PCA Case NO 2016-13

UNDER THE RULES OF ARBITRATION OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW AND CHAPTER ELEVEN OF THE NORTH AMERICAN FREE TRADE AGREEMENT BETWEEN:

RESOLUTE FOREST PRODUCTS INC.,

Claimant/Investor

and -GOVERNMENT OF CANADA

Respondent/Party

ARBITRAL HEARING ARGUMENT HEARD BEFORE PROFESSOR BERNARD HANOTIAU, DEAN RONALD CASS, PROFESSOR CÉLINE LÉVESQUE, held via Arbitration Place Virtual, on Tuesday, October 19, 2021, at 8:05 a.m. EDT

> RESTRICTED ACCESS - VOLUME 2 REVISED TRANSCRIPT

APPEARANCES:

Elliot Feldman Michael Snarr Paul Levine Analia Gonzalez

Martin Valasek
Jean-Christophe Martel
Jenna Anne de Jong
Jacques Vachon

Mark Luz

on behalf of the Respondent

on behalf of the Claimant

Rodney Neufeld
Annie Ouellet
Stefan Kuuskne

- 1 Arbitration Place Virtual
- 2 --- Upon resuming on Tuesday, October 19, 2021 at
- 3 9:00 a.m. EDT
- 4 PRESIDENT HANOTIAU: Thank
- 5 you. Good morning, ladies and gentlemen.
- Before we start, should I ask
- 7 you whether you have any housekeeping matters to
- 8 address? Claimant?
- 9 MR. FELDMAN: I don't think
- 10 so. Thank you.
- 11 PRESIDENT HANOTIAU:
- 12 Respondent?

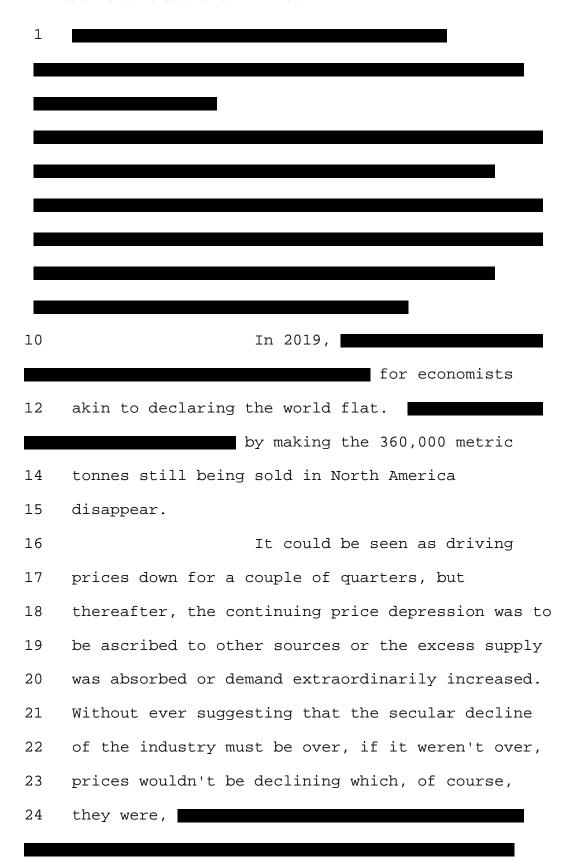

- MR. LUZ: Nothing other than
- 14 to express the appreciation to the Claimant and to
- 15 the Tribunal just with respect to restricted
- 16 access documentation. We are doing the same, I
- 17 will do my best to make sure that we announce when
- 18 we are going into restricted access and the
- 19 Claimants were really good about doing the same
- 20 yesterday, so we appreciate that.
- 21 PRESIDENT HANOTIAU: Okay.
- 22 Nothing else, so we can start with the rebuttals.
- Mr. Feldman, Mr. Valasek.
- 24 MR. FELDMAN: It looks like I
- 25 am going first, Mr. President, and I believe

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 Mr. Valasek will follow me and Mr. Snarr will
- 2 follow Mr. Valasek, but if we get confused you
- 3 will, I am sure, forgive us.
- 4 PRESIDENT HANOTIAU: No
- 5 problem.
- 6 MR. FELDMAN: And we will
- 7 start in the restricted access that we are already
- 8 in.
- 9 --- Whereupon Restricted Transcript Commences
- 10 SUBMISSIONS BY MR. FELDMAN:
- 11 MR. FELDMAN: I am going to
- 12 try to be organized but I don't guarantee that
- 13 outcome.
- 14 Counsel yesterday complained
- 15 that Resolute
- 18 MR. LUZ: I am sorry to
- 19 interrupt. Heather, can you just confirm that we
- 20 are in restricted access.
- MS. D'AMOUR: Sorry,
- 22 Mr. Feldman, restricted access, we are in
- 23 confidential currently. So do you want to be in
- 24 restricted access?
- MR. FELDMAN: No, we should be

1	in restricted acces	ss.	That's wha	at I thought that
2				
3		MS.	D'AMOUR:	Okay, sorry.
4	One second.			
5		MR.	LUZ: Tha	nk you so much.
6	I am sorry to inter	rrup	t, Elliot.	Thank you.
7		MR.	FELDMAN:	I thought I was
8	just staying put.			
9		MS.	D'AMOUR:	Okay, confirming
10	we are in restricte	ed.

permissible, not breaching measures, through the

PCA Case No. 2016-13

RESTRICTED ACCESS
RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

October 19, 2021

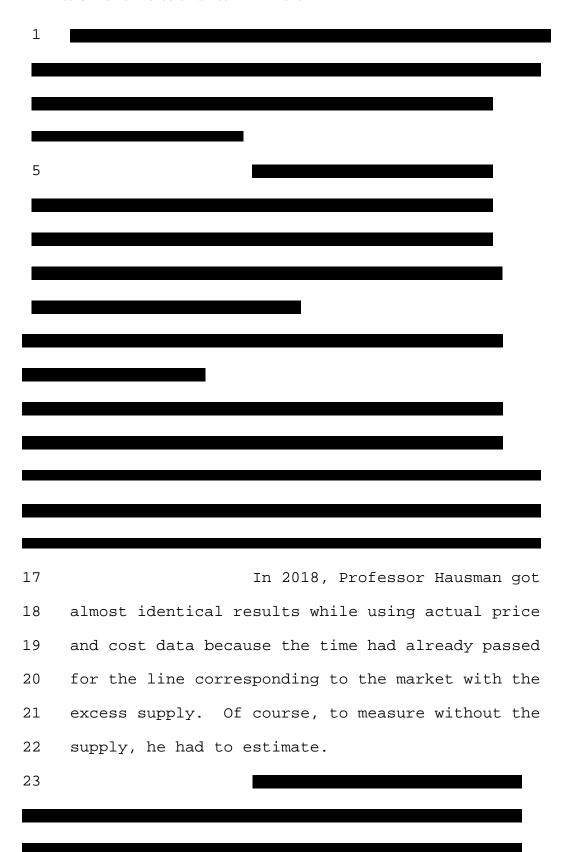

- 1 Article 1108(7) exception.
- 2 I am going to deal only
- 3 partially with this question.
- 4 First, to be remembered always
- 5 is that PWCC said from the outset that it would
- 6 not buy into the deal unless it got everything it
- 7 wanted and more than once it, in fact, did walk
- 8 away. It did not matter how small or trivial
- 9 government authorities might have thought the
- 10 demand to be; and second, not all the measures
- 11 were monetary, at least two were regulatory. And
- 12 notwithstanding that Canada wants to monetize and
- 13 trivialize them. You saw yesterday in Ron Stern's
- 14 own handwriting -- I believe we have a slide for
- 15 that, Ricky. There it is.
- 16 You saw in his own handwriting
- 17 that they were make or break for him. He says "we
- 18 can't handle any -- "it's his underlining "-- RES
- 19 cost increase". And he indicates that "it has to
- 20 be never", never to be a possibility.
- 21 Nova Scotia apparently told
- 22 him not to worry about the RES standard and that
- 23 it would not arise. That's what we were told
- 24 yesterday. But Stern said, not good enough. I
- 25 need written assurance that it will never arise

- 1 and the government made the commitment just for
- 2 him. Hence, there were government measures that
- 3 could not be construed under any definitions as
- 4 subsidies or procurement and there would not have
- 5 been a deal, Port Hawkesbury would not have
- 6 reopened without them.
- 7 We imagine the Tribunal were
- 8 to take the hypothetical direction and dismissed
- 9 almost all the measures, we think it impossible
- 10 to dismiss the regulatory measures, might then
- 11 wonder whether all the claim damages should be
- 12 recognized. We think they should because even the
- 13 smallest measure was indispensable to the re-entry
- 14 into the market and the foreseen and the
- 15 foreseeable damages that followed.
- Nonetheless, the Tribunal
- 17 might choose to evaluate the various measures,
- 18 especially the hypothetically isolated regulatory
- 19 measures in some kind of proportion to the
- 20 damages. We would suggest that were the Tribunal
- 21 to travel this path, it might see the regulatory
- 22 measures as proportionally contributory to the
- 23 damages and assess the damages accordingly.
- 24 Dean Cass inquired about
- 25 pension liability. NewPage Port Hawkesbury left

- 1 behind substantial pension liabilities. PWCC said
- 2 it would not absorb or honour them. The law
- 3 didn't require PWCC to honour them, but a new and
- 4 good citizen letting go half its workforce when
- 5 shutting down the newsprint machine might have
- 6 done so.

- The government and PHP entered
- 13 an agreement on pension matters as a condition of
- 14 the plan of arrangement for coming out of
- 15 bankruptcy with the needed agreement of the plan
- 16 administered. This can be found in Exhibit
- 17 C-347.59.
- 18 By contrast with how PWCC
- 19 treated pensioners, Resolute did sell 550,000
- 20 acres to Nova Scotia, but it didn't take the money
- 21 to use in the business in the mill as was said at
- 22 least twice yesterday. Instead, Resolute turned
- 23 over all the money to assure the workers losing
- 24 their jobs that they would collect their pensions.
- 25 Mr. Luz said that Resolute

- 1 took the money but that's not so, unless he thinks
- 2 honouring pensions when closing is paying for
- 3 business in the mill. Mr. Luz has indulged in
- 4 uncharitably a mischaracterization.
- 5 Good citizen PWCC took from
- 6 Nova Scotia everything it could. Apparently bad
- 7 citizen Resolute returned assistance that it
- 8 concluded could not save its mill and surrendered
- 9 550,000 acres to protect the pensions of Nova
- 10 Scotians. Mr. Luz might call this context.
- 11 You asked right at the end of
- 12 yesterday's session, the Tribunal asked that we
- 13 address causation and damages again but without
- 14 particular questions. So I will try to summarize
- 15 that here and we can obviously return to it at the
- 16 Tribunal's discretion.
- 17 The requirement to establish a
- 18 causal link between government measures and
- 19 damages is to establish a proximate cause. In
- 20 this case, damages from the government measures
- 21 were foreseeable and foreseen.

Damage
cannot be measured from before entry into the
market and shortly after. They continue for as
long as there is excess supply.

- 2 say that there weren't any damages from this entry
- 3 into the market, now we are told that company,
- 4 Port Hawkesbury, operates in a market that treats
- 5 customers in a North America market and a global
- 6 market because Europe counts too. It's part of
- 7 the world, and part of the North American import
- 8 market. But the market here is the North American
- 9 market because the imports from Europe stay steady
- 10 in their market share and they are a market
- 11 feature. They don't change the market.

12

But it's not possible to

- 15 add significant volumes of the commodity to a
- 16 market in secular decline without triggering
- 17 prices to fall.
- 18 Canada yesterday attempted to
- 19 retreat from Nova Scotia's statements in 2012 that
- 20 it intended to make Port Hawkesbury the low-cost
- 21 producer of supercalendered paper.
- I think it's the next slide.
- 23 But at the time of the
- 24 transaction -- not quite but I will get to it.
- 25 But at the time of the

1 transaction, Nova Scotia made clear in public

2 statements that it intended Port Hawkesbury to be

3 the low-cost producer.

The state measures do not have

17 to be the only cause of damages for them to be

18 held accountable. The Tribunal in CME, as did the

19 Tribunal in Gavazzi, said otherwise -- go back,

20 please, to the CME statement.

21 The CME Tribunal said:

22 "A state may be held

23 responsible for injury to

24 an alien investor where

25 it is not the sole cause

1		of the injury; the state
2		is not absolved because
3		of the participation of
4		other tortfeasors in the
5		infliction of the injury.
6		The injury was
7		effectively caused by a
8		combination of factors,
9		only one of which was to
10		be ascribed to the
11		responsible state.
12		International practice
13		and the decisions of
14		international tribunals
15		do not support the
16		reduction or attenuation
17		of reparation of
18		concurrent causes except
19		in cases of contributory
20		fault."[as read]
21		Can we see the next slide,
22	please.	
23		Similarly, in the Gavazzi
24	Tribunal:	
25		"Other possible

1	concurrent events that
2	are not attributable to
3	the state are irrelevant.
4	Such events do not
5	diminish the state's
6	responsibility, nor do
7	they reduce the amount of
8	compensation for damages
9	due."[as read]
10	Thank you.
11	Canada insists that Resolute
12	mills had been profitable. Assuming Canada is
13	right, it doesn't matter. Without the competition
14	of excess supply, the mills would have been more
15	profitable and the additional profits that might
16	have been but-for the excess supply are also
17	losses, also damages. This elementary economic
18	point seems lost in the Canadian analysis.
19	Can I have the Cargill slide,
20	please.
21	The Cargill Tribunal found
22	this but-for framework to be the correct one. You
23	can see highlighted passages here:
24	"The appropriate approach
25	to assessing damages in

1	this proceeding is to
2	determine the present
3	value of net lost cash
4	flows.
5	The Tribunal does not
6	find these projections to
7	be so unusual or
8	difficult that employment
9	of the method is
10	inappropriate in this
11	proceeding. This
12	calculation, as accepted
13	and utilized by the
14	Tribunal in its own
15	analysis, calculates net
16	lost cash flows as equal
17	to the but-for quantity
18	of HFCS that Claimant
19	would have sold where
20	quantity is determined as
21	the product of the entire
22	market for HFCS,
23	multiplied by the
24	percentage of Claimant's
25	projected share of that

1	market, multiplied by the
2	price of HFCS, determined
3	over the period of loss
4	and brought to the
5	present value using the
6	appropriate interest
7	rate."[as read]
8	Now, yesterday, Mr. Neufeld
9	pleaded with the Tribunal to wipe this out, to
10	make a ruling that this methodology should never
11	be used, could never been used again. No
12	government should ever be held liable for damages
13	that have to be measured this way.
14	But we are not the first to
15	say that this is not only appropriate but it is
16	the only way to measure the damages in the
17	circumstances
18	PROFESSOR LÉVESQUE: I am
19	sorry to interrupt. I have a question.
20	MR. FELDMAN: Please.
21	PROFESSOR LÉVESQUE: Yes, also
22	on this slide, you have, it shows that in Cargill,
23	the measurement was a quantity of HFCS that
24	Claimant would have sold.
25	So the Tribunal was able to

- 1 compare what they sold before and after the
- 2 measure that was discriminatory on the basis of
- 3 nationality. They could see how much they didn't
- 4 sell.
- 5 Isn't that different than
- 6 doing a price erosion model?
- 7 MR. FELDMAN: I don't think
- 8 fundamentally it's different. The price is a
- 9 consequence of the quantity you sell. The
- 10 projection of the price is driven by how much
- 11 you're selling. And the how much you're selling
- 12 is driven by removing from the market the excess
- 13 supply, which you can only estimate because you're
- 14 working in a but-for world in which we don't have
- 15 those data.
- 16 PROFESSOR LÉVESQUE: Thank
- 17 you.
- 18 MR. FELDMAN: Damages in our
- 19 case are not entirely in the future. To the
- 20 contrary, about 77 percent of them were in the
- 21 past when Dr. Hausman did his analysis.
- Can we see that slide, please.
- There must always be estimates
- 24 because the world that doesn't always exist, the
- 25 world without supply in the market must be

1 estimated. But it is certain,

there will be damages as long

- 3 as the market is saturated with excess supply.
- 4 The reason is simple, with less supply to meet
- 5 demand, prices would be higher.
- 6 Professor Hausman has provided
- 7 two sophisticated and detailed reports of exactly
- 8 how he calculated the two lines on the graphs.
- 9 For prices with and without Port Hawkesbury's
- 10 excess supply.
- 11 Because profits are the
- 12 difference between costs and prices and costs are
- 13 different in every mill, he used data for costs
- 14 and prices to derive profits for each of
- 15 Resolute's three mills, for all the years
- 16 available beginning with Port Hawkesbury's
- 17 re-entry into the market.
- 18 He deployed one method
- 19 initially and a second as a check. One method
- 20 relied on price forecasts without the excess
- 21 supply, the other relied on calculated price
- 22 elasticities.
- For the period when actual
- 24 costs and prices were known for the market with
- 25 the excess supply, the results between the

- 1 forecasted data and the economic approach, as he
- 2 called it, were very close. You can see on this
- 3 slide the difference of between 81 and 97. But,
- 4 nonetheless, they do represent a range because
- 5 we're estimating.
- When he had to project both
- 7 results, looking forward while the excess supply
- 8 continued to cause damage, the difference between
- 9 the projected price with and without the excess
- 10 supply got wider as there was much more
- 11 uncertainty.
- The commodity was and is in
- 13 secular decline. No one has disagreed with that.
- 14 No one has questioned that.
- 15 U.S. International Trade
- 16 Commission found that paper mills must run 24/7 so
- 17 that they cannot reduce gradually their output
- 18 when demand slackens. This can be found in the
- 19 ITC report which is C-054.80 at Footnote 12,
- 20 because we were asked yesterday about some
- 21 evidence for the 24/7 requirement for running a
- 22 mill.
- Supply is removed from the
- 24 market in chunks when mills close, as we
- 25 illustrated yesterday.

- 1 Could we see that slide of the
- 2 stepladder, please. Ricky, the next slide. No,
- 3 okay. Well we saw this slide yesterday, there
- 4 it is.
- 5 Mills will close, but it's
- 6 impossible to know exactly when.
- 7 In this case, mills closed in
- 8 2018, suddenly reducing supply. Over time, the
- 9 market shock of the mill closure is smoothed out
- 10 as supply and demand achieve a new equilibrium.
- 11 But at the moment of closure, prices likely will
- 12 go up for a time before resuming their downward
- 13 fall.
- 16 That shock in 2018 disrupted
- 17 the overall apparently steady decline in Professor
- 18 Hausman's estimates obliging him to adjust from a
- 19 2017 baseline projecting to 2028. Neither 2017
- 20 nor 2018 could serve at that moment as a baseline
- 21 because they exaggerated the temporary impact of
- 22 the mill closure. What Professor Hausman called
- 23 an anomaly.
- So he proposed a three-year
- 25 average for the baseline looking forward from the

- 1 most recent data of actual losses.
- There's nothing unusual about
- 3 Professor Hausman's analysis.

- 8 Mr. Neufeld yesterday
- 9 caricatured Professor Hausman confused and
- 10 befuddled. He is a world renowned and much
- 11 decorated econometrician executing an analysis
- 12 here that may escape Mr. Neufeld's complete
- 13 understanding. There are places in here which
- 14 surely escape mine. But for him and for
- 15 economists, it's routine, simple and not unusual.
- 16 We urge the Tribunal to rely
- 17 on his written reports and not on the banter that
- 18 characterized Mr. Neufeld's jovial
- 19 cross-examination. Mr. Neufeld asked the Tribunal
- 20 to banish the but-for economic analysis and to
- 21 deny the existence of damages when caused by an
- 22 enduring market change. He might have asked too
- 23 for an adoption of the flat earth society.
- 24 Certainly governments would be
- 25 much comforted if they could cause lasting damage

- 1 that could not be compensated because this
- 2 Tribunal decided that long-lasting damages carried
- 3 into the future can not be compensated.
- 4 Ricky, can I have the slide on
- 5 the then and now in power.
- 6 PROFESSOR LÉVESQUE:
- 7 Mr. Feldman, another question. Maybe I am
- 8 challenged too but there are some things I am
- 9 having a hard time putting together.
- 10 MR. FELDMAN: And I promise
- 11 you I am having probably the very same problem but
- 12 I will try to answer as a stand-in for Professor
- 13 Hausman.
- 14 PROFESSOR LÉVESQUE: I
- 15 wouldn't challenge Dr. Hausman. I am just trying
- 16 to focus on what we have to determine. I quess I
- 17 am having a hard time of what, you know, is
- 18 counted in the analysis, the way the market is
- 19 being defined and what we keep out or what you say
- 20 gets smoothed out.
- 21 So when I am told there's an
- 22 anomaly that throws the model but we can smooth it
- 23 out, to me, what happened in the market is still
- 24 relevant, right. The closings in Europe, whether
- 25 it's the value of the currency, grade

1 substitution, whatever it is, there are things

- 2 happening in the market.
- 3 And what I am trying to square
- 4 is how can we just pretend, you know, the prices
- 5 didn't go up substantially in 2018 and '19, and
- 6 that's presumably why Resolute decided to invest
- 7 more in Kénogami to better compete with PHP in
- 8 2020.
- 9 So I am having a hard time
- 10 squaring what's happening in the market with the
- 11 model. I hope that was clear.
- 12 MR. FELDMAN: I think I
- 13 understand. And we are not in disagreement; that
- 14 is the nomenclature may be evasive, an anomaly, a
- 15 shock, but what we are trying to look at is the
- 16 long term.
- 17 This is a commodity that's
- 18 been in secular decline for already two decades
- 19 when we are getting to this, or at least since
- 20 2000 there seems to be agreement. What that means
- 21 is that over time, all the curves are smoothed
- 22 out. The supply comes out in chunks because they
- 23 come out when you close the mill. They don't come
- 24 out because a mill reduces its production. It
- 25 can't do that. That's what the ITC found and the

- 1 reference I provided for you.
- 2 So you're trying to integrate
- 3 this stepladder, as I referred to it in the graph,
- 4 with the overall decline which is, which, when you
- 5 see it over a period of time, looks steady. So
- 6 when you encounter suddenly the mill closure,
- 7 well, that's an aberration at that moment but if
- 8 we were able to look from, say, 2015 to 2030, it
- 9 wouldn't stand out so much.
- 10 So it's not as if you're not
- 11 accounting for all those other events in the
- 12 market. You are. Professor Hausman and
- 13 Dr. Kaplan both took into account these different
- 14 events that occurred in the market. But the
- 15 2017/2018 moment happened to coincide with this
- 16 proceeding. It didn't happen in the prior four
- 17 years, as we saw. There were some moments where
- 18 the prices went up a little bit but they went up
- 19 in both worlds. The but-for world tracked them as
- 20 going up in both with and without the supply.
- 21 So the adjustment is to
- 22 recognize that over the long term, you're still in
- 23 secular decline. No one denies that. But if you
- 24 project it out from just that point, from 2017 to
- 25 2028, that's what Professor Hausman did originally

- 1 before the shock happened to occur in that year.
- 2 And then he looks at that says, well, wait a
- 3 minute, I can't project out from 2017. That's not
- 4 going to make any sense because I have removed a
- 5 chunk from the market.
- So he finds the same thing
- 7 happening in 2018. He smooths it out for the
- 8 three-year period. It's not an ideal choice,
- 9 perhaps. Maybe it's the only choice. But I think
- 10 we would agree that some adjustment has to be
- 11 made. You can't project out the next ten years
- 12 from a wrong point. It's what might be called an
- 13 inverted pyramid, taking an extrapolated point --
- 14 taking a point that's the wrong one and
- 15 extrapolating. That's when your analysis becomes
- 16 an inverted pyramid.
- 17 So you're always extrapolating
- 18 from something. He is extrapolating from a
- 19 three-year average that he concludes is the better
- 20 way to go than to extrapolate from a point which
- 21 is plainly different, aberrational in the sense
- 22 that the chunk of supply that's removed, the
- 23 moment that it occurs, is not the point from which
- 24 you should be extrapolating.
- 25 PROFESSOR LÉVESQUE: A quick

- 1 follow-up and then I promise to let you go on.
- 2 In terms of impact on the
- 3 individual market players, so yesterday in your
- 4 opening, you were saying PHP wanted to be the last
- 5 mill standing. But if you look at the market
- 6 players, Irving is still, you know, in business
- 7 and I think maybe the closest competitor based on
- 8 their grades of paper to PHP, Catalyst is still in
- 9 the business, Kénogami, as I mentioned, invested
- 10 even more to be in that market.
- 11 So what can we conclude from
- 12 that; right --
- MR. FELDMAN: Well, we had
- 14 said -- I am sorry. Go ahead and finished.
- 15 PROFESSOR LÉVESOUE: So I was
- 16 just going to say you just made the point it's
- 17 about not making as much profit as one company
- 18 expected, but there's not one mill standing.
- 19 There's still currently those same players still
- 20 operating and still making money, so isn't that
- 21 relevant or?
- 22 MR. FELDMAN: It would be
- 23 relevant if it were correct but it's not correct.
- 24 There is no production anymore in the United
- 25 States. It's gone. Verso closed --

- 1 PROFESSOR LÉVESQUE: One
- 2 closed because of a fire but I am talking about
- 3 these Canadian --
- 4 MR. FELDMAN: No, that was
- 5 Sartell. Verso and Madison did not close because
- 6 of fires. They closed because there was no longer
- 7 enough demand in the market for them to include
- 8 supply at their cost of production.
- 9 So when we say the last mill
- 10 standing, it doesn't mean everything's gone.
- 11 There are others there now. But when it's over,
- 12 the expectation is that the lowest-cost mill will
- 13 be the last one to survive and everyone -- and the
- 14 projection now is that sometime, 2028 or perhaps a
- 15 bit beyond, no one will be producing this
- 16 commodity.
- 17 So what we have seen from 2012
- 18 is already closures. The two American
- 19 companies -- the one that's most startling, in my
- 20 mind, is that Verso brought the countervailing
- 21 duty case against all of the supercalendered paper
- 22 from Canada and settled with Port Hawkesbury and
- 23 with Irving. Between them, they paid Verso over
- 24 \$60 million and, within a year, Verso had to close
- 25 anyway, even with that infusion from the

- 1 settlement.
- 2 So the American production is
- 3 gone. The only producers now left are in Canada.
- 4 And they are continuing to compete in such a
- 5 fashion that as the demand will continue to
- 6 decline, because everybody agrees we are in
- 7 secular decline, for all the reasons stated,
- 8 because of digital formats and so forth, as that
- 9 happens, others will be forced to close. Kénogami
- 10 probably the next one up, for all of the
- 11 improvements and corrections, but we don't know
- 12 for sure.
- 13 What we know for sure is that
- 14 at some point, there will not be enough demand for
- 15 the supply now in the market.
- Now, when Professor Hausman
- 17 did this analysis, he took what we keep saying as
- 18 a conservative approach. That means that the only
- 19 damages we have claimed are price erosion damages.
- 20 We have not claimed lost sales, we have not
- 21 claimed lost customers, we have not claimed other
- 22 things that, as you're suggesting, could be
- 23 losses. But we have restricted the damages
- 24 claimed to the price erosion.
- There is price erosion,

There's price

- 3 erosion, there will continue to be price erosion
- 4 as long as there's excess supply in the market.
- 5 And there will be excess supply in the market
- 6 continuously because the demand is declining.
- 7 How fast it is, what the slope
- 8 is is uncertain. We are now -- that's why we
- 9 couldn't extrapolate from a point and that was
- 10 probably an error because the overall slope is
- 11 correct but its pace and how quickly we will get
- 12 to the end, the idea is to be the last one
- 13 standing, you're quite right. There are others
- 14 still competing, but unless they are able to get
- 15 their costs down below Port Hawkesbury's, they
- 16 won't survive Port Hawkesbury. Port Hawkesbury
- 17 will survive them.
- 18 That's the bet that the
- 19 province made. That it had the security of Port
- 20 Hawkesbury's perception and commitment that it
- 21 would be the low-cost producer. And as the
- low-cost producer, it should be the last one to
- 23 survive when the demand dwindles and goes away.
- 24 And this industry will go away, but for the time
- 25 being, it's worth investment for some and they're

1	making those investments. The Americans couldn't
2	do it. They're gone.
3	PROFESSOR LÉVESQUE: Thank
4	you.
5	MR. FELDMAN:
	But the
16	province amended the plan for Port Hawkesbury as a
17	result of the denial of the tax ruling with Port
18	Hawkesbury receiving essentially the same economic
19	deal as it originally sought with the power
20	rate. It's just that the savings took place
21	somewhere else.
22	
25	and indeed, as I suggested,

- 1 4 million to buy off
- 2. Verso and buy off the American case that was
- 3 restricting and inhibiting its market in the
- 4 United States.

