 | early Condominium officials described the Ngok territory | 2 | typically travelled from the north with Arab armed |
| 3 | as: | 3 | contingents and Arab guards. That is not to be |
| 4 | " difficult to traverse at all times of the year | 4 | critical that made sense, that was who they were |
| 5 | and so distant from an administrative centre that it has | 5 | working with in the north but it affected, naturally, |
| 6 | been rarely visited." | 6 | what they saw when they came south. |
| 7 | The routes of the Condominium officials, when we | 7 | The Ngok Dinka were afraid we're going to see |
| 8 | look at them, never penetrated to the north of the Ngol, | 8 | particular examples of that of slave raiding. They |
| 9 | except along a single corridor extending from Fauwel to | 9 | hid, and we will see further examples of that. |
| 10 | Lake Keilak. The officials' treks never went west or | 10 | Professor Crawford scoffs at it, but they hid from the |
| 11 | north, through the vast expanse of the Bahr lying | 11 | Condominium officials and they dissembled about where |
| 12 | between the Ngol and the goz. As Professor Daly will | 12 | they were to the Condominium officials. |
| 13 | explain to us, British knowledge of the Ngok was based | 13 | That is not something to treat as an odd excuse. |
| 14 | on a few hours' path-crossing. | 14 | The lack of evidence is no evidence. It is something |
| 15 | Given the limited extent of the Condominium | 15 | that you need to appreciate in order to understand the |
| 16 | exploration, it is particularly important to note that | 16 | historical record. |
| 17 | most of it occurred during the dry season as well. The | 17 | One, as a lawyer, looks at these documents and says, |
| 18 | reason was that, unlike the Ngok, the Condominium | 18 | "Ah ha, black and white, I can see it. Here's the |
| 19 | officials couldn't travel in this entire region during | 19 | document, it says A". But we all need to look at this |
| 20 | the wet season, and they never went there. All of the | 20 | record in light of all of the things that I have said |
| 21 | observations that we have are from the dry season. | 21 | and in light of these somewhat subjective factors and |
| 22 | That's fundamentally important. That's one of the | 22 | I use those words advisedly one needs to assess this |
| 23 | reasons that I spent the time taking you through the | 23 | documentary evidence with judgment and scientific |
| 24 | migration patterns which may be a little bit tedious, | 24 | analysis. That is why the ABC experts were picked, and |
| 25 | but it's fundamentally important to realise that the | 25 | it requires putting these documents into a particular |

When the Condominium officials were making their observations, it was at a time when the Ngok were not in their traditional places where they were during the wet season. Mr Tibbs, who was writing in the 1950s, substantially later than the early explorations and when they would have been a lot more access, explained: "I never visited the Ngok during that period [the wet season] because the conditions made it impossible for us to penetrate the region at all between May and November." | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 | It is different from our context. We look at documents and assume they mean what they say. We are used to, as lawyers, the plain language rule: a contract means what it says, a treaty means what it says. We need to view these documents through a different lens; we need to view them through the lens of the people of the area, and of the seasons and of the ecology and of the environment of the area, because it profoundly affects the way one values that evidence. Finally, there were also and that's been referred to repeatedly by almost every speaker the inaccuracies and uncertainties in the documents themselves. Even if one were to read the plain language of the documents, one would not know what exactly it means, in part because there weren't geographic landmarks and because when one refers to the rivers, the Condominium officials used multiple names for the same river or the same name for different rivers. The confusion about the |
| 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | time of the dry season, when the Ngok had migrated south. When they said places were uninhabited or when there were wandering parties of Arabs, it was because the time of year was when the Ngok wouldn't be there. It would be a little bit like going out at night and saying, "There's no sun here". Of course not. There's no sun here. It's because the Ngok, moved south during the dry season. When the Condominium officials were making their observations, it was at a time when the Ngok were not in their traditional places where they were during the wet season. Mr Tibbs, who was writing in the 1950s, substantially later than the early explorations and when they would have been a lot more access, explained: "I never visited the Ngok during that period [the wet season] because the conditions made it impossible for us to penetrate the region at all between May and November." To some extent working with these documents is a little bit like doing |

