## ERITREA-ETHIOPIA BOUNDARY COMMISSION

## ANNEX TO THE COMMISSION'S STATEMENT OF 27 NOVEMBER 2006

## LIST OF BOUNDARY POINTS AND COORDINATES

1. The boundary points listed below, and as illustrated on the accompanying 1:25,000 maps, fall into two categories: fixed points and movable points. ${ }^{1}$
2. The fixed boundary points are located on land. Each is identified by its grid and geographical coordinates accurate to one metre and is illustrated on the maps by the conventional sign of a small square enclosing a dot. Fixed points adjacent to rivers are located a short distance from the river bank so as to avoid the effects of flooding or river movements.
3. The movable boundary points represent the turning points of the boundary which fall within rivers. As the boundary in rivers follows the middle of the main channel and may move from time to time, these turning points cannot be fixed permanently. They are marked on the illustrative maps by small circles which indicate the location of these points at the time of the aerial photography.
4. These movable points are to be found at the confluence of two rivers, or at the intersection between the middle of the main channel of the river and the extension riverwards of the straight line between the nearest fixed boundary point and the next or preceding fixed boundary point.
5. The list of coordinates is presented in eight columns.

Column 1 contains the numbers of the boundary points which are covered by each set of coordinates or are otherwise described.

Column 2 contains the numbers of the points identified in Maps 10, 11 and 12 that illustrate the Delimitation Decision of 13 April 2002. These are referred to below simply as "Points".

[^0]Columns 3 and 4 contain the Universal Transverse Mercator ("UTM") grid coordinates of each boundary point, not otherwise described, in the following projection:

| Projection: | UTM Zone 37 extended eastward |
| :--- | :--- |
| Geodetic Datum: | Eritrea Ethiopia Boundary Datum 2002 <br> $($ EEBD2002) |
| Longitude of Origin: | $39^{\circ} \mathrm{E}$ |
| Latitude of Origin: | $0^{\circ} \mathrm{N}$ |
| False Easting: | $500,000 \mathrm{~m} \mathrm{E}$ |
| False Northing: | 0 m N |
| Unit of Measurement: | Metre |

Columns 5 and 6 contain the geographical coordinates in degrees of latitude and longitude in terms of the Commission's geodetic datum, EEBD2002.

Column 7 contains occasional descriptions of the location of the particular boundary point and an indication of the course of the boundary to the next boundary point.

Column 8 contains the number of the $1: 25,000$ map sheet on which the boundary point is located.

## COMMENTS

## A. The Western Terminus

6. This Point is described in paragraph 8.1, $\mathrm{A}(1)$ of the Dispositif of the Delimitation Decision as follows: "The boundary begins at the tripoint between Eritrea, Ethiopia and the Sudan and then runs into the centre of the Setit opposite that point (Point 1)". This determination has not been questioned by either Party.
7. In investigating the matter, the Commission's experts were not able to see any previously established monument marking the tripoint between Eritrea, Ethiopia and the Sudan. In these circumstances, the Commission adheres to the description of Point 1 (designated as Point 1 in the Delimitation Decision) and which it now designates as BP1 (see Map No. 1).

## B. The Line from the Setit to the Mareb (from Point 6 to Point 9 in the Delimitation Decision)

8. The Delimitation Decision determined that a straight line runs from the Setit starting at Point 6 (the confluence of the Setit and the Tomsa) to Point 9 (the confluence of the Mareb and the Mai Ambessa). These Points are now joined by a straight line drawn between them on land. The only changes that may occur in the future are the minor ones at the northern and southern termini of that line if there are movements in the middle of the main channels of the two rivers. Point 6 is now BP2 and its fixed point on land is BP3 (see Map No. 8). Point 9 is now BP5 and its fixed point on land is BP4 (see Map No. 13).