5

That can be found in the

- 7 transcript at pages 489 and 490 of the
- 8 November 2020 hearing, a transcript and Exhibit
- 9 C-238.5.
- 10 And that's all I thought I
- 11 should say without more questions to try to
- 12 clarify some of the issues on damages and
- 13 causation.
- 14 And so, unless you have
- immediate questions for me, I would surrender the 15
- 16 floor to Mr. Valasek.
- SUBMISSIONS BY MR. VALASEK: 17
- 18 PRESIDENT HANOTIAU: Yes,
- Mr. Valasek, you have the floor. 19
- 20 Thank you very MR. VALASEK:
- 21 much. Let me just move my notes into position on
- 22 my screen, please.
- 23 MS. D'AMOUR: Mr. Valasek, I
- 24 don't want to interrupt you. Should we still
- 25 remain in restricted access?

- 1 MR. VALASEK: No, we will be
- 2 going into restricted access I think at least at
- 3 one moment but I will indicate that to you.
- 4 MS. D'AMOUR: Okay, so are we
- 5 able to start the public stream currently, then?
- 6 MR. VALASEK: Yes.
- 7 MS. D'AMOUR: Okay, thank you.
- 8 --- Whereupon Restricted Transcript Ends
- 9 MR. VALASEK: Good afternoon,
- 10 Professor Hanotiau and good morning, Dean Cass,
- 11 Professor Lévesque.
- 12 My presentation is organized
- 13 by reference to a number of points that I wish to
- 14 rebut in particular in relation to Article 1102
- and some on Article 1108. And in the course of my
- 16 rebuttal, to some of the points that Canada made
- 17 on these issues, I will also address as best I can
- 18 the questions that were put to Claimant on some of
- 19 those issues.
- 20 Yesterday, Mr. Luz argued that
- 21 the Tribunal, in its jurisdictional decision, had
- 22 already decided against Claimant, essentially.
- 23 You'll recall that Mr. Luz said that the
- 24 Article 1102 claim is not just moot but it's dead
- 25 on arrival, essentially suggesting that it had

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 already been killed off by the earlier statements
- 2. of this Tribunal.
- 3 With all due respect to my
- 4 friend Mr. Luz, I think this is imaginative
- revisionism of what the Tribunal found. 5
- 6 In our view, it is actually
- 7 Canada that lost what it had considered to be its
- decisive argument in this case; namely, that the 8
- 9 measures adopted by Nova Scotia could not meet the
- 10 test under either Article 1102 or, at that stage,
- 11 Article 1101 which was the threshold of measures
- 12 that "relate to" Resolute.
- 13 And they made that argument at
- 14 that stage because they said because Resolute's
- 15 mills that Resolute claims were necessarily
- 16 affected by the measures in Quebec and not Nova
- 17 Scotia, that was a decisive reason to rule against
- 18 Resolute and to preclude the claim.
- 19 It is, therefore, Canada's
- 20 continuing argument at this stage that that fact
- 21 alone is decisive in respect of Article 1102 that
- 22 is undermined by the jurisdictional decision.
- 23 the Tribunal will be aware that in its summary
- 24 memorial, Canada has doubled down on this position
- 25 that in the like circumstances analysis, the fact

- 1 that Resolute's mills are not in Nova Scotia is
- 2 decisive. And I will get to our jurisdictional
- 3 analysis in due course.
- 4 Let me first just pull up the
- 5 jurisdictional decision so that we can see what in
- 6 fact the Tribunal decided in that respect.
- 7 And, Ricky, if you can pull
- 8 up, please, paragraph 290 of that jurisdictional
- 9 decision which I believe is on page 82.
- Now, Canada has characterized
- 11 the Tribunal's jurisdictional decision as saying
- 12 that there are really only two possibilities for
- 13 Canada's -- for Resolute's claim to be able to
- 14 proceed under Article 1102 or to succeed. And,
- 15 similarly, that we must fail because we are
- 16 essentially making a claim for a uniform standard
- 17 across Canada, and that we must fail because our
- 18 position violates the principle in Merrill & Ring.
- 19 So let me first look at what
- 20 the Tribunal actually decided and, of course, for
- 21 Professor Hanotiau, I think this is important
- 22 because this predates his chairmanship of the
- 23 Tribunal.
- 24 So the Tribunal wrote as a
- 25 conclusion on the question of whether the measures

1	that Nova Scotia adopted here related to
2	quote/unquote Resolute's investments in Canada,
3	the Tribunal concluded that:
4	"The Tribunal agrees with
5	the NAFTA parties that
6	Article 1102(3) should
7	not be read so as to
8	impose vis-à-vis foreign
9	investments, a
10	requirement of uniformity
11	of treatment by the
12	different component units
13	of the three federal
14	states which are the
15	parties to NAFTA."[as
16	read]
17	I will explain to the Tribunal
18	that we are not proposing a uniform standard:
19	"It agrees with the
20	Tribunal in Merrill &
21	Ring that Article 1102(3)
22	only applies to the same
23	regulatory measures under
24	the same jurisdictional
25	authority."[as read]

1	And I will explain to the
2	Tribunal again during my presentation this morning
3	why it is that we are not violating that principle
4	in this case considering all the relevant
5	circumstances for the like circumstances analysis:
6	"But it does not follow
7	"[as read]
8	The Tribunal wrote:
9	"That Canada's argument
LO	limiting the effective
11	scope of the national
12	treatment obligation to
13	investments located
14	within the particular
15	province should be
16	accepted."[as read]
17	And that is really what Canada
18	is arguing again here when it says that the fact
19	that we were not in the province, that Resolute's
20	mill was not in the province is decisive is
21	essentially itself violating this direction from
22	the Tribunal.
23	And then the Tribunal went on:
24	"Examples can be imagined
25	of protective measures

1		taken for the benefit of
2		local investors while
3		effectively keeping NAFTA
4		investors or their
5		investments out. Whether
6		this would involve a
7		breach of Article 1102
8		would depend on the
9		circumstances, including
10		the application of the
11		like circumstances
12		requirement."[as read]
13		So that's an example that the
14	Tribunal gave:	
15		"But there seems no doubt
16		that there could be a
17		breach of the national
18		treatment obligation in
19		such case. The same
20		would be true in a
21		Methanex-type scenario if
22		the out of province
23		investor had been the
24		specific target of a
25		provincial campaign to

1	cause it loss. The
2	situation is not limited
3	necessarily to a scenario
4	where there has been a
5	single specific
6	target."[as read]
7	And so that's the second
8	example that the Tribunal gave.
9	Now Mr. Luz is fond of saying
10	that these are the only two scenarios specifically
11	that were open to Claimant in addressing their
12	Article 1102 claim.
13	The Tribunal concludes this
14	paragraph by saying:
15	"While the Claimant does
16	not suggest that it was
17	specifically targeted by
18	the Nova Scotia measures,
19	it is open to it to
20	establish on the merits a
21	breach of Article 1102 on
22	some other basis."[as
23	read]
24	And that's exactly what we
25	submit we are doing and have done.

- 1 And I just wanted to set the
- 2 record straight there that this was not a closed
- 3 list of just two limited examples that we had to
- 4 come within, and I submit that we have laid out a
- 5 basis for a breach of the merits on some other
- 6 basis, and of course that's what I will go through
- 7 in more detail today, including a rebuttal of some
- 8 of the points that I just mentioned, the
- 9 uniformity point and the Merrill & Ring point.
- 10 Ricky, you can take that down.
- I would also say that I am not
- 12 sure that Canada wants to be drawing too much
- 13 further attention to the jurisdictional decision
- 14 for another reason.
- 15 Mr. Luz claimed yesterday that
- there couldn't be a more straightforward
- 17 application of 1108(7) than the case here and it
- 18 renders the question of national treatment moot
- 19 and irrelevant. One really wonders why if that is
- 20 allegedly the case, Canada didn't advance a
- 21 preliminary argument against the Article 1102
- 22 claim, along with its other jurisdictional
- 23 inadmissibility objections.

- 24 The fact is it is not
- 25 straightforward in the least and Mr. Luz's

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 assertion that the Article 1102 claim is moot is
- 2 simply wishful thinking.
- 3 As I explained during the 2020
- 4 hearing, the fact that Canada did not advance a
- 5 preliminary argument during the jurisdictional
- 6 phase is a suggestion not just of this fact but
- 7 also is consistent with its delay in asserting a
- 8 robust objection on the basis of subsidies and
- 9 procurement similar to its inconsistency in the
- 10 positions that it took before the WTO and now in
- 11 this proceeding now that there's no risk to Canada
- 12 in the parallel US proceedings.
- So let me turn now to a series
- 14 of what I would call simply red herrings. In
- 15 other words, issues that have been raised and
- 16 argued by Canada, sometimes under the guise of
- 17 context but strongly suggesting that the Tribunal
- 18 should use them as a basis to stray from the
- 19 analysis that's required under Article 1102.
- 20 And I concede that it's a
- 21 technical analysis. In some cases, it's not
- 22 intuitive, and I would suggest to the Tribunal
- 23 that if you look at the cases under Article 1102
- 24 and generally cases concerning non-discrimination,
- 25 it is not an easy analysis. It's not just -- and

- 1 this is true, of course, of discrimination claims
- 2 generally. The like circumstances analysis is
- 3 complicated.
- 4 And so the Tribunal needs to
- 5 be cautious about what I consider red herrings.
- 6 Issues that have been raised as context which
- 7 appeal to your intuitive instinct that in light of
- 8 those facts, surely a claim can't be valid. But
- 9 if one considers the proper framework for the 1102
- 10 analysis, then the conclusion is otherwise.
- 11 And I will take you through a
- 12 few of these points and address the Tribunal's
- 13 questions hopefully at the same time.
- 14 So Mr. Luz -- so this is the
- 15 first, what I call the first red herring, the
- 16 Bowater Mersey issue.
- 17 Mr. Luz took some time going
- 18 through the story of the closure of the Bowater
- 19 Mersey mill. And, Professor Hanotiau, you asked
- 20 us specifically about this. Can we, can Resolute
- 21 invoke Article 1102 when Resolute received a
- 22 substantial package for Bowater Mersey.
- 23 I am really grateful for the
- 24 question. It allows me to focus on this important
- 25 point and to demonstrate that Resolute's mill at

1	Bowater Mersey and the treatment it received from
2	the government is not an appropriate comparator.
3	And, again, this is a technical analysis. But let
4	me take you through it briefly.
5	Ricky, if you could pull up
6	the slides from yesterday and go to Slide
7	starting at Slide 62, please.
8	So the first point to note is
9	that this is an issue that was raised by the
10	Tribunal in advance of the 2020 hearing as well.
11	It was the Tribunal's Question 18:
12	"The Respondent has
13	brought forward evidence
14	of the treatment provided
15	to Bowater Mersey (owned
16	by Resolute) by the
17	Government of Nova
18	Scotia, in particular, in
19	terms of financial
20	assistance and other
21	benefits. Should the
22	Tribunal consider that
23	Bowater Mersey and not
24	Resolute's mills in
25	Quebec were in like

(416) 861-8720

1	circumstances to Port
2	Hawkesbury Paper, that
3	all like circumstances
4	describes the
5	relationship to all of
6	Resolute's mills."[as
7	read]
8	So next slide, please.
9	Now, I haven't really heard
10	Canada contest the factors that we've listed. And
11	indeed they cannot. The cases make clear that all
12	of these factors are relevant to the like
13	circumstances analysis.
14	So, really, the question is,
15	moving away from some sort of intuitive appeal or
16	contextual factor or simply appealing to your
17	instinct that it can't be right that Canada is the
18	subject of a claim and that Nova Scotia is the
19	subject of scrutiny for its treatment of Port
20	Hawkesbury when there was this story about Bowater
21	Mersey. Well, we have to look at the factors and
22	apply them. That's what Article 1102 requires.
23	And the first factor is
24	essentially decisive but we will go through them
25	all. Now the first series of factors are the

1	market	and	the	product.	Are	the	foreign	investor
---	--------	-----	-----	----------	-----	-----	---------	----------

- 2 and the domestic investor operating in the same
- 3 market? And how similar are the products or
- 4 services being offered by the foreign investor and
- 5 the domestic investor? And, again, we are
- 6 complaining about the Port Hawkesbury measures.
- 7 So Bowater Mersey is not in
- 8 the same market as Port Hawkesbury and did not
- 9 sell the same product.
- Next slide, please.
- This was conceded by Canada's
- 12 own witness that was directly involved in these,
- 13 these efforts.
- 14 I asked him:
- 15 "As the chair of the
- 16 committee, you were
- 17 tasked with the
- 18 overseeing, the gather
- and analysis --
- 20 MS. D'AMOUR: Sorry to
- 21 interrupt. Should we be in restricted access?
- 22 MR. VALASEK: I don't think
- 23 this really is but, to be safe, let's go into
- 24 restricted access.
- MS. D'AMOUR: Okay.

1	Whereupon Restricted Transcript Commences
2	MS. D'AMOUR: Okay, confirming
3	we are in restricted access.
4	MR. VALASEK: So the question
5	was:
6	"And as the chair of the
7	committee, you were
8	tasked with overseeing
9	the gathering and
10	analysis of information
11	as to the state of the
12	newsprint and SC paper
13	industries."[as read]
14	And the Tribunal will recall,
15	Bowater Mersey was a newsprint mill and Port
16	Hawkesbury is an SC paper mill.
17	"ANSWER: That's correct.
18	"QUESTION:

1 [as read]

Next slide, please.

- 4 So that dispenses of those
- 5 factors and Canada's never argued that Bowater
- 6 Mersey and Port Hawkesbury are in the same
- 7 industry dealing with the same product.
- 8 The next factor is temporal.
- 9 Is there a timing issue as regards the investors
- 10 and investments being compared?
- Now, Resolute had already
- 12 decided to close the Bowater Mersey mill when the
- 13 Port Hawkesbury measures were adopted. So there
- 14 really is an issue of timing. And I will get
- 15 into, in any event, a comparison of what was
- 16 actually offered to one compared to the other, not
- 17 because it's relevant to the like circumstances
- 18 test but because I want the Tribunal to have a
- 19 full picture of the context.
- 20 So next slide, please.
- 21 Perhaps, you know, very
- 22 important factor as well is the combination of
- 23 policy, jurisdictional analysis, and
- 24 implementation. And it's critical that when one
- 25 considers whether it's important that a mill, for

(416) 861-8720

- 1 example, would be in the same province or not or
- 2 whether measures should be or treatment should be
- 3 in like circumstances, one really has to look at
- 4 the policy, the relevant jurisdiction in which --
- 5 or as to which the policy was implemented and how
- 6 it was implemented. And, again, this comes from
- 7 the case that have looked at discrimination
- 8 claims.
- 9 And we say when you look at
- 10 those together, none of the measures adopted for
- 11 Port Hawkesbury were of general application in
- 12 Nova Scotia. None would have applied to Bowater
- 13 Mersey. They were targeted at protecting Port
- 14 Hawkesbury, and as such, they simply are not --
- 15 the treatment is not in like circumstances to
- 16 Bowater Mersey.
- 17 Next slide.
- 18 And the Tribunal will remember
- 19 this slide where we have shown or we're
- 20 illustrating that if you consider this list of
- 21 measures, each of them was put in place
- 22 specifically to address the demands of the winning
- 23 acquirer of Port Hawkesbury, and were focussed on
- 24 putting that mill into what we say be a leading
- 25 competitive position, be the lowest-cost producer,

- 1 and none would have applied across Nova Scotia,
- 2 none apply generally. And in that sense, again,
- 3 the conclusion has to be that Bowater Mersey is
- 4 not in like circumstances to Port Hawkesbury.
- 5 Even if it were appropriate --
- 6 next slide, please. Sorry, Ricky, are we on Slide
- 7 68?
- 8 I think I will -- this is
- 9 simply the testimony where Mr. Montgomerie
- 10 confirms that the objectives that were being
- 11 sought to be achieved in the two different cases,
- in the case of Bowater Mersey and in the case of
- 13 Port Hawkesbury, were very different. On the one
- 14 hand, one was a policy that was adopted to
- 15 essentially put the Bowater Mersey, put the
- 16 Bowater Mersey mill on track to have an orderly
- 17 transition to closure, whereas the other one was
- 18 looking to make Port Hawkesbury a competitive
- 19 success.
- 20 And so, again, this is not
- 21 treatment in like circumstances.
- Okay, you can take the slides
- down.
- 24 Members of the Tribunal, even
- 25 if it were appropriate to compare Resolute's

RESTRICTED ACCESS October 19, 2021

- 1 experience at Bowater with PWCC's experience at
- 2 Port Hawkesbury, the package that the government
- 3 offered to Resolute was very different from what
- 4 it offered to Port Hawkesbury Paper. So, here, I
- 5 am not conceding that this is the right
- 6 comparator, but even if it somehow were, if you
- 7 intuitively felt, well, we need to compare it,
- 8 there are important differences.
- 9 As noted in paragraph 19 of
- 10 the Garneau witness statement, there were
- 11 qualitative differences in what was offered to
- 12 Port Hawkesbury versus Bowater Mersey. The
- 13 Government of Nova Scotia did not offer assistance
- 14 negotiating electricity rates with Nova Scotia
- 15 Power or assistance with obtaining the Utility and
- 16 Review Board approval of such rates. The
- 17 Government of Nova Scotia did not make a statement
- 18 in support of an electricity rate, hire a
- 19 consultant, present an expert witness, introduce
- 20 evidence, answer information requests, make
- 21 representations regarding government action or
- 22 enact legislation to ensure passage of a load
- 23 retention rate.
- 24 And the assistance the
- 25 Government of Nova Scotia offered to Resolute, as

- 1 I have mentioned, was intended simply to ensure
- 2 the orderly closure of Bowater Mersey, not to make
- 3 it the lowest-cost producer of newsprint for an
- 4 extended life.
- 5 And I do wish to highlight
- 6 that Mr. Luz yesterday suggested that somehow, we
- 7 were abandoning our insistence that it was
- 8 relevant that Mr. Todd Williams had been hired by
- 9 the government as a consultant, I think in
- 10 relation to the attribution claim. But this is
- 11 where, you know, it is important. That was a very
- 12 significant step, an extraordinary step that the
- 13 government took with respect to Port Hawkesbury.
- 14 And then there was an
- 15 important quantitative difference.
- 16 The amount offered to Bowater
- 17 Mersey was intended to ensure that orderly
- 18 closure. And we know that it ultimately wasn't
- 19 even enough to do that and we know that Resolute
- 20 ultimately gave back the money that was offered to
- 21 it for that purpose and exited the province.
- 22 So that takes me to another
- 23 red herring, if you will, that exists in this
- 24 file, which relates to the fact that Resolute was
- 25 invited to bid on, or was allowed to consider the

- 1 process for the bidding on Port Hawkesbury.
- 2 And, Professor Hanotiau, you
- 3 also asked whether it's appropriate for Resolute
- 4 to invoke Article 1102 when Resolute was not
- 5 prevented, itself, from bidding on the Port
- 6 Hawkesbury mill.
- 7 Mr. Luz also alluded to this
- 8 point, asserting that the government encouraged
- 9 Resolute to participate in the bidding process and
- 10 that this was not a situation where the government
- 11 was trying to prevent the Claimant from investing
- 12 and doing business in the province. And of course
- 13 here, again, he is alluding to what he suggests is
- 14 one of only two possibilities that exist under
- 15 1102 for a claim. But as I showed you before,
- 16 that wasn't what the Tribunal, I think, was
- 17 suggesting.
- 18 But Resolute's complaint here
- 19 isn't about being excluded from bidding or
- 20 excluded from the province. It is specifically
- 21 about the anti-competitive measures the province
- 22 adopted in response to the demands that were made
- 23 by the only bidder that emerged from that process.
- 24 And had Resolute made those demands and succeeded,
- 25 it would have only succeeded in undercutting its

1	own business elsewhere through price erosion.
2	Surely Resolute cannot be
3	prevented from advancing a claim for loss under
4	this provision of NAFTA in respect of the measures
5	supporting PWCC through an argument that suggests
6	that it could have made similar negotiating
7	demands on the government for measures that would
8	harm its own interests.
9	It would have been, I think,
10	inconceivable to go into a process and make the
11	demands that PWCC made of Nova Scotia and insist
12	on them when all the while knowing that they
13	would, as we have demonstrated, necessarily result
14	in an impact on Resolute's other mills.
15	But, again, it's also
16	instructive to consider some of the additional
17	facts in the record regarding the bidding process,
18	because Canada, I think, has given a very enhanced
19	picture, if you will, of what actually happened.
20	Mr. Luz stated yesterday that
21	

1	
7	and we are in restricted access here; right,
8	Heather?
9	MS. D'AMOUR: Correct, we are
	in restricted access.
10	
11	MR. VALASEK: Okay.
18	
	The credit monitor, the monitor that was

- 1 overseeing the CCAA proceeding, essentially the
- 2 restructuring proceeding, contacted 110 potential
- 3 parties, including Resolute. 110. Eight parties
- 4 submitted offers, and four were invited to
- 5 continue bidding. Only two, including PWCC's bid,
- of the four final bids were to keep the mill open.
- 7 The other two were to scrap the mill.
- 8 And that's at Exhibit C-120,
- 9 paragraph 15.
- 10 And the other bidder who was
- 11 willing to bid on it as a going concern had what
- 12 was euphemistically referred to in the media as a
- 13 bit of a spotty past. That's at Exhibit C-143.
- 14 So it turns out that the
- 15 opportunity that Mr. Luz and Canada refers to here
- 16 as sort of being an open invitation to bid on Port
- 17 Hawkesbury at that time wasn't much of an enticing
- 18 offer. I mean, 110 potential parties, out of 110
- 19 parties, only two, including PWCC that, as we have
- 20 seen in the record, came in with a very aggressive
- 21 agenda, about which we complain because it
- 22 essentially, we say, co-opted the government into
- 23 providing measures that were anticompetitive, only
- 24 two ultimately came to the table and one of them
- 25 was simply not a reputable party.

1	I will turn now to what I call
2	the false narrative red herring.
3	PROFESSOR LÉVESQUE: Just
4	before you move on, I'd like to make sure I
5	understand the last point you're making.
6	
15	So correct me if I say
16	anything you disagree with.
17	MR. VALASEK: All right.
18	PROFESSOR LÉVESQUE:
21	MR. VALASEK: Correct.
22	PROFESSOR LÉVESQUE:

- MR. VALASEK: Correct.
- 15 PROFESSOR LÉVESQUE: So you
- 16 agree with that?
- 17 MR. VALASEK: I agree with it
- 18 and I would say that it was a reasonable
- 19 assessment.
- 20 PROFESSOR LÉVESQUE: Okay.
- 21 MR. VALASEK: It was reading,
- 22 and Mr. Garneau testified to this effect, that he
- 23 had experience with the government, and even after
- 24 certain assistance was provided to Resolute, in
- 25 that context, in the context of Bowater Mersey, in

- 1 the end, it wasn't sufficient and he --
- 2 PROFESSOR LÉVESQUE: Just
- 3 to -- sorry, I didn't mean to interrupt. Just to
- 4 finish this point.

So it's -- I want to make

12 sure I understand your position.

13

5

- MR. VALASEK: I guess what
- 16 I'm -- I am responding to the argument that Canada
- 17 makes which is that because the opportunity was
- 18 not foreclosed, because Resolute, like other
- 19 potential bidders, was invited to consider Port
- 20 Hawkesbury, its claim under 1102 is foreclosed,
- 21 that's the argument.
- 22 And I don't understand that
- 23 argument because everyone who looked -- almost the
- 24 entire slate of bidders that looked at that
- 25 opportunity said this isn't worth considering.