| 18:13 1 | is because of the context in which they arose. | 18:15 | 1 | Mahon make made a second trek in southern Kordofan |
|----------|--|-------|----------|--|
| 2 | Mahon was the Governor of Kordofan, and he reported | | 2 | in 1902, this time to the Abyei Area itself. It's |
| 3 | on two trips that he made to Kordofan in 1901 and 1902. | | 3 | described in Sudan Intelligence Report No. 92. His |
| 4 | Those trips illustrated: (1) the confused terminology at | | 4 | report described the Ngok locating: |
| 5 | the time with regard with the rivers of the Bahr. He | | 5 | " Sultan Rob's country on the Bahr el Homr about |
| 6 | uses both the terms Bahr el Arab and Bahr el Homr | | 6 | two days from Ambady." |
| 7 | apparently to refer to the Ngol; (2) the Messiriya being | | 7 | Mahon's reference to Sultan Rob's country on the |
| 8 | confined to the area around the Muglad, consistent with | | 8 | Bahr el Homr is almost certainly a reference to the Ngol |
| 9 | the evidence that I've previously described, migrating | | 9 | again. As you will see, the Bahr el Homr and the |
| 10 | from the south to the Ngol during the dry season; and | | .0 | Bahr el Arab were used interchangeably as references, |
| 11 | (3) the Ngok being located on the Ngol, or the | | 1 | while they referred to the Kiir/Bahr el Arab as the |
| 12 | Ragaba ez Zarga, in the dry season. | | 2 | Kiir, the Gurf, the Bahr el Jange or the Bahr el Dinka. |
| 13 | Mahon's first trek through southwestern Kordofan is | | .3 | As we will see, his description of a subsequent trek |
| 14 | reported in November and December of 1901 dry | | .4 | in 1903 uses exactly the same terminology. This doesn't |
| 15 | season in Sudan Intelligence Report No. 90, dated | | .5 | mean that Sultan Rob was on the Ngol. That's not what |
| 16 | January 31st 1902. | | .6 | he said. He's talking about Sultan Rob's country; |
| 17 | In his report Mahon notes the locations of the | | .7 | there's a difference between a person and a country. |
| 18 | Messiriya, saying that they had their headquarters in | | .8 | When he refers to where Sultan Rob's country was, he is |
| 19 | Muglad, substantially to the north of the goz, and that | | .9 | referring to it being on the Ngol. |
| 20 | in the dry season they "go south to the Bahr el Arab". | | 20 | As I've said, that's precisely consistent with the |
| | It's almost certain that that was a reference to the | | | grazing patterns and the seasonal migrations that we've |
| 21 22 | | | 21 22 | |
| 23 | Ngol/Ragaba ez Zarga. You will remember that Professor Crawford said this | | | previously talked about. |
| | | | 23 | Mahon's report also described the fact that Rob's |
| 24 | morning that, "The Ragaba ez Zarga in this period was | | 24 | place is a great trade centre for Bahr el Ghazal, and |
| 25 | dominantly called the Bahr el Arab" that's in the | 2 | 25 | a lot of ivory comes there. That is a reference further |
| | Page 193 | | | Page 195 |
| | | | | |
| | | | | |
| 18:14 1 | transcript at page [90], line [3] which is exactly | 18:17 | 1 | south to Sultan Rob's village, where there was an active |
| 2 | consistent with the environmental evidence, the cultural | | 2 | trading centre; one hesitates to say a "bustling |
| 3 | evidence that we've described. | | 3 | commercial centre", but it was something that would |
| 4 | The Messiriya would be to the north of the goz; they | | 4 | inspire Mahon to refer to it as a great trade centre. |
| 5 | would come south during the dry season on to the Ngol. | | 5 | Obviously a substantial number of people, it was the |
| 6 | That would be the area where they camped near to the | | 6 | Ngok centre, and recorded quite clearly in the |
| 7 | villages of the Ngok Dinka and it makes perfect sense. | , | 7 | documentary evidence. |
| 8 | The fact that there are Messiriya in the Bahr and | | 8 | The second of the pre-1905 explorations in the Abyei |
| 9 | Messiriya in the Abyei Area is not inconsistent with the | ! | 9 | Area was by Wilkinson, who we've heard reference to. He |
| 10 | Ngok Dinka being there; on the contrary, it is precisely | 1 | 0 | trekked from El Obeid to Lake Keilak, which we've seen |
| 11 | consistent with that because all the evidence shows that | 1 | 1 | in the satellite photography; then entering, from |
| 12 | where the Messiriya came in the dry season was where | 1 | 2 | Keilak, what he called Dar el Jange, from the northeast, |