## C. Tserona and Zalambessa

9. The Commission directed the demarcation team to take full account of the proposed boundaries in the Parties' comments on Tserona and Zalambessa. ${ }^{2}$ As similar considerations affect the demarcation line around both places, these two items are dealt with together.
[^1]
## 1. Tserona

10. The Dispositif of the Delimitation Decision, paragraph 8.1, B. (iv), provides in part that the boundary should "leave Tserona and its environs to Eritrea. The boundary runs round Tserona at a distance of approximately one kilometre from its current outer edge, in a manner to be determined more precisely during the demarcation".
11. The Commission has considered the submissions of the Parties and has noted in particular the comment by Ethiopia that the "outer edge and environs of Tserona should be determined using precisely the same principles as are used for the determination" of the outer edge and environs of Zalambessa ${ }^{3}$ (see paragraph 12 below). Eritrea expressed the same wish. ${ }^{4}$ The Commission has identified these environs by a line that leaves the Belesa B at BP8 and proceeds by a series of straight lines to BP26 where it returns to the Belesa B (see Map No. 21). BP8 is located at the intersection of the middle of the main channel of the Belesa B and the straight line extension of the line from BP10 to BP9. BP26 is located at the intersection of the middle of the main channel of the Belesa $B$ and the straight line extension of the line from BP24 to BP25. Thence, the boundary follows the Belesa B southwards to BP27 where it leaves that river to run south-westwards towards BP28 (see Map No. 22).

## 2. Zalambessa

12. The Commission invited Eritrea to comment on Ethiopia's proposed boundary for the town of Zalambessa and to submit its own proposal. Ethiopia identified a boundary which was influenced by physical obstacles to the use of certain lands around the environs of Zalambessa. Eritrea asked that whatever standard or procedures applied to Zalambessa should also be applied to Tserona. ${ }^{5}$ Eritrea also submitted that "Any

[^2]alterations should, additionally, be balanced so that gains to one party are equalled by gains to the other." ${ }^{" 6}$ There is a close similarity between the Eritrean and Ethiopian proposals for the boundary around Zalambessa except that the Ethiopian proposal also includes the plateau land to the east.
13. In demarcating the boundary around Zalambessa, the Commission has borne in mind the views of the Parties, the nature of its environs and the extent of manifest impracticability in parts of the area. The boundary therefore continues from BP41 through BP42 to BP103 where it meets the Muna/Berbero Gado at BP104 (see Map No. 23).

## D. The boundary between Points 15 and 16

14. Paragraph 8.1. B.(v) of the Dispositif provides in part that the boundary continues to the source, at Point 15, of an unnamed tributary: "From that point it crosses the watershed by a straight line to the source of a tributary of the Belesa A at Point 16...."
15. The Commission has determined that "References to the headwaters or sources of rivers or streams mean the highest point at which the flow of water can be identified or, if the stream bed has become permanently dry, then the highest point at which the stream bed can be identified". ${ }^{7}$ Points 15 and 16 are now identified as BP28 and BP29 (see Map No. 22). The boundary runs as a straight line between these two points. If either of these points is found not to lie exactly at the source of the relevant tributary, it shall nonetheless be treated as if it were the source. If necessary, this point shall be linked to the nearest position of the relevant tributary by the shortest line.
[^3]
## E. The Eritrean claim line (Points 17 to 18 of the Dispositif)

16. Paragraph 8.1. B.(v) of the Dispositif provides in part that, from Point 17, the boundary "continues up the Belesa A to follow the Eritrean claim line to Point 18 so as to leave Fort Cadorna and its environs within Eritrea. The Eritrean claim line is more precisely depicted on the $1: 100,000$ Soviet map referred to by Eritrea in its final submission on 20 December 2001. Point 18 lies 100 metres west of the centre of the road running from Adigrat to Zalambessa."
17. The Eritrean claim line is now identified as BP30 to BP41. Regarding BPs 32 and 33, if either of these points is found not to lie exactly at the source of the relevant tributary, it shall nonetheless be treated as if it were the source. If necessary, this point shall be linked to the nearest position of the relevant tributary by the shortest line.
18. In its Demarcation Instructions of 22 August 2003, the Commission instructed that pillar sites should be "located within approximately 200 metres of the coordinates extracted from the Soviet map". ${ }^{8}$ The positions of BPs $35-41$ (see Maps Nos. 22 and 23) have been determined on this basis.