- 1 And obviously if you're in this market, you
- 2 understand that you could get some government
- 3 support,
- 5 And this claim is all about
- 6 the extent of the support. I mean that's the
- 7 nature of our complaint. So I think what we are
- 8 saying is that all the bidders, other than PWCC,
- 9 were considering what would a reasonable amount of
- 10 support from the government, which is what
- 11 governments do, and even Mr. Luz said, he claimed
- 12 that's what the Government of Nova Scotia did with
- 13 respect to PWCC.
- 14 But I think the evidence from
- 15 the bidders shows that most of the bidders, in
- 16 thinking about what the government would likely do
- in a reasonable scenario, would simply not be
- 18 sufficient. And so they walked away. PWCC went
- 19 in and said we insist on getting this. We want to
- 20 be the lowest-cost producer and pushed the
- 21 government to provide assistance of such a degree.
- 22 As my colleague said yesterday, it wasn't the type
- 23 of measures, it was their character.
- 24 It was such an extraordinary
- 25 set of relief that of course, in hindsight, it's

- 1 like why didn't anyone else do that? Well,
- 2 because it's improper. And I don't think any of
- 3 the other bidders felt that any government would
- 4 go to that extent to violate NAFTA and provide
- 5 support that ultimately is anticompetitive in that
- 6 industry.
- 7 So, you know, I think that
- 8 this evidence doesn't help Canada. In fact, it
- 9 supports our claim that when PWCC entered into the
- 10 bidding process, it, you know, we heard a dog
- 11 analogy yesterday. The tail started wagging the
- 12 dog.
- 13 This wasn't -- earlier bidders
- 14 were looking at this process and saying, well,
- 15 what's normal and then one bidder came in and I
- 16 showed you evidence from my cross-examination of
- 17 Mr. Montgomerie yesterday as well where even
- 18 before the bidding process ended, what happened is
- 19 PWCC started negotiating with the government.
- 20 They sat down and they said you are going to be
- 21 our partner and we are going to insist.
- I think PWCC recognized that
- 23 after the closure of Bowater Mersey, the political
- 24 pressure on Nova Scotia was extreme and that they
- 25 had them in a corner. And it would be very

- 1 difficult politically for Nova Scotia to back away
- 2 from the demands that PWCC was making.
- And that is not a normal
- 4 approach to government support and the government
- 5 went too far. And we say that this evidence
- 6 supports that narrative. So it's, you know, it is
- 7 consistent with what we are saying and it doesn't
- 8 prevent us from bringing our 1102 claim. To the
- 9 contrary.
- 10 PROFESSOR LÉVESQUE: Thank
- 11 you.
- MR. VALASEK: So, again, this
- 13 is just, I think it's consistent with what we just
- 14 discussed, this sort of false narrative red
- 15 herring, Mr. Luz referred to us as sort of
- 16 presenting a false narrative, that our claim is
- 17 built entirely on that.
- 18 And Mr. Luz referred to
- 19 government officials carefully studying and
- 20 balancing the options and weighing the
- 21 consequences of doing nothing versus some
- 22 appropriate level of government support for
- 23 private business in the public interest and
- 24 reasonable under the circumstances.
- 25 That's at transcript 162 from

- 1 yesterday.
- 2 And what I am suggesting what
- 3 the record shows is that the one bidder that
- 4 showed any interest in maintaining the mill as a
- 5 going concern commandeered that process and set
- 6 the terms of what the government was going to have
- 7 to provide by way of support in order for the
- 8 government to be able to avoid yet another mill
- 9 closure.
- 10 That's the narrative, and
- 11 that's not false.
- 12 What you have heard from -- I
- 13 understand why they testified that way and they
- 14 may well believe it, that they were doing what was
- in the public interest, but the record shows that
- 16 there was a private interest here that recognized
- 17 that there was a public interest that they could
- 18 push to the point of securing an extraordinary
- 19 deal for themselves.
- Now let me turn to that -- I
- 21 will now turn to the -- I am just conscious of
- 22 time.

- 23 Professor Hanotiau, you said
- that we weren't going to be limited to one hour.
- 25 I know that we are beyond it. I mean, I have, I

- 1 am about halfway through my remarks.
- 2 PRESIDENT HANOTIAU: Yes, no
- 3 worry, no worry. I think that we should be
- 4 flexible today because we have asked a lot of
- 5 questions so you are supposed to do more than your
- 6 rebuttal, so don't worry.
- 7 MR. VALASEK: Okay, thank you,
- 8 please let me know if -- I mean I think I should
- 9 be able to finish up in about 10/15 minutes, I
- 10 hope, so.
- 11 PRESIDENT HANOTIAU: Okay, go
- 12 ahead.
- MR. VALASEK: Okay. So the
- 14 next topic, members of the Tribunal, I'd like to
- 15 look at is the issue of -- I am really surprised
- 16 that we are still debating this at this stage. I
- 17 had hoped that we would get beyond it.
- But, anyway, the proper
- 19 framework for the analysis under Article 1102 and
- 20 what nationality-based discrimination means.
- 21 Canada is simply -- I mean we
- 22 saw a roller coaster on a slide yesterday. I
- 23 believe this is just as much -- this is the roller
- 24 coaster in this case, that Canada's position on
- 25 nationality-based discrimination in Article 1102.

1 Canada neither accepts the

- 2 framework set out in our submissions based on the
- 3 UPS three-part test followed by the justification
- 4 test, but it doesn't really present its own
- 5 framework. It is very hard for me to pin that
- 6 down and I think that is strategic.
- 7 Canada has never delved into
- 8 what is actually required in the way that we have
- 9 to establish nationality-based discrimination and,
- 10 importantly, which elements are Claimant's burden
- 11 and which elements are Respondent's burden.
- 12 The fact is that Canada and
- 13 the non-disputing parties over time assigned a
- 14 range of meanings to that term "nationality-based
- 15 discrimination" and sort of used it as a bit of a
- 16 cudgel, if you will, through these proceeding. As
- 17 a result, the meaning Canada attributes to that
- 18 term has shifted over time.
- In its counter-memorial,
- 20 Canada started at one extreme when it argued that
- 21 the term imposed the burden, the burden on
- 22 Claimant to show that it was accorded different
- 23 treatment because of its nationality. Essentially
- 24 a type of targeting argument.
- 25 In its rejoinder, Canada

- 1 argued that nationality must still, even
- 2 considering the specific language of
- 3 Article 1102(3), which I will get to in a minute,
- 4 form the basis for the least favourable treatment
- 5 in order for that treatment to constitute a breach
- of Article 1102, and it occurs to me we can come
- 7 out of restricted access.
- 8 --- Whereupon Restricted Transcript Ends
- 9 MS. D'AMOUR: Confirming we
- 10 are now in public access.
- MR. VALASEK: Okay. However,
- 12 in a subtle shift at that time, Canada no longer
- 13 argued that it was Resolute's burden to show
- 14 deferential treatment based on nationality, just
- 15 that nationality should form its basis. And then
- 16 I am not going to go through all the details, but
- 17 I showed at the 2020 hearing that Mr. Luz had gone
- 18 back to saying that we had to show some kind of
- 19 linkage, that it was because of the foreign
- 20 nationality that the deferential treatment
- 21 existed.

- 22 And, yesterday, I explained
- 23 here that Canada had finally come around to
- 24 Resolute's position on the proper framework in its
- 25 summary memorial.

1	And, Ricky, could I ask you, I
2	don't know if you have this handy. If not, I will
3	just read from it.
4	But the summary I am sure
5	that all the members of the Tribunal have the
6	summary memorial that Canada submitted in this
7	case. And I had been encouraged that maybe we
8	would finally be in a common framework so that the
9	Tribunal could sort of move forward with that
10	framework.
11	And at paragraph 47, Canada
12	said:
13	"Well, the Claimant has
14	failed to establish the
15	elements of the national
16	treatment test."[as read]
17	So that's something that I can
18	relate to. There is the three-part UPS test.
19	Footnote 153 is a proper
20	reference to that UPS test:
21	"Failure to establish one
22	of the three elements
23	will be fatal to its
24	case. This is the legal
25	burden that rests

1	squarely with the
2	Claimant. That burden
3	never shifts to the party
4	here, Canada."[as read]
5	And so forth.
6	So that's a three-part test,
7	that's fine.
8	And then in paragraph 49 of
9	the memorial, summary memorial, it seemed that
10	Canada was then referring to its burden to
11	demonstrate that the measures that were
12	presumptively violating Article 1102 could be
13	justified when it said:
14	"The evidence is clear
15	that the government's
16	support for PHP had a
17	reasonable nexus to
18	rational government
19	policy which made no
20	distinctions between
21	Canadian and foreign
22	investors."[as read]
23	Now, the Tribunal will
24	recognize that language. That's right out of Pope
25	& Talbot. That's the first of the two tests in

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 Pope & Talbot, and so that's why I said that it
- 2 appeared that Canada was now coming around to our
- 3 framework.
- 4 But in his remarks yesterday,
- 5 Mr. Luz remained vague, saying that it didn't
- 6 matter who had the burden. And that he didn't
- 7 think that the second part of the Pope & Talbot
- 8 test made sense in any event.
- And so, of course, to us, it
- 10 matters. To us, it matters because if you apply
- 11 that proper framework, there are consequences. We
- 12 meet the first three-part test, we succeed in
- 13 meeting our burden, and the burden shifts to
- 14 Canada.
- 15 And then there's two elements
- 16 to that burden. The first is nationality-based
- 17 discrimination. As we have said, Canada may well
- 18 discharge that burden, but there is that
- 19 nettlesome second part of the test and herein lies
- 20 the rub.
- 21 That is why Canada doesn't
- 22 want to accept the framework that is the proper
- 23 framework, which is that there is a burden on
- 24 Canada to show that the measures were not
- 25 anticompetitive, which it can't do. And that

1	should be the takeaway the Tribunal has from the
2	way that Canada has sort of muddled through the
3	framework for Article 1102, in our view.
4	Another important point to
5	make on the framework for Article 1102 is even how
6	nationality figures into that prima facie test,
7	because Mr. Luz and Canada's position is that,
8	somehow, we are ignoring nationality all together.
9	We are just conceding that there's absolutely no
10	nationality component.
11	One can look at paragraph 46,
12	for example, of Canada's summary memorial in which
13	Canada introduced its argument on Article 1102(3)
14	as follows:
15	"As Canada has explained,
16	the purpose of the
17	national treatment
18	obligation in
19	Article 1102 is to
20	prevent nationality-based
21	discrimination. NAFTA
22	tribunals, parties,
23	scholars have
24	consistently referred to
25	this as a necessary

1	element to find a
2	national treatment
3	violation. The
4	irrelevance of the
5	Claimant's US nationality
6	is evidenced by the
7	government's
8	encouragement of the
9	Claimant to bid on Port
10	Hawkesbury and
11	Mr. Montgomerie's
12	testimony that the
13	government would have
14	considered request for
15	financial assistance had
16	Resolute asked."[as read]
17	I would say as an aside that's
18	all fine and that could be part of its
19	justification test, by the way. But it doesn't go
20	to the first part of the test which is whether we
21	have taken into account nationality to discharge
22	our burden.
23	And the next part of
24	paragraph 46 goes to this:
25	"The Claimant concedes

Τ	that its US nationality
2	was not a factor in the
3	government's actions and
4	that other Canadian-owned
5	SC paper producers,
6	Irving and Catalyst, were
7	similarly impacted while
8	Resolute 'just happened
9	to be the only foreign
10	participant with an
11	investment in
12	Canada'."[as read]
13	Well, guess what? That's
14	sufficient under the UPS three-part test. That's
15	a sufficient nationality component to meet our
16	burden and to shift the burden to Canada.
17	And I will show you that
18	Canada itself in its pleadings has essentially
19	conceded that with respect to 1102(3) because
20	that's exactly what the language of 1102(3) says.
21	Canada goes on at the end of
22	its paragraph to say:
23	"To argue that there is a
24	national treatment
25	violation in a situation

1	where several enterprises
2	in the same sector were
3	accorded the same
4	treatment and similarly
5	impacted regardless of
6	their nationality
7	transforms Article 1102
8	into a guarantee for
9	foreign investors that
10	places them above
11	domestic investors, which
12	is not its purpose."[as
13	read]
14	Well, I don't think Canada has
15	read Article 1102(3) carefully. And let's bring
16	that up.
17	Ricky, could you bring up
18	Slide 32, please, from yesterday's presentation.
19	Okay, thank you.
20	So it's important to read
21	Article 1102(3) after all. This is a plain
22	language issue:
23	"The treatment according
24	by a party under
25	paragraphs 1 and 2"[as

1	read]
2	So paragraphs 1 and 2 are the
3	standard national treatment provisions for an
4	investor and paragraph 2 is for investments.
5	Now, paragraph 3 deals with
6	provincial national treatment obligations:
7	"The treatment accorded
8	by a party under
9	paragraphs 1 and 2 means,
10	with respect to a state
11	or province"[as read]
12	Of course that's what we are
13	dealing with here:
14	"Treatment no less
15	favourable than the most
16	favourable treatment
17	accorded, in like
18	circumstances, by that
19	state or province to
20	investors, of the party
21	of which it forms a
22	part."[as read]
23	That language on its face
24	tells you that there will be or there can be
25	deferential treatment among Canadian investors in

- 1 a provincial measure because the relevant
- 2 comparison is between the US investor and the most
- 3 favourable treatment of Canadian investors.
- 4 That's what Article 1102(3)
- 5 says.
- 6 If Mr. Luz -- if Canada were
- 7 correct, Article 1102(3) would have read
- 8 "treatment no less favourable than the treatment
- 9 accorded in like circumstances by that state or
- 10 province to investors of the party of which it
- 11 forms a part", and it would have assumed that that
- 12 treatment has to be uniform. But it doesn't.
- 13 Instead, the provision says
- 14 "treatment no less favourable than the most
- 15 favourable treatment accorded in like
- 16 circumstances by that state or province to
- investors of the party of which it forms a part",
- 18 i.e. Canadian investors in this context.
- 19 So the fact that other
- 20 Canadian SC paper mill owners are also impacted
- 21 does not preclude Resolute's claim under
- 22 Article 1102(3) and it also does not mean, as
- 23 Canada suggests, that nationality is irrelevant to
- 24 our position.
- 25 Ricky, can you go to Slide 34,

- 1 please.
- 2 So this is our framework,
- 3 which is not controversial. And in the context of
- 4 a provincial measure, I think it's very
- 5 appropriate to consider what it means.
- It means that we have the
- 7 burden in the first instance to demonstrate
- 8 nationality-based discrimination for purposes of
- 9 1102(3) which does not mean anything beyond the
- 10 simple fact that as a foreign national -- so that
- 11 is the nationality element.
- 12 As a foreign national -- no
- 13 one contests that Resolute is a foreign
- 14 national -- it has received treatment less
- 15 favourable than the most favourable treatment
- 16 accorded to Canadian investors. And we have
- 17 demonstrated that.
- 18 It doesn't matter that
- 19 Catalyst and Irving are also impacted by the
- 20 measures. 1102(3) allows for that. It's the most
- 21 favourable treatment that's relevant for the
- 22 comparison.

- 23 And we concede that
- 24 nationality also figures into the second part of
- 25 the test where the burden shifts to Canada. But

1	Canada doesn't want to go there because it has a
2	second burden to meet, which is ensuring that the
3	measures do not violate, unduly undermine the
4	investment liberalizing objectives of NAFTA, so
5	there's the anticompetitive concern that Canada
6	would have to address, which, at this point, it
7	simply addresses by wishing it away.
8	Yesterday, Mr. Luz referred to
9	the writings of Ms. Kinnear saying that that is a
10	good demonstration of what all the, you know, of
11	the sort of position that everyone agrees defines
12	the standard under Article 1102(3) or under
13	1102.
14	And Ms. Kinnear, in her
15	treatise, noted that:
16	"Claimant must meet its
17	
	burden of proof that it
18	burden of proof that it is in like circumstances
18	is in like circumstances
18 19	is in like circumstances with the more favourable
18 19 20	is in like circumstances with the more favourable treated entity or class
18 19 20 21	is in like circumstances with the more favourable treated entity or class of entities and that it
18 19 20 21 22	is in like circumstances with the more favourable treated entity or class of entities and that it has been accorded less

1	connected to
2	nationality."[as read]
3	Now, that is that's a broad
4	statement.
5	"Flows from" and "arises out
6	of", I understand. That suggests a causal
7	connection between nationality and the deferential
8	treatment consistent, perhaps, with motive or
9	intent. That's certainly a way to establish the
10	prima facie argument.
11	"But otherwise connected"
12	captures the remaining neutral fact patterns. I
13	suggest that it was very carefully chosen by
14	Ms. Kinnear and Professor Bjorklund, where two
15	investors in like circumstances are treated
16	differently, one happens to be a foreign investor
17	with the nationality of another NAFTA party, and
18	there is a deferential impact on that foreign
19	investor even if the motive is not nationality.
20	That is still connected to nationality.
21	Now, finally, my final point
22	on nationality-based discrimination.
23	It is worth noting that in its
24	rejoinder, Canada explained in the greatest detail
25	yet what it meant for nationality to "form the

1	basis" of discrimination considering the language
2	of Article 1102(3), and it essentially adopted
3	Resolute's position that I have just explained.
4	It said, and this is at
5	paragraph 98 of Canada's rejoinder:
6	"In a situation where a
7	Canadian province, for
8	instance, Nova Scotia
9	would treat more
10	favourably investors from
11	another Canadian
12	province, for instance,
13	British Columbia, than
14	its own local investors,
15	a foreign investor from
16	another NAFTA party could
17	still bring a claim
18	alleging a breach of
19	Article 1102 based on the
20	fact that it did not
21	receive the treatment
22	accorded by Nova Scotia
23	to investors from British
24	Columbia. There would
25	still be a nationality

1	element to such a
2	claim."[as read]
3	In its Article 1128
4	submission, Mexico accepts this explanation and
5	concludes:
6	"Therefore, the
7	interpretation that
8	Article 1102(3) does not
9	require proof of
10	nationality-based
11	discrimination is
12	incorrect."[as read]
13	But we are not arguing for
14	anything other than that. We are arguing that
15	that is the nationality-based discrimination that
16	we have established as part of our prima facie
17	case.
18	So if that is the standard,
19	then Claimant clearly meets that standard.
20	Resolute has brought its claim because, as a
21	foreign investor, an investor of US nationality,
22	it did not receive treatment as the most
23	favourable treatment Nova Scotia accorded to a
24	Canadian investor, namely PWCC.
25	It doesn't matter that

- 1 Catalyst and Irving also suffered deferential
- 2 treatment alongside Resolute for purposes of the
- 3 prima facie standard.
- 4 What matters for purpose of
- 5 Article 1102(3) is that Resolute is a US national
- 6 mon the one hand, and that it received less
- 7 favourable treatment than the most favourable
- 8 treatment accorded to Canadian investors on the
- 9 other hand.
- 10 And then we get to the burden.
- 11 So I am now going to turn to a
- 12 few other --
- DEAN CASS: Mr. Valasek,
- 14 before you turn to something else, let me just ask
- 15 a few very small questions.
- 16 First, you noted the testimony
- 17 of Mr. Montgomerie when he said that Resolute was
- 18 invited to bid and had it bid and asked for
- 19 assistance, Canada would have, or the province of
- 20 Nova Scotia, would have considered it.
- 21 Does it matter to your case
- 22 that that was not a blanket statement that
- 23 Resolute would have received the same support that
- 24 PWCC did? Or is that simply something that is not
- 25 relevant to the argument you're making?

- 1 MR. VALASEK: Dean Cass, are
- 2 you referring specifically to that Mr. Montgomerie
- 3 should have made a broader statement in his
- 4 testimony?
- 5 DEAN CASS: His testimony
- 6 wasn't that the same support would have been
- 7 available regardless of the bidder in order to get
- 8 the mill restarted. It was that it was something
- 9 that would have been considered. I believe those
- 10 were his words.
- 11 MR. VALASEK: Right, I do
- 12 think that's relevant and I think it is consistent
- 13 with my earlier explanation for the circumstances
- 14 under which Resolute considered the bid.
- I mean, there was, there was
- 16 no indication to Resolute what level of support
- 17 would ultimately be given to PWCC. And as I also
- 18 suggested, if it had been evident to Resolute what
- 19 that level of support would have been, it would
- 20 have been -- it would have in some ways put
- 21 Resolute into the position of having to decide
- 22 whether it would inflict harm on itself.
- 23 DEAN CASS: A second question
- 24 on this.
- 25 In looking at the nationality

- 1 component here, I understand that the position is
- 2 that intent to harm the investment or investor of
- 3 the other nation is not required and I believe
- 4 Canada has agreed to that.
- 5 But does it matter in
- 6 assessing the 1102 case that the largest player in
- 7 the market, the largest competing firm was a
- 8 US-owned and not Canadian owned? That the other
- 9 Canadian firms in the market were not as large as
- 10 Resolute in terms of SC paper production?
- 11 MR. VALASEK: I think it is
- 12 relevant because -- and here, we would have to go
- 13 into restricted access.
- 14 --- Whereupon Restricted Transcript Commences
- MS. D'AMOUR: Sorry, just
- 16 confirming we are in restricted access. Thanks.
- 17 MR. VALASEK: Okay.
- 18 So, Dean Cass, I have to make
- 19 a distinction whether it's relevant -- whether we
- 20 say it's part of the standard whether it would be
- 21 necessary for an 1102(3) claim for the US investor
- 22 to be the largest player in the market. We are
- 23 not saying that that's a necessary component.
- 24 We think that the -- as I
- 25 described elsewhere, I believe I described it

- 1 yesterday, certainly at the 2020 hearing, we say
- 2 that the threshold for treatment is a policy
- 3 adopted by the province favouring its own
- 4 investor, so that's where the, you know, the key
- 5 intent is to favour its own investor that has,
- 6 that can only be achieved with a foreseeable
- 7 impact on the foreign investor.
- 8 So it doesn't matter what the
- 9 size of that foreign investor is. The threshold
- 10 is simply that it is a foreign investor.
- 11 But I think in considering the
- 12 evidence in this case, because that's what's
- 13 relevant whether we have met that standard,

1

5	DEAN CASS: Just, if I may,
6	one more question on the legal standard here.
7	In the Claimant's view, is
8	1102, Article 1102 an additional prohibition on
9	action on NAFTA parties in addition to 1101 and
10	1102 or is $1102(1)$ and (2) , or is $1102(3)$ a
11	substitute with respect to the actions of certain
12	components of the state, a substitute for what
13	would normally apply?
14	So, in other words, if you
15	didn't have 1102(3) and Nova Scotia gave a package
16	of benefits to Port Hawkesbury, PWCC, and no other
17	province was given similar benefits I know you
18	are not doing a cross-province comparison here.
19	But in the absence of 1102(3), would that be a
20	basis for a finding of a violation of the national
21	treatment obligation? The fact that you have one
22	component of the state giving out benefits that
23	are greater than are received by anyone else
24	anywhere in Canada?
25	MR. VALASEK: So the question

- 1 is still in relation to a provincial measure?
- DEAN CASS: Yes, a provincial
- 3 measure if there were no 1102(3). Would that be
- 4 attributed to Canada and would that on its own be
- 5 a basis for a finding of a national treatment
- 6 violation if --
- 7 MR. VALASEK: Thankfully we
- 8 don't have -- I mean we do have a specific
- 9 provision in the treaty that addresses this so I
- 10 find it is an interesting hypothetical, what if
- 11 the treaty had been written differently. We would
- 12 be in a different -- you know, we would be arguing
- 13 under a different set of legal realities.
- 14 But I do think -- my position,
- our position is that Article 1102(3) simply
- 16 clarifies for purposes of provincial measures what
- is also the case under Article 1102(1) and (2). I
- 18 don't believe that even for a Canadian measure,
- 19 for the prima facie, for a prima facie case of
- 20 discrimination, even under Article 1102(1) and
- 21 (2), I don't think the foreign investor has to
- 22 demonstrate that no other Canadian investors are
- 23 similarly impacted.
- 24 That's a question for the
- 25 justification stage.

- 1 But I think for the prima
- 2 facie case, 1102(3) simply makes it clear with
- 3 respect to provincial measures that that is the
- 4 case.
- 5 DEAN CASS: Okay, thank you.
- 6 MR. VALASEK: So I will now
- 7 turn to a few of the more detailed questions,
- 8 Professor Hanotiau. For example, the like
- 9 circumstances questions.
- 10 So, Dean Cass, you had asked
- 11 your Question 1 was on like circumstances.
- 12 You said in the like product
- 13 discussion, one of the things that the Claimant
- 14 says is that the government measures were intended
- 15 to have a direct impact on the price of
- 16 supercalendered paper -- oh, by the way, are we
- 17 now in or out of restricted access?
- 18 MS. D'AMOUR: We are in
- 19 restricted access right now.

- 20 MR. VALASEK: Okay, I think we
- 21 can come out of restricted access.
- 22 --- Whereupon Restricted Transcript Ends
- 23 MS. D'AMOUR: Okay, confirming
- 24 that we have moved back to public access.
- MR. VALASEK: Dean Cass, you

- 1 asked in the like product discussion, one of the
- 2 things that the Claimant says is that the
- 3 government measures were intended to have a direct
- 4 impact on the price of supercalendered paper, and
- 5 I was wondering whether the Claimant was thinking
- 6 that that was a necessary claim or something that
- 7 it was just an observation.
- 8 This is the phase that we use
- 9 to summarize an observation relevant to
- 10 considering two factors in the like circumstances
- 11 test: Product factor and policy factor.
- 12 So that was at Slide 58 of our
- 13 opening presentation.
- 14 And, as such, that was an
- 15 observation which feeds into our conclusion that
- 16 Resolute and PWCC and their respective mills
- 17 producing supercalendered paper are in like
- 18 circumstances. It's not a necessary claim.
- 19 We also made other
- 20 observations regarding the product factor and
- 21 policy factor as set out on Slide 58.
- Maybe, Ricky, you can pull
- 23 that up.
- 24 And these observations lead to
- 25 the same conclusion. So, for example, Resolute

1	and PWCC's investment concern the same product and
2	that the measures were adopted expressly in a
3	connection with a policy meant to effect
4	competition.
5	So, in the CPI case, the
6	Tribunal wrote:
7	"Where the products at
8	issue are interchangeable
9	and indistinguishable
10	from the point of view of
11	the end users, the
12	products and therefore
13	the respective
14	investments are in like
15	circumstances."[as read]
16	And if you go to the yeah.
17	And then also in the CPI case, the Corn Products
18	International case, the Tribunal wrote that:
19	"It cannot escape the
20	conclusion that the
21	producers of like
22	products, which were
23	directly competitive,
24	were in like
25	circumstances as regards

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

1	a measure designed
2	expressly for the purpose
3	of affecting that
4	competition."[as read]
5	And now here, I'd have to go
б	back into restricted access, please, Heather.
7	Whereupon Restricted Transcript Commences
8	MS. D'AMOUR: Thanks.
9	Confirming we are in restricted access.
10	I think, Mr. Valasek, I think
11	you actually may have froze.
12	PRESIDENT HANOTIAU: Yes, it
13	seems that Mr. Valasek is frozen.
14	MS. D'AMOUR: He mentioned
15	earlier he was having internet issues so let's see
16	if he reconnects. We will just give him a second.
17	DEAN CASS: I thought being
18	frozen was acceptable in Canada.
19	MS. D'AMOUR: Okay, it looks
20	like he dropped off the call so I will just give
21	him a minute to reconnect.
22	PRESIDENT HANOTIAU: Yes, yes.
23	Brief pause taken.
24	PRESIDENT HANOTIAU:
25	Mr. Snarr, if Mr. Valasek cannot reconnect, maybe

- 1 you could make your submission now and then we
- 2 will come back to Mr. Valasek. We still need to
- 3 have Mr. Valasek I suppose. Yeah.
- 4 MS. D'AMOUR: He is rejoining
- 5 right now so let's see if he is able to get in.
- 6 PRESIDENT HANOTIAU: Very
- 7 good. Thank you.
- 8 We lost you.
- 9 MR. VALASEK: Maybe I was put
- 10 into restricted access. But, okay.
- 11 So are we now in restricted
- 12 access?
- MS. D'AMOUR: Yes, confirming
- 14 we are in restricted access.
- MR. VALASEK: Just to complete
- 16 my response to you, Dean Cass,

- So we can look at Slide 59,
- 21 Ricky.
- 22

- 1 So once the decision was made
- 2 to restart Port Hawkesbury,
- 5 So that was an observation
- 6 that we made but it's not a necessary claim
- 7 because we have other grounds on which to make out
- 8 the like circumstances test. So that's what I
- 9 would -- that's how I would respond.
- Now, Professor Hanotiau, you
- 11 asked a few questions relating to the
- 12 jurisdictional factor and, in short, the
- 13 jurisdictional factor is one of the factors in
- 14 considering treatment in like circumstances, and
- 15 we accept that Merrill & Ring is an important case
- 16 that found that where a Claimant was complaining
- 17 about a regulatory regime that applied across all
- 18 federal lands of which -- in which it was, that it
- 19 could not complain about a separate regulatory
- 20 regime that applied to other investors that only
- 21 were subject to the provincial regime.
- 22 So we would say that the
- 23 jurisdictional factor is important. If you, as an
- 24 investor, are in an environment where there is
- 25 legislation that applies across the jurisdiction

1 you actually are in and it's of general

- 2 application and it's discriminatory, then
- 3 certainly you have to be in that jurisdiction
- 4 because that's where the legislation or the
- 5 regulation applies.
- 6 But where you have targeted
- 7 measures, and I have shown you that slide before
- 8 which shows that all of those measures, even
- 9 including kind of regulatory measures in this case
- 10 that were adopted only for purposes of benefitting
- 11 Port Hawkesbury, then the jurisdictional analysis
- 12 is different in the like circumstances test
- 13 because what you are -- what you have to consider
- 14 is what the crux of the complaint is.
- The crux of the complaint
- 16 isn't that within Nova Scotia, the overall
- 17 regulation discriminates between one or another
- 18 thing. The complaint is that the province
- 19 targeted these measures towards one investor, and
- 20 if the policy was driven by an intention to make
- 21 that one investor competitive in a national market
- or, indeed, a North American market, the intended
- 23 effect, and the necessary intended effect was
- 24 extra-provincial.
- 25 And so it's appropriate from a

- 1 jurisdictional analysis not to limit the scope of
- 2 potential Claimants to investors in that province.
- 3 That just wouldn't make sense. And that's a
- 4 contextual analysis.
- 5 You know, and so Canada says
- 6 Merrill & Ring bars this claim. It doesn't. Just
- 7 like they tried to argue at the jurisdictional
- 8 phase that the fact that we weren't in the
- 9 province meant necessarily that any measure of
- 10 Nova Scotia does not relate to Resolute. The
- 11 Tribunal rejected that. It's the same argument.
- 12 It's a jurisdictional argument but it doesn't do
- 13 the job.
- 14 PRESIDENT HANOTIAU: And what
- 15 about the fact that some measures could not have
- 16 been granted to Claimants like, you know, for
- 17 example, the forest utilization license and the
- 18 outreach agreements?
- MR. VALASEK: Yes.
- 20 PRESIDENT HANOTIAU: Because
- 21 it seems it was not in Nova Scotia.
- Does it affect the analysis of
- 23 like circumstances?
- 24 MR. VALASEK: It doesn't, no.
- 25 I have my answer here. Well, the answer is, no.