| 13 | they mixed with the Ngok Dinka. | 1 | 3 | again in the dry season, 1902. And he travelled south |
| 14 | That is why the witnesses said that these people are | 1 | 4 | to reach Fauwel, which is just north of the Ngol. The |
| 15 | brothers. They wouldn't be brothers if they didn't mix, | 1 | 5 | reference to the Dar el Jange is I think it's |
| 16 | and the time that they mixed was during the dry season. | 1 | 6 | undisputed a reference to the Ngok Dinka. |
| 17 | This wouldn't be a bridge if the two people didn't | 1 | 7 | After arriving in Fauwel, Wilkinson headed south and |
| 18 | mingle together, as they have harmoniously done in the | 1 | 8 | crossed what he called the Bahr el Arab; we heard |
| 19 | last three days, if they weren't coming together during | 1 | 9 | previous reference to that. It's conceded that when he, |
| 20 | the dry season. | 2 | 0. | Wilkinson, referred to the Bahr el Arab, he in fact |
| 21 | The way that happened was by the Messiriya coming | 2 | 1 | meant the Ngol/Ragaba ez Zarga, and not the Kiir. That |
| 22 | south into the Ngok territory, and if it wasn't Ngok | 2 | 2 | was the conclusion that the experts reached. We heard |
| 23 | territory, as the Government says, if the Ngok weren't | 2 | 3 | it discussed by Mr MacDonald, and we heard it discussed |
| 24 | really there, then there's no way that that mingling | 2 | 4 | this morning. And I think it's undisputed in the record |
| 25 | would occur. | 2 | 5 | that when Wilkinson came south from Fauwel and reported |
| | | I | | |
| | D 404 | | | D 404 |
| | Page 194 | | | Page 196 |

| 18:18 1 | reaching the Bahr el Arab, he meant the Ngol. | 18:21 1 | called the Kiir, which is the Kiir/Bahr el Arab in |
|--|---|--|--|
| 2 | After he crossed what is the Ngol, he noted the | 2 | today's terminology. And he described his approach |
| 3 | country of the Dinka chief called Ruweng lay to the | 3 | there as: |
| 4 | east. Then about 15 miles south of the Ngol he reported | 4 | "The Kiir River or Bahr el Jange is struck as one |
| 5 | and Professor Crawford referred to it this morning: | 5 | reaches the settlements of Sultan Rob. The river here |
| 6 | "The first Dinka village of Bombo is reached." | 6 | is a most pleasant sight. The district on the north |
| 7 | It's clear at this stage that he's describing Ngok | 7 | bank is called Mareig, the district on the south bank is |
| 8 | villages. Contrary to the Government's initial claims | 8 | called Massian, and Sultan Rob lives in the latter. |
| 9 | about the Ngok being located south of the Kiir, here in | 9 | Much dura is cultivated." |
| 10 | the dry season one of the officials following a single | 10 | The name of the district Mareig on the north bank is |
| 11 | route reports a Dinka village 10 miles at least to the | 11 | obviously a reference to the Ngok Dinka. The Ngok Dinka |
| 12 | north of the Kiir. | 12 | cultivated, as we saw, sorghum; "Mareig" is the local |
| 13 | He went on to report then: | 13 | name for sorghum. There's no doubt but what the |
| 14 | "These villages, neatly built, are used by the | 14 | reference to the settlements on the north bank is again |
| 15 | Dinkas in the rains and as long as the water lasts. At | 15 | another reference to Ngok villages. |
| 16 | the present date, 2.2.02 [February 2nd 1902], all the | 16 | When we look at the map of this region and I'm |
| 17 | inhabitants had left and were grazing their herds of | 17 | afraid this is put together a little in an ad hoc way |
| 18 | cattle where grass and water were to be found." | 18 | one can see the description of Sultan Rob's settlement |
| 19 | He does not say these are uninhabited villages. He | 19 | on the south bank of the Kiir at this point referred to |
| 20 | instead says: this is where the Ngok [live], but during | 20 | as "Massian"; it's very likely a reference to Mathiang; |
| 20 | the dry season they have left, they have gone to the | 20 | it's on the south bank of the Kiir to the southeast of |
| 22 | rivers. That is exactly consistent with the | 22 | the current location of Abyei Town, and this is |
| 23 | environmental evidence. | 23 | Wilkinson's sketch map. |
| 23 | It also suggests why, during the dry season, the | 23 | The same map labels the area to the north of the |
| 25 | Condominium officials wouldn't see many Ngok: the Ngok | 25 | Kiir as Dar el Jange or Dinka. |
| 23 | Condominatin officials wouldn't see many regor, the regor | 23 | Kili as Dai Ci Jalige of Dilika. |
| | Page 197 | | Page 199 |