## F. Boundary between Points 24 \& 25

19. See paragraph 15 above. Points 24 and 25 are now marked as the highest points at which the streambed can be identified. The boundary runs as a straight line between them. These points are now BPs 107 and 108 (see Map No. 24). If either of these points is found not to lie exactly at the source of the relevant tributary it shall nonetheless be treated as if it were the source. If necessary, this point shall be linked to the nearest position of the relevant tributary by the shortest line.
[^4]
## G. Points 29, 30 and 31

20. The Dispositif provides in Paragraph 8.1. B. (xii) that, "From Point 28, the line continues down the Muna/Endeli/Ragali to Point 29, northwest of the Salt Lake, and thence by straight lines to Points 30 and 31, at which last point this sector [i.e. the Central Sector] of the boundary terminates."
21. The Commission has found that maintenance of Point 29 as a fixed point could lead in the event of a change in the main stream of the river to depriving one or other Party of access to the river's water. The Commission has therefore decided that Point 29 must be abandoned and that, consistent with the principles enunciated in the Delimitation Decision, the course of the boundary in this area shall follow the middle of the main channel of the Ragali River until it reaches a point nearest to BP111 (Point 30) which is the point at which equal access to the river's water is no longer significant. The middle of the main channel of the Ragali is linked to BP111 by the shortest line. A straight line is then drawn south-eastwards to BP112 (Point 31).
22. BP112 is where the Ragali River reaches the Salt Lake. Because of ground conditions, it has not been possible to determine the exact location of this Point either from field inspection carried out during pillar site assessment of the Eastern Sector or from the imagery of the aerial photography. It has therefore been necessary to estimate where the Ragali River reaches the Salt Lake and to identify BP112 accordingly.

## H. The Eastern Sector

23. The Delimitation Decision described this boundary as a series of straight lines connecting Point 31 to Point 41 at the boundary with Djibouti. This line was to serve as the basis for the demarcation, leaving open the possibility at that stage of "adapting it to the nature and variation of the terrain" as contemplated in Article II of the 1908 Treaty. ${ }^{9}$ Demarcation Instructions for the identification of pillar sites in this Sector included the requirement that maintenance of an area balance between the lines

[^5]joining the Points finally chosen compared to the original delimitation line of 13 April 2002 should be in the order of three percent. These Instructions also required the determination of the mid-point between the Eritrean and Ethiopian customs posts at Bure and the reinstatement of the original pillar emplacement on Musa' ali at Point 41.
24. The Commission's field staff was able to undertake the selection of all pillar sites in the Eastern Sector in early 2003. The sites chosen were based, where possible, on the submissions of the Parties in their 24 January 2003 memoranda and were assessed according to the requirements set out by the Commission in the Demarcation Instructions of 21 March 2003. In May 2003, the Commission submitted an initial report of this work to the Parties for comment. The Parties' comments were received on 11 June 2003 and indicated acceptance of the proposals in principle. The Demarcation Team, after considering these comments, made further adjustments, and presented a final report to the Commission in August 2003. This report set out the coordinates as surveyed of all boundary positions in the Eastern Sector and achieved an almost exact area balance. The position of the mid-point between the Eritrean and Ethiopian customs posts at Bure was identified. At Musa'ali, the remains of the old monument were located and its position was fixed.
25. The boundary in the Eastern Sector is therefore now defined as passing through the boundary points from BP112 to BP146.

## I. The boundary in rivers

26. The Commission has determined in the Demarcation Directions that, "Unless the Commission should decide otherwise after receiving a request from a Party that the boundary in a river requires demarcation, the Commission considers that the identification of a river as a boundary should normally suffice without actual demarcation therein, save as regards the identification of confluences, turning points that may give rise to doubts, and headwaters or sources."10 The Demarcation Instructions provide that the river "boundary is in the middle of the main channel (the

[^6]channel of greatest volume) and will move in accordance with any change in position of the middle of the main channel., ${ }^{11}$
27. The Demarcation Instructions further provide that "islands shall fall within the territory of either Party according to their location in relation to the main channel". ${ }^{12}$ Where islands are identified by the Parties in their comments, "the demarcation team shall determine by appropriate methods the position in relation to the main channel of those islands". ${ }^{13}$ Although there were general comments from the Parties on some islands, these comments did not provide substantial or specific evidence requiring a variation from the Commission's delimitation formula for boundaries in rivers; accordingly, all islands are distributed in accordance with this formula.