- 1 Because the nature of Resolute's complaint isn't
- 2 that those benefits should be extended to it in
- 3 Quebec, I think I found -- that's right, I have my
- 4 notes here.
- 5 That argument, in our view,
- 6 you asked us to address whether the measures like
- 7 FULA could not be granted to Claimant and you also
- 8 said that the fact, whether Nova Scotia Power
- 9 could not grant favourable electricity rates, for
- 10 example, in Quebec, whether that's relevant.
- 11 And I would say that that
- 12 argument that Respondent raises misapprehends the
- 13 nature of Resolute's complaint.
- 14 Resolute is complaining about
- 15 measures that had a necessary and foreseeable
- 16 adverse impact on its mills in Quebec, just like
- 17 the high fructose corn syrup producers complained
- 18 about a tax on bottlers that had a necessary
- 19 adverse impact on their business and we say it is
- 20 misguided to consider that Article 1102 would
- 21 require such measures to be extended to the
- 22 complaining investor.
- 23 Rather, what Article 1102
- 24 requires is that such anticompetitive measures not
- 25 be adopted in the first place.

1 That's the answer to that

- 2 point.
- Now, this connects, I think,
- 4 to Dean Cass's question for Respondent, so we, I
- 5 think we will let Respondent deal with it. But I
- 6 recognize I think there is a question that Dean
- 7 Cass asked relating to the quantum of support
- 8 given and the measures and essentially whether
- 9 there is some range of measures that would be
- 10 acceptable or not, and so I am not going to get
- into that until maybe after I have heard Canada's
- 12 response.
- I think I have three quick
- 14 questions to answer and then I will hand it over
- 15 to our colleague, Mr. Snarr, to just address some
- 16 of the subsidy points.
- 17 So just quickly, Professor
- 18 Hanotiau, you also asked about the inconsistent
- 19 declarations. Professor, you said whether the
- 20 prior statements of Respondent before the WTO can
- 21 bind the Tribunal or whether the better view isn't
- 22 that the Tribunal needs to determine for itself
- 23 whether a specific advantage is a subsidy or
- 24 procurement.
- We are invoking accepted

- 1 doctrines of international law that sanction
- 2 inconsistent conduct and statements based on the
- 3 principle of good faith. These doctrines focus on
- 4 the impropriety of the inconsistent conduct of the
- 5 party and the Tribunal's discretionary power to do
- 6 something about it rather than on whether one or
- 7 the other of the inconsistent positions is
- 8 correct.
- 9 So it's a focus at a
- 10 preliminary stage on the conduct itself, not on
- 11 which position is correct. It's essentially an
- 12 evidentiary rule that the government should be
- 13 prevented from making a case in respect of its
- 14 current position when it made a different case
- 15 earlier under, you know, granted, under limited
- 16 circumstances as set out in, for example, the
- 17 Chevron case where it's clear that the party with
- 18 the inconsistent positions had something to gain
- 19 and that the other party has something to lose in
- 20 that comparison.
- 21 And in a similar vein here,
- 22 Mr. Luz argues that the Tribunal should not accept
- 23 Claimant's argument regarding inconsistent
- 24 statements because, first, the Tribunal, he says,
- 25 has no jurisdiction under the agreement under

(416) 861-8720

- 1 subsidies and countervailing measures; two, there
- 2 is no express NAFTA requirement of notification of
- 3 subsidies; and, three, a notification under the
- 4 agreement on subsidies and countervailing measures
- 5 does not prejudge the characterization of the
- 6 measure.
- 7 Well, Mr. Luz does not address
- 8 Canada's inconsistent statements and conduct. He
- 9 just focuses on the measures. That's not what we
- 10 are asking the Tribunal to do. We are not asking
- 11 the Tribunal to rule on what the proper position
- 12 was under the WTO. That's not the point.
- The point is that it's clear
- 14 that they took inconsistent positions there and
- 15 here and that that should not be permitted.
- 16 PRESIDENT HANOTIAU: Okay but,
- in other words, let's suppose that we say, well,
- 18 this is a subsidy. It is absolutely clear that
- 19 this is a subsidy. What should we do? Because
- 20 they said that we did not give a subsidy, we
- 21 should not accept the position that it is a
- 22 subsidy?
- MR. VALASEK: That's open to
- 24 you, yes. If you look at the -- Professor
- 25 Hanotiau, if you look at the Chevron and Ecuador

- 1 case, Ecuador is arguing that the Claimant did not
- 2 have an investment, and the Tribunal did not get
- 3 into the question of whether there was or wasn't
- 4 an investment. Clearly that's the Tribunal's
- 5 jurisdiction to do that.
- They said we will not allow
- 7 Ecuador to argue that there wasn't an investment
- 8 because its own courts had ruled that there was
- 9 and, therefore, they are barred from making a
- 10 different argument here because, in that case, it
- 11 was actually even a different branch of
- 12 government. Here we are not even dealing with two
- 13 different branches and the independence of the
- 14 judiciary. Here it's even a clearer case.
- But that is what we are
- 16 saying, that that doctrine is very powerful. As
- it should be, because good faith is important.
- Now, my final, my final point
- 19 addresses Professor Lévesque's question. What
- 20 happens to our Article 1102 claim if only one or
- 21 two measures remain after a carveout analysis.
- 22 I think, Professor Lévesque,
- 23 you know our main argument, of course, is that we
- 24 are dealing with an ensemble and that you should
- 25 not go piece by piece. That's our primary

- 1 argument.
- We have our argument which is
- 3 that, in any event, Article 1108(7) is precluded
- 4 because of the inconsistent statements.
- 5 But even if the Tribunal
- 6 decides to apply Article 1108 on a measure by
- 7 measure basis, some will necessarily survive, in
- 8 our submission. For example, the measures adopted
- 9 to ensure that the electricity package could be
- 10 implemented, my colleague Mr. Feldman made a
- 11 number of points in that respect. And the record
- 12 shows that each measure was essential for the
- 13 restart of Port Hawkesbury.
- 14 The record is clear. That
- 15 PWCC was going to walk away unless it got
- 16 everything it wanted. And, therefore, we say the
- 17 Article 1102 analysis precedes even with the
- 18 remaining measures and it is essentially
- 19 unaffected by it because our definition of
- 20 treatment is the adoption of a policy by the
- 21 government to favour its own investor in a way
- 22 that can only be achieved with a foreseeable
- 23 negative impact on the foreign investor. And we
- 24 say that even with one or two remaining measures,
- 25 the policy is still a fact.

PCA Case No. 2016-13
RESTRICTED ACCESS
RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA
October 19, 2021

- 1 The measure reflects a policy
- 2 that is established by the record. And even if
- 3 only one of the measures survives for analysis
- 4 under 1102, the analysis must proceed and we
- 5 submit it's undisturbed and one that gets into
- 6 like circumstances and the less favourable
- 7 treatment is also in place.
- 8 And then a final point.
- 9 Mr. Luz said that we haven't
- 10 established less favourable treatment. We have.
- 11 For purposes of the analysis, the treatment is the
- 12 favouring of the local investor in a way that is
- 13 improper and is in a way that is -- lavishes these
- 14 benefits on Port Hawkesbury and, by definition, it
- is something that is not available to Resolute,
- 16 and that's the very crux of the matter. That's
- 17 the anticompetitive nature which is that the
- 18 government decided to go so far in making one
- 19 participant in a North American market the
- 20 beneficiary of its largesse.
- 21 And that is deferential
- 22 treatment. If you accept that there is treatment,
- 23 then you have to accept that it's deferential and
- 24 that the, and that Resolute hasn't been accorded
- 25 treatment that is as favourable as that most

- 1 favourable treatment.
- 2 And I will conclude there.
- PRESIDENT HANOTIAU: Okay.
- 4 MR. VALASEK: I believe my
- 5 colleague Mr. Snarr has a few comments to make as
- 6 well.
- 7 SUBMISSIONS BY MR. SNARR:
- 8 MR. SNARR: Thank you, members
- 9 of the Tribunal. I expect I probably just need
- 10 about ten minutes of time if that works.
- 11 PRESIDENT HANOTIAU: Yes, then
- 12 we will have a break, yes.
- MR. SNARR: Okay, very good.
- 14 One thing I wanted to address
- 15 at the beginning, just a correction.
- 16 Mr. Feldman had mentioned the
- 17 settlement where PHP joined Irving in a cash
- 18 settlement to address the US countervailing duty
- 19 investigation and the amount of the settlement was
- 20 \$42 million. I think there was a reference to a
- 21 slightly higher number, but just to correct that.
- 22 And that document is at C-242 if you're interested
- 23 in looking at that.
- 24 Members of the Tribunal, as
- 25 Mr. Valasek had just said, and as you well know,

RESTRICTED ACCESS October 19, 2021

- 1 our view of the measures is that they must be
- 2 looked at as a whole in their context together as
- 3 an ensemble rather than in isolation, and we
- 4 maintain our position that Mr. Valasek has been
- 5 discussing about Article 1108(7), but we wanted to
- 6 be responsive to Professor Lévesque's questions
- 7 about the definitions of procurement and subsidies
- 8 and how those might be applied if you were to look
- 9 at them on a measure by measure basis.
- 10 Our pre-hearing memorial at
- 11 paragraph 70 to 72 set out the definitions for
- 12 procurement and for subsidies. We mentioned
- 13 procurement is the action of obtaining or
- 14 procuring something and I think Professor Lévesque
- 15 found that definition, while brief, consistent
- 16 with what the other cases have said when looking
- 17 at the definition of procurement.
- 18 We also address the definition
- 19 of a subsidy as a sum of money granted by the
- 20 government or a public body to assist an industry
- 21 or business so that the price of a commodity or
- 22 service may remain low or competitive.
- 23 And then we turn to the
- 24 discussion in the UPS case and Dean Cass's
- observation about the meaning of a subsidy.

- 1 And I would just highlight the
- 2 statement that the article, Article 1108(7)(b),
- 3 while discussing subsidies, there should be a
- 4 caution about construing it too broadly, that it
- 5 appears intended more narrowly to reach only
- 6 self-conscious and overt decisions by government
- 7 to expressly convey cash and benefits to a
- 8 particular business, enterprise or activity.
- 9 And that that ought to be
- 10 viewed in the context, as well, of the WTO
- 11 disciplines. And we highlighted the WTO subsidies
- 12 and countervailing measures agreement and referred
- 13 to the definitions of a financial contribution or
- 14 income or price support.
- 15 So with those definitions in
- 16 mind, turning back to the text of Article 1108(7),
- 17 subsection (a), says that procurement by a party
- 18 or a state enterprise is not applied to
- 19 Article 1102, and subsection (b) says subsidies or
- 20 grants provided by a party or a state enterprise,
- 21 including government-supported loans, guarantees
- 22 and insurance.

- 23 And Professor Lévesque, I
- 24 understood your question yesterday to be how are
- 25 the words "loans, guarantees, insurance" to be

- 1 interpreted vis-à-vis the word "subsidies", and I
- 2 would submit that they are subsumed within that
- 3 definition so that we are describing subsidies at
- 4 the beginning and then the things that follow are
- 5 included and come within that umbrella of
- 6 subsidies.
- 7 So, and but viewed in the
- 8 context of Dean Cass's statement that we are
- 9 talking about cash payments, a sum of money,
- 10 thinking about it in the context of the WTO
- 11 subsidies and countervailing measures agreement,
- 12 that there should be a financial contribution
- 13 here, because otherwise, there are a lot of
- 14 inventive ways that you can think of some kind of
- 15 assistance that might arise indirectly from any
- 16 type of government transaction.
- 17 Now, one thing that I'd like
- 18 to add to the definition of procurement.
- 19 We see in NAFTA Article
- 20 1001(5) that there is an explanation of
- 21 procurement for the Chapter 10 provisions that
- 22 deal with procurement.

- 23 And I will read subsection 5
- 24 and then give some thoughts about it. It says:
- 25 "The procurement includes

1	procurement by such
2	methods as purchase,
3	lease or rental with or
4	without an option to buy.
5	Procurement does not
6	include"[as read]
7	And then subsection (a) says:
8	" non-contractual
9	agreements where any form
10	of government assistance,
11	including cooperative
12	agreements, grants,
13	loans, equity infusions,
14	guarantees, fiscal
15	incentives, and
16	government provision of
17	goods and services to
18	persons."[as read]
19	And so on.
20	So if you were to look to that
21	provision as a guide for interpreting a
22	distinction between procurement and subsidies
23	here, the conclusion that you might draw from that
24	is that any transaction with a subsidy element to
25	it, a financial contribution from the government

- 1 providing assistance to the recipient, couldn't be
- 2 considered procurement. That exception in the
- 3 language in 1001(5) says that if it looks like a
- 4 subsidy, it would not be considered procurement
- 5 here.
- Now, MESA Power is one of the
- 7 cases that Professor Lévesque mentioned, and it
- 8 cautions against, I think, incorporating
- 9 provisions of another chapter of NAFTA into
- 10 Chapter 11. But I will note that the Canfor
- 11 versus United States case, which is available to
- 12 you at RL-007, used a provision of Chapter 19 of
- 13 NAFTA which concerns anti-dumping and
- 14 countervailing duties and disputes settlement of
- 15 determinations of those measures to exclude
- 16 measures that had been challenged in a NAFTA
- 17 Chapter 11 arbitration.

- 18 So this is in the days of
- 19 lumber for when softwood lumber producers had
- 20 challenged the United States's antidumping and
- 21 countervailing duty measures. And the Tribunal in
- 22 that case did look outside of Chapter 11 to
- 23 Chapter 19, and import a provision at 1901(3) to
- 24 say that antidumping and countervailing duty
- 25 measures when they're the subject of a NAFTA

1 Chapter 11 challenge have to be excluded from that

- 2 Chapter 11 challenge.
- I will note also that Article
- 4 1112(1) in Chapter 11 says that in the event of
- 5 any inconsistency between Chapter 11 and any other
- 6 chapter, the other chapter will prevail to the
- 7 extent of the inconsistency.
- 8 So where there's a
- 9 transaction, and we have really only one example
- in the list that I am planning go through with
- 11 you. But where you have an example where,
- 12 arguably, there's a government agreement to
- 13 purchase something but that also serves as a form
- 14 of government assistance, you, as a Tribunal,
- 15 looking at this question, unless you view them as
- 16 an ensemble, as we have suggested you should,
- 17 would have to decide how you would distinguish
- 18 whether that measure would be a procurement
- 19 measure under 1108(7)(a) or a subsidy measure
- 20 under 1108(7)(b), particularly here in the context
- 21 of our arguments about Canada not having the right
- 22 to claim 1108(7)(b) because of their statements to
- 23 the WTO.
- 24 And even if you were to look
- 25 at MESA Power and say, well, but I am still not

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 sure that I want to import this other provision or
- 2 if I don't think that there is necessarily an
- 3 inconsistency that 1112(1) tells me I have to go
- 4 look at the provision in Chapter 1001(5), you
- 5 still, at the end of the day, have to make the
- 6 determination of whether something that is a
- 7 measure that has elements, perhaps, of both being
- 8 a government purchase as well as a measure that is
- 9 providing assistance, which of those should apply.
- 10 So I now -- we may be in
- 11 restricted access already but if we're not, I
- 12 would ask that we go into restricted access so
- 13 that I can speak about the measures. There are a
- 14 few items of them that, Professor Lévesque, you
- 15 had asked for a little bit of explanation about
- 16 them and I just want to be sure that I'm not
- 17 discussing them in a public session.
- MS. D'AMOUR: We are currently
- 19 in restricted access.
- MR. SNARR: Thank you.
- 21 As we understood Professor
- 22 Lévesque's question, she has asked us to choose
- 23 whether each of the Nova Scotia measures
- 24 essentially would be identified as a subsidy or
- 25 procurement or neither with respect to 1108(7),

- 1 and so I will go through the list.
- 2 The \$24 million forgivable
- 3 loan, well, that is a loan, it's an interest free
- 4 loan, so that would seem to fit with the
- 5 definitions of subsidy.
- 6 The \$40 million forgivable
- 7 credit facility, the working capital loan, again,
- 8 interest free and that would more likely fit under
- 9 a subsidy.
- 10 With respect to the two
- 11 grants, the \$1.5 million productivity grant and
- 12 the \$1 million marketing grant, as grants and the
- 13 description of grants there falls under subsidies
- 14 as well, that's where they would be.
- The \$38 million outreach
- 16 agreement. Now, Canada has said that that is
- 17 either procurement or a grant. The agreement
- 18 provides that PHP may receive reimbursements

. The

- 23 government is not buying something, there is no
- 24 price for services. The amount -- the way that
- 25 the agreement works is that there's \$3.8 million

- 1 available for these reimbursements over a ten-year
- 2 period.
- 3 So what that agreement is
- 4 doing is it's providing a fiscal incentive of
- 5 reimbursement up to annual limits for PHP as it
- 6 decides to undertake the types of activities that
- 7 would be eligible as costs to be reimbursed within
- 8 the amounts of the annual limits.
- 9 I will note that the
- 10 Department of Commerce found the outreach
- 11 agreement to be a countervailable subsidy and
- 12 Canada did not challenge that finding at the WTO,
- 13 and you can see that in the panel report that they
- 14 have provided at R-238.
- Next is the \$20 million land
- 16 purchase. Now, while this is a transaction of the
- 17 government purchasing land, it's apparent that the
- 18 transaction took place on ______, at
- 19 the time when Nova Scotia and PHP were closing the
- 20 deal that was going to bring PHP back online. So
- 21 they were doing this with the other measures that
- 22 they were then implementing and finalizing at the
- 23 time so that they could go forward and come back
- 24 online and go into business.
- Originally, that purchase was

- 1 announced by Nova Scotia along with other
- 2 incentives in an August announcement and then
- 3 there were some changes to get things finalized
- 4 for signature and closing the deal in September 28
- 5 of 2012.
- 6 So taken in context with the
- 7 other transactions, the land purchase was intended
- 8 to be a form of government assistance that would
- 9 provide PWCC with cash to start up its operations.
- 10 And so per the distinction in
- 11 NAFTA Article 1001(5), and perhaps also Article
- 12 1112(1), that should be considered a subsidy
- 13 because 1001(5), if you were to look to that for
- 14 guidance, this would be financial assistance and
- 15 that would tip the balance for it to be a subsidy
- 16 rather than treated as procurement.
- 17 One other note on procurement.
- 18 You know, a foreign party to a procurement award
- 19 who might have a grievance about it would
- 20 challenge that award through a bid protest
- 21 normally. And Article 1017 sets out fair
- 22 procedures for a bid challenge when someone claims
- 23 that they unfairly have been denied a procurement
- 24 award.

25 And that's not the nature of

- 1 our claim in this case. And that's not, the
- 2 transaction here is not the type of transaction
- 3 that reflects a procurement measure, and as we're
- 4 not complaining about that anyway, that's not the
- 5 way that the measure should be viewed.
- The electricity rate and the
- 7 accompanying biomass plant must run regulations
- 8 and the renewable energy regulatory protection, I
- 9 believe that it's undisputed by the parties that
- 10 those items are neither procurement nor subsidies.
- 11 Certainly that's our position.
- We have discussed the
- 13 harvesting of the \$1 billion in tax losses. Well,
- 14 that's not procurement. And we would say that
- 15 that tax incentive could be considered as a
- 16 subsidy providing a financial contribution. It's
- 17 a financial benefit being provided by the
- 18 government.
- 19 And particularly is the way
- 20 that it was restructured at the last minute
- 21 because PHP had been disappointed about not
- 22 getting the tax ruling from federal Canada the way
- that it wanted to, and so there were changes to
- 24 allow them to apply those tax losses that were for
- 25 the mill and carried over previously.

pension
7

- 2 relief. We consider that neither procurement nor
- 3 a subsidy. There is no provision of money with
- 4 respect to the handling of the pensions.
- 5 The forestry utilization
- 6 license, Professor Lévesque, you asked for a
- 7 little bit of clarity about what that was. So
- 8 it's a 20-year license for the purchase and
- 9 harvest of timber. That's neither procurement nor
- 10 a subsidy because it's a purchase of goods from
- 11 the government. It's not the government
- 12 purchasing goods from the company.
- On top of the stumpage fees
- 14 that they pay, PHP pays as part of that
- 15 agreement -- and those would be the fees for
- 16 purchasing wood fibre --

- 21 And then as there are -- as
- 22 there's silviculture work being done, then that
- 23 money can be provided back to PHP as
- 24 reimbursements.
- Now, the interesting thing

- 1 about that relationship is if you take a look at
- 2 C-170, a newspaper learned through an access to
- 3 information request that in 2017, PHP received
- 4 \$4.4 million in silviculture reimbursements when
- 5 they had only paid -- thank you, Ricky -- when
- 6 they had only paid in stumpage fees.
- 7 So it's not procurement and
- 8 the transaction, the sale of goods is not a
- 9 subsidy, but it certainly is a -- what happened
- 10 here with, as noticed in the article and as
- 11 revealed through the access of information
- 12 request, demonstrates a very generous beneficial
- 13 agreement for PHP and a reduction of its fibre
- 14 cost which is one of the four cost considerations
- 15 for paper mills.
- 16 So that concludes what I have
- 17 to say about the list of the different measures.
- 18 And we can go out of
- 19 restricted access for one final comment.
- 20 --- Whereupon Restricted Transcript Ends
- 21 MS. D'AMOUR: Confirming we
- 22 are now in public access.