The descriptions of villages, large settlements, neatly built houses, headquarters of a local chief are all exactly consistent with the descriptions that I've given based on the environmental and cultural evidence of how the Ngok lived. At the same time, the absence of the Ngok cattle herds and the Ngok people is consistent with the seasonal grazing. Wilkinson then records about 28 miles from the Ngol that he reached what he called the Kiir River or Bahr el Jange, and the settlements of Sultan Rob. It's now common ground that the river referred to by Wilkinson is the Kiir/Bahr el Arab. He'd gone from the | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 | Fauwel, following much the same route that he had arrived from. He noted: "When leaving Sultan Rob's settlement, the country here is open and much dura cultivated. Dinka dwellings are dotted about, and the country presents a most prosperous aspect." Again, this is going north from the Kiir, going back to Fauwel. He doesn't say how far north that extended, but that's because of the nature of the Condominium records: he didn't keep precise records of how far he was observing particular peoples. It's also important to note that the reference of all the Dinka leaving in some of these records and I'll come back to this is inconsistent I think with both the historical record and with the cultural and environmental evidence, which is that not all the Dinka left; a substantial number of Dinka would remain in the villages, or at least a significant number of Dinka would remain in the villages during the wet season, while parts of the people would go south with the cattle. In total Wilkinson's notes referred to about a dozen substantial Ngok villages on the one route that he took |

| 18:24 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | like Bombo, Teehac, Etai, Mareig, Gohea and El Myat. He refers more generally to a number of other smaller villages; and when you think back to the traditional structure of two or three tukuls clustered together, it's likely these didn't even necessarily have names, saying that Dinka dwellings are dotted about, and referring to numerous settlements. He also refers of course to dura being cultivated, the Ngok Dinka's traditional sorghum, their traditional staple crop. And those are all precisely consistent with the environmental evidence that we discussed. Again, this was a dry season trek, and it only followed a single route. It provides evidence good evidence of where some Ngok were. It provides no evidence at all about 98% or 99% of that entire region, which he could not have gone to, he did not go to; he followed a single route. Finally and then perhaps it would be an opportune time to stop; it's been a long time, and lots of discussion of tukuls and dura and rainy season and so forth Wilkinson's trek notes also fairly strongly suggest but I will admit fully that to some extent we are engaging in detective work here. One has to do that with that record. I have no doubt that what the Government will come | 18:27 1 record that is incomplete; the best the Government has and the best that we have. 3 One has to bring scientific appreciation, and appreciation of the area and the region, to those references in order to understand what they mean. One can't dismiss them and say they mean nothing, or they're unintelligible. One has to, if one is going to engage with this, bring scientific discrimination to them. 9 Perhaps with that it would be an opportune time to stop. 11 THE CHAIRMAN: I thank you very much, Mr Born. 12 I draw the attention of the two parties to the fact that tomorrow morning the hearings will begin at 9 o'clock, not 9.30. Be careful! 15 Thank you very much. 16 MR BORN: Thank you, Mr Chairman. 17 (6.28 pm) (The hearing adjourned until 9.00 am the following day) 19 20 21 22 23 24 25 Page 203 |
|---|---|--|
| 18:25 | back and say is that it's inappropriate to engage in detective work, but the truth of the matter is one must bring appreciation and care to the documentary record. When one looks at Wilkinson's trek notes, he describes passing Fula Hamadi, about 29.5 miles north of the Ngol. He reported for the first time: " small villages, mere collections of three or four huts passed at El Jaart and Um Geren." His notes had previously referred to Arab settlements or villages, he would denominate them as such. In this area he doesn't, and I would suggest to you that this is it's indirect, it's circumstantial, but I would suggest to you that this is strong evidence of Ngok Dinka villages in this region. It's two or three huts, which is consistent with the Ngok Dinka style, which we've seen on multiple occasions. In this area where the Arabs were "wandered Arabs", as Professor Crawford and Mr Bundy told us about half a dozen times, wandered Arabs didn't build houses; wandered Arabs lived in tents. Therefore, if there are villages consisting of two or three houses here, two or three huts, tukuls, they have to be Ngok. I fully admit this is circumstantial and indirect evidence, but it is the best we have from a documentary | INDEX PAGE Submissions by MR BUNDY (continued) |