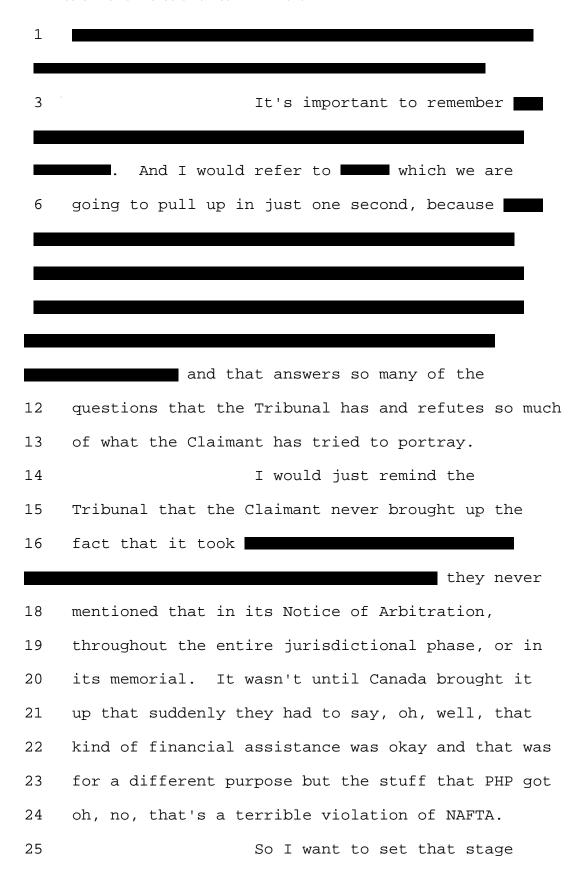

- MR. SNARR: Okay, thank you.
- 24 So the last thing that I would
- 25 like to say is I wouldn't want to leave any

- 1 misimpression with the Tribunal or with our
- 2 friends representing the Government of Canada that
- 3 anything that we have not addressed this morning
- 4 is a waived or conceded argument.
- We have tried, above all, in
- 6 our remarks to be responsive and focussed on the
- 7 interests of the Tribunal and have tried to be
- 8 resourceful that way and wouldn't want any sort of
- 9 misimpression to be left otherwise as we are
- 10 focussing on the Tribunal's questions.
- 11 And that's all that I have for
- 12 the Tribunal at this time.
- 13 PRESIDENT HANOTIAU: Thank you
- 14 very much, sir.
- I suggest that we have a
- 16 15-minute break. Mr. Luz, is that fine with you?
- 17 MR. LUZ: Could I ask for
- 18 20 minutes just to be able to use the facility and
- 19 organize my notes.
- 20 PRESIDENT HANOTIAU: Twenty
- 21 minutes, yes.
- MR. LUZ: Thank you.
- 23 --- Upon recess at 11:23 a.m.
- 24 --- Upon resuming at 11:42 a.m.
- 25 SUBMISSIONS BY MR. LUZ:

PCA Case No. 2016-13
RESTRICTED ACCESS
RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA
October 19, 2021

- 1 MR. LUZ: Professor Hanotiau,
- 2 before I start, can I ask -- I know you said that
- 3 it doesn't matter, but I would like to at least
- 4 know roughly how long the Claimant took so I know
- 5 we have at least that amount.
- 6 PRESIDENT HANOTIAU: No
- 7 problem at all. You take the time that you want.
- 8 MR. LUZ: Okay, thank you. I
- 9 just wanted to make sure. I don't think my
- 10 colleague Mr. Neufeld and I will take as long but
- 11 there's a lot to get through and I want to make
- 12 sure that I respond to as much of what the
- 13 Claimant said as I can as well as dealing with the
- 14 issues that the Tribunal asked us to deal with.
- 15 And I hope, what I plan to do
- 16 is follow the same pattern that I did yesterday
- 17 where I will take the Tribunal through the Bowater
- 18 Mersey situation, the bidding on Port
- 19 Hawkesbury -- or Port Hawkesbury in general, and
- 20 then move on to electricity and then the measures
- 21 as a whole and then deal with the legal issues,
- 22 1108(7) and 1102.
- So I will sort of follow that
- 24 and, within that package or ensemble, I will make
- 25 sure I answer as many of the -- or all the

- 1 Tribunal's questions and then try and refer to
- 2 what some of the Claimants were saying.
- 3 So we will just go into
- 4 restricted access session now and, Heather, you
- 5 can just let me know when we're in.
- 6 --- Whereupon Restricted Transcript Commences
- 7 MS. D'AMOUR: Confirming we
- 8 are in restricted access.
- 9 MR. LUZ: Thank you.
- I want to start off with there
- 11 was a question that came from Professor Hanotiau
- 12 about Bowater Mersey and also relating to Dean
- 13 Cass's question about Port Hawkesbury getting
- 14 everything that it asked for and it seemed like
- 15 there was a discussion today as to comparing
- 16 Bowater Mersey and Port Hawkesbury so I want to be
- 17 able to, you know, give the full picture because
- 18 so much of what the Claimants are talking about is
- 19 slight of hand.
- John, if we could pull up the
- 21 first set of slides.
- The first set of slides, if
- 23 you go to the first slide, Slide 1 -- or 2. Thank
- 24 you.
- 25 This is the

- 1 because the discussion that came up later about
- 2 disregarding 1108(7) based on inconsistent
- 3 statements and whatever other equitable principles
- 4 that the Claimant didn't actually name but seems
- 5 to be appealing to, the Claimant should be held to
- 6 their own standard.

7 Because

Now, it doesn't mean that

So let's go back to the slide,

25 John. Slide Number 2. Thank you.

- 1 So December 1st --
- 2 PRESIDENT HANOTIAU: By the
- 3 way, have we received your slides?
- 4 MR. LUZ: I am not sure you
- 5 have. I apologize if -- I am just checking. I am
- 6 told that they were sent at 11:42.
- 7 PRESIDENT HANOTIAU: Okay, can
- 8 you resend them just to make sure.
- 9 MR. LUZ: Yes, apologies.
- 10 PRESIDENT HANOTIAU: No, no,
- 11 problem. Okay, yeah, thank you. Go ahead.
- 12 MR. LUZ: I will spend some
- 13 time on these slides and of course you will have a
- 14 copy and we will be pulling up exhibits as we go.
- 15

- 21 I also wish -- unfortunately,
- 22 I don't have a slide here for it but I am going to
- 23 pull up

1	
2	And we are looking at page 1
3	right now. I will just ask the Tribunal to just
4	take a little picture, a little snapshot in your
5	minds of
11	Let's skip to page 5.
12	Yeah, and if we could
13	highlight right up at the top,
15	п

11	Let's go back to the slides.
16	Next slide, please.
17	Oh, and, Professor Hanotiau, I
18	have been told that the slides were just sent
19	again so you should have a copy of them as well.

	l
	•
	I

21	Next slide.
22	none silve.

-		
		Next slide.
		And Mr. Feldman brought up a
	point this morning	
	reason access measures	
		Well, I refer the Tribunal to
	Exhibit	
J		
		So Mr. Feldman's accusation
	what I was saying t	this morning is not warranted

1	
9	Next slide, please.
10	And, again,

	Next slide.
	Next slide.
	Oh, and again, this is what
was referring to.	
	Now, of course, the major
difference between	Bowater Mersey and PHP, Port
Hawkesbury, was the	at Bowater Mersey owned more
private land.	

1	Now,	as	${\tt Ms.}$	Towers	testified

- 2 in her witness statements, the FULA that would
- 3 eventually go to Port Hawkesbury was exactly the
- 4 established practices of the province with respect
- 5 to licensing Crown land. So, in other words,

Next, please.

Now, as the Tribunal knows,

12

- and then, suddenly, within the next six months,
- 14 the market collapsed. Mr. Garneau said, well, no
- one's able to predict what the market is going to
- 16 be when you have a declining demand for your
- 17 product.

(613) 564-2727

- So even within six months,
- 19 Resolute itself had

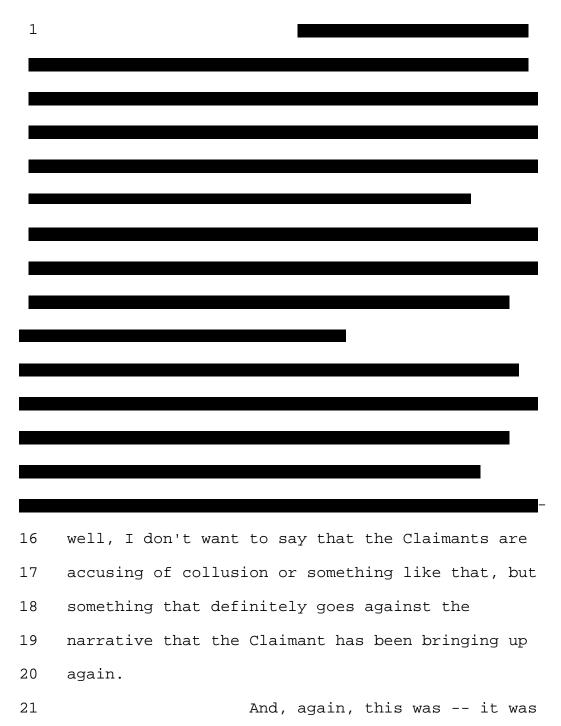

Everyone knew it was going to be

- 23 difficult. That's not contested. Everyone knew.
- 24 But for the Government of Nova
- 25 Scotia, when Resolute said,

1	
	because, as Ms. Chow testified last
3	year, as long as the mill's operating and
4	continuing, the province is getting benefit.
5	So that was the idea.
6	The same circumstances, the
7	same thinking, the same approaches that the
8	government took with respect to Bowater Mersey,
9	you see the same thing happening again in Port
10	Hawkesbury.
11	Next, please.
12	Actually, sorry, if we could
13	go back to the previous slide, I will just leave
14	that one for a second.
15	We are going to come up later
16	when we talk about pensions.

1	Okay, John, we are going to
2	so the Tribunal has seen
6	And you saw
9	John, if we could pull up
10	Exhibit Exhibit
11	This is something that
12	Mr. Montgomerie testified in paragraph 25 of his
13	first witness statement. I am going to just
14	paraphrase what he says.
15	
25	And, again,

1		
		, and maybe you can zoom in a
3	little bit.	
4		
		you could scroll down a little
8	bit.	
9		
1.4		
14 15		But the point is you can see
16		John, if you could just scroll
17	down to page 2.	John, II you could just scroll
18	down to page 2.	Yeah. "
10		reali.
20		So this, again,
		so enis, again,

- Bowater Mersey and Port Hawkesbury happening at the same time and the province was approaching
- them both the same way.
- 25 And I look -- I would suggest

1

that the Tribunal look at paragraph 25 of 2 Mr. Montgomerie's statement. 3 9 You can put that down, John. 10 I will just speak to the Tribunal directly. 11 So Dean Cass asked yesterday 12 about giving PHP everything it wanted referring to 13 the Claimant's theory because that's certainly not 14 what Canada's view of what it is. 15 You can see in

1

3 But the idea that PHP got

4 everything it wanted is just simply not true.

•

9 Now, again, there could have

10 been -- there's justifiable differences and,

11 again, we are not trying to recreate the

12 negotiations and we are not trying to say -- and I

13 have to remind the Tribunal, that Bowater Mersey's

14 not part of the Claimant's in like circumstances

15 claim. They never -- they hid the fact that

16 Bowater Mersey ever got financial assistance so

17 they are not complaining about it as a NAFTA

18 breach. So the differences of what they got and

19 how they got it and so on, that's not the point.

Nor is the point for the

21 Tribunal to be deciding -- and this is something I

22 will come up with later. It's not the point for

23 the Tribunal to decide whether or not it was

24 appropriate that PHP got this and Bowater Mersey

25 got this. There are differences. Bowater Mersey

- 1 was an old mill, PHP had potential, it was in a
- 2 more rural area, PHP had the possibility with new
- 3 machinery, brand new, brand new supercalendered
- 4 paper machine to survive, whereas the old
- 5 newsprint machine had been there in Bowater Mersey
- 6 for decades.
- 7 It's not for the Tribunal to
- 8 replace its judgment as to what would be more
- 9 appropriate, more or less.
- 10 Was the financial assistance
- 11 done in bad faith or was it manifestly arbitrary?
- 12 Well, if the answer to that is no, well, then,
- 13 both 1105 and 1102 claims fail. Obviously there
- 14 was a rational connection and a justifiable and a
- 15 reasonable connection to everything that the
- 16 government was doing. And there is a reason why
- 17 the Claimant did not want to talk about Bowater
- 18 Mersey throughout its NOA, the jurisdictional
- 19 stage, or in its counter-memorial, is because it
- 20 doesn't fit their narrative.
- 21 So let's go on -- I just want
- 22 to make sure I covered everything. Okay.
- 23 Let's move on to the next
- 24 slide, John.
- MR. MORALES: I want to

RESTRICTED ACCESS RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA October 19, 2021

1 confirm we still are in restricted.

- 2. MR. LUZ: Yes, we are in
- 3 restricted.

PCA Case No. 2016-13

- 4 MS. D'AMOUR: Yeah, confirming
- we are in restricted. 5
- 6 MR. LUZ:
 - It wasn't in the Government of Nova
- 10 Scotia's control as to who was bidding and who was
- 11 not bidding.
- 12 I also find a lot of
- 13 suppositions and assumptions from the Claimant as
- 14 to what actually happened during the bidding
- 15 process because the monitor reports, those were --
- 16 that's Ernst & Young that had been preparing them
- and they don't have the kinds of details that the 17
- 18 Claimant was suggesting. Again, it doesn't fit
- their narrative, but the fact is there were 19
- bidders for the mill, some of them wanted to use 20
- 21 it for scrap, but it ended up being PWCC that
- 22 wanted to operate it.
- 23 And what did they want to
- 24 operate it as? Now, you've heard from the
- 25 Claimant that time and time again, the entire case

1	seems to fall on a low-cost producer versus the
2	low-cost producer.
3	Well, I wanted to put up
	as
5	was mentioned yesterday from the Claimant,
6	
8	
	that really kind of
11	encapsulates and cuts through sort of the labels
12	and tag lines and so on, because, as Canada's said
13	all along, labels are not a substitution for real
14	analysis. You have to look at it.
15	

(416) 861-8720

1	
	1

1	
	[as read]
18	So if the entirety of the
19	Claimant's case falls on turns on "A" versus
20	"the" low-cost producer, speaks for itself.
21	
25	
25	We can see that again in one

3

- 1 of the submissions to the UARB.
- Next slide, John.

3

- 7 Let's move on. Since we are
- 8 on the topic of electricity, let's move on to
- 9 that, because it also goes to the question of --
- 10 Actually, sorry, John, you can
- 11 pull up that slide and go to Slide 12.
- 12 Because Mr. Feldman brought up
- 13 the idea that if PWCC would not buy the mill if it
- 14 didn't get everything that it wanted and the
- 15 electricity rate.
- 16 And, Dean Cass, you also asked
- 17 about, you know, whether the, you know, did PWCC
- 18 get everything it asked for.
- 19 Well, the fact is it didn't
- 20 get everything it asked for and, in fact, the most
- 21 important thing that it did not get, what it
- 22 thought it could do to get its electricity rates
- 23 down to hour was the electricity
- 24 rate that it started with.

1	And that was noted when after
2	the advanced tax ruling was turned down by the
3	Canada Revenue Agency, and it says here and
4	this is a public document from the filings at the
5	UARB, where it said:
6	"In response to IRs from
7	various parties"[as
8	read]
9	IRs, I think, is inquiries
10	it's an adversarial process so others can demand
11	this kind of information:
12	" PWCC filed
13	confidential financial
14	information updated to
15	reflect the projections
16	for profitability of the
17	mill, recognizing the
18	loss of the ATR. It
19	projects the mill to be
20	considerably less
21	profitable without the
22	ATR than it would have
23	been had the ATR been
24	granted."[as read]
25	So, again, they didn't get

- 1 everything they wanted and it was going to be a
- 2 lot less profitable than what they had originally
- 3 dreamed of to be the lowest-cost producer, if that
- 4 was ever really meaningful, which Canada says, has
- 5 always said and as

- 9 I just respond to something
- 10 with respect to electricity that I believe it was
- 11 Mr. Valasek, it might have been someone else that
- 12 brought up this morning about the consultant that
- 13 was hired by the Government of Nova Scotia to
- 14 advocate for them.
- 15 You will recall the testimony
- 16 from Mr. Williams that said I did not advocate for
- 17 either side. I was there as an honest broker.
- 18 Mr. Coolican testified last
- 19 year that the reason why there was no need for the
- 20 Government of Nova Scotia to provide a consultant,
- 21 Resolute never asked for one, and what they were
- 22 asking for, Bowater Mersey, I should say, was
- 23 fairly straightforward is it was a fixed
- 24 electricity rate.
- What PWCC came up with and,

- 1 again, this is all in our pleadings, it's
- 2 complicated but it was a completely different
- 3 formula, completely different, never done before
- 4 in Nova Scotia.
- 5 So that was the impetus for
- 6 having Mr. Williams sit in on the negotiations and
- 7 try and act as a translator between really two
- 8 different languages. Someone coming from outside
- 9 the province speaking to a provincial electricity
- 10 provider.
- I just want to re-emphasize
- 12 the -- well, we will get to the electricity part
- 13 as well.
- Okay. I am just going to go
- 15 to the pension liability question, for which we
- 16 don't have any slides. But I will just clarify
- 17 this because the Claimant had always said that --
- 18 or it had said last year or in its pleadings, I am
- 19 not really sure what they are saying now, quite
- 20 frankly, but what Canada has always explained is
- 21 that Premier Dexter had explained that the Port
- 22 Hawkesbury pension liability cannot be transferred
- 23 to the taxpayers and the province never took on
- 24 any liability or topped up the pensions.
- 25 That is Exhibit R 364.

- 1 Now, the legislation that had
- 2. been proposed was in order to help the workers and
- 3 pensioners avoid an immediate windup hit of up to
- 4 30 percent or more of their pensions.
- 5 So workers at the mill, they
- 6 had -- and that's R-466.
- 7 So the workers at the mill had
- negotiated a new contract with PWCC. 8 There were
- 9 obviously substantial job cuts. And the idea was
- 10 that instead of having the workers suffer the
- 11 impact of a new contract, the government just
- 12 simply extended the time for the windup of the
- 13 plan. So, as Canada has always said, there's no
- 14 benefit to the mill. It was something that was
- 15 for the workers specifically.
- 16 And I want to contrast that,
- 17 again, and I can refer to -- it's back to Exhibit
- 18 R-155 that in contrast to Port Hawkesbury where
- 19 the province did not take on the pension
- liabilities of the mill, that's exactly what 20
- 21 Resolute -- that's exactly what the government did
- 22 for Bowater Mersey's mill.
- So it's kind of paradoxical 23
- 24 to, again, complain about pensions at Port
- 25 Hawkesbury when it was the government that took

October 19, 2021

- 1 over of pension liability at Bowater
- 2 Mersey.
- I am going to talk about
- 4 biomass. I know they didn't talk about it too
- 5 much today but it is something that I feel I have
- 6 to kind of respond because of what was said
- 7 yesterday.
- 8 And, again, this was all
- 9 explained by Mr. Coolican at the hearing and in
- 10 his witness statement. The draft regulations
- 11 regarding biomass were done in 2011. That is
- 12 before NewPage went into creditor protection
- 13 proceedings and before there was ever a bid and
- 14 before PWCC ever entered the picture.
- So, in 2011, the government
- 16 had already designated the biomass plant as must
- 17 run because it advanced Nova Scotia's renewable
- 18 energy policy. So just in terms of timing, it
- 19 cannot possibly be that this regulation was to
- 20 help PWCC turn Port Hawkesbury into the lowest
- 21 cost mill in North America because the regulation
- 22 was devised in 2011.
- I am going to pull up Slide
- 24 15. This, again, goes back to the testimony of
- 25 Mr. Coolican. And, you know, I won't go through

- 1 it too much because I think I can just explain
- 2 exactly what Mr. Coolican was saying. I can
- 3 paraphrase it.
- 4 What he was saying is that
- 5 it's common knowledge that renewable, renewable
- 6 electricity is always more expensive than
- 7 alternatives like oil and gas, so with the
- 8 transition to renewable energy, which really
- 9 started in 2007, it was clear that regulations had
- 10 to be put in place by the government to require
- 11 certain levels of renewable energy and, ipso
- 12 facto, those regulations would necessarily create
- 13 additional costs for ratepayers.
- John, you can put the slide
- 15 down.
- 16 So as I said before, that
- 17 was -- that had been envisioned since 2007.
- So, again, this was not
- 19 something that had been devised to make PWCC and
- 20 Port Hawkesbury the lowest-cost producer in North
- 21 America. This was all part of a regulatory plan
- 22 that had been there for quite some time to be able
- 23 to make sure that the biomass plant was designated
- 24 as must run in order to fulfil renewable energy
- 25 targets.

- 1 Slide 16, please.
- 2 So, again, when -- and this is
- 3 important when we get to the measures because I
- 4 have got the list of measures that Resolute came
- 5 up with, so, and we are going to go through them
- 6 so what I am saying to you now is important for
- 7 later.
- 8 If what Resolute is talking
- 9 about is the amount of money that PWCC -- that
- 10 Port Hawkesbury pays for steam from the biomass
- 11 boiler, the board reviewed it. They said it's
- 12 reasonable, it's not subsidized by taxpayers.
- 13 They pay money for steam. So it's a market rate.
- 14 It's part of the deal. It was part of the load
- 15 retention rate. It's not attributable to the
- 16 Government of Nova Scotia. That was the deal that
- 17 PWCC and NSPI decided it was an amount that they
- 18 would pay for steam. So that's not a measure of
- 19 the Government of Nova Scotia nor is it a subsidy
- 20 because it's a market rate.
- 21 Next slide, please.
- Oh, yes, and this is another
- 23 really, really important point.
- 24 The government has never paid
- 25 a single penny for additional costs. That was

- 1 predicted by Mr. Coolican when he was asked by the
- 2 board. So we are not talking about a scenario
- 3 where the government suddenly took on extra costs
- 4 or started paying the mill to make up for those
- 5 costs. It never happened.
- 6 So if that's what the Claimant
- 7 is talking about when it comes to 6 to \$8 million
- 8 in savings, which I am not really sure what they
- 9 are talking about, but if that's what they are
- 10 talking about, it's made up because it never
- 11 happened and Mr. Coolican confirmed that.
- 12 Professor Lévesque, you asked
- 13 about the FULA, and it is my great regret that the
- 14 Claimants did not call Deputy Minister of Natural
- 15 Resources Julie Towers to testify at the hearing
- 16 last year because I think the Tribunal would have
- 17 been very entertained by an exceptional public
- 18 servant who would have dispelled everything that
- 19 the Claimant has said today.
- 20 The problem with the FULA is
- 21 that the Claimant said almost nothing through
- 22 almost all of its pleadings and so Canada felt
- 23 like we were, you know, trying to hit a moving
- 24 target or no target at all because they weren't
- 25 saying anything about the FULA which is, I would

- 1 assume, is why the question came up yesterday.
- I will tell the Tribunal,
- 3 since they can't hear Ms. Towers viva voce, read
- 4 paragraphs 31 to 37 of her first witness statement
- 5 and paragraphs 3 and 4 of her rejoinder. The
- 6 testimony is unchallenged.
- 7 But I will try and paraphrase
- 8 now. Because it's important, again.
- 9 As I said yesterday, the
- 10 former owners of Port Hawkesbury had been
- 11 operating on Crown land under a piece of
- 12 legislation from 1968. The statute gave the
- 13 mill's owner de facto control of government land,
- 14 and limited the government on what it could do on
- 15 its own land. That's in contrast to Bowater
- 16 Mersey that had private land. It could do what it
- 17 wanted on its own private land.
- 18 That Act, the Stora Act, which
- 19 I believe is Exhibit R-219, that had a 50-year
- 20 term that was coming up for renewal in 2019 for
- 21 another 50 years and that was stated in the Suther
- 22 affidavit at R-24 paragraph 18.
- So when Port Hawkesbury went
- 24 into creditor protection in September 2011, there
- 25 was an opportunity for the government to negotiate

- 1 a modern forest licensing arrangement with the new
- 2 owner that would be more advantageous to the
- 3 province and fulfil the province's goals and aims
- 4 when it came to its own land. And so that is why
- 5 the province required PHP to sign the FULA on
- 6 September 27th, 2012.
- 7 This is all in Ms. Tower's
- 8 testimony and it's uncontroverted. I am
- 9 paraphrasing for the Tribunal.
- 10 The point of the FULA, as
- 11 Ms. Towers explains, was to place a cap on how
- 12 much Crown timber can be used for PHP's operations
- 13 and to encourage greater use of timber from
- 14 private woodlots. So, in fact, the FULA, the FULA
- 15 was designed in order to ensure that private wood
- 16 supply rather than Crown wood supply would drive
- 17 the timber market in the province.
- So the whole point of that was
- 19 so that PHP would not actually use Crown land as
- 20 much as they used to be able to use it for mill
- 21 operations. So that's an advantage to the
- 22 province. The province now had greater control
- 23 over its own land to fulfill its Natural Resources
- 24 strategy.
- 25 So, in summary, the FULA was

- 1 not a benefit to PWCC. If anything, I am sure
- 2 PWCC would have preferred the pre-existing regime
- 3 because it was a lot more advantageous to a
- 4 private owner.
- Now, again, Resolute confuses
- 6 the FULA's stumpage fees aspect and the
- 7 silviculture payments as Ms. Towers explained and
- 8 as is in the FULA, PHP pays for all Crown stumpage
- 9 harvested at the rates prescribed in the FULA and
- 10

- So whatever they pay in
- 16 stumpage is prescribed that's set
- 17 out in the FULA.
- Now again, separately from
- 19 that, it still requires PHP to conduct
- 20 silviculture activities on Crown land for using
- 21 best practices for forest management.
- 22
- 23 that necessarily involves PHP incurring additional
- 24 expenses to do silviculture on Crown land that it
- 25 would not do in the ordinary course of business.

- 1 Now, the reimbursement is
- 2 capped at and requires detailed
- 3 reports that are audited by the government before
- 4 it's reimbursed and those fees are specified in
- 5 the FULA and Ms. Towers describes it in her
- 6 witness statement.
- 7 And, again, paragraph 3 of her
- 8 witness statement, the province compensates PHP
- 9 for taking care of Crown land.
- Now, since there's no other
- 11 evidence on the record and the explanation that
- 12 Ms. Towers gave and the summary that I just gave
- 13 summarizes this, I am not really sure where that
- 14 leaves the Claimant. I have never been sure where
- 15 that leaves the Claimant, because certainly
- 16 there's nothing wrong here. It's procurement
- 17 obviously when it comes to the silviculture
- 18 expenses, and nothing else qualifies. But even if
- 19 the Claimant could argue that it was a subsidy, I
- 20 don't know where that helps them because it ends
- 21 up being exempted in 1108(7)(a).
- 22 Not that we concede that it
- 23 is, just to point that out, but a newspaper
- 24 article that obviously had no evidentiary or
- 25 documentary analysis or anything behind it is not

- 1 evidence for the purposes of the Tribunal.
- I have gone through that and I
- 3 am going to go through now the ensemble of
- 4 measures.
- 5 Can you pull up the next
- 6 slide, John.
- 7 And shockingly, I mean, this
- 8 is something that the Claimant has now brought up
- 9 on the last day to set out its position on what
- 10 some of these are and my pen ran out of ink just
- 11 as Mr. Snarr was going through them to try and
- 12 actually finally set out what their position was,
- 13 so we will see how much overlap and agreement
- 14 there is with the Claimant and the Respondent in
- 15 this matter.
- 16 But I just want to go through
- 17 them all just to explain what it is very clearly
- 18 and then I am going to get to the legal issues and
- 19 answer the rest of the questions the Tribunal had.
- 20 So let's look at the ensemble
- 21 of measures.
- The first one, John, you can
- just go, the \$24 million forgivable loan, that
- 24 falls within 1108(7)(b).
- 25 \$40 million forgivable credit

- 1 facility, (b), again.
- 2 The productivity grant,
- 3 1108(7)(b).
- 4 \$1 million marketing grant,
- 5 1108(7)(b).
- The outreach agreement,
- 7 1108(7)(a).
- I want to just hold on one
- 9 second, John, before you get to the land purchase.
- The Claimant said this morning
- 11 that Canada says it's either procurement or a
- 12 grant. That's not quite accurate.
- The Claimant seems to have
- 14 suggested earlier in its submissions that the
- 15 outreach agreement is a grant. We just simply
- 16 said that the testimony of Ms. Towers shows
- 17 clearly that it is a procurement but even if the
- 18 Claimant was right, that it's a grant, well, then,
- 19 that doesn't help them because it falls instead of
- 20 subsection (a), it falls within subsection (b).
- 21 But the point is Canada's
- 22 submission, and it's substantiated by Ms. Tower's
- 23 witness statement, this is procurement by a party.
- The next one, please.
- 25 \$20 million land purchase,

- 1 obviously that is procurement.
- 2 Something that the Claimant
- 3 forgot to mention. It is uncontroverted that the
- 4 land purchase was for fair market value. So I
- 5 don't really understand how a fair market valued
- 6 transaction could be considered a subsidy.
- 7 Again, my pen ran out of ink
- 8 as Mr. Snarr was going through it but I believe if
- 9 they are suggesting that it was a subsidy, they
- 10 obviously didn't answer the question of how that
- 11 could be when it was a fair market value
- 12 transaction.
- 13 Electricity rate, it was a
- 14 private transaction at a market rate, not a
- 15 measure of the Government of Nova Scotia. We have
- 16 said that from the very beginning. Even if it was
- 17 a -- if the Tribunal is not with us on
- 18 attribution, our point is, well, that doesn't help
- 19 them at all anyway because it was a private
- 20 transaction at a market rate which was affirmed by
- 21 the WTO.

- Biomass plant savings were 6-
- 23 to \$8 million a year. Incorrect, private deal
- 24 market rate, not GNS measure. As I mentioned
- 25 earlier, again, we are not really sure what it is

- 1 that the Claimant is talking about because they
- 2 failed to identify an actual measure that results
- 3 in 6- to \$8 million of savings a year. Again,
- 4 that -- what they are saying doesn't really make
- 5 sense because there's no measure that actually
- 6 does that.
- 7 If what they are talking about
- 8 is how much the mill pays for steam, the board
- 9 already confirmed that it is not a subsidy, it's
- 10 not subsidized by other ratepayers and that was
- 11 the deal that two private parties negotiated.
- 12 Renewable energy regulatory
- 13 protection. As I said before, no money ever paid.
- 14 Harvesting of \$1 billion tax
- 15 losses, there's so many things wrong with the way
- 16 the Claimants have presented this. We explained
- 17 this before. That's not a measure of the
- 18 Government of Nova Scotia. It's the Income Tax
- 19 Act that gives the right with respect to tax
- 20 losses and I
- 23 so, therefore, it falls under -- that should be
- 24 (b) -- I apologize. 1108(7)(b) is the -- it's
- 25 part of the , so.

1	Yes,	so	that's	а	mistake	on
---	------	----	--------	---	---------	----

- 2 Slide 14. It should be (b) because it's
 - . Apologies for that.
- 4 Pension relief. Again, no
- 5 assumption of pension liabilities by Nova Scotia.
- 6 The FULA, the silviculture is
- 7 procurement by a party. Stumpage is
- . Debtor in possession finances hot idle and
- 9 forestry infrastructure, the Tribunal has already
- 10 ruled that outside the jurisdiction of the
- 11 Tribunal.
- 12 And the property tax relief,
- 13 well, that one would require an in-depth analysis
- 14 into a favourite provision of NAFTA Article 2103
- on taxation measures and our position is it
- 16 doesn't matter anyway because there's no -- it's
- 17 not within the same jurisdiction so it's not like
- 18 the property tax relief could have been given to
- 19 Quebec -- to Resolute's mills in Quebec because
- 20 this was a Nova Scotia property tax.
- Okay, now I want to touch on
- 22 some of the legal standards and address the
- 23 questions that the Tribunal brought up.
- One of Dean Cass's questions
- 25 was about how the Tribunal should evaluate -- and

- 1 this actually goes to something that Professor
- 2 Hanotiau had asked as well in a different context
- 3 but I think I can deal with them together.
- 4 It's what the Tribunal should
- 5 do to evaluate the quantum of support that was
- 6 given.
- 7 Well, under Article 1105, all
- 8 this Tribunal can apply is the minimum standard of
- 9 treatment of aliens under customary international
- 10 law, and that does not permit evaluating the
- 11 quantum or second guessing the decision of a
- 12 government as to whether more or less would have
- 13 been a good idea or a bad idea. That's not what
- 14 1105 permits. That's very clear from the case
- 15 law, including Eli Lilly and other cases that we
- 16 have cited.
- 17 Customary international law
- 18 does not discipline subsidies. There's no
- 19 substantial state practice or opinio juris that
- 20 would give the Tribunal any benchmark by which to
- 21 evaluate the quantum. Substantial deference has
- 22 to be given to a state to make policy decisions
- 23 and can't be second guessed by a NAFTA Chapter 11
- 24 Tribunal.
- 25 There's no proportionality

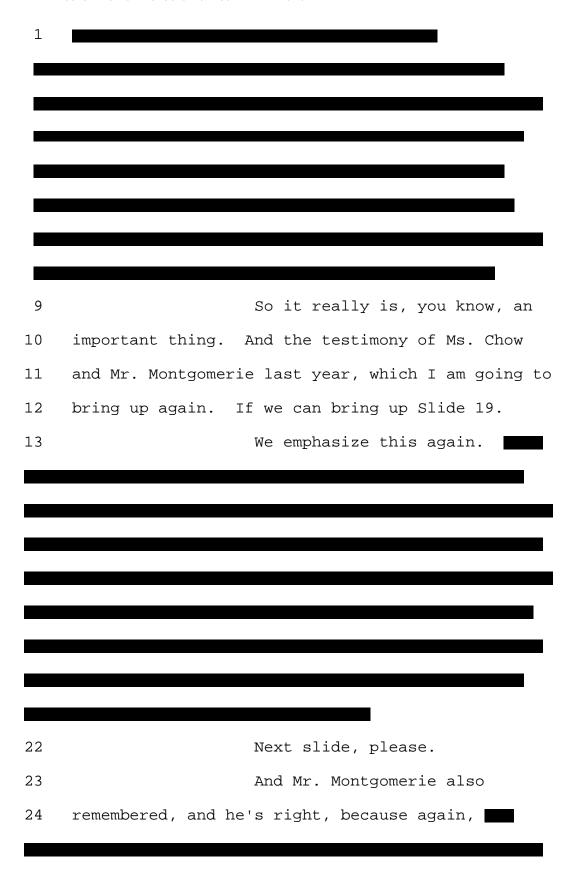

1	rule in customary international law. I think that
2	was basically conceded by the Claimant last year,
3	and there's no evidence on that as well. But it
4	seems like that's what the Claimants want the
5	Tribunal to do anyway. That is not the standard
6	to apply in either 1105 or 1102.
7	Again, I will just refer to
8	the for example, Eli Lilly and, John, if you
9	could pull up Slide 80 from our opening statement
10	yesterday. Just sort of pull out the language
11	because, again, it sort of encapsulates the idea
12	that, you know, the standard that the Tribunal
13	there was looking is that:
14	"The Tribunal need not
15	opine on whether the
16	promise doctrine is the
17	only or the best means of
18	achieving these
19	objectives. The relevant
20	point here is that in the
21	Tribunal's view, the
22	promise doctrine is
23	rationally connected to
24	these legitimate policy
25	goals."[as read]

- 1 PRESIDENT HANOTIAU: Mr. Luz,
- 2 concerning 1105, I think we have enough
- 3 information.
- 4 MR. LUZ: Thank you, yes.
- 5 Thank you, I will just move on.
- 6 DEAN CASS: Can I ask just one
- 7 quick question about the slide you had up.
- 8 With respect to property tax
- 9 relief, were you saying there was no property tax
- 10 relief for PWCC or that there couldn't be property
- 11 tax relief given to Resolute by the Government of
- 12 Nova Scotia. I wasn't sure which point your slide
- 13 was trying to make --

- MR. LUZ: I am sorry, Dean
- 15 Cass, and I realize it is probably not as clear as
- 16 it could have been on the last part.
- 17 We did deal with this in our,
- 18 I believe, in our counter-memorial that talked
- 19 about how the tax, the tax agreement with the
- 20 municipality in Port Hawkesbury was actually done
- 21 because of a change in the property, a reduction
- 22 in the size of the mill, I believe. I could -- I
- 23 could get the explanation, the citations to our
- 24 memorial, it's escaping me now. But we did
- 25 explain this. There was a property tax relief but

- 1 it actually was commensurate with the reduction of
- 2 the size of the operation of the mill because they
- 3 closed the newsprint machine.
- 4 So there was a property tax
- 5 reduction but it wasn't a benefit. It wasn't --
- 6 it was just an adjustment to account for new
- 7 circumstances.
- 8 The point of the slide really
- 9 was to say it doesn't matter because they're not
- 10 in the -- they are not in the -- the Claimant's
- 11 mills are not in that jurisdiction so it couldn't
- 12 get a property tax relief for its mills when they
- 13 are not in that jurisdiction. I think that was
- 14 really our point.
- My colleague is telling me
- 16 that it's -- we explain the tax, the property tax
- 17 issue in our counter-memorial at paragraphs 134 to
- 18 135.
- I am just going to move on
- 20 again now to talk about but just
- 21 before I do, because it again goes to the question
- 22 that both Professor Hanotiau and Dean Cass said
- 23 about the reviewing the quantum of damages. We
- 24 know that in 1105 but, and I am going to get into
- 25 this in detail.

1	The quantum of subsidies is
2	also not relevant in 1102 because the NAFTA
3	parties decided not decided to, not to discipline
4	subsidies at all, and I am going to explain very
5	clearly how that is the case. So how much
6	quantum, the form of it, and so on, the NAFTA parties
7	specifically decided to exclude that from Chapter
8	11 so it's not within the remit of the Tribunal to
9	think about.
10	Again, I will deal with that
11	later.
12	I just want to go through
	because, again, there's a lot that
14	the Claimant has said about . And I
15	have to emphasize, and this came up very clearly
16	in the hearing last year.

We have already gone through in our pleadings and, again, I don't want to ke going back to this	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	We have already gone through
in our pleadings and, again, I don't want to ke	we have already gone through
going back to this	
	going back to this

_	L And	so,	ior	the	Government	Οİ

- 2 Nova Scotia, and this is why I brought this up, is
- 3 if every time a government refused to act simply
- 4 because there might be an adverse effect on some
- 5 foreign investor or maybe a domestic investor or a
- 6 group of them, well then governments would never
- 7 be able to do anything. They would never be able
- 8 to act.

14

- 9 The only question for this
- 10 Tribunal was, was there -- was the decision
- 11 manifestly arbitrary or irrational or done in bad
- 12 faith, and if the answer to that is no, then that
- answers the questions for both 1105 and 1102,
 - - But it was rational,
- 16 reasonable, connection for what they were trying
- 17 to accomplish.
- 19 And it's quite surprising to
- 20 be able to keep, you know, and again, I don't want
- 21 to belabour the point. But, again, they put too
- 22 much stock on this. And last year, Mr. Suhonen
- 23 went through this and explained -- and I will just
- 24 bring this up very quickly.
- John, bring up Slide 22.

- 2 show how a government is obviously something --
- 3 they have to think about these things. That they are
- 4 acting in good faith. Here, they point out that
- 5
- 8 The next slide. Just
- 9 identifying the things --
- The next slide.

- 16 The idea was -- the idea of
- 17 this was that there was a huge downward shift from
- 18 coated mechanical paper to eat up the SCA+ paper
- 19 that Port Hawkesbury was producing and that
- 20 brought up prices everywhere and made the market
- 21 float for everyone because of that, and
- 22 Mr. Neufeld discussed that in great detail
- 23 yesterday.

- The next slide, please.
- 25 Again, this is the same thing.

RESTRICTED ACCESS October 19, 2021

- 1 And we can move on.
- I won't go through all those
- 3 slides. I will just mention again that one of the
- 4 other things that the Claimants didn't mention is
- 5 that the Claimants, in October 2012,

- 9 and that Dolbeau mill cannibalized its own market,
- 10 including for Laurentide. So just to mention
- 11 that.
- 12 Okay, I would like to get to
- 13 the heart of what I want to talk about today which
- 14 is 1108(7). And this, I think we can go into
- 15 public access.
- 16 --- Whereupon Restricted Transcript Ends
- 17 MS. D'AMOUR: Confirming we
- 18 are in public access.
- MR. LUZ: The Tribunal asked
- 20 the parties whether they could provide a
- 21 definition of subsidy and how the terms in Article
- 22 1108(7) should be understood.
- 23 I am sorry, am I just hearing
- 24 feedback? Sorry, Heather, is there --
- MS. D'AMOUR: Sorry, someone

- 1 was unmuted. I just muted them.
- MR. LUZ: Okay, thank you.
- Now because the term "subsidy"
- 4 is not defined in Chapter 11 or elsewhere in the
- 5 NAFTA, the Tribunal has to turn to the general
- 6 rule of interpretation under customary
- 7 international law, which is encapsulated in
- 8 Article 31.1 of the Vienna Convention on the Law
- 9 of Treaties.
- 10 The absence of a definition
- 11 suggests that the NAFTA parties did not want a
- 12 narrow technical definition of subsidy, but
- 13 rather, a broad one consistent with a general
- 14 understanding of what constitutes a subsidy.
- 15 You will recall yesterday when
- 16 I cited the Mercer and MESA cases where they were
- 17 considering the meaning of procurement. They
- 18 those cases -- in those cases, they considered the
- 19 ordinary meaning of procurement by a party to be
- 20 broad and not limited. The same reasoning applies
- 21 with respect to subparagraph (b) and all of its
- 22 terms, which are undefined.
- 23 So while Canada does not
- 24 believe that that the Tribunal needs to
- 25 definitively define the term "subsidy" here to

- 1 decide this case, but a Vienna Convention on the
- 2 Law of Treaties analysis provides sufficient
- 3 elements to conclude that the measures all fall
- 4 within the scope of 1108(7).
- Now, the Oxford Dictionary
- 6 definition, which Resolute, I believe, referred
- 7 to, the definition of subsidy is that it's a sum
- 8 of money granted by the state or a public body to
- 9 help keep an industry or business keep the price
- 10 of a commodity or service low.
- 11 There are other similarly
- 12 broad definitions that don't contain the reference
- 13 to keeping the price of a commodity or service
- 14 low, but again, the point is it's broad.
- 15 You also need to consider the
- 16 context. The context of the term "subsidy"
- 17 includes the word "grant" which suggests that the
- 18 term "subsidy" is something different or at least
- 19 is broader. And the term "grant" itself defines a
- 20 sum of money given by the state for any of various
- 21 purposes. For example, to finance education or an
- 22 authoritative bestowal or confirmative or
- 23 privileged right or possession, a gift or
- 24 assignment of money by the act of an
- 25 administrative body or a person in control of the

- 1 fund.
- 2 So the examples that follow
- 3 subsidies or grants in subparagraph (b) also
- 4 inform the meaning of those terms and indicate
- 5 that what we are talking about is government
- 6 support but the form of that subsidy or grant is
- 7 not limited to the direct transfer of funds by the
- 8 government.
- 9 So while a grant or
- 10 government-supported loan is a direct transfer of
- 11 funds by a government, a government-supported
- 12 guarantee or insurance is not but it could
- 13 constitute a subsidy.
- 14 And, of course, not every
- 15 advantageous treatment of an enterprise of a party
- 16 is a subsidy. There must be some kind of
- 17 financial contribution.
- 18 And we don't argue that the
- 19 SCM definition applies or should be read into
- 20 NAFTA Article 1108(7). The definition of subsidy
- 21 under the SCM agreement has a very specific and
- 22 particular meaning: Financial contribution by a
- 23 government which provides a benefit, and under the
- 24 SCM agreement, actions can only be taken against
- 25 subsidies that are specific.

- 1 And the definition determines
- 2 the scope of that agreement, and the application
- 3 of certain disciplines that exist in that
- 4 agreement. So we are not suggesting that it
- 5 should be imported into NAFTA Chapter 11 because
- 6 the NAFTA parties purposely left the definition
- 7 undefined, unlike the SCM agreement. So it is to
- 8 be given its ordinary meaning, broad, just like
- 9 procurement by a party.
- 10 Because the Article 1108
- 11 contains the terms "subsidies" or "grant",
- 12 including government-supported loans, guarantees
- 13 and insurance, without any other further
- 14 conditions attached, you can't use the kind of
- 15 conditions that exist in the SCM agreement here.
- 16 And, again, the context of the
- 17 treaty is important as well. As opposed to the
- 18 SCM agreement which has its own set of disciplines
- 19 and its own ideas, the purpose of 1108 is
- 20 specifically not to impose disciplines on
- 21 subsidies but to maintain the government's policy
- 22 flexibility and to carve out from the scope of
- 23 national treatment subsidy -- disciplines on
- 24 subsidies.
- 25 But if you're going to look at

- 1 the SCM agreement and talk about the direct
- 2 transfer of funds and so on, that's something that
- 3 might, might inform, you know, in a particular
- 4 program that is difficult to understand or is more
- 5 complex.
- 6 But as Canada has always
- 7 submitted along here, that's not something the
- 8 Tribunal needs to do because of the specificity of
- 9 the language in 1108(7)(b) making sure that
- 10 government-supported loans and grants are covered
- 11 specifically without needing to go into the full
- 12 details of what a subsidy might be. But the fact
- is the fact that they left it undefined suggests a
- 14 broad definition.
- Now, again, and this is where
- 16 I -- the crux of my argument for this, because
- 17 Professor Hanotiau had asked about government
- 18 subsidies and whether there should be a limit and
- 19 so on, and in the context of 1105, I think the
- 20 Tribunal already has it.
- 21 But the answer is, no. There
- 22 is not any discipline on the limit and the quantum
- 23 in NAFTA Chapter 11, the form nor the intention.
- 24 Chapter 11 does not discipline subsidies. The
- 25 parties purposely excluded subsidies from the

- 1 national treatment obligation and, of course, as
- 2 we know, there is no customary international law
- 3 that disciplines subsidies either.
- 4 And, in fact, I want to bring
- 5 up the next slide, it's the last slide in my deck,
- 6 although I have more to say but it's just the last
- 7 slide.
- 8 The NAFTA parties -- if the
- 9 Tribunal needs any more support for the idea that
- 10 the NAFTA parties really did not want anything in
- 11 1108(7)(a) and (b) to be -- sorry. 1108(7)(b).
- 12 If the Tribunal needs any
- 13 other evidence that the NAFTA parties did not want
- 14 subsidies or grants and government-supported loans
- 15 to be subject to the disciplines of NAFTA
- 16 Chapter 11, they can just look at Article 1907.
- 17 In NAFTA Chapter 19, that
- 18 shows that the NAFTA parties did not agree to
- 19 discipline subsidies. The only thing that they
- 20 did was that if domestic remedies were going to be
- 21 used, Chapter 19 of the NAFTA created a mechanism
- 22 to review the use of the domestic antiduty and
- 23 countervailing duty laws for a panel review
- 24 process.
- 25 But here is where it says:

1	"The parties further
2	agree to consult."[as
3	read]
4	Sometime in the future:
5	"The potential to develop
6	more effective rules and
7	disciplines concerning
8	the use of government
9	subsidies; and the
10	potential for reliance on
11	a substitute system of
12	rules for dealing with
13	unfair trans-border
14	pricing practices and
15	government
16	subsidization."[as read]
17	That tells you right there.
18	The NAFTA parties did not want to discipline
19	subsidies in this agreement.
20	Article 1907(2) tell this
21	Tribunal that there was no agreement by the NAFTA
22	parties to discipline subsidies and it can't be
23	done indirectly by Chapter 11.
24	DEAN CASS: Might I ask, if
25	that were a blanket exclusion of any treatment of

- 1 subsidies under any provision of NAFTA, why was
- 2 the 1108(7) exclusion not drafted broadly but only
- 3 specified certain of the headings of Chapter 11
- 4 from which subsidies would be excluded? Was there
- 5 a particular reason for that?
- 6 MR. LUZ: Sure, and this is
- 7 actually something that I, we have said a long
- 8 time ago, is that the point of 1108, reservations
- 9 and exceptions, and they carved out from not just
- 10 national treatment but most favoured nation
- 11 treatment and 1107, which senior management and
- 12 board of directors.
- 13 You can't carveout -- like
- 14 with respect to 1105, you can't carveout from
- 15 customary international law, the minimum standard
- 16 of treatment. The minimum standard of treatment
- 17 is the minimum standard. So you -- so the NAFTA
- 18 parties could not carveout subsidies from what is
- 19 the minimum standard of treatment.
- 20 Our point is simply that there
- 21 is no customary international law rules on the
- 22 discipline of subsidies. So excluding subsidies
- 23 from -- excluding subsidies from national
- 24 treatment was a deliberate choice by the NAFTA
- 25 parties to make sure that they did not need to

- 1 provide national treatment.
- And, Dean Cass, in fact, I am
- 3 grateful for your question because that leads me
- 4 directly into the answer I was going to give to
- 5 Professor Hanotiau about the object and purpose,
- 6 like why was this done.
- 7 And we can look to the MESA
- 8 award, because the MESA award really did say what
- 9 this was all about, and maybe I could just pull it
- 10 up really quickly.
- 11 What's the object and purpose
- 12 of the procurement exception but the reasoning
- 13 applies equally to subsection (a).
- John, can you pull up RL-52.
- 15 That's the MESA award.
- 16 Because we are going to go to
- 17 paragraphs 418 and 419, and then eventually to
- 18 paragraph 437.
- 19 As we said yesterday, the MESA
- 20 Tribunal was discussing procurement not a subsidy,
- 21 but Canada suggests that the same approach should
- 22 be adopted.
- John, if you could go to
- 24 paragraph 418. Actually, why don't you just go to
- 25 paragraph 419. And get the last -- just keep

- 1 going. Is this the right exhibit? Yes. Go right
- 2 down to paragraph 419. Maybe it's not pulling up.
- It's okay, John, we will just
- 4 pull it down. I am just going to quote from the
- 5 MESA. I know the Tribunal can find it.
- What the MESA Tribunal said is
- 7 that the NAFTA contracting parties sought to
- 8 protect their ability to exercise
- 9 nationality-based preferences in cases of
- 10 procurement. It's the same object and purpose
- 11 with respect to subparagraph (b). The NAFTA
- 12 parties sought to protect their ability to
- 13 exercise nationality-based preferences in cases of
- 14 subsidies or grants, including
- 15 government-supported loans.
- And, again, paragraph 437 --
- oh, yeah, that's right. Okay, thank you, John.
- Paragraph 437, if we can pull
- 19 that up quickly just so that it sticks in the
- 20 Tribunal's mind.
- 21 The object and purpose of the
- 22 carveout in Article 1108(7)(a) -- again, applies
- 23 to (b) as well -- is to permit the NAFTA
- 24 contracting parties to purchase goods or services
- 25 in a manner that yields maximum benefits for the

- 1 local economy. It would make no difference
- 2 whether at all such goods or services, once
- 3 purchased, are used solely by the government or
- 4 any other entity.
- 5 Well, if you adopt the same
- 6 reasoning with respect to (b), it makes sense. It
- 7 allows the NAFTA parties to give subsidies in a
- 8 manner that yields maximum benefits for the local
- 9 economy and it doesn't matter what it's for. That
- 10 tells you right there Canada's answer with respect
- 11 to the definition of subsidies and how we hope
- 12 this Tribunal will adopt.
- DEAN CASS: Mr. Luz, if I may,
- 14 I have a question and you may not want to answer now
- or you may want to defer.
- 16 But you were talking about
- 17 object and purpose. I noticed when you were
- 18 talking about the nature of the test under 1102,
- 19 you said that all we really needed to look at was
- 20 whether there was a rational basis for the
- 21 Government of Nova Scotia's action, not looking at
- 22 that, the sort of the second part of the Pope &
- 23 Talbot test dealing with the object and purpose of
- 24 NAFTA, and I didn't know whether that was an
- 25 intentional exclusion of that part of the test or

- 1 simply that you didn't get to it once you were are
- 2 talking about it.
- 3 And your comments here about
- 4 object and purpose simply reminded me of that.
- 5 MR. LUZ: Thank you and I will
- 6 deal with it more and certainly I was not ignoring
- 7 it.
- 8 You may recall from last year
- 9 I answered this question on the Pope & Talbot test
- 10 and so on and I will deal with it shortly.
- 11 But the point is if the object
- 12 and purpose -- it cannot possibly be that the
- 13 object and purpose in 102 of NAFTA means what the
- 14 Claimant says it is when the NAFTA -- when the
- object and purpose of 1108(7) is to remove
- 16 subsidies and procurement by a party from national
- 17 treatment. It doesn't, it doesn't make sense.
- 18 Like, that is consistent with the object and
- 19 purpose of exactly what the NAFTA parties wanted
- 20 to do.
- 21 So that Pope & Talbot test is
- 22 just inapposite. We would suggest that it doesn't
- 23 have any basis in the text of the treaty anyway.
- 24 I was just simply putting that forward as a
- 25 rebuttal point that even, even what the Claimant

- 1 says is the test, which we don't agree with in
- 2 several respects, it still passed.
- But if that's okay with you, I
- 4 will get to this a little bit in more detail
- 5 unless you would like to ask something again now.
- 6 Okay.
- 7 Just on the WTO notification.
- 8 Resolute's -- actually, I should look to make sure
- 9 I haven't -- I took so many notes.
- 10 Oh, something that I heard for
- 11 the very first time this morning was the Claimant
- 12 trying to pull in the procurement definition from
- 13 Chapter 10. Again, we are not in Chapter 10. We
- 14 are in NAFTA Chapter 11.
- That has been attempted in
- 16 other cases. MESA, is the first one that pops to
- 17 mind. So obviously the Tribunal can see how
- 18 much -- what they face because I don't think --
- 19 the fact that the Claimant has never brought this
- 20 up before and is just bringing this up now, that
- 21 whole point was rejected in MESA, Mercer, UPS so I
- 22 don't think there's much to that, to that
- 23 definition. It's not defined, it's a broad
- 24 definition. The MESA Tribunal already dealt with
- 25 that.

RESTRICTED ACCESS

October 19, 2021

- 1 Okay, I am going to get to the
- 2 WTO notification and some of the questions that
- 3 Dean Cass asked about the, are we interpreting the
- 4 agreement or applying equitable principles.
- 5 PRESIDENT HANOTIAU: I ask a
- 6 question concerning the objectives.
- 7 When one says that in any
- 8 case, you know, even if you are within 1108, you
- 9 know, you have -- you cannot undermine the
- 10 objectives of NAFTA, what are the objectives of
- 11 NAFTA? In MESA, the Tribunal said that these
- 12 objectives are to be determined chapter by
- 13 chapter.
- What's your position on this?
- MR. LUZ: I am agreeing with
- 16 the MESA Tribunal. It is chapter by chapter. You
- 17 can't look at them import rights and obligations
- 18 from other chapters unless the -- unless NAFTA
- 19 Chapter 11 allows it.
- 20 So if the object and -- if
- 21 NAFTA Chapter 11 intentionally and explicitly
- 22 carved out subsidies from the national treatment
- 23 discipline, that is the object and purpose of
- 24 NAFTA Chapter 11, the NAFTA parties decided that
- 25 was not going be the subject of an ISDS claim, so

- 1 I would suggest that that's the -- and
- 2 furthermore, it's the purpose of each provision.
- 3 What is the object and purpose of each provision?
- 4 That's how the Vienna Convention analysis is. And
- 5 the object and purpose of that provision is to
- 6 make sure the NAFTA parties are not disciplined by
- 7 Chapter 11 Tribunals when it comes to procurement
- 8 or subsidies.
- 9 I do want to get through this
- 10 quickly because Resolute's response to 1108(7) is
- 11 not that the measures were not actually subsidies.
- 12 They keep talking about how the government heaped
- 13 largesse on PHP, but they ask that the Tribunal
- 14 disregard 1108(7). And I think what we heard this
- 15 morning is, really, that is what the Claimant is
- 16 asking, is they are asking for the Tribunal to
- 17 rely on some general -- I am not even sure. What
- 18 it sounds like is ex aequo et bono is what they
- 19 are asking the Tribunal on how to disregard this
- 20 because Resolute's trying to turn this WTO
- 21 notification into something that it was never
- 22 intended to be.

- The notification is allowing
- 24 for transparency and discussion as between WTO
- 25 members. They were not meant to be determinative

- 1 as to whether certain measures are subsidies or
- 2 not. Article 25 of the SCM agreement makes that
- 3 clear.
- 4 And if it's not the case under
- 5 the WTO, all the more reason that it cannot be the
- 6 case under NAFTA.
- 7 And Professor Hanotiau, I
- 8 think, brought this up in the question to the
- 9 Claimant is that it is incumbent on this Tribunal
- 10 to make its own determination as to whether the
- 11 national treatment obligation applies to the
- 12 measure by considering whether or not they fall
- within the scope of the carveout in 1108(7).
- 14 And the question about
- 15 equitable principles and so on, I -- I have to
- 16 take a bit of umbrage with what the Claimant had
- 17 been talking about.
- 18 The question was is it open to
- 19 you to disregard an explicit part of the NAFTA
- 20 treaty? It is not open to this Tribunal to
- 21 disregard 1108(7).
- 22 And Mr. Valasek resurrected
- 23 these equitable principles that came about earlier
- 24 on in their pleadings in what is inappropriate
- 25 given what the Claimant has done in this

- 1 circumstance.
- What the Claimant is asking
- 3 the Tribunal to do is just to disregard based on,
- 4 again, I am not really sure on what legal
- 5 principle. It's certainly not estoppel because it
- 6 doesn't fulfil any of the criteria of estoppel.
- 7 It certainly doesn't include just good faith
- 8 because good faith does not exist without -- in
- 9 the ether. It must be in conjunction with an
- 10 obligation.

- 11 But if the Claimant is trying
- 12 to complain about and transform a nil notification
- 13 into some kind of contrary statement or denial and
- 14 so on, what about the Claimant saying now that
- 15 Port Hawkesbury's electricity rate was against the
- 16 public interest and inappropriate? When, in 2011,
- 17 it was Bowater Mersey that publicly testified that
- 18 keeping both of those mills was in the public
- 19 interest. And saying that load retention rates
- 20 were common in North America. That's the
- 21 Claimant's words in 2011 and they are not to be
- 22 held to that account of consistency.
- 23 And what about the fact that
- 24 they hid from the Tribunal's knowledge until
- 25 Canada brought it up that they accepted a

- 1 sistance package with a potential
- 2 for another That's good for
- and the Claimant but not good for Port
- 4 Hawkesbury.
- 5 I would suggest that the
- 6 Tribunal, if they are going to even think about
- 7 what the Claimant is saying on that respect,
- 8 which, of course, they can't and would be outside
- 9 the Tribunal's jurisdiction to do that, but if
- 10 they are going to hold Canada to that kind of
- 11 standard, then the Claimant should be held to its
- 12 own standard.
- I'd like to get -- I am sorry,
- 14 go ahead, Dean Cass.
- 15 DEAN CASS: Before you leave
- 16 the point about reporting subsidies to the WTO,
- 17 you cited, if I understood you correctly, the
- 18 provision in the SCM agreement that says a report
- 19 of something to the WTO isn't dispositive of
- 20 something actually being a subsidy so Canada, in
- 21 this case, could have reported the GNS measures to
- 22 the WTO as possible subsidies without that being a
- 23 conclusive statement that they violate the subsidy
- 24 agreement in any way.
- 25 Doesn't that make it even

1 easier to report measures as potential subsidies

- 2 rather than saying that there are no subsidies?
- 3 Doesn't that make the point about Canada's denial
- 4 of subsidies even stronger?
- 5 MR. LUZ: We dealt with this
- 6 in our pleadings and a little bit last year.
- 7 The point is that "nil" is not
- 8 a denial of a subsidy. It's a complex procedure
- 9 for a federal state to gather information from
- 10 provinces and so on, and no one is saying that the
- 11 reporting mechanism of the WTO is perfect by
- 12 Canada or any other state.
- The point is that as soon as
- 14 the -- as soon as the United States and the
- 15 European Union brought this up with Canada, Canada
- 16 disclosed everything, and that was evident from
- 17 those documents that we have looked at before. We
- 18 have described it exactly as they were.
- 19 So the constructive
- 20 notification of the subsidies actually occurred.
- 21 And, again, it's not relevant
- 22 for a NAFTA Chapter 11 Tribunal. We've gone
- 23 through this before. This Tribunal is applying
- 24 1108(7), and that's what it's bound to apply and
- 25 if there was any kind of requirement in the NAFTA

- 1 that would enable the Tribunal to disregard
- 2 1108(7), well, that's one thing. But there isn't.
- 3 DEAN CASS: Thank you.
- 4 MR. LUZ: Thank you.
- I know we have been going for
- 6 quite a while and this is what happens when we
- 7 don't have time limits.
- 8 Would the Tribunal like a
- 9 quick break and I will deal with 1102 as
- 10 succinctly as I can and then leave some time for
- 11 my colleague Mr. Neufeld to go ahead? Or I can go
- 12 ahead. It's for the Tribunal. I am in your
- 13 hands.
- 14 PRESIDENT HANOTIAU: I don't
- 15 need a break but, Ron?
- 16 DEAN CASS: I am at your
- 17 disposal, Mr. President.
- 18 MR. LUZ: Okay, I think what I
- 19 will do is I will just quickly go through -- oh,
- 20 Professor Lévesque?
- 21 PROFESSOR LÉVESQUE: No, I am
- 22 fine too. Thank you.
- MR. LUZ: Okay, thank you.
- 24 So I will just go through 1102
- 25 as quickly as I can, cognizant of the time and

- 1 cognizant of the many disagreements that we may
- 2 have but I think we can boil them down and the
- 3 Tribunal will know how Canada has argued this
- 4 before despite the arguments put forward by my
- 5 friend Mr. Valasek this morning.
- 6 With respect to what
- 7 Mr. Valasek was saying with respect to the
- 8 Tribunal's decision on jurisdiction, let me put it
- 9 this way. Our point was not that the Tribunal had
- 10 already made a determination in like
- 11 circumstances.
- 12 Our point was that the
- 13 Tribunal had already made some observations on how
- 14 1102 should be seen. And our point was that the
- 15 Claimants haven't been able to fit their case into
- 16 those observations. The first observation is that
- 17 you don't need uniform treatment amongst the
- 18 provinces.
- 19 So the Claimants haven't tried
- 20 to modify their case to fit that. But this is
- 21 essentially what they are asking for because
- 22 either -- they want uniform treatment. They want
- 23 everything that PHP got or PHP to get nothing,
- 24 which goes against the logic of what the Tribunal
- 25 had already said.

- 1 So we are not saying that that
- 2 was a determinative finding on like circumstances.
- 3 Paragraph 291 of the decision said that the
- 4 Tribunal was not making a decision on in like
- 5 circumstances so there's no dispute there.
- 6 Secondly, the Tribunal already
- 7 said that you have to be within the same
- 8 regulatory space as the Merrill & Ring Tribunal
- 9 said. I've already said, and it was picked up by
- 10 the Tribunal several times, including this
- 11 morning, is that the Claimant hasn't even tried to
- 12 explain how that applies with respect to so many
- 13 of the measures. So it didn't adjust its case to
- 14 account for what the Tribunal had already told
- 15 them.
- 16 And then of course, yes, there
- 17 were other scenarios that the Tribunal tried to
- 18 elucidate. Not an exhaustive list, but the fact
- 19 is the Tribunal was signalling to the Claimant,
- 20 you better prove one of these two, otherwise, you
- 21 are going to have to come up with some other kind
- 22 of scenario to even be in the realm of an in like
- 23 circumstances test.
- 24 They couldn't do the first
- 25 part because Nova Scotia was not trying to keep

- 1 Resolute out of Nova Scotia. They wanted them in
- 2 Nova Scotia, or at least to bid on the mill. And
- 3 I believe the Claimant already conceded yesterday
- 4 explicitly, although it's been done before, but
- 5 they are not alleging a Methanex-type of target, I
- 6 don't think they are alleging anything.
- 7 In fact, what they are
- 8 alleging, and I heard this morning is not even
- 9 deferential treatment. They are complaining -- I
- 10 believe Mr. Valasek said this, and I wish I had
- 11 the transcript in front of me, but essentially
- 12 what he is saying is we are not complaining about
- 13 the deferential treatment. We are complaining
- 14 about the anticompetitive effects.
- So what does that mean? This
- is not a national treatment claim anymore?
- 17 Suddenly it's an anticompetition claim? Well, as
- 18 the UPS Tribunal says, there is no anticompetition
- 19 in 1105 and if's not a national treatment claim, I
- 20 really don't know what this claim is anymore.
- 21 Now, as the Tribunal said in
- 22 paragraph 291 on the decision of jurisdiction,
- 23 those were just on admissibility questions, there
- 24 was no determination as to whether or not it was
- 25 in like circumstances. That was still a test that

- 1 needed to be applied in the merits, which is why
- 2 we are here now.
- Now, on nationality-based
- 4 discrimination, we have already put that up, the
- 5 Mercer decision, another decision that the
- 6 Claimant just wants to disregard.
- 7 The Claimant's approach would
- 8 mean that any time a foreign investor affected
- 9 just happens to get less favourable treatment than
- 10 one other domestic investor, there is a
- 11 presumption of a national treatment violation.
- 12 That's the test they are proposing for you.
- But that's not the test. And,
- 14 again, what they're making very clear is that they
- 15 want national treatment to be some kind of an
- 16 anticompetitive discipline and/or for protection
- 17 of the negative impact -- any negative, any
- 18 possible negative impact on a foreign investor,
- 19 and that's not what it is.

- 20 We have always been very
- 21 clear, we know what the UPS test is. Treatment,
- 22 treatment in like circumstances, and more -- the
- 23 treatment is less favourable. You have to pass
- 24 all of those and, as the UPS majority said, is
- 25 that that is the burden for the Claimant. It

- 1 never shifts to the Respondent.
- 2 But I want to bring up that
- 3 decision, CL-113. John, hopefully, you're still
- 4 listening.
- 5 Because the Claimant continues
- 6 to disparage the idea of nationality-based
- 7 discrimination as not being relevant here at all,
- 8 but I want to point the Tribunal to paragraph 177
- 9 of the UPS award. It's paragraph 177, John.
- 10 So after having gone through
- 11 the like circumstances test and determining that
- 12 the Claimant and Canada Post were not in like
- 13 circumstances -- yeah, right there, that's great.
- 14 Paragraph 177. You can get part of the -- you can
- 15 get 176 as well because it provides the context
- 16 right above was when the Tribunal decided they
- 17 were not in like circumstances.
- 18 And that first sentence,
- 19 because they were not in like circumstances, but
- 20 the Tribunal felt it important to note that the
- 21 fact also illustrates that the rationale for
- 22 providing distribution assistance through Canada
- 23 Post does not comprise any nationality-based
- 24 discrimination.
- 25 And they go on to be able to

- 1 say that other Canadian courier companies were
- 2 equally affected and treated in an identical manner.
- 3 That obviously shows that nationality-based
- 4 discrimination was something that was important to
- 5 that Tribunal as well.
- 6 You can take down the slide.
- 7 Thank you, John.
- I am just going to end on
- 9 this.
- 10 When the Claimant goes through
- 11 their long list, the one that sticks out -- and
- 12 just given time, I am not going to go through all
- 13 of them. But the one that sticks out are the
- 14 middle categories: The policy, justification and
- 15 implementation and that's where their entire case
- 16 falls apart.
- 17 I have already talked about
- 18 treatment. But the in like circumstances aspect,
- 19 those three categories, policy, jurisdiction and
- 20 implementation, the Claimants have created a
- 21 narrative that simply does not comport with the
- 22 reality.

- 23 Canada has given a long list
- 24 of all of the reasons why the in like
- 25 circumstances test is not achieved. I don't have

- 1 anything more to say about that because I think
- 2 the Tribunal has heard enough.
- I would just take note, again,
- 4 that the Claimant did not respond at all to the
- 5 more favourable -- the less favourable treatment
- 6 aspect of the test, which Canada has emphasized.
- 7 They didn't address it as with respect to
- 8 electricity or any of the other measures.
- 9 So I think we will just leave
- 10 it at that and unless the Tribunal has any other
- 11 questions, I think I will just leave it to my
- 12 colleague Mr. Neufeld.
- Perhaps a little break would
- 14 be a good time.
- 15 PRESIDENT HANOTIAU: Let's say
- 16 ten minutes.
- MR. LUZ: Okay, thank you.
- 18 --- Upon recess at 1:20 p.m.
- 19 --- Upon resuming at 1:32 p.m.
- 20 SUBMISSIONS BY MR. NEUFELD:
- 21 MR. NEUFELD: I am starting
- 22 and if the Tribunal has no questions, then we can
- 23 move to public and I will signal when we should cut
- 24 the public feed.

25 Thank you, members of the

- 1 Tribunal, and thank you for your questions. I
- 2 will have about no more than 30 minutes for sure
- 3 depending on if you have follow-on questions for
- 4 me but I don't have much today and I really tried
- 5 to focus on the two questions that you posed to us
- 6 yesterday which were damages, damages related.
- 7 The first question, of course,
- 8 was Dean Cass's question when you asked if the
- 9 Tribunal finds that there are measures that are
- 10 excluded from the application of Article 1102 by
- 11 being in a, through 1108(7), what should we do with
- 12 respect to any decision on damages and causation?
- 13 That was the question, at least that's what I recorded
- 14 yesterday. So if it wasn't, please correct me now
- 15 because I have prepared all my remarks based on
- 16 that question.
- 17 DEAN CASS: I think it's if
- 18 there are some that are still left in after others
- 19 are excluded, what do you do.
- MR. NEUFELD: Right, well,
- 21 that sounds good to me because that's exactly what
- 22 I understood.
- 23 And I hope that, I hope that
- 24 Canada's position on this is already clear. I
- 25 don't need to say too much on it. Our submission

- 1 is already available to you in our
- 2 counter-memorial at paragraphs 373 to 376. I also
- 3 spent some time on this at our other hearing in
- 4 2020, time that was cut short and I didn't get
- 5 much time so I do appreciate having a little bit
- of an opportunity now to sum up Canada's position.
- 7 In sum, the case that the
- 8 Claimant brought was on, was on a package, on an
- 9 ensemble of measures and, on top of that, its
- 10 cause in fact theory, and I use that because I am
- 11 constantly distinguishing cause in fact. It's
- 12 the only thing they run from proximate cause
- 13 which they don't ever address.
- But the cause in fact theory,
- 15 you will find that in Dr. Kaplan's statements in
- 16 his first, his first expert report at paragraph 18
- 17 and again at paragraph 50, where he states it's
- 18 clear that PHP's re-entry depended on the entire
- 19 benefits package. His opinion is based on the
- 20 entire benefits package being given, so
- 21 \$124.5 million is what he tabulates that to be.
- 22 And then the words of the
- 23 Claimant at paragraph 308 of its memorial couldn't
- 24 be clearer. The Claimant argues that but for the
- 25 measures taken together, PHP would never have

- 1 re-entered the market and Resolute would not have
- 2 been damaged. That's the Claimant's words. Not
- 3 Canada's words. It was the Claimant's words at
- 4 308 in its memorial.
- 5 So the only possibility, the
- 6 only possibility is that if one of those measures
- 7 doesn't constitute a breach, because it's
- 8 procurement of subsidy, doesn't constitute a
- 9 breach of 1102, then the case that the Claimant
- 10 brought fails on its own premise. There's no
- 11 viable theory of causation that would allow
- 12 reparation for a non-breach.
- 13 Since the Claimant hasn't
- 14 provided an alternative argument that would allow
- 15 the Tribunal to consider a smaller package, the
- 16 Tribunal has no choice but to award no damages for
- 17 lack of causation coupled with the Claimant's
- 18 decision not to quantify a breach caused by
- 19 individual elements or some other, some other
- 20 package, some other elements.
- 21 Mr. Feldman's request this
- 22 morning to the Tribunal that it come up with its
- 23 own amount for damages, we have to caution this is
- 24 nothing but a plea for the Tribunal to act ex
- 25 aequo et bono. If Claimant simply hasn't made its

- 2 for it.
- 3 Mr. Feldman this morning also
- 4 pointed to, and again, pointed to Mr. Steger's
- 5 price bucket. He points to it to show causation.
- This is something I addressed
- 7 yesterday. He says -- so he says, Mr. Feldman
- 8 says this about Peter Steger. He says he
- 9 acknowledges that PHP's reopening caused prices to
- 10 fall. Well, that's not true. I said that
- 11 yesterday and it's unfortunate but I am going to
- 12 have to say it again today. Mr. Steger's opinion
- is on quantum. It in no way addresses proximate
- 14 cause of any harm to Resolute.
- Look at Steger 1. Here is his
- 16 opinion where this price bucket is found. And in
- 17 paragraph 84 of his statement, he says:
- 18 "I have been asked to
- 19 quantify the price
- 20 erosion using the
- 21 assumption provided by
- 22 Canada that the entire
- 23 benefits package caused
- 24 the breach and was the
- 25 sole reason PHP

1	re-entered the SC paper
2	market."[as read]
3	Canada instructed Mr. Steger
4	to assume that the breach occurred. We instructed
5	him to assume that the breach caused some damage.
6	And then we asked him if that's the case, please
7	tabulate it for us. It's in that context that he
8	is measuring price erosion.
9	And what did Mr. Steger do?
10	Well, he looked at all of the contemporaneous
11	commentary, the market study, the all the you
12	know, the reports from all the paper watchers and
13	he concluded that there was a market reaction and
14	it was based on expectations of what would happen
15	when PHP re-entered. Those expectations were not
16	unlike RISI's,
18	And note that, in this regard,

And note that, in this regard,

paper sales are locked in for a long period. They

usually have six month -- they typically have six

month contracts. Sales locked in advance of PHP's

re-entry would have been locked in at a price

based on that expectation of what might happen

when PHP re-entered the market.

But as we have learned,

25

- 1 expectations don't always bear out.
- 2 It wasn't for no reason that
- 3 prices bounced right back up six months later.
- 4 After sales contracts had expired, the market
- 5 reset. Replacing the expectations with the real
- 6 world.
- 7 The long list of industry
- 8 commentary that Mr. Steger cites to shows what
- 9 that market expectation was and it shows that that
- 10 expectation was incorrect and that, in fact, PHP's
- 11 supply was quickly absorbed by coated mechanical
- 12 paper and by imports.
- 13 I'd like to point to the stats
- 14 in this regard and we are going to go to Pöyry's
- 15 first report in this arbitration to do that.
- 16 So, John, if you could please
- 17 call up Figure 3.2.
- 18 Mr. Feldman says that imports
- 19 are steady. That's what he said this morning.
- 20 Imports are steady, don't worry about them. Well,
- 21 let's have a look, let's look at the numbers here.
- The Claimant hasn't filed any
- 23 numbers but you will find them in Steger 1 and it
- 24 is Schedule 10. You will find them in the Pöyry
- 25 report too.

RESTRICTED ACCESS October 19, 2021

- 1 And this graph shows you a
- 2 number of important things, but focussing first on
- 3 imports, that's the light -- sorry, the darker
- 4 green -- no, I am getting mixed up myself now.
- John, do you have -- yeah,
- 6 it's 3.2, did I want 3.3. Oh, thanks, John. He
- 7 is showing me where they are.
- 8 It is the light green and dark
- 9 green figures. So you see almost no dark green at
- 10 all. That's what had me stumped because there are
- 11 no imports, there are barely any imports of SNC
- 12 and SCB, the stuff that Resolute largely produces.
- 13 You do see an awful lot of
- 14 light green, though. You see almost 25 percent in
- 15 some years. It's a big chunk of the market. And
- 16 what you see there from -- yeah, come back to
- 17 that, yeah, thanks.
- 18 From 2009 to 2011 is that when
- 19 things are pretty flat, imports are pretty flat,
- 20 they have gone up a little bit. But if you look
- 21 specifically at 2010, there's a jump from 277,000
- 22 to 380 -- sorry, metric tonnes. 277 metric tonnes
- 23 to 380, that's over 100 -- that's a jump of over
- 24 100. That is not insignificant in a market where,
- 25 you know, like just compare to Kénogami's output

- 1 alone. Kénogami is at 133. And here we are
- 2 talking about a jump of 100.
- Now let's look also just to
- 4 the general trend on SC -- you see from the
- 5 beginning to the end, there is a secular decline.
- 6 Nobody disagrees with that. You have numbers that
- 7 are generally coming down, but it doesn't come
- 8 down every year. In 2007 -- 2006, it goes up,
- 9 2007, it goes up. But it also goes up in 2013
- 10 and, of course, that's where the facts of this
- 11 case lie.
- So I referred to it yesterday.
- 13 So from 2011 to 2012, you have this precipitous
- 14 fall and so Port Hawkesbury's idled, it's not
- 15 producing paper, selling paper, and suddenly,
- 16 demand for SC paper plummets by, you know, 440.
- 17 And the year after, in 2013,
- on PHP's back in the market, it jumps back up
- 19 again. So this massive spike in 2013.
- Now, the point I was trying to
- 21 make yesterday is what would have happened if PHP
- 22 had not have come back on stream?
- You know, PHP, again, it's
- 24 making the SCA+ paper, right, the high grade
- 25 paper. What would have happened if it hadn't come

- 1 back in 2013? Would you have experienced the same
- 2 spike in volumes that you have there? Who would
- 3 have supplied them? Or would they have just,
- 4 would they have just stayed with coated
- 5 mechanical? Because that's what we are saying
- 6 absorbed all that spike.
- 7 The new demand that you see in
- 8 2013, it replaces coated mechanical paper and from
- 9 a causation perspective, if your job is to put
- 10 Resolute back in the situation it would have been,
- 11 then we submit that either the new demand for SC
- 12 paper would not have shot back up at all, you
- 13 wouldn't have the same spike, or imports would
- 14 have taken up that space. And, you know,
- 15 Dr. Hausman, in his testimony, acknowledged that.
- 16 We know all this because,
- 17 while PHP was able to displace coated mechanical
- 18 production with its high grade SCA+ paper. Other
- 19 producers, like Resolute, are not. They can't
- 20 replace it. Resolute just doesn't make good
- 21 enough paper.
- 22 So this is, in our submission,
- 23 what would have happened in the but-for world.
- 24 The Claimant misunderstands our argument entirely.
- 25 We have never said that price erosion was caused

- 1 by coated mechanical or caused by imports.
- 2 Mr. Feldman just either misunderstands or
- 3 misconstrues what we are saying.
- 4 Our position is that in the
- 5 but-for world of proximate causation, Resolute
- 6 would have been in the position with either the
- 7 demand remaining low where it was, or imports
- 8 causing the demand to shoot back up again, which
- 9 would necessarily have had an effect on the market
- 10 and would have affected the prices.
- 11 Since the Claimant's method of
- 12 assessing harm and quantifying its damages doesn't
- 13 account for these factors, it's just simply
- 14 unusable.
- John, you can take that one
- 16 down and I will turn to the second question, the
- 17 one that Professor Hanotiau raised yesterday.
- 18 The question, as I understood
- 19 it, was from the moment -- so this is -- first
- 20 citing the Claimant's statement, and then asking
- 21 for the authorities to back it up. And the
- 22 statement was from the moment you've established
- 23 sufficiently and reasonably that your losses are
- 24 due to state's breach, other possible concurrent
- 25 events that are not attributable to the state are

- 1 irrelevant and that such events do not diminish
- 2 the state's responsibility.
- 3 So that's the Claimant's
- 4 statement and you have asked for authorities on
- 5 that, of course. The Claimants have this morning
- 6 cited to CME, cited to Gavazzi.
- 7 And, again, I would like to
- 8 sum up Canada's views on this matter.
- 9 In short, we don't dispute the
- 10 general principle of concurrent causation. What
- 11 we dispute is the Claimant's application of it
- 12 here.
- You'll find our arguments in
- our rejoinder at paragraphs 225 to 229.
- So the principle of concurrent
- 16 causation holds that when there are multiple
- 17 parties that cause harm, one can't escape that
- 18 harm by pointing the finger at the other guy. You
- 19 know, in the CME situation, the issue is whether
- 20 the state could escape responsibility for the
- 21 destruction of the investment by pointing the
- 22 finger at Dr. Zelezny rather than to its own media
- 23 counsel.
- 24 Tehran hostages, we could talk
- 25 about those facts, the Corfu Channel. The concept

- 1 is well understood.
- Now, when international law
- 3 borrowed this concept from domestic law, from tort
- 4 law, really, it borrowed the concept that holds
- 5 that where joint and several liability on two or
- 6 more parties, when there is joint and several
- 7 liability on two or more parties, it's if their
- 8 negligence combines to produce the same loss. I
- 9 stress that. It's the parties' negligence that is
- 10 causing the harm, or to translate that into
- 11 international law, the parties have committed
- 12 wrongs. What is the wrong?
- When Claimant's counsel speaks
- 14 of concurrent cause, it speaks of causes of price
- 15 erosion. And the problem with that is that the
- 16 multitude of causes of price erosion are not
- 17 attached to any wrong. Prices go up, they go
- 18 down. That's what they do. Interest rates, raw
- 19 material costs. These are all things that cause
- 20 prices to go up and down. They are not wrongs.
- 21 And that's why this principle
- 22 of concurrent cause has no application with
- 23 respect to price erosion, which is the Claimant's
- 24 entire quantification analysis. Really, it's the
- 25 basis of its causation argument too.

- 1 It applies in tort law. You
- 2 apply it to multiple tortfeasors. If they, you
- 3 know, together combined to commit an assault or it
- 4 applies in insurance law when you're talking about
- 5 is the damage caused by the flood or by the fire.
- 6 But in patent litigation,
- 7 where, really, where price erosion found its home,
- 8 really, where quantification by price erosion is
- 9 so well known, concurrent cause doesn't apply to
- 10 that price erosion. That wouldn't make any sense.
- 11 To the contrary, the authorities that Canada has
- 12 submitted and that you will find again in the
- 13 paragraphs we have referenced show this.
- 14 And, in particular, I will
- 15 take you to R-474, which is a study. The study
- 16 was undertaken by PwC, and they looked at 1,751
- 17 patent decisions in the United States between the
- 18 dates of '95 and 2011.
- 19 So it doesn't have a lot to
- 20 say on price erosion because price erosion really
- 21 doesn't sort of matter in the same way that it
- 22 arguably used to.
- 23 And if you look on page 11, it
- 24 found that reasonable royalties are the
- 25 predominant measure of damages. Put that one

1	down, John, and go up oh, yeah, actually, yeah,
2	it's also in the big fat bolded summary right on
3	top, so you can just grab it from there.
4	"Reasonable royalties are
5	the predominant measure
6	of damages; price erosion
7	is rare."[as read]
8	And in the last paragraph on
9	that page, it kind of explains why:
10	"Damages awards for price
11	erosion claims have
12	become almost
13	non-existent."[as read]
14	It says:
15	"Over the last six years,
16	globalized competition,
17	turbulent economic
18	conditions and the cost
19	and complexity of price
20	erosion analyses have
21	reduced the recovery and
22	most likely the pursuit
23	of price erosion
24	claims."[as read]
25	Well, if they are rare in

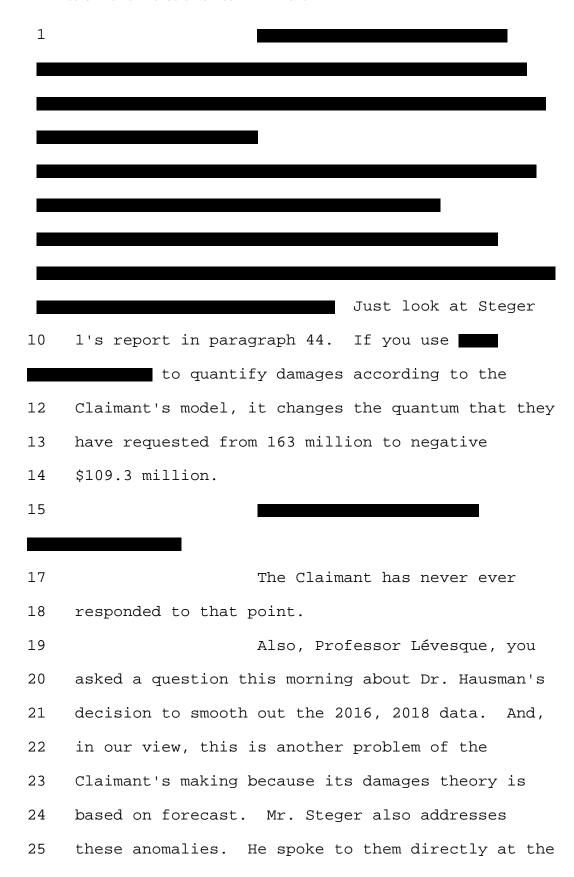

- 1 patent litigation, they are a heck of a lot rarer
- 2 in ISDS. The lone example that we came across was
- 3 Rompetrol.
- 4 And, in Rompetrol, the
- 5 Tribunal was faced with an event study. That
- 6 study measured the erosion of the company's share
- 7 price, allegedly due to the actions of the
- 8 government. The government was undertaking an
- 9 anticorruption investigation and the Claimant
- 10 argued that investigation caused its share prices
- 11 to shoot down please give us the difference
- 12 between -- and note they are actually looking at
- 13 actuals here, not at forecast prices. They are
- 14 looking at the event studies what actually
- 15 happened and then makes an assessment.
- So the Tribunal in that case
- 17 found a breach but it found that the action
- 18 breaching the BIT wasn't the criminal
- 19 investigation itself. It wasn't the
- 20 anti-corruption investigation. Rather, it was an
- 21 arrest that the government had made and an
- 22 attempted imprisonment of an individual.
- 23 And since the Claimant
- 24 proposed a method of assessing and calculating
- 25 damages, that didn't allow the Tribunal to divorce

- 1 the harm caused by the illegal act, the arrest and
- 2 near imprisonment from the legal act, the actual
- 3 investigation, the Tribunal said, well, we can't
- 4 award damages here.
- 5 The Tribunal didn't say it
- 6 didn't matter what the cause was of the harm. It
- 7 didn't say, well, you know, the price came down,
- 8 we can see the price came down. There's harm and
- 9 some of the reason of the harm is the arrest and,
- 10 you know, maybe there's a contributing cause or a
- 11 concurrent cause with the criminal investigation
- 12 but none of that matters because there's a breach
- 13 and there's harm and, therefore, we are going to
- 14 award the damages.
- That's precisely what it did
- 16 not do. To the contrary. The Tribunal had no
- 17 choice but to award no damages which is exactly
- 18 the situation that you're sitting in today.
- Now there's a common theme
- 20 that runs through those decisions that the
- 21 Claimant cites, that Canada cites, that, in fact,
- 22 it's really embedded in Article 31 of the rules of
- 23 state responsibility. In fact, the Claimant's
- 24 statement itself recognizes that -- the common
- 25 theme is that, as the Claimant itself states, is

RESTRICTED ACCESS October 19, 2021

- 1 that there has to be a breach established and
- 2 losses due to that breach. I mean, that's what
- 3 this all comes down to. What is the breach and
- 4 what are the losses attributable to that breach?
- 5 What's the wrong?
- And before I address that, I
- 7 need to apologize. I need to apologize to
- 8 Mr. Feldman, but, and to the Tribunal, but most of
- 9 all, to Dr. Hausman, because it seems like I left
- 10 the impression that I thought of him as befuddled,
- 11 which I would like to say I absolutely do not. I
- 12 clearly left the wrong impression when I was
- 13 speaking. I am the first to acknowledge
- 14 Dr. Hausman as an award winning and world renowned
- 15 econometrician.
- 16 In fact, he is the only person
- 17 I have ever met who has a theorem named after him.
- 18 He is really an incredible person and "befuddled"
- 19 is not the word I would use.
- In fact, this is precisely why
- 21 yesterday I called attention to the words that he
- 22 uses compared to the words that the Claimant uses.
- 23 You know, you have to pay close attention when
- 24 Dr. Hausman says things like inherent uncertainty
- 25 and nobody knows for sure and it's impossible to

- 1 predict the future. He is the expert. We get
- 2 that.
- 3 And then contrast the
- 4 Claimant's words. The contrast, the contrast is
- 5 evident. The Claimant says economic theory
- 6 dictates, and Dr. Hausman shows that Resolute
- 7 incurred loss. Well, Dr. Hausman wouldn't say "I
- 8 show". "I estimate". That's really the
- 9 difference.
- 10 You should also pay attention
- 11 to the fact that Dr. Hausman, a world leading
- 12 econometrician, didn't submit a regression
- 13 analysis in this case. He didn't do any
- 14 econometrics. He did in the jurisdictional phase,
- 15 but he didn't do that here.
- 16 And you should pay particular
- 17 attention to the fact that he wanted to rely on an
- 18 economic approach but the Claimant, the Claimant
- 19 didn't. They wanted to rely on this forecasting
- 20 approach instead.
- 21 I never said that Dr. Hausman
- 22 is confused. I said that the Claimant is
- 23 confused. They are confused about his reports,
- 24 and more importantly, they are confused about
- 25 forecasts. Forecasts don't show harm.

1 hearing and you will see it in his presentation at

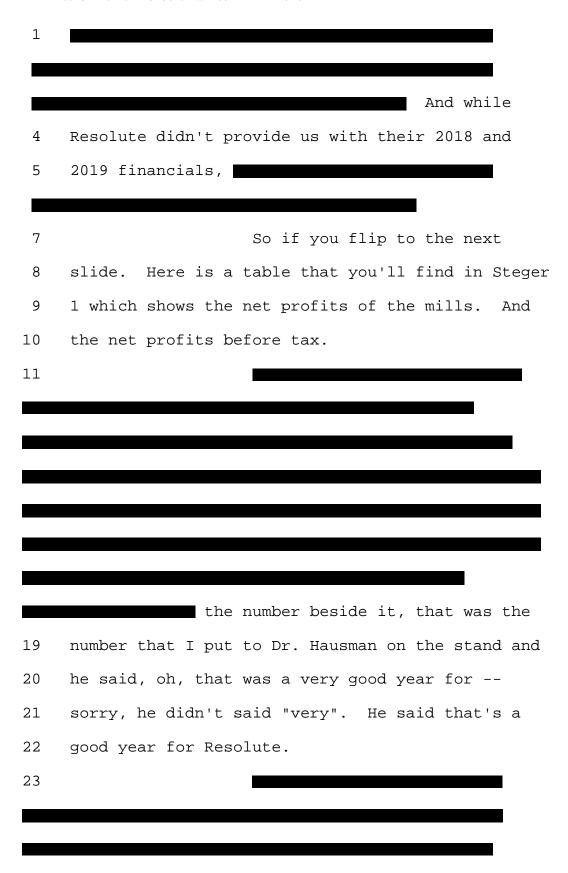

- 2 the hearing on pages 13 and 14.
- But in your exchange today,
- 4 Mr. Feldman kept repeating that the 2018, 2019
- 5 price increases, they were due to mill closures.
- 6 You know, it was because mills closed that prices
- 7 went up again. And what we know is that the only
- 8 mill closure of relevance is the 2016 closure,
- 9 well before the 2018/2019 price hike.
- But, more importantly, and,
- 11 again, it shows the difference in words used by
- 12 Dr. Hausman and words used by the Claimant.
- 13 Dr. Hausman didn't point to this mill closure
- 14 as the reason. He said the price hike was an
- 15 anomaly. It was an unexpected event. If it
- 16 related to a 2016 mill closure, it wouldn't have
- 17 been unexpected at all; would it?
- 18 The main point here is that
- 19 forecasts don't show harm and the RISI forecasts
- 20 certainly do not show harm.
- 21 Forgive me, Professor Lévesque
- 22 and Dean Cass, you have seen this before, but our
- 23 chairman hasn't so I would like to go into
- 24 confidential mode, so we just have to cut the
- 25 public feed, Heather, to share the RISI data.

1	Whereupon Confidential Transcript Commences
2	MS. D'AMOUR: Thanks,
3	confirming that the feed has been cut. The
4	restricted access people still remain in Zoom.
5	MR. NEUFELD: Thanks.
6	
18	I mean, I won't go through
19	again how he does it. He takes those, he compares
20	it to the actuals, he reduces two different kinds
21	of costs, et cetera.

1	So it's interesting because,
2	you know, all I want to do here is to say, you
3	know, nobody has got a crystal ball, nobody can
4	predict the future and RISI certainly can't
5	predict the future.
10	

1

- I mean, it's obviously not --
- 4 if we all had crystal balls like this, we could
- 5 predict prices, we would be playing the stock
- 6 market and wouldn't have to work a day in our
- 7 lives and we would all be billionaires. It's not
- 8 unusual that they can't predict prices like this.
- 9 But it precisely why it
- 10 shouldn't form the basis of a causation claim or a
- 11 quantum claim. It can't be used to show
- 12 proximate harm. And this is why you have to
- 13 look at the actual evidence, not the theories, not
- 14 the forecasts.
- So what evidence?
- 16 Well, we know what evidence
- 17 the Claimant does not want to include. It doesn't
- 18 include any proof of lost contracts, lost
- 19 shipments, predatory pricing. And, at the same
- 20 time, it includes Resolute's -- it -- sorry, at
- 21 the same time, it does include
- 24 If you go to Slide 165 now,
- 25 John, Dr. Hausman recognized that

1

3	So just what kind of harm did
4	Resolute suffer?
5	We can go back to the public
6	feed now, Heather.
7	Whereupon Confidential Transcript Ends
8	MS. D'AMOUR: Confirming we
9	are in public.
10	MR. NEUFELD: Thanks.
11	You can see that they didn't
12	suffer harm. And what you need to keep in mind
13	when looking at this evidence is that Drs. Kaplan
14	and Hausman could have used this hard financial
15	evidence. This is hard evidence to show causation
16	and quantified damages.
17	Indeed, Dr. Hausman did look
18	at financials during the jurisdictional phase when
19	he concluded that, you know, through a regression
20	study that Resolute did not yet know it had been
21	harmed. Right. He specifically looked at
22	financials in his regression study. And yet, he
23	chose to disregard that evidence now for the sake
24	of this merits case. Or maybe he didn't. Knowing
25	what we know of Dr. Hausman, maybe he actually

- 1 didn't choose to disregard it. It was the
- 2 Claimant that instructed him to do so.
- 3 Tribunal members, isn't it
- 4 obvious the Claimant didn't want to assess its
- 5 damages based on actual evidence? The Claimant
- 6 didn't want Dr. Hausman to assess damages based on
- 7 decreased shipments or on diminished profits
- 8 because there wasn't any.
- 9 So that concludes all I have
- 10 to say on damages, and unless you have questions
- 11 for me.
- 12 DEAN CASS: I do.
- MR. NEUFELD: You do, good.
- 14 DEAN CASS: Let me ask, I have
- 15 a few questions.
- 16 First, let me start off with
- 17 the question about what would happen if there are
- 18 some things that are taken out and some things
- 19 left in? You said if even one thing is taken out,
- 20 then there is no claim left.
- I would have thought it was
- 22 exactly the opposite. That if there was even
- 23 one -- let me use an example which may or may not
- 24 be apt -- but everything I know about the casino in
- 25 Monte Carlo is from the old Casino Royale movie,

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 but my understanding is if you were a gentlemen,
- 2 you needed to go in wearing a tuxedo. If you had
- 3 a tuxedo jacket, that wasn't enough. If you had a
- 4 tuxedo vest, that wasn't enough. A tuxedo pants
- 5 weren't enough. Surely you needed the entire
- 6 outfit.
- 7 Now, if you had everything
- 8 except for the black tie, you still needed someone
- 9 to give you the black tie to get in.
- 10 And I take it that
- 11 Respondent's argument about the ensemble is that
- 12 each piece was necessary to get the mill to reopen
- and so, if even one piece is problematic is there
- 14 by virtue of the breach of a NAFTA obligation,
- 15 then I think the Claimant's argument is that all
- 16 that follows, all the damage that follows by
- 17 reopening the mill would be compensable under its
- 18 claim.
- 19 So before I ask anything else,
- 20 let me just ask. Is that not your understanding
- 21 of --
- 22 MR. NEUFELD: No --
- DEAN CASS: -- the situation?
- 24 MR. NEUFELD: If that is
- 25 indeed what the Claimant's arguing, and I think

- 1 they haven't exactly been the clearest on this,
- 2 but let's assume that it's the Claimant's argument
- 3 that the package itself causes a breach, the
- 4 individual elements might not, and it's when you
- 5 assemble all these things, all these things
- 6 together.
- 7 You -- the problem you have,
- 8 Tribunal, is that you're in a situation of guilt
- 9 by association. I mean we, you know, it was
- 10 interesting as well that Professor Hanotiau asked
- 11 the question about concurrent cause. Because the,
- 12 you know, the theory applies in the same way. If
- 13 multiple causes result in a harm and those are all
- 14 wrongs, you can package this together. I get it.
- 15 But how do you package
- 16 together something that is legal with something
- 17 that illegal to say that it harmed you?
- 18 There isn't a causation theory
- 19 out there that says you can be compensated, you
- 20 can get reparation for a legal act. And 1
- 21 understand that if the illegal act is a whole big
- 22 package of things, which all acting together is
- 23 illegal, is a different measure, it's a measure
- that stands on its own, well, then, sure, what I
- 25 have to say is not applicable in the same way.

- 1 But I mean I have to, I just
- 2 have to refer to all of the things that my
- 3 colleague Mr. Luz had to say. How on earth do you
- 4 look at that package and say, and assume that it
- 5 was all rolled out in a concerted way as a big, a
- 6 big matzo ball that is meant, you know, that is
- 7 meant to -- and causes the harm.
- 8 That's a merits question
- 9 rather than a damages question.
- 10 DEAN CASS: Let me -- I hear
- 11 your answer. I am not sure about the relation of
- 12 the matzo ball to the tuxedo but let me ask a
- 13 couple of other just quick questions.
- One is, I thought I heard you
- 15 say that imports increased demand and that an
- 16 increase in imports would increase demand for
- 17 supercalendered paper.
- Did I mishear you?
- MR. NEUFELD: Say that again?
- 20 DEAN CASS: I thought I heard
- 21 you say that a rise in imports would increase
- 22 demand.
- MR. NEUFELD: Yeah, no, if I
- 24 said that, then I am mistaken. I am sorry.
- So, first of all, I am a

(416) 861-8720

- 1 lawyer, not an economist, and when I use the word
- 2 "demand", I am using the word "demand" as it
- 3 appears in the RISI reports and it is showing
- 4 volumes, it's showing what's being sold.
- 5 There is a little -- there's a
- 6 dispute -- there's a fun little retort between
- 7 Dr. Kaplan and Mr. Suhonen on this that you see.
- 8 And the word "demand", when I am using it, I am
- 9 not using it in an economic you are pushing the
- 10 scale or its changing the demand curve. That's
- 11 not what I am intending at all.
- 12 That's the first part of my
- 13 answer.

- 14 The second part is I wouldn't
- 15 have said rise in imports creates a -- what I am
- 16 saying is that, alternatively, if coated
- 17 mechanical continued to occupy the space that it
- 18 did and SC paper wasn't, wasn't suddenly taking,
- 19 substituting and taking that from coated
- 20 mechanical, two things would have happened: One
- 21 is that either coated mechanical would have
- 22 continued to sell the paper that it was and SC
- 23 paper wouldn't have been selling anything, or SC
- 24 paper imports would have substituted for coated
- 25 mechanical. SC paper imports, so that's when I

- 1 probably used the word "would have taken that
- 2 demand" and I mean that in a colloquial sense of
- 3 the word "demand", not in an economic sense.
- 4 DEAN CASS: I wasn't trying to
- 5 go to the difference between a shift in demand
- 6 curve and quantities demanded.
- 7 Okay, I will leave it at that.
- 8 Thank you.
- 9 MR. NEUFELD: Okay, thank you.
- 10 Could I add one more remark
- 11 just in answer to your first question.
- 12 This is the sort of
- 13 aggregate -- we, you know, it was a subject
- 14 addressed during our opening statements and in the
- 15 first hearing as well. I said that the Claimant
- 16 is welcome to point to this aggregate of measures.
- 17 It can also say that there is an aggregate of
- 18 measures that caused the re-entry, so let's not
- 19 think about it from the breach perspective but
- 20 from the causation perspective here.
- 21 That aggregate causes re-entry
- 22 of Port Hawkesbury in the view of the Claimant.
- 23 But at what point does taking one of those
- 24 measures out not cause the re-entry of -- I mean,
- 25 that's a question they don't answer, they don't

- 1 address, right.
- 2 So I say the whole thing falls
- 3 down when you pull one of the measures out. You
- 4 are not wearing a bow tie because, you know, was
- 5 it the bow tie that didn't get you through? Well,
- 6 I think it was. Was it the, you know, the
- 7 \$40 million loan or the \$24 million or was it the
- 8 \$1.5 million grant? Which element was enough to
- 9 get you to...
- 10 You know, and it's funny.
- 11 This case started with, well, it was everything.
- 12 It was hot idle, it was all of these measures all
- 13 packaged together. And then suddenly hot idle
- 14 falls: Well, no, it wasn't hot idle. It was just
- 15 the two loans and, you know.
- 16 I think the Claimant's answer
- 17 to that -- I don't want to speak for them, of
- 18 course -- but it's that every time a measure gets
- 19 knocked out: Well, that's still enough for Port
- 20 Hawkesbury; well, that's still enough for Port
- 21 Hawkesbury to come back on stream. And, you know,
- 22 it's a little bit too, it's a little bit too
- 23 cheeky. Like, at some point, if your job, from a
- 24 damages perspective, is to tie your loss back to
- 25 the breach, then it's not good enough to say some

- 1 jumbled mess of measures caused this without
- 2 knowing what it did.
- 3 And I don't want to land
- 4 myself into hot water. You know, Rompetrol,
- 5 again, is great on this. They say it would be
- 6 ridiculous to say you have to take one measure and
- 7 then find the harm to that and then another
- 8 measure, find the harm to that and tabulate this
- 9 all together and that's your harm. That's totally
- 10 unrealistic. We get that. That's not what I am
- 11 proposing at all.
- But the position of the
- 13 Claimant is all of this package was necessary for
- 14 Port Hawkesbury to come back on stream. If the
- 15 \$40 million is not part of that package, is it
- 16 still enough? We don't know.
- 17 Is that clear? I hope that
- 18 answers your first question.
- 19 DEAN CASS: I think you were
- 20 muted, Mr. Chairman.
- 21 MR. NEUFELD: I am so happy
- 22 you didn't say I was muted because I felt I
- 23 delivered that really well.
- 24 PRESIDENT HANOTIAU: Nothing
- 25 else? No.

- 1 MR. NEUFELD: Nothing for me.
- 2 PRESIDENT HANOTIAU: No, okay,
- 3 thank you.
- 4 MR. NEUFELD: Thank you very
- 5 much.
- 6 PRESIDENT HANOTIAU: So we are
- 7 coming at the end of this hearing. We are going
- 8 to receive the transcript of the second day
- 9 tomorrow. I suppose the parties are going to
- 10 discuss any corrections that has to be made to the
- 11 transcript, and I don't think it's necessary today
- 12 to determine the date to send us the corrections
- 13 to the transcripts. You can discuss between
- 14 yourselves and tell us when it's convenient for
- 15 you to send us these corrections.
- We will need also to receive
- 17 your statement of cost and fees. And also, you
- 18 should agree on the format and also the date at
- 19 which you want to send us these statement of fees
- 20 and costs. I don't know if you already discussed
- 21 that or if you want to discuss this coming few
- 22 days and revert to the Tribunal.
- I give you the floor, to both
- 24 of you, Mr. Feldman or Mr. Valasek first.
- 25 MR. FELDMAN: We have resolved

(416) 861-8720

PCA Case No. 2016-13 RESOLUTE FOREST PRODUCTS INC. v. GOVERNMENT OF CANADA

- 1 these matters very congenially with counsel. We
- 2 will be happy to try to do it again. So no hard
- 3 feelings from today or yesterday. We will sort
- 4 out all the communications that are necessary to
- 5 the Tribunal.
- 6 PRESIDENT HANOTIAU: Okay.
- 7 Are there any other issues to raise?
- 8 Yes, Mr. Valasek.
- 9 MR. VALASEK: I am completely
- 10 in your hands, Mr. Chairman and members of the
- 11 Tribunal. There was a question on which I
- 12 reserved which was the question relating to MESA
- 13 Power and the interpretation of the object and
- 14 purpose of the treaty. I have heard Claimant's
- 15 argument. I would have a two-minute response to
- 16 it but I understand that it's late and so I am in
- 17 your hands.
- 18 PRESIDENT HANOTIAU: I give
- 19 you two minutes.
- 20 SUBMISSIONS BY MR. VALASEK (Cont'd):
- 21 MR. VALASEK: Okay.
- So if I understood Canada's
- 23 argument correctly, it is that because Article
- 24 1108(7) is a carveout on subsidies that applies to
- 25 Article 1102, the latter provision cannot be

- 1 interpreted in light of the overall objects and
- 2 purposes of NAFTA set out in Article 102 because
- 3 Article 1108(7) essentially represents a clear
- 4 override to those objectives. Essentially what he
- 5 says is the NAFTA parties have clearly indicated
- 6 that they want to allow each other to give
- 7 national preferences and so forth.
- 8 This cannot be right. This
- 9 would mean that once the carveout has done its
- 10 work and excluded any measures to which
- 11 Article 1102 cannot properly apply, but leaves
- 12 some measures to which it does properly apply, the
- 13 carveout and whatever policy lies behind it would
- 14 continue to have an effect in relation to the
- 15 measures that it did not carve out.
- 16 The carveout in 1108 and the
- 17 principal provision in 1102 are separate
- 18 provisions and do separate work. Each must be
- 19 interpreted on its own and once 1108 has done
- 20 whatever work it can do, 1102 must be interpreted
- 21 and our argument is that that provision must be
- 22 interpreted in light of Article 102, which is the
- 23 overall purpose and objectives of the treaty. And
- 24 that's particularly true since Article 102, I have
- 25 it up on my screen, reads:

1	"The objectives of this
2	agreement as elaborated
3	more specifically through
4	its principles and rules,
5	including national
6	treatment, most favoured
7	nation treatment and
8	transparency are
9	to"[as read]
10	And then it lists the
11	objectives and the one, of course, that comes up
12	in the Pope & Talbot test is (b), to promote
13	conditions of fair competition in the free trade
14	area.
15	Mr. Luz is using whatever
16	policy might lie behind 1108 to avoid the second
17	leg of the Pope & Talbot test in an appropriate
18	way.
19	And the last point I would
20	make on this issue is that the provision that we
21	heard about today for the first time, which is
22	the I am just going to pull it up here, because
23	I didn't have it up on screen, but Article 1907(2)
24	to support their position, that refers to the
25	parties agreeing to consult on the potential to

- 1 develop more effective rules and disciplines
- 2 concerning the use of government subsidies, not
- 3 any rules and disciplines. That must mean or
- 4 suggests that NAFTA Chapter 11 can include some
- 5 discipline on measures that are related to that
- 6 subject.
- 7 I have many other points to
- 8 make to rebut some of --
- 9 PRESIDENT HANOTIAU: I am
- 10 sure, I am sure.
- 11 MR. VALASEK: But I would like
- 12 to release you from that.
- 13 PRESIDENT HANOTIAU: Okay.
- 14 Respondents?
- MR. NEUFELD: We probably also
- 16 have many, many points to make but I don't need to
- 17 make them. You have heard it. You have heard it
- 18 all. You have heard us say it, our submissions.
- 19 PRESIDENT HANOTIAU: I think
- 20 we have enough arguments on the table.
- 21 MR. NEUFELD: I am sure you
- 22 do.
- 23 PRESIDENT HANOTIAU: And I
- 24 said we have fixed deliberations on 18 and 19
- 25 November in Montreal.

- 1 MR. NEUFELD: Okay, we should
- 2 thank you, though, for all the work that you have
- 3 done and for stepping in as you have,
- 4 Mr. Chairman. We are very grateful to have the
- 5 opportunity and found that the proceeding went
- 6 very smoothly, so thank you.
- 7 PRESIDENT HANOTIAU: Yes,
- 8 well, I'd like to thank you. You know, it's a
- 9 pleasure to have so brilliant lawyers on both
- 10 sides. Makes our work even more difficult, I
- 11 think.
- 12 But it's a great pleasure for
- 13 me to share this arbitration with my colleagues
- 14 who are wonderful people.
- MR. FELDMAN: Mr. President,
- 16 if I may just, not to be left behind, and to
- 17 express regret that we have interrupted your
- 18 dinner two nights in a row and we thank all three
- 19 of you very, very much.
- 20 PRESIDENT HANOTIAU: With
- 21 great pleasure.
- Okay, I think we can end this
- 23 hearing now. Thank, of course, to Arbitration
- 24 Place and the court reporters because I think they
- 25 are, I don't know if there is one or two but they
